leaving for net earnings the sum of	$134,134 68

This amount is subject to a further deduction of the salaries of president, treasurer, book-keeper, office rent, and interest on funded and floating debt, viz:—

Salaries	$6,500 00	
Rent of office expenses	800 00	
Interest on funded debt	38,657 96	
Interest on floating debt, premium, exchange, etc.	19,748 00	
		65,707 06
which deducted from $134,134 68 leaves		$69,427 62

During the past year sixteen miles of track have been laid, and the graduation, bridging, trestling, etc., of that portion of the route completed, and likewise that portion of the route between where the track terminates and Garner's Station, very nearly completed in its graduation, etc.

In a few days track-laying is to be recommenced and continued without further interruption to Garner's Depot, about eleven miles from Grenada, the terminus of the road.

On this eleven miles of route, over fifty thousand dollars of work has been done in the way of graduation, bridging, etc., and we can see no reasonable impediment in the way of its being completed within the contract time, that is, the first of March, 1861.

The entire amount of estimates returned by the Chief Engineer for work done, and iron, etc., purchased during the year, aggregates $195,667 42.

These expenditures, with the heavy floating debt of the company—at its last annual meeting amounting to $319,518 06—and the amount paid for additional rolling stock, has kept the company always hard pressed for money. But owing to heavy receipts from freight and passenger service, and an unsullied credit, the progress of the work has not been sensibly retarded.

It was mentioned in the last annual report that the Company owned only $150,000 of their first mortgage bonds, and that these were deposited with certain South Carolina banks as collateral security for a loan of one hundred thousand dollars. These bonds were taken by the banks in payment of the company's indebtedness to them—they having the option, at their prevailing market rates.

There has likewise been sold, absolutely, $88,600 and engaged $50,000 of the income bonds.

The floating debt of the company has been reduced from $319,518 06 to $241,781 76. This reduction has been caused by the sale of bonds and from the receipts of the road.

The rolling stock owned by the company consists of 7 locomotives, 6 passenger cars, 1 baggage and express car, 2 mail cars, 37 box freight cars, 68 platform cars, 10 hand cars, 8 dump cars and 4 rubble cars. Four new locomotives have been ordered from the Taunton Locomotive Manufacturing Company.

The following is the statement of the financial condition of the company as given by the Treasurer—

		Dr.
Railroad and appurtenances		$1,603,427 11
Locomotives	$71,406 23	
Cars	96,796 86	
		168,203 09
General and contingent expenses		74,292 31
Interest and discount		379,787 11
Operating accounts, 1859 and 1860.		79,854 68

Ledger balances		43,223 49
		$2,329,917 76

The following is a list of the directors and officers of the company for the year 1860-'61.

Directors—F. M. White, James Elder, Barnett Graham and Samuel Mosby, Memphis, Tenn.; J. C. N. Robertson and A. N. Mackay, De Soto Co., Miss.; Edward F. McGehee, N. R. Sledge and Wm. B. Dickins, Panola Co., Miss.; Nathaniel Howard, Grenada, Miss.; Robert S. Rayburn, Yalabusha Co., Miss.

Officers—F. M. WHITE, President; C. F. VANCE, Secretary and Treasurer; N. MERIWETHER, Chief Engineer; R. HOUGH, Superintendent.

Virginia and Kentucky Railroad.

We learn from the Wheeling *Union* that work has been commenced on the Virginia and Kentucky railroad at Bristol. The road is under contract from that place to Estillville, Scott county, Va. It is said that 3,000 hands will be at work upon the road by the first of next spring.

Hawkinsville Branch Railroad.

We learn that the survey of this road will commence in a few days, and that the subscriptions are sufficient to authorize its completion. The distance to the Macon and Brunswick road is about nine miles. Arrangements have been made, by which this stock is merged with that of the other road, and payable in 1862 and 1863. The road from Macon, it is expected, will be completed to Longstreet, opposite Hawkinsville, by about the 1st of January. The laying down of the superstructure and iron is now going on rapidly.

Asphaltic Roofing Felt.

We invite attention to the Advertisement of this article, in another column. We understand that it has given entire satisfaction wherever it has been used. The proprietors, David Anderson & Sons, Belfast, Ireland, who have been so long justly celebrated for the superior quality of their Patent Felt, in 1850 appointed Messrs. Edmiston Brothers, Commission Merchants, No. 8 Bowling Green, New York, their sole agents for the United States and these gentlemen execute orders and send samples and circulars on application.

The Felt is made up in rolls like canvass 32 inches wide, 25 yards long (equal to 200 superficial feet) and weighs about 84 lbs. per roll. In its most compressed state it is about the substance of strong sole leather, *and at least four times the thickness of any other roof covering now before the public.*

While combining the advantages of a slate, metal or tin roof, it avoids their practical defects, as it does not shrink or rend with the wood work.

Owners of first class dwelling houses who have been in the habit of using tin, now prefer these felt roofs, as they neither rust like tin, nor rot like shingles.

It should be laid from gable to gable, or across from eave to eave, stretched tight and smooth, overlapping one inch at the joinings and nailed through the overlap. When the whole roof is laid it should have a coating of cement or felt varnish, which requires to be renewed every fourth or fifth year. This varnish is supplied along with the felt, or separately.

The many advantages claimed for this roofing over all others:—such as its complete imperviousness to wet and damp, its incombustibility, etc., etc., we cannot even enumerate within the limits of this notice, but they are very fully set forth in the circular which will be furnished on application by the Messrs. Edmiston, to all who may desire it.

St. Louis Railroad Iron.

A contract has been made by Col. Thos. A. Allen, Vice President of the Lexington and St. Louis Railroad Company, on behalf of that road, for the iron rails, chairs and spikes necessary for the entire length of the track. The contract we learn, is quite liberal, and mutually advantageous to the parties concerned. The rails will be manufactured at the Laclede Rolling Mill of Chouteau, Harrison & Valle, in this city, *out of Missouri iron.*

Extensive preparations are making at the mill, with the expectation that a portion of the iron will be ready early in the month of December, and the Directors of that road expect to be able to lay the rails from Farmers City to Georgetown, a distance of about eight miles, by the middle of January next. This is an important movement in the right direction, and shows that we need not go from our State for any article required for the construction of our roads. The contract involves over a quarter of a million of dollars, quite an item to be kept at home as an encouragement for manufacturers.

This announcement, we believe, will be received with favor by the citizens generally of the State, and will direct the attention of parties interested in other roads to this point, where favorable contracts can be made. An establishment for the manufacture of railroad iron involves a very heavy outlay, and we therefore trust that the business will compensate the proprietors of the mill for their efforts in stopping here the large amounts paid for rails. We learn that the contractors, John M. Wimer & Co., have a large force on the work, and it is confidently believed the whole line of sixty miles will be completed and ready for the cars within the next twelve months, thus giving to the Pacific Railroad and this city the desirable trade of the counties of Pettis, Saline, Lafayette, Ray, Carroll and Clay.—*St. Louis Republican.*

New London City Bonds.

At a city meeting in New London, on the 27th ult., a committee was authorized to lease to the railroad company till 1867, the property involved in the $100,000 mortgage, for $3,000 a year; or to sell it to them for $50,000. By this, the city proposes to compromise by assuming and paying one-half of the debt, if the road will raise the other half.

Roanoke Valley Railroad.

At the annual meeting of the stockholders of the Roanoke Valley Railroad Co., recently held at Clarksville, Va., resolutions were passed appointing a committee of five to assist in procuring from the Legislature an appropriation to the Keysville extension, requesting the directors to take steps to collect the balance due from the Board of Public Works, and giving notice to delinquent stockholders in the Keysville extension, that unless the balance due on their subscriptions be paid within thirty days, then their stock will be sold at auction to the highest bidder.

Vicksburg, Shreveport and Texas Railroad.

The annual meeting of the stockholders of this company was held at Monroe, La., the 17th ult., and the following directors were elected:

C. G. Young, John Ray, C. H. Dabbs, C. H. Morrison, F. P. Stubbs, Henry M. Bry, J. C. Cummings, James H. Stephens, D. Faulk, of Ouachita; C. A. Manlove, of Vicksburg; D. M. Pugh, of Madison; Sack P. Gee, of Morehouse; W. M. Burns, of Bossier; L. M. Nutt, of Caddo.

The board organized in the evening and re-elected the following officers; Charles G. Young, President; O. D. Stilman, Secretary; and Jos. F. McGuire, Treasurer.

Illinois River Railroad.

This road is now open for travel between Peoria and Jacksonville, and connects at the former city with the Bureau Valley Railroad to a junction with the Rock Island road, thus forming a continuous line from Jacksonville to Chicago.

Michigan Southern Railroad.

The Adrian *Expositor* says the Southern railroad has just ordered one hundred freight cars, in addition to its present large accommodations. This is rendered necessary by the rapid accumulation of grain and other freight all along the road, beyond the power of the company to move it with their present stock—a thing entirely unprecedented before.

Springfield, Mt. Vernon and Pittsburg R. R.

This road, better known as the Delaware Cut-off, is to be sold at Springfield, Ills., ont he 5th of December, at 10 o'clock, a. m., under direction of the Sheriff of Clark County.

"The terms of sale of the railroad and franchises are $25,000 cash on the day of sale: balance in ten days thereafter, either in cash or in first mortgage Western Division bonds of the Company, each bond to be taken at its pro rata share of the purchase money which it would be entitled to on confirmation of sale and final order of Court. For the personal property the terms are cash on the day of sale, or 20 per cent. cash, and balance in the first mortgage Western Division bonds of the Company."

Henderson and Nashville Railroad.

At a meeting of the Board of Directors held at Hopkinsville on the 20th ult., Col. Edward S. Cheatham, President of the Edgeville and Kentucky Railroad Co., was unanimously elected President of this company. The Nashville *Patriot* says:

From the well known energy and capacity of the new President, we anticipate a speedy completion of this long deferred enterprise.—Its importance to Nashville as a thoroughfare to St. Louis, Chicago, and the rich producing regions of the great North-west, cannot be over-rated, and the cheap and abundant supply of coal that will immediately follow when it is opened to the great Kentucky coal fields, will give our manufacturing enterprises a fresh impetus, and relieve our citizens of the heavy tax now imposed upon them whenever Cumberland river is too low to bring that indispensable article from above.

Alexandria and Lynchburg Railroad.

We learn from the Lynchburg *Republican* that the railroad bridge across James River on the line of this road, has been completed so that the cars can cross, and that the event will be celebrated by a great railroad demonstration, some time between this and the annual meeting of the stockholders of the Alexandria Railroad Company, which takes place, we believe, on the 22d of November.

New London Northern Railroad.

The holders of the first mortgage bonds against the New London, Willimantic and Palmer Railroad corporation met on Friday, in New London, and organized a new company under the title of the New London Northern Railroad Corporation. A board of eight directors was elected, consisting of the following named gentlemen: Henry P. Haven, Robt. Coit, Acors Barns, Francis Allyn, and Wanton A. Weaver, of New London; William G. Johnson, of Montville: Lafayette S. Foster, of Norwich; and Charles H. Marshall of New York. Subsequently, at a meeting of the Board of Directors, Henry P. Haven of New London was chosen President. This corporation will immediately assume the management of the road.

Central Pacific Railroad.

A meeting of the Directors of this company was recently held at Harrisonville, Mo., for the purpose of completing the organization of the company and securing the survey and location of the road, as well as to arrange the means for the successful prosecution of the work.

Major N. B. Holden, *President of the company.*
C. Mackbee, *Vice-President.*
Judge McSpadden, *Treasurer.*
Jno. Cummins, *Secretary.*
Wm. Weeden, *Chief Engineer.*
B. W. Thomas, *Land Agent.*

We learn that the survey will shortly be commenced from Holden to Harrisonville, and will be extended to the junction with the Kansas Valley Road, near Lawrence, in that territory.

We learn also that the work between Holden and Harrisonville will be commenced simultaneously with the work on the Pacific Railroad west of Warrensburg, so that the track-laying may continue continuously from Warrensburg to Harrisonville.—*Warrensburg Missourian.*

Fort Erie and Chippewa Railway Company.

The *Advocate* speaks of this new enterprise thus: "Among the most significant features of improvement which tend directly to favor Buffalo, we may mention the building of the Fort Erie and Chippewa Railroad. This is a new enterprise, the existence of which has only lately come to our knowledge. The work, we learn, has considerably advanced. Wm. A. Bird, Esq., is President of the Company, and Wm. Wallace, Esq., is managing Director. With such men at the head of operations, we see no reason to doubt a successful consummation. Buffalo bids fair yet to become the radiating point of many railroads, and we wish all of them the prosperity which they deserve."

OFFICE OF THE NEW YORK CENTRAL R. R. Co.,
Albany, November 2nd, 1860.

The Annual Election for Directors of this Company, and for Three Inspectors of the next Election, will be held at the Office of the Company, in the Exchange, in the City of Albany, on the Second Wednesday (the twelfth,) of December next. The Poll will be opened at eleven o'clock in the forenoon, and will continue open for two hours thereafter. By order of the Board of Directors.

4145 GILBERT L. WILSON, Secretary.

LYONS' TABLES.

To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.			SHEET No			
1. General Table for all Bases and all Slopes.			13. for Base 18 ft. Slop.			1½ to 1
			14. " 20 "			1½ to 1
2. For Side Hill Cuts and Fills.			15. " 24 "			¼ to 1
3. Base 12 ft.	Slopes	1½ to 1	16. " 24 "			1½ to 1
4. " 14 "	"	1½ to 1	17. " 25 "			1½ to 1
5. " 15 "	"	¼ to 1	18. " 26 "			1½ to 1
6. " 15 "	"	1 to 1	19. " 28 "			¼ to 1
7. " 15 "	"	1½ to 1	20. " 30 "			1 to 1
8. " 16 "	"	¼ to 1	21. " 30 "			1¼ to 1
9 " 16 "	"	1 to 1	22. " 30 "			1½ to 1
10. " 18 "	"	¼ to 1	23. " 32 "			1 to 1
11. " 18 "	"	½ to 1	24. " 32 "			1¼ to 1
12. " 18 "	"	1 to 1				

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at **25c. each;** or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

BALLARD'S PATENT CLAW JACK SCREWS,

MANUFACTURED AT

No. 7 Eldridge Street, near Division,

NEW YORK.

LARGE and small **CLAW JACKS** for BRIDGES, RAILROAD and BOILER BUILDERS, SHIP BUILDERS, STONE QUARRIES, and **various other kinds,** for different purposes.

Notice to Contractors.

OFFICE GEORGIA WESTERN RAILROAD Co.,
Atlanta, Oct. 4th, 1860.

SEALED PROPOSALS will be received at this office until the 1st day of December next for executing the Grading and Masonry on fifty miles of the Georgia Western Railroad, commencing at Atlanta, and extending into Haralson county.

Profiles and plans, with approximate estimates of quantities, will be exhibited at this office on and after the 15th of November. Payments to be made in cash, monthly. The work is in a healthy locality, and will present superior advantages to contractors in obtaining supplies.

By order of the Board of Directors.

L. P. GRANT, Chief Engineer.

STRATTON & CO.,

COMMISSION MERCHANTS,

No. 1 PINE STREET, N. Y.

AGENTS FOR

Bauman & Co.'s Poco Metallic Paint.

FOR WOOD PAINTING.—It retains a beautiful lustre, kills knots and will protect it under any circumstances. It covers 6,000 square feet per hundred pounds, and will neither fade, blister, or wash, and a better fire-proof than any other Paint, for it will stand a heat that will melt lead. It is proof against sea, air and storms.

Refer to JOHN LEISENRING, Sup't and Eng'r. Lehigh Coal and Navigation Co., Mauch Chunk, Pa.

FOR BRICK AND PLASTER.—It makes all the fanciful stone colors, and will cover 4,000 square feet per 100 pounds. When laid out in blocks, it is truly beautiful.

Refer to SEMPLE & BROTHER, Easton, Pa.

FOR SHIP AND BOAT PAINTING.—It hardens under water to the hardness of Iron, preventing the ravages of the wood-worm effectually. On deck it is impervious to water, expands and contracts with heat and cold, and we warrant it on the forecastle six months.

Refer to CAPTAIN MASON, Schooner 'Adolph Ugel.' Philadelphia.

FOR RAILROADS.—It preserves Bridges and Ties from dry or wet rot and freight cars from burning and leaking.

Refer to R. H. SAYER, Sup't and Eng'r, WM. KELLOG, Master of Repairs, Lehigh Valley Railroad, Bethlehem, Pa.
A. G. BRODHEAD, Sup't and Eng'r, Beaver Meadows R. R., Mauch Chunk, Pa.

FOR ROOFING.—It covers 8,000 feet per 100 pounds, and may be used in the rain, as it never runs.

Refer to M. CULLOUGH & CO., HENRY BUCKWALTER, Philadelphia.

FOR IRON.—It will stand 300 deg. Fah. and gives satisfaction to all the Iron men in Philadelphia, on gas holders, steam boilers, Iron fronts and ornamental iron. It is equal to Red Lead, for steam and hot water joints.

Refer to J. W and J. F STARR, Camden, N J. MORRIS, TASKER & CO., MERRICK & SONS, Philadelphia.

FOR IRON FOUNDERS' PATTERNS.—Five parts by weight of it to one of gum shellac dissolved in alcohol, will make a covering more impervious to the damp sand or loam than shellac alone of equal consistency.

Refer to THE NOVELTY IRON WORKS, New York.

FOR STAINING.—Oak, Mahogany, Rosewood and Walnut Stains for Furniture, we warrant it equal to Turkish Umber. Its natural colors are Umber, Brown, Lake, Olive and Lead color, which may be combined in endless variety. We hope soon to have other colors much lighter

ANALYSIS.

DENNIS BAUMAN & CO.,
Parryville, Carbon County, Pa.

The following are the results of Analysis of your Poco Metallic Paint.—Peroxyde of Iron 55.84, Red Oxyde of Manganese, 1 65; Lime, 2.52, Magnesia 1.29; Alumina, 9 00; Silex, 29.70;—100 parts.

The Analysis proves that this paint is not likely to be altered in the slightest degree by ordinary atmospheric agents, such as sunlight, rain, cold, or heat. We therefore regard your Poco Metallic Paint as of the most durable character

FELTING

For Covering LOCOMOTIVE, STEAMSHIP and STATIONARY ENGINE BOILERS, STEAM and WATER PIPES.

NATIONAL FERTILIZER.

The attention of Agriculturists is requested to this ECONOMICAL and SUPERIOR **FERTILIZER.** It possesses all the good qualities of the best known manures, without any of the injurious effects produced by the over-active Ammonia in Guano and kindred FERTILIZERS, while its price is **less than one-half of the Peruvian** Guano. The various materials composing this Fertilizer, are so chemically combined, that they are gradually evolved by the heat and moisture of the earth, and furnish to the plant all the requirements for a **rapid and luxurious vegetation.**

[COPY.]

NEW YORK, Sept. 8, 1860.

I have used about one ton of the NATIONAL FERTILIZER manufactured under Dr. L. Harper's patent, on my sugar plantation in the Island of Cuba, and although tried upon very poor soil, realized a fine crop. I used it in the same way and in the SAME QUANTITY as I use Peruvian Guano. I can confidently recommend it as in every respect equal to Peruvian Guano for sugar cane.

HISTORY

OF THE

RAILROADS

AND

CANALS

OF THE

UNITED STATES

OF AMERICA

EXHIBITING THEIR

Progress, Cost, Revenues, Expenditures

AND

PRESENT CONDITION.

By HENRY V. POOR, Esq.,

Editor of the 'AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co. N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well papered, on application at their office, by **DELAFIELD & BAXTER,** 104 Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

ROSENDALE HYDRAULIC CEMENT.

ROSENDALE AND KINGSTON CEMENT CO. Manufactory at Kingston, N. Y. on the West Bank of the Hudson River. Office 48 Pine st., New York City.
E. M. BRIGHAM, Sec'y.

PATENT ASPHALTIC
ROOFING FELT.
THE BEST, CHEAPEST AND
MOST DURABLE ROOFING KNOWN.

THE IMPROVED PATENT ROOFING FELT furnished by the Subscribers is entirely free from the objections hitherto urged against articles that have been furnished under similar names by various parties.

It makes a **light, cheap, durable,** and perfectly **Fire** and **Water-proof Roofing** for **Churches, Farm Buildings, Railroad Depots, etc.**

It forms the best and cheapest lining for Stores, Granaries, Barns and Wooden Buildings, as rats, mice and other vermin will not touch it.

It stands all climates and has been extensively furnished to the British Government for use in their widely scattered foreign possessions. The Turkish Government used large quantities of the Felt for roofing their hospitals and stables in the late war.

In this country first class dwelling houses have been roofed for three years with this Felt, and the owners who used tin now prefer this Roofing Felt.

Also an entirely new, superior and cheap **ROOFING CEMENT** for the above Felt and leaky tin roofs.

For Samples, Circulars, etc., apply to
EDMISTON BROS.,
No. 3 Bowling Green, New York.
N. B.—Agents wanted.

CEMENT ROOFING.

PATENT MICA
AND
Fibrous Cement Roofing.

IT HAS STOOD THE BEST OF ALL TESTS—TIME!

IT fully sustains the high reputation it has gained, as a PERFECTLY RELIABLE, DURABLE and WATER PROOF ROOFING. It is adapted to every variety of Roof, new or old, and is the best and cheapest Cement in use for repairing OLD LEAKY TIN or other Roofs.

ALL WORK WARRANTED.

Cement for sale by the Barrel, and sent to any part of the Country, with printed instructions for use.

Also, for sale, State and County Rights for a portion of the United States.
DITTO, PORTER & CO.,

New York, Saturday, November 17, 1860.

Detroit and Milwaukee Railway.

Under the reorganization of this company C. J. Brydges has been elected President, Thomas Reynolds Vice-President, and C. C. Trowbridge, Secretary. The new company have just issued a circular-letter to the holders of the first and second mortgage bonds, and other creditors of the road, giving an exhibit of its finacial condition. After rehearsing the past history and present condition of the company, and speculating upon its probable receipts from the passenger and freight traffic, the President suggests the following as a means of relieving present embarrasment, and providing for the ultimate payment of the bonds named, as well as other debts:

To enable the company to pay in cash the sums ordered by the court to be liquidated out of the earnings of the line, it becomes necessary for the first and second bondholders to fund their present overdue coupons, and those maturing up to and including May 15, 1862. It is proposed to issue in exchange for the coupons thus to be funded, bonds maturing May 15, 1866, *having all the rights of the first and second mortgages respectively*, and bearing interest at the rate of seven per cent., payable semi-annually in cash. These bonds for deferred coupons will be paid in cash on May 15, 1866, or earlier, if the company's financial position will admit of it.

Holders of bonds to the amount of upward of one million of dollars have already given their consent to the arrangement, and having carefully examined, by agents specially appointed for that purpose, into the whole bearings of the question, they have come to the conclusion that the course now stated is the only feasible one to adopt, without resorting to expensive and harrassing legal proceedings, which after great delay, might probably not produce such satisfactory results as the present amicable arrangement.

It is hardly necessary here to state that the arrangements now announced will ultimately pay the deferred coupons in full in cash with interest for the period that they remain unpaid.

Holders of the first and second bonds will require to give their assent to this plan on the form herewith furnished, and forward it to either the Secretary in Detroit, Mr. C. C. Trowbridge, or to Mr. B. Baker, the Secretary in London, not later than the 15th of December next, from either of whom the proper bonds in favor of Trustees can be obtained in the exchange for the coupons, which coupons, it is proposed, shall not be canceled, but held in trust for the owners thereof.

Norfolk and Petersburg Railroad.

The annual meeting of the stockholders in this road was held at the office of the company in Norfolk, Va., on the 12th of April last. The report of the Directors was read by Henry Irwin, Esq., President, and the report of the committee appointed to examine the road and property of the company, by Geo. W. Camp, Esq. The report of the Chief Engineer and Superintendent, Wm. Mahone, Esq., giving a detailed account of the receipts, disbursements, etc., of the road was read by him. From this we learn that the income of the company for the fiscal year ending April 1, 1860, were:

From passengers		$50,534 28
" freight		27,727 93
" telegraph		5,957 24
		$84,219 45
And the expenses were:		
Maintenance of road	$16,370 57	
" machinery	7,911 66	
Conducting transportation	18,245 13	
Salaries, office exp. taxes, etc.	7,372 26	
Telegraph line	2,590 03	
		52,489 66
Net income		$31,946 54
Receipts from miscellaneous sources		216 75
		$32,163 29

It will be seen that the gross income from all sources was $84,436 20, which sum is equal to an average receipt per month of $7,036 35; and per mile of road of $1,055 45, and to $1 21 per mile run of all revenue trains. This amount of revenue as compared to that of seven months preceding the 1st of April, 1859, the beginning of the past fiscal year, shows an increase of $2,000 per month, or about 40 per cent. on the receipts of the road. The expenses, embracing every item properly chargeable to its management, were $52,489 66—equal to $656 12 per mile of road; 75.2 cents per mile run of all revenue trains, and 62.2 per cent. of the gross receipts of the company. The net income, $31,946 54, is only insufficient by about $10,000 to meet the current interest of the funded debt of the company. The Superintendent in his report says:

The Treasurer's books show at this time an indebtedness of $177,000, but in addition to this sum, there is due upon open accounts about $13,000, making in all, as near as may be, the Company's legitimate debt of this character $190,000. Of this amount $31,500 is due the State, and $12,262 to individuals for arrearages of interest upon mortgage bonds. Besides this sum, there are some $54,000 of paper which now lies over awaiting payment. The balance, about $88,000, matures between this time and the end of November of the current year, but principally during the months of April, May, July and November. In reconciling the $127,000 of floating debt as set forth in my last annual Report, and which had accumulated in the fall of '58 and '59, and at that time seriously threatened the very existence of the work, there were $51,500 of the first mortgage bonds of the Company disposed of upon condition that the same should be redeemed before the first of July, of the present year at 90 cts., the rate at which they were at the time taken in settlement. It is proper then to embrace this liability as a source of absolute indebtedness, and thus treating it, the floating debt of the company becomes $236,500, this latter sum being equal to $46,850, as the equivalent of the bonds at 90 cts.; while, however, this addition to the floating debt is made, the means of the Company are enlarged by the amount of bonds released, ($51,500.)

The resources of the Company applicable to all these obligations of debt, are, in Norfolk City Registered Stock, $8,630; in the Railroad Company's First Mortgage 8 per cent. bonds, $117,000; and in the late appropriation made by the General Assembly for the relief of the Company, $300,000. The latter has yet to be realized and

the former released by the retirement of the paper on account of which they are locked up as collateral. The bonds of the company ought now without difficulty to be made available at par, either in the satisfaction of the floating debt, or certainly in payment for whatever work may be hereafter undertaken in the further completion of the Road. The amount of the first mortgage is but for $600,000, and surely in addition to the property which it covers of an amount equal to one half of the *lien* itself, in fact appreciates its value or the bonds which it secures. Quite the entire sum appropriated by the Legislature will be applied to the permanent improvement and enlargement of the property covered by the mortgage, in removing the floating debt which trammels the capacity and usefulness of the Road and in completing the unfinished works which wise economy and its better interest urgently and equally require. I shall therefore regard the resources of the Company as in all material respects equivalent to cash and as of consequence amounting to the sum of $425,630, made up of State appropriation, $300,000; of Railroad 1st Mortgage Bonds, $117,000; and of City Scrip, 8,630. Deducting from this amount this indebtedness of the Company as hereinbefore stated, and there remains of available means $189,130, which sum is sufficient to replace all the trestle work upon the line with proper permanent structures—to complete the ballasting of the track—to erect station houses at Windsor and Wakefield—to enlarge the freight accommodations at Norfolk—to build a permanent station house at Petersburg, and to increase proportionally the rolling stock of the Road.

General Statement, March 31, 1860.

Capital stock by State of Virginia		$900,000 00

		20,895 47
		$2,279,111 06

The following is a list of the directors and officers of the company for the year 1860-'61.

President—Wm. Mahone.

Directors on the part of the State—Geo. W. Camp, Chas. F. Collier, Geo. Bramble.

Directors on the part of the Stockholders—Thomas B. Rowland, John D. Myrick.

Treasurer—Wm. H. Hunter.

Atlantic and Gulf Railroad.

This great work is now completed and in operation to Quitman, Ga., 160 miles west of the city of Savannah.

Stonington Railroad.

The receipts of this company for the year ending 31st August, 1860, have been as follows:

Through passage	$109,065 45	
Local do	72,136 99	
		$181,202 44
Receipts from New Haven, New London, and Stonington Extension Railroad		12,270 54
Through freight	$81,182 37	
Local do	36,149 05	
		$117,331 42
Mail service	$7,500 00	
Balance due last year	2,410 76	
	$9,910 76	
Less am't due by P. O. De't.	3,548 44	
		$6,362 32
Total		$317,166 72
Interest on deposits	$1,128 44	
Do. on bonds held by Co.	930 00	2,058 44
Total		$319,225 16
Balance August 31, 1859		30,525 89
Total		$349,751,05
The expenditures have been		$187,529 23
Six per cent b'ds pur'd and canceled.		29,693 75
Div. Nov. '59, and J'ly '60.	$75,384 60	
Dividends unclaimed	2,367 60	73,017 00
Paid unclaimed dividends		1,980 00
New Haven, New London, and Stonington Extension Railroad		46 51
Balance in cash		38,959 56
Total		$349,751 05

The receipts for the year just closed show an increase of $60,424 38. In expenditure there is an increase of $46,814 93.

The number of passengers carried over the road during the past two years, is as follows:

	1860.	1859.	Inc.
Through passengers	117,213	86,361	30,852
Local do	100,713	85,638	16,075
Total	217,926	170,999	46,927

The amount of freight transported over the road the past two years is as follows:

	1860.	1859.	Increase.
Thr'h fre't. lbs.	75,874,000	62,256,000	13,618,000
Local do lbs.	21,376,000	15,536,000	5,840,000
Totals. lbs.	97,250,000	77,792,000	19,458,000

The receipts of the year were		$317,166 72
The expenditures 59 per cent		187,529 23
Net receipts		$129,637 49
The re'ts of last y'r were.	$256,742 34	
The expen'ure 55 per ct.	140,714 30	116,028 04
Gain in 1860		$13,609 45

The indebtedness of the company on the 31st of August last was as follows:

Six per cent. bonds		$306,500 00
Amount due but not presented		400 00
Total		$306,900 00
Less amount held by company		30,100 09
Leaving		$276,800 00

The total earnings of the New Haven, New London, and Stonington Extension Railroad for the year was $26,758 55.

The benefit derived from the connection with the Extension Road is:

From through passengers to and from New York and Boston	$7.691 00
From passengers to and from connecting roads	20,253 72
From passengers to and from stations on Stonington Road	11,819 85
From freight	5,153 82
Total	$44,917 89

Exclusive of the earnings of the Extension Road.

The Bonded debt of the company continues steadily to be reduced. During the past ten years the entire issue of the $250,000 7 per cent. bonds has been paid, and $262,700 of the 6 per cent. bonds paid, leaving but $276,800 outstanding. The real estate at Providence will no doubt soon be available, and will probably command from $50,000 to $75,000. This will be applicable to the extinguishment of the bonded debt.

The company has no floating debt, nor any construction account open.

Journal of Commercial Law.

Banks: Presumption as to Knowlege of the Signature of their Customers: Payments made upon checks are at the peril of the Bank.

The administrators of one Weisser brought an action against Denison, President of the North River Bank to recover a balance alleged to be due, for sums deposited with the bank by, and during the life, of their intestate. The plaintiffs claimed a balance of $1,739 70; and the defendant admitted that there was in the bank to the credit of the intestate, at the time of his death, the sum of $1,150 50. The difference $589 20, had been paid by the bank upon checks forged by one Harlin, a clerk of the intestate, at different times from February, 1848, to August, 1849. During this time the bank book of the intestate had been written up and balanced by the bank several times and the amount paid upon forged checks debted thereon, and the book with the vouchers returned to him. Harlin, the forger, was a confidential clerk of the intestate, transacting much of his business with the bank, and receiving from the bank in every instance with a single exception, the bank book when balanced, and the canceled vouchers, and on his return comparing the checks returned with the check book of the intestate, and reporting to his principal that all was right. He abstracted the forged checks from the vouchers returned, and after the discovery of his offence and his flight, the checks which were in controversy were found in his trunk with the bank mark upon them.

Upon the trial had in the Superior Court of the City of New York, the jury rendered a verdict for the whole sum claimed; amounting, with interest to $1,896 99. The Court, at General Term, modified this verdict by reducing the amount of recovery to the amount admitted to be due, together with the amount paid upon the forged checks prior to the time when the bank book was first balanced, and with the amount paid upon forged checks debted thereon; and a new trial was ordered unless the plaintiff would accept this modification. The plaintiff assented to this reduction and perfected judgment; from which, the defendants appealed to the Court of Appeals. The following is the opinion of the Appellate Court:

Allen J. The jury, by their verdict, pronounced the checks upon which the money in dispute was paid to be forgeries, and it is not claimed that the intestate, Weisser, after he had personal knowledge of the facts, did any act by which he made them his own. After the forgeries were discovered by him he did not in any manner recognize Harlin, the forger, as his agent for drawing the checks. The original payment of the checks by the bank was in their own wrong, and if paid to an innocent holder the money could not be re-

covered back. The defence in the action is based upon the alleged negligence of Weisser in omitting to examine his bank book after it had been settled and balanced by the bank and returned with the canceled vouchers, and to compare them with his check book, by which the forgeries might have been earlier detected. But I can find no principle upon which this defence can be sustained. First, The intestate was not within any rule of law estopped from alleging that the signatures of the checks were unauthorized. He did not act to give currency to the checks. He did not act with a view to influence the conduct of the defendants, or by which they were influenced and induced to part with their property or change their position. Second, the most that can be claimed is that the "writing up" of the bank book debiting in it the forged checks and returning the book with the vouchers was the statement of an account by the bank and that Weisser, by returning the account after a reasonable time for its examination had elapsed, without objection, must be deemed to have acquiesced in it and admitted it to be correct, and is equally bound by it as by an account stated. This is undoubtedly the result of his omission personally to examine his account and take seasonable objections to improper items. Still, inasmuch as the defendant has not, by the silence of Weisser been induced to take any action or lost any rights, the only effect of this is to cast the burden of proof upon Weisser and his representations to slow fraud, error or mistake in the account. The acquiescence in the account as stated can be of no more binding force than an express admission of the genuineness of the signitures to the forged checks would have been; and yet such admission made in good faith would not have concluded the party unless third persons had been induced to give credit to the checks and part with value upon the faith of such admission.

Third. It is said that Harlin settled the account with the bank as the agent of Weisser, and that the agent having knowledge of the forgeries and that the charges in dispute were based upon such forgeries, the principle was effected by the knowledge of the agent and must be deemed to have acted in person with full knowledge of all the facts and thus to have acquiesced in the payment of the forged checks from his funds. The principle that notice to an agent is notice to the principal is quite familiar, but is only applicable to cases in which the agent is acting in the course of his employment. Were it otherwise and did it extend to acts unauthorized and outside of the employment, whether trespasses or even felonies, the master might be made responsible for all the acts, whether tortious or otherwise, done by his servant while in his employ or acting professedly in his behalf if he did not act at once by disclaiming his authority. The servant would necessarily have knowledge of his own wrongful act, and within the rule sought to be applied, the knowledge of the servant would be that of his master; and if the latter, having knowledge, should not object, he might be deemed to acquiesce. He would thus, by a legal fiction, be charged with the tortious, fraudulent or even felonious act of his servant. This is not the law.

Had Harlin, in fact, settled with the bank, his acts in respect to the forged papers would not have bound Weisser. The allowance of the amounts would not have been unauthorized, and but a continuation and carrying out of his first offence, and no more obligatory upon his employer than the receipt of the money in the first instance at the counter of the bank. *Bankers are presumed to know the signature of their customers purporting to be drawn by them at their peril.* If they do not know them to be genuine they must take time to ascertain. The debit of the amount of these checks, not being authorized by the checks themselves, cannot be sustained upon the authority of Harlin in the settlement of the account. There being no drafts or authority from Weisser, the bank had but the verbal assent of Harlin to charge upon settlement of these amounts to the account of Weisser, and there is no pretence that Harlin was supposed to have authority to bind Weisser to that extent or that manner.

But there was no settlement with the bank except such as resulted from the acquiescence of the plaintiffs' intestate in the account by his silence. *The examination of the account by Harlin was not a transaction with the bank or in which they had any interest or of which they had any knowledge. It was a matter between Weisser and his clerk for the information of the former*, and whether faithfully or honestly done is not a matter material to the defendant. Weisser did not obtain the desired information; but he is in no worse condition and the defendant is in no better, than if no examination had been attempted, and in such case it would not be claimed that he would have been concluded by the account and his omission to examine it. The business was, in truth, transacted in the usual and ordinary way, and no negligence can attach to Weisser in the premises.

Mere lapse of time, in the abstract, however long, will not bar the right of the party to allege the forgery, provided he does it within a reasonable time after it is discovered. Lapse of time between the payment of the checks and the discovery of the forgeries is all there is upon which the defendant can rely in this action, and that cannot avail him as a defence to the action. I see no reason why the judgment of the Supreme Court at the trial term for the full amount of the verdict should not have been affirmed; and as the relinquishment of a part of the verdict of the plaintiffs, the whole of which they were entitled to retain, whether done upon their own motion or otherwise, cannot prejudice the defendant, the judgment below should be affirmed.

The First Railroad in Turkey.

A railway about thirty miles in length will shortly be opened from Smyrna to Turbali, which is nearly due east of the former place.

Tennessee and Alabama Railroad.

The gap in the road, between Athens and Nashville, has been reduced to five miles. It is thought that it will be completed by the first December. This will shorten the time between Tuscumbia and Nashville several hours.

Horse Railroads in Montreal.

At a late meeting of the Montreal City Council, power was conferred upon certain individuals to construct horse railroads through the city, and to levy fares on passengers traveling thereon. The fares which have been fixed by the Council are five cents for any distance within one district, six cents within two, eight cents within three, and ten cents within four, which latter is of course the maximum charge.

United States Securities.

For some years past, despite much writing to the contrary, a regular flood of investment of English capital has been setting in upon the United States. The usual rate of interest in that go-ahead country upon ordinary mercantile transactions being from 12 to 15 per cent., the more sober securities, which reach no higher than 7 or 10, are neglected by native capital, and hence much of the weakness and failure that attends so large a portion of railway enterprise on the other side of the Atlantic. These investments, however, have gradually been introduced to the English capitalists, so that year by year a larger interest is felt in the traffic of the States, not merely on account of Canadian but also of American connections. The history of companies in in the United States is now much better known than formerly, while prospects are more clearly appreciated, and difficulties less misunderstood. The vast length and frequent complication of many systems have rendered local or partial maps of comparatively little use, and an accurate delineation of the network of the continent an absolute desideratum. We therefore welcome with more than ordinary acceptance a complete outline of the whole American system, as issued by our contemporary in New York, and published in London by Algar, of Clement's-lane. This map, distinctly traced and elaborately colored, stretches from Maine to Kansas, and from Houston on the Gulf of Mexico, to Fond du Lac on Lake Superior. It consequently embraces the whole of Canada, and would for English purposes, be absolutely perfect did it set out New Brunswick and Nova Scotia. Should this elaborate work in its annual issues, as we anticipate, keep pace with the progress of the locomotive over the immence territories it comprehends, there will be no safer reference and no more practical and intelligent guide than "Poor's Railway Map of the United States and Canadas."—*London Railway Times.*

New Orleans, Jackson and Great Northern Railroad.

From G. D. Bustamante, Esq., of Kosciusko, agent to procure subscriptions to the capital stock of the New Orleans, Jackson and Great Northern Railroad, the *Choctaw* (Miss.) *Recorder* gleans the following information with regard to this road, in the early completion of which the citizens of Louisiana and Mississippi are alike deeply interested:

"The graduation upon Messrs. Cocke, Bradford & Co.'s contract of two miles from Canton to McWillie's mill in Attala Co., has been completed, and the work upon the remaining 14 miles to Kosciusko is being rapidly pushed forward by the energetic contractor, Col. J. M. Wesson, whose sub-contractors have about 400 hands upon the work. The iron for ironing the 40 miles from Canton to Kosciusko has been purchased, and the work of track-laying will be commenced at Canton next January, and, should the funds not fail, the cars will be running to Kosciusko by the 1st of December, 1861. At the Aberdeen end of the road the work of construction south is also in a very forward state of progress, under the direction of Messrs. Barker, Rogers & McAllister, who expect to have their work completed to the junction with the Mobile and Ohio Railroad, nine miles distant, and ready for the locomotive by the 1st of November, 1861.

With regard to the business of the road, it is daily on the increase, and as to its affairs, under the present efficient management, they continue in a most prosperous condition. The total earnings of the road for twelve months ending the 31st of August, 1860, were one million two hundred and twenty-two thousand seven hundred and forty-two dollars, an increase of three hundred and fifty-one thousand and twenty-six dollars, or a fraction over 40 per cent. over the receipts for the year ending August, 1859. In three years it is

estimated that the receipts of the road will reach fully two millions of dollars per annum. Mr. Bustamante is engaged in procuring further subscriptions to the road to insure its early construction through Attala on to the junction with Aberdeen end, and as the sooner the road reachers our county line the sooner will our railroad tax be made available and our citizens be placed in direct communication by one continuous road with the Crescent City, and as with an increase of subscription, too, the letting out at an early day of the whole route through Choctaw, Oktibbeha, Chickasaw and Monroe, to the junction with the Aberdeen end is secured beyond a contingency, we cannot, therefore, recommend too strongly the mission of Mr. B. to our county."

Williamsport and Elmira Railroad.

The creditors of this company will be glad to learn that the business of the road is larger than in any previous year, and is realizing more money, except, perhaps, in the year 1857, when freights were higher. The funded debt of the company is $1,000,000, at 7 per cent. One of the $35,000 of interest due on this debt in January, the company, we are informed, has earned and holds from the proceeds of four months' business $25,000—leaving only $10,000 to be realized in the remaining two months. At this rate, the company is earning more than the interest on its funded debt, which excess will go to the preferred shareholders, as the next creditors in order.

Railways in India.

The capital authorized to be raised under guarantee of the Government of India, for railways, steam flotilla, and Madras Irrigation, is 38,173,300*l.* There has now been actually raised and paid by the companies 31,228,335*l.*, leaving 6,944,965*l.* still to be raised. Only the sum of 632,376*l.* has been raised in India; all the rest has been from Great Britain. Up to the end of 1859 the Indian Government had advanced for interest guaranteed to the companies 3,854,403*l.*, and they have since paid in England a further sum of 691,801*l.*; but against this must be set the amount received by the Government from the traffic of completed portions of the railways,—an amount which had reached 562,000*l.* so long ago as in June, 1859. The following table, made up to 15th August last, shows the financial position of each company, the sum it has paid up, the sum which has been paid out and expended (partly estimated), the estimated balance due on account of each company, and the sum authorized but not yet raised :—

Companies.	Paid up.	Paid out.
East India....£	14,870,223	13,725,570
Eastern Bengal.....	568,038	449,017
Calcutta & S. East...	197,240	167,593
Madras.....	4,452,552	4,330,448
Great Southern.....	289,220	280,620
Great Indian Pen....	6,115,759	5,551,569
Bombay, Baroda.....	2,004,711	1,978,160
Scinde.....	1,244,932	1,136,626
Punjaub.....	704,956	542,822
Indus St. Flotilla....	249,505	192,250
Madras Irrigation....	531,199	35,568
	£31,228,335	£28,890,243

Companies,	Balance.	Not yet raised.
East India....£	1,144,653	629,777
Eastern Bengal.....	119,021	431,962
Calcutta & S. East..	29,647	52,760
Madras.....	122,104	547,448
Great Southern.....	8,600	300,780
Great Indian Pen...	564,190	2,717,541
Bombay, Baroda....	26,551	995,289
Scinde.....	108,306	5,068
Punjaub.....	162,134	795,044
Indus St. Flotilla...	57,255	495
Madras Irrigation...	495,631	468,801
	£2,838,092	£6,944,965

It must not be supposed that 38,173,300*l.* authorized will complete these great works; some 15,000,000*l.* more will be required.

Railroad Earnings.

The earnings of the St. Louis, Alton and Chicago Railroad, for October, were:

Passengers	$44,185 70
Freight	62,606 53
Mails and Express	3,391 53
Total	$110,183 76
Corresponding period in 1859	90,102 00
Increase	$20,081 76

The receipts of the Chicago and Northwestern Railroad in October were:

From passengers	$32,245 88
From freight, etc.	78,469 03
	$110,714 91
Same month in 1859	55,974 58
Increase	$54,740 33

The following statement exhibits the earnings of the Milwaukee and Mississippi Railroad for October, in comparison with the earnings for the corresponding month of last year:

	1860.	1859.
Freight	$141,184 08	$102,836 97
Passengers	20,398 15	20,281 67
Mails and receipts	3,422 88	1,835 42
Total	$165,115 11	$124,854 06
Increase		$40,151 05

The following is a comparative statement of the earnings of the Marietta and Cincinnati Railroad for the month of October, 1859 and 1860:

	1859.	1860.
Passengers	$13,319 69	$14,719 08
Freight	20,818 31	30,994 80
Mails and telegraph	2,666 14	2,677 30
Total	$36,804 14	$48,391 18
		36,804 14
Increase		$11,587 04

There were 12,574 tons of freight transported over this road during the month of October last.

The following are the earnings of the Great Western Railway of Canada for the week ending November 2, 1860:

Passengers	$22,351 17
Freight and live stock	31,486 08
Mails and sundries	1,333 79
Total	$55,154 00
Corresponding week of last year	42,997 98
Increase	$12,246 02

The receipts of the Grand Trunk Railway of Canada, for the week ending November 3, 1860, were | $84,866 82 |
Corresponding week, 1859	58,476 65
Increase	$26,390 17
Total traffic from July 1, 1860	$1,210,156 85
Do. for same period last y..	892,877 69
Increase	$317,278 16

The following is the official statement of the earnings of the Dayton and Michigan Railroad for October, 1859 and 1860:

	1859.	1860.
Passengers	$11,134 43	$15,366 32
Freight	13,745 50	20,127 72
Mails and express	1,046 33	2,531 98
	$25,926 26	$38,026 02
Increase in October, 1860		$12,099 76

The following is the Illinois Central Railroad Company's statement for October, 1860:

Land Department.

17,192 18 acres sold for	$293,620 62
48,839 43 " " since Jan. 1	798,901 07
1,237,260 55 " " previously,	15,735,837 02
1,286,099 98 " " Total	$16,534,788 09
Bonds canceled in October	$78,500 00
" " previously	1,589,500 00
Total bonds canceled	$1,668,000 00
Cash receipts in October, 1860	140,457 68
Total since Jan. 1	596,123 43
Total cash and bonds received to October 31, 1860	$3,903,551 33

NOTE.—Cash receipts in October abplicable to cancellation of Construction Bonds, $78,447 47; applicable to Interest Fund, $45,471 73; miscellaneous accounts, $14,574 96.

Traffic Department.

Total receipts for October, 1860	$307,185 79
Do. do. 1859	248,962 86
Increase	$58,222 93
Total receipts since Jan. 1, 1860	$2,185,350 26
Do. correspond'g period,'59	1,673,425 74
Increase	$511,924 52

Freight forwarded over Illinois Central Railroad.

	Oct. 1859.	Oct. 1860.	10 mos. 1859.	10 mos. 1860.
Wheat, bsh.	431,051	716,332	2,111,699	3,112,775
Rye, "	7,456	17,876	12,613	65,778
Corn, "	110,503	201,194	466,991	3,002,458

Barley, "	41,088	40,914	72,027	88,443
Flour, bbls.	19,353	41,297	94,340	188,612
Total*	866,340	1,339,796	3,527,421	8,321,499

* Reducing flour to grain.

The deliveries of flour and oats by the Illinois Central at Cairo during October were larger than any previous month, and, as compared with the deliveries at Chicago, show the extent of the Southern demand.

Flour delivered at Chicago in Oct., bbls.	9,304
Flour delivered at Cairo, bbls.	27,484
Oats delivered at Chicago, bushels	21,092
Oats delivered at Cairo, bushels	133,873

The following is a statement of the earnings of the Buffalo, New York and Erie Railroad (Buffalo to Corning) for October, 1860, compared with the same month of last year:

	1859.	1860.
Passengers	$14,044 91	$15,306 71
Freight	39,649 44	51,080 11
Other sources	1,828 11	2,040 60
Total	$55,522 46	$68,427 42

The following is a comparative statement of the earnings of the Little Miami Railroad for the months of October, 1859 and 1860:—

October, 1860	$118,362 74
" 1859	103,030 90
Increase	$15,331 84

The earnings and expenses of the Michigan Southern Railroad for five months ending September 30, 1859 and 1860, were:

	1859.	1860.
Earnings	$687,630	$884,200
Expenses	397,404	401,882
Net earnings	$290,226	$484,318

The earnings of the Erie Railroad for the month of October, 1860, were | $587,241 06 |
| October, 1859 | 474,605 93 |
| Increase | $112,636 13 |

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Share and Money Market.

The panic in the stock market the past week has exceeded in severity anything previously experienced. Although in business everything has thus far gone on pretty much as usual, there is no picture of distress which active imaginations have not painted, with which to feed themselves, and an excited public. We now begin to see that excessive license of opinion even upon political matters is as injurious as actual waste or destruction of property, and that disruption of political unity means nothing less than the ruin of the material interests of the country. The lesson is a severe one, but may prove to be the only thing to bring the country to reason.

But for the political excitement that prevails, every interest in the country would be exhibiting evidences of extraordinary prosperity. The northwest is fairly getting on its legs again. Our internal commerce is now exceeding in bulk and value all precedents. The earnings of our railroads were never so great, and the prospect before them never so flattering. They are no less valuable than before the recent fall. The political clouds have only to be removed to have prices spring back to their former figures.

The money market usually takes its tone from the aspect of political affairs. If we are to indulge in civil war, it is plain to see that this is to put a stop to the collection of debts. The means of the merchants will be in worthless paper. No one in view of his own necessities will part with a dollar. Everything is thus brought to a dead stand. There is good reason to hope that the panic, which is not created by a deficit in the

material wealth of the country, will soon subside. Were the present political apprehension calmed, there would be instant and effectual relief.

The Political Crisis.

If the threatened political outbreak be finally consummated, the result must be most disastrous to all railroad enterprises, particularly in the Southern States. The sections most needing railroads are unable to provide sufficient means for their construction. These, for the railroads of all purely agricultural districts, both north and south, are to a considerable extent supplied from the great commercial centres—New York in the first place, and through her from abroad. For the rails, at least, a credit must be had in one way or another. Many of the Southern States are in full blow with their schemes. But if the General Government is to be shattered, there is an end, for the present, of credits. All enterprises that have not their means fully secured, must be laid up. No matter how peaceable and amicable the parting of the States may prove to be, the world has not yet had such an example, and will act in reference to very different ones, till the opposite is fully demonstrated.

The material interests of the country are the all important ones. The first step in their development are railroads. They are an equally essential element in political affairs. Is it wise to forego such advantages for political abstractions—or, at best, for apprehensions that may never be realized? Already have contracts for rails and materials come to a dead stand. The future must look much more promising before things will move again.

The railroad men of the country can do much in the present crisis. The new roads want money and material, from which they are at present cut off; the old ones, traffic, which must be most injuriously affected by extreme measures. By the stimulus they have given to our internal commerce, they constitute the strongest tie that now binds the States. By the means they supply for social intercourse they promote an homogeneousness of thought, sentiments and habits, which is next in strength to the tie of interest. The two together must prove stronger than theoretical abstractions, or partisan zeal, and, in the end, compose all the differences that now threaten the peace and tranquillity of the two extremes of the country. Such being the case, it is the duty of every citizen to do what he can to bring about a better state of things, and to check the panic now prevailing, and to mitigate its effects.

Blue Ridge Railroad Company.

The annual meeting of the stockholders of this company was held in Charleston on the 31st ult., at which the president submitted a report on the condition and prospects of the road, and also a report of Colonel Walter Gwynn, Chief Engineer, and statements and exhibits of the Treasurer, which were read and ordered to be printed in pamphlet form.

An election was held for nine Directors to serve for the ensuing year, which resulted as follows:

Hon. Edward Frost, Hon. Chas. Macbeth, Mayor of Charleston, Henry Gourdin, Charles M. Furman, George A. Trenholm, Robert Adger, William C. Dukes, Charles T. Lowndes, Richard Yeadon.

An election was entered into for officers for the ensuing year, which resulted as follows:

Hon. Edward Frost, President.

Wm. H. Perronneau, Sec. and Treas.

The above road is a continuation of the Greenville and Columbia Railroad from Anderson, South Carolina, to Clayton, Georgia; Murphy, North Carolina, and Ducktown, Tennessee to Cleveland and Chattanooga.

Pease's Improved Oils.

We give elsewhere the advertisement of F. S. Pease, Esq., of Buffalo, N. Y., relating to a patent oil manufactured and sold by him, for both lubricating and burning purposes. This oil has been in use on the New York Central Railroad for over five years, on the Buffalo, New York and Erie for over six years, on the Toledo and Wabash for over four years, on the Buffalo and Erie, and a number of other first-class roads, and is recommended by them in point of economy and durability for railroad purposes. It has been in use for several years on our government steamers, and is endorsed and recommended by the United States government for lighthouses, signals and engine use. A dynamometer test was made at the American Institute with the greatest care, by an instrument as accurate as mechanism could make it, arranged for testing the friction of metals and oils. These oils proved themselves equal to the best sperm, and they granted to the exhibitor a medal. Chemical tests by Headly show that these oils have no acid reaction; that they stand the greatest degree of heat without change; that of melted lead 600° Fah. and higher without change, and consequently were unaffected when other oils were burned or dried up. In burning, some parties testify that they proved themselves equal, if not superior, to the best sperm, the heating of the lamp being much less and the burning far better than sperm. In a trial made with the car oil, as the manufacturer terms it, on the New York Central Railroad, a sleeping car was run over 10,000 miles with only one oiling; the bearings remaining in good order and free from gum. The oil is equally superior for manufacturers, steam engines and mecanical works generally, and while it is not a volatile oil, it is free from acid reaction, and will stand a great degree of cold or high degree of heat. Mr. Pease is in possession of folios of recommendations from users of his oil, some of them speaking of it in flattering terms.

Central Railroad of New Jersey.

The following is a comparison of the receipts, expenses and net earnings of the nine months ending September 30, 1860, with the same months of 1859:

	1860.	1859.
Receipts, nine months.	$891,667 45	$708,984 81
Expenses, do.	350,021 19	280,946 58
Net earnings, do.	$541,646 26	$428,037 73
	Increase in 1860.	
Receipts, do.	$182,683 14 or 26 per cent.	
Expenses, do.	79,074 61 " 25 " "	
Net earnings, do.	$113,608 53 " 27 " "	

The following disposition has been made of the net earnings $541,646 26

Interest nine months, including $33,333 33, accrued but not payable.	$158,063 69	
Dividend 7½ per cent., nine months	270,710 00	
		428,773 69
Surplus of earnings		$112,872 57

Of this surplus there has been applied to the purchase of engines, $46,800; and expended on property or permanent accounts, $25,932 14. There was applied to the payment of $100,000 first mortgage bonds, over the amount received on stock $28,600, and the remainder, $11,540 43, is either on hand in cash or appears in an increase of the accounts receivable.

Buffalo, New York and Erie Railroad.

From the annual report of this company for the fiscal year ending September 30, 1860, we learn that the earnings during that period were:

From Passengers	$185,751 20
" Freight	422,713 22
" Rochester division	6,706 77
" Mail, express, etc.	14,829 34
	$580,000 53

And the expenses were:—

Operating road	$174,254 81	
Maintaining road	96,412 10	
Repairs of machinery...	66,379 72	
		337,046 13
Net earnings		$242,954 40
The interest on the entire liabilities of the company paid during the same period was		181,416 15
Leaving a net surplus of		$61,538 25

—being upward of nine per cent. on the entire capital stock of the company.

Compared with the previous year, the gross earnings show an increase of..	$38,750 93
With a reduction in expenses of..	31,882 11
Making the increase in net earnings ..	$70,633 04

The interest on the permanent debt of the company, viz: $2,000,000 of first mortgage bonds, $380,000 of second mortgage bonds, and $33,516 22 of real estate mortgages, amounts yearly to $168,946 12. The difference between this sum and the amount paid on interest account during the year, is $12,470 02. This amount was expended in paying the accrued interest on such of the bonds of the former company, being liens on the Buffalo and Attica Division of the road, as have been returned and exchanged for bonds of this company, and for interest on a part of the floating debt, exchange, etc. The floating debt of the company at the date of the last report, September 30, 1859, was $252,142 01. This has been reduced during the year to the present sum of $201,681 90. The actual floating debt, aside from open accounts, is about $100,000; and the report says it is not an extravagant estimate to assume that, within the ensuing two years, this debt may be wholly extinguished, so that the surplus earnings of the company may thenceforth be safely applied in paying dividends on the capital stock of the company. The assets of the company, exclusive of its railroad, real estate, machinery and equipments amount to $341,814 53, being an excess of $140,132 63 over the amount of the existing floating debt. They consist principally of cash on hand, balances due from other companies, materials on hand (fuel, oil, iron, etc.), and the proprietary interest in the Rochester and Genesee Valley Railroad, the value of which to the company is fully equal to the estimate.

A more perfect connection at Elmira, the report says, with the Southern roads is required for the accommodation of the coal and iron traffic. This can be obtained by the construction of an independent road from Corning to Elmira, to be con-

trolled and operated by this company, or by an extension of our own line to that point, a distance of 18 miles.

Balances of the General Ledger, Sept. 30, 1860.

Cost of road and equipment		$3,163,765 95
First mortgage bonds on hand, to liquidate Buffalo and N. Y. City R. R. bonds		107,690 00
Coupon account, 1857		14,350 00
ASSETS, as follows:—		
Avon, Gen. & Mt. Morris R. R. stock	$1,112 75	
Rochester & Gen. Valley R. R. stock	149,940 00	
Quincy and Toledo R. R. bonds	8,080 00	
B. & N. Y. C. R.R. bonds	6,115 75	
Buffalo, N. Y. & Erie R.R. bonds	47,910 00	
Inventory of material	68,851 38	
Cash on hand and in banks	11,075 63	
Due from agents (since remitted)	85,220 32	
Bills receivable	1,707 89	
Other roads	3,354 28	
Individual accounts	4,801 38	
Post Office Department	3,645 18	
		341,814 53
Total		$3,627,620 48
Capital stock		$680,000 00
FUNDED DEBT:—		
1st mortgage bonds	$2,000,000 00	
2d " "	380,000 00	
Real estate "	33,516 22	
		2,413,516 22
1st mortgage B. & N. Y. C. R. R., Buffalo to Attica		107,690 00
FLOATING DEBT:—		
Bills payable	$79,832 80	
Pay rolls	54,923 84	
Other roads	10,273 05	
Individual accounts	56,652 21	
		201,681 90
Balance of income account, Sept. 30, 1860		224,732 36
Total		$3,627,620 48

Railroad Progress in Cuba.

We learn that the new road which has been constructing for the last two years, between the towns of Guines and Matanzas, has been completed and opened on the 14th September to the traveling public, with imposing ceremonies, by the Captain General Serrano. Guines is on the line of road from Havana to Union and Isabel. Hitherto, passengers by rail between Havana and Matanzas, were obliged to proceed by way of Union, where changing cars to the Matanzas and Sabanilla line, it was necessary to perform a somewhat retrograde movement toward Matanzas—the whole time consumed in going a distance of 106 miles, was about 6⅓ hours, and oftentimes more, if the trains did not connect promptly at Union. The new road from Guines is about 36 miles long and reduces the whole distance to about 80 miles.

The whole of the new line having been incorporated in the Havana Railroad Company, it is worked by the machinery of the latter, and although not yet all in complete order, the express trains daily make the run between the cities of Havana and Matanzas in three hours. Passengers leaving either place, can spend six hours in the other and return the same day.

The grades and curvature of the new road are very favorable, and the bridging and superstructure of the most permanent character. More than one-half of the road is laid with broken stone ballast; the rail joists are thoroughly spliced with wood and iron, being Trimble's joint, with addition of bottom and inside plates of iron.

Grand Trunk Railway of Canada.

A general meeting of the shareholders of the Grand Trunk Railway has been called, to be held in London in December next, so as to allow time to secure the attendance of the President and Vice President from Canada. A report of the London directors was issued on the 20th of October, the object of which was to make known the condition of the company's finances, as made up from the accounts to the 30th of June. After announcing the impossibility of meeting the interest due October 1st on the second preference bonds, this report says:—

It has already been mentioned in the circular of the 13th of July that although authority had been given to raise £1,500,000 on bonds or stock of the company, to pay off liabilities and to increase the rolling stock, and to meet the current wants of the year, the directors were unable to obtain it on any terms. A memorial was accordingly drawn up and presented by the directors in Canada to the executive government, pointing out the existing condition of the undertaking, and praying for relief. The London directors had fully expected to have received before now an answer to this application; but the visit of his Royal Highness the Prince of Wales had so entirely absorbed the time of the various members of the government that they were unable to take the subject into their serious consideration, and they have now only authorized your directors to announce that the subject of the Grand Trunk Railway will be brought under the notice of Parliament, and that the government are about to issue a commission to inquire into its affairs. The directors announce an earnest desire that the investigation should be made a thorough one, and propose that one or two gentlemen well versed in railway management, in whom the English subscribers would have confidence, should proceed to Canada, and, in conjunction with the proposed government commission, and for the purpose of co-operating with it in its important investigation, report to them the result of their observation. Annexed is an estimate of the company's liabilities in England:—

To loans and bills payable in England.	£1,782,668
Bills drawn by the co. from Canada	235,564
Total	£2,018,282

—Against which are hypothecated the following securities, viz:—

£265,600 2d pref bonds	For value of £443,043
326,000 ordinary bonds.	
47,200 Tor. Corp. b'ds.	
42,500 At. & St L. sh.	
7,500 At. & St. L. b's.	
Blalance	£1,575,189
Securities in hand £32,300 ord. 6 per c. bonds.	
Securities in hand £27,600 7 per cent bonds	
Add unpaid and over due interest on b'ds.	130,500
Total	£1,705,689

The London directors have at present no exact return of any further floating indebtedness which may exist in Canada for additional rolling stock provided since March, and other expenditures, but have desired such a report to be made. Since the estimate of the wants of the company in March last, its pecuniary position has been deteriorated by the payment of interest on bonds and loans £161,000. Difference in value of assets from fall in prices, £250,000. Total, £411,000. While on the land to be resold, and valued at £120,000, only a small portion, realizing £5,000, has been sold, which will explain the increase in the net requirements of the company at the present time, as compared with the statement issued in March last. In the present embarrassed state of the company's affairs, and the uncertainty of relief from the government adequate to meet its liabilities, Messrs. Baring, Brothers & Co., and Messrs. Glyn, Mills & Co. have obtained a judgment against the company for debts due to them and others whom they represent, which vests in their agents the power of seizure of the rolling stock of this road; but this measure has been adopted for the general benefit of all present creditors, to guard against hostile prosecution of individual claims, and for the protection of the company's interest.

Debt of Virginia.

The annexed is an official statement of the debt of Virginia on the 30th of Sept., 1860:

Amount of Certificates of State 6 per cent. registered debt	$18,436,641 63
Amount of Certificates of State 5 per cent. registered debt	322,000 00
Aggregate amount of the registered debt of the State	$18,758,641 63
Amount of Certificates of debt issued in the form of coupon bonds, payable in New York	12,624,500 00
Amount of Certificates of debt issued in the form of 5 per cent. sterling coupon bonds, payable in London	1,865,000 00
Aggregate Public Debt	$33,248,141 63

Telegraphic Communication Between Memphis and Helena.

The laying of the cable across the Mississippi, previously mentioned, completed the line of telegraph between Memphis and Helena, Ark., putting the two cities in direct communication. It will soon be completed through to Little Rock. This is the second line within the State of Arkansas. She now has telegraphs and railroads, and the two will work together for her prosperity, as she comes more and more in communication with her sister States.—*Memphis Enquirer.*

Sunbury and Erie Railroad.

It is stated that a vigorous effort will again be made at the approaching session of the Pennsylvania Legislature, to devise the ways and means for finishing this road. There only remains some twenty-five or thirty miles to grade, and one hundred and twenty miles of rails to be laid to complete the road to Erie city, on Lake Erie.—*Cleveland Leader.*

DON PEDRO II. RAILROAD.

THE Board of Directors of the Railroad of Don Pedro II. proposes to contract for the construction of eleven and a-half English miles, from the egress of the large tunnel, west of the Serra do Mar, to a point selected for a station near the junction of the rivers Pirahy and Parahyba; and with this view will receive proposals, in sealed letters, to be opened on the 28th day of February, 1861, the competitors, or bidders, to be guided by the following regulations:—

Proposals will be received for the whole eleven and a-half miles, or for any portion thereof not less than four miles—for, 1st, the road-bed; and, 2d, the superstructure; or for the road-bed and superstructure combined; but, in the latter case, the price of each must be stated separately. It being understood that only on inspection of the proposals will it be determined to make the award in whole or in part.

The specifications, which may be seen at the office of the directory, at the central station, must govern the construction in all that is essential; each proposal, however, may suggest such modifications as may be deemed useful, in order that they may be duly considered. At said office can be seen all the plans and inclinations, or profiles of the ground.

The directory insists upon the clause that the technical direction belongs exclusively to its own engineers. It also requires that specific prices shall be stated in the contract for every kind of work; and whether the contract be for specific prices or for a total one, the periodical payments shall be made by measuring the work done, and calculating the value according to the stipulated prices.

The deduction made for security can be substituted by a deposit of money or equivalent bonds, at the discretion of the directory; and the interest or revenue of the security shall be long in all cases to the parties to whom contracts are awarded.

Office of the Board of Directors
of the Railroad of Don Pedro II.
C. B. OTTONI, President.
A. ELLISON, Jr., Chief Engineer.
Rio de Janeiro, August 18, 1860. 2t45

OFFICE OF THE NEW YORK CENTRAL R. R. Co.,
Albany, November 2nd, 1860.

The Annual Election for Directors of this Company, and for Three Inspectors of the next Election, will be held at the Office of the Company, in the Exchange, in the City of Albany, on the Second Wednesday (the twelfth,) of December next. The Poll will be opened at eleven o'clock in the forenoon, and will continue open for two hours thereafter. By order of the Board of Directors.

4t45 GILBERT L. WILSON, Secretary.

LYONS' TABLES.

To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.			SHEET No			
1.	General Table for all Bases and all Slopes.		13.	for Base 18 ft.	Slop.	1½ to 1
14.	"	20 "	"	1½ to 1		
2.	For Side Hill Cuts and Fills.		15.	"	24 "	" ¼ to 1
3.	Base 13 ft.	Slopes 1½ to 1	16.	"	24 "	" 1½ to 1
4.	" 14	" 1½ to 1	17.	"	25 "	" 1½ to 1
5.	" 15	" ¼ to 1	18.	"	26 "	" 1½ to 1
6.	" 15	" 1 to 1	19.	"	28 "	" ¼ to 1
7.	" 15	" 1½ to 1	20.	"	30 "	" 1 to 1
8.	" 16	" ¼ to 1	21.	"	30 "	" 1¼ to 1
9	" 16	" 1 to 1	22.	"	30 "	" 1½ to 1
10.	" 18	" ¼ to 1	23.	"	32 "	" 1 to 1
11.	" 18	" ½ to 1	24.	"	32 "	" 1½ to 1
12.	" 18	" 1 to 1				

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail**, in separate sheets, at **25c.** each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail**, upon receipt of the price. For sale at this office. Price **$1.**

BALLARD'S PATENT CLAW JACK SCREWS,

MANUFACTURED AT

No. 7 Eldridge Street, near Division,

NEW YORK.

LARGE and small **CLAW JACKS** for BRIDGES, RAILROAD and BOILER BUILDERS, SHIP BUILDERS, STONE QUARRIES, and **various other kinds,** for different purposes.

Notice to Contractors.

OFFICE GEORGIA WESTERN RAILROAD Co.,
Atlanta, Oct. 4th, 1860.

SEALED PROPOSALS will be received at this office until the 1st day of December next for executing the Grading and Masonry on fifty miles of the Georgia Western Railroad, commencing at Atlanta, and extending into Haralson county.

Profiles and plans, with approximate estimates of quantities, will be exhibited at this office on and after the 15th of November. Payments to be made in cash, monthly. The work is in a healthy locality, and will present superior advantages to contractors in obtaining supplies.

By order of the Board of Directors.

L. P. GRANT, Chief Engineer.

STRATTON & CO.,

COMMISSION MERCHANTS,

No. 1 PINE STREET, N. Y.

AGENTS FOR

Bauman & Co.'s Poco Metallic Paint.

FOR WOOD PAINTING.—It retains a beautiful lustre; kills knots and will protect it under any circumstances. It covers 6,000 square feet per hundred pounds, and will neither fade, blister, or wash, and a better fire-proof than any other Paint, for it will stand a heat that will melt lead. It is proof against sea, air and storms.

Refer to JOHN LEISENRING, Sup't and Eng'r, Lehigh Coal and Navigation Co., Mauch Chunk, Pa.

FOR BRICK AND PLASTER.—It makes all the fanciful stone colors, and will cover 4,000 square feet per 100 pounds. When laid out in blocks, it is truly beautiful.

Refer to SEMPLE & BROTHER, Easton, Pa.

FOR SHIP AND BOAT PAINTING.—It hardens under water to the hardness of Iron, preventing the ravages of the wood-worm effectually. On deck it is impervious to water, expands and contracts with heat and cold, and we warrant it on the forecastle six months.

Refer to CAPTAIN MASON, Schooner 'Adolph Ugel.' Philadelphia.

FOR RAILROADS.—It preserves Bridges and Ties from dry or wet rot and freight cars from burning and leaking.

Refer to R. H. SAYER, Sup't and Eng'r, WM. KELLOG, Master of Repairs, Lehigh Valley Railroad, Bethlehem, Pa.
A. G. BRODHEAD, Sup't and Eng'r, Beaver Meadows R. R., Mauch Chunk, Pa.

FOR ROOFING.—It covers 3,000 feet per 100 pounds, and may be used in the rain, as it never runs.

Refer to M. CULLOUGH & CO., HENRY BUCKWALTER, Philadelphia.

FOR IRON.—It will stand 300 deg. Fah. and gives satisfaction to all the Iron men in Philadelphia, on gas holders, steam boilers, Iron fronts and ornamental iron. It is equal to Red Lead, for steam and hot water joints.

Refer to J. W. and J. F STARR, Camden, N. J.. MORRIS, TASKER & CO. MERRICK & SONS, Philadelphia.

FOR IRON FOUNDERS' PATTERNS.—Five parts by weight of it to one of gum shellac dissolved in alcohol, will make a covering more impervious to the damp sand or loam than shellac alone of equal consistency.

Refer to THE NOVELTY IRON WORKS, New York.

FOR STAINING.—Oak, Mahogany, Rosewood and Walnut Stains for Furniture, we warrant it equal to Turkish Umber. Its natural colors are Umber, Brown, Lake, Olive and Lead color, which may be combined in endless variety. We hope soon to have other colors much lighter.

ANALYSIS.

DENNIS BAUMAN & CO.,
Parryville, Carbon County, Pa.

The following are the results of Analysis of your Poco Metallic Paint.—Peroxyde of Iron 55.84; Red Oxyde of Manganese, 1.65; Lime, 2.52; Magnesia 1.29; Alumina, 9.00; Silex, 29.70;—100 parts.

The Analysis proves that this paint is not likely to be altered in the slightest degree by ordinary atmospheric agents, such as sunlight, rain, cold, or heat. We therefore regard your Poco Metallic Paint as of the most durable character

BOOTH, GARRET & REESE,
Practical and Analytical Chemists.

JACKSON'S

PREMIUM NON-CONDUCTING

FELTING

For Covering LOCOMOTIVE, STEAMSHIP and STATIONARY ENGINE BOILERS, STEAM and WATER PIPES.

NATIONAL FERTILIZER.

The attention of Agriculturists is requested to this ECONOMICAL and SUPERIOR **FERTILIZER.** It possesses all the good qualities of the best known manures, without any of the injurious effects produced by the over-active Ammonia in Guano and kindred FERTILIZERS, while its *price* is **less than one-half of the Peruvian** Guano. The various materials composing this Fertilizer, are so chemically combined, that they are gradually evolved by the heat and moisture of the earth, and furnish to the plant all the requirements for a **rapid and luxurious vegetation.**

[COPY.]

NEW YORK, Sept. 8, 1860.

I have used about one ton of the NATIONAL FERTILIZER manufactured under Dr. L. Harper's patent, on my sugar plantation in the Island of Cuba, and although tried upon very poor soil, realised a fine crop. I used it in the same way and in the SAME QUANTITY as I use Peruvian Guano. I can confidently recommend it as in every respect equal to Peruvian Guano for sugar cane.

D. DE HEIVERA.

HISTORY

OF THE

RAILROADS

AND

CANALS

OF THE

UNITED STATES

OF AMERICA

EXHIBITING THEIR

Progress, Cost, Revenues, Expenditures

AND

PRESENT CONDITION.

By HENRY V. POOR, Esq.,

Editor of the 'AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale Ulster Co. N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER, 104 Wall st.**

The above CEMENT is used in most of the fortifications building by government. 45

ROSENDALE HYDRAULIC CEMENT.

ROSENDALE AND KINGSTON CEMENT CO. Manufactory at Kingston, N. Y. on the West Bank of the Hudson River. Office 41 Pine st., New York City.

PATENT ASPHALTIC
ROOFING FELT.
THE BEST, CHEAPEST AND
MOST DURABLE ROOFING KNOWN.

THE IMPROVED PATENT ROOFING FELT furnished by the Subscribers is entirely free from the objections hitherto urged against articles that have been furnished under similar names by various partics.

It makes a **light, cheap, durable,** and perfectly **Fire** and **Water-proof Roofing** for **Churches, Farm Buildings, Railroad Depots, etc.**

It forms the best and cheapest lining for Stores, Granaries, Barns and Wooden Buildings, as rats, mice and other vermin will not touch it.

It stands all climates and has been extensively furnished to the British Government for use in their widely scattered foreign possessions. The Turkish Government used large quantities of the Felt for roofing their hospitals and stables in the late war.

In this country first class dwelling houses have been roofed for three years with this Felt, and the owners who used tin now prefer this Roofing Felt.

Also an entirely new, superior and cheap **ROOFING CEMENT** for the above Felt and leaky tin roofs.

For Samples, Circulars, etc., apply to

EDMISTON BROS.,
No. 3 Bowling Green, New York.
N. B.—Agents wanted.

CEMENT ROOFING.

PATENT MICA
AND
Fibrous Cement Roofing.

IT HAS STOOD THE BEST OF ALL TESTS—TIME!

IT fully sustains the high reputation it has gained, as a PERFECTLY RELIABLE, DURABLE and WATER PROOF ROOFING. It is adapted to every variety of Roof, new or old, and is the best and cheapest Cement in use for repairing OLD LEAKY TIN or other Roofs.

ALL WORK WARRANTED.

Cement for sale by the Barrel, and sent to any part of the Country, with printed instructions for use.

Also, for sale, State and County Rights for a portion of the United States. **DITTO, PORTER & CO.,**

Illinois Central Railroad.

The recent census of Illinois, of which we are getting returns, has an important bearing on the success of this great enterprise, as the sale and value of its lands, and the extent of its traffic, must be in very direct ratio to the number of inhabitants upon its line.

It is now ten years since the grant to this company was made. At that time the population of the State was 851,000, which was at the rate of about 15½ to the square mile. This population was found chiefly along the line of navigable water courses. Within the limits of the grant made to the Central Railroad, it did not probably exceed seven to the square mile. The immense plains traversed by this road would, at the present time, be considered as almost uninhabitable without it.

All this is entirely changed. The tide of emigration now sets towards the very districts avoided before the construction of railroads. The great gain in population, consequently, has been upon the lines of these works, and has been beyond all precedent in this country, as is proved by the recent census of the northern judicial districts of the State, which we give elsewhere. This district, embracing 35 of the 102 counties, contained, in 1850, a population of 335,442; in 1855, 606,898, and, in 1860, 819,167. The absolute increase in the 10 years has been 483,725; the rate just about 150 per cent. The returns from the southern district have not been fully received, but if we estimate the rate of increase within it at only 100 per cent., the total population in the State, at the present time, is 1,850,000. That this is not far from the actual number, is shown by the number of votes cast at the late presidential election. The total vote was 340,215. The ratio of votes polled in the northern district was one to five and a-half of the population. A similar ratio would give the southern district fully 1,050,000 inhabitants.

Such a migration, in the short space of 10 years, has been without a parallel in the history of this country. The greatest previous increase of any new State was that of Ohio from 1820 to 1830, in which period the population went from 937,903 to 1,519,467. The greatest absolute increase in the population of any State was in that of New York, from 1840 to 1850, which rose from 2,428,921 to 3,097,394. One-half of this increase was in the cities of New York and Brooklyn.

As there is a necessary ratio between the number of inhabitants on a given area, and the value of the lands embraced in it, it will be seen that the Illinois Central enterprise, as far as its value depends upon its lands, is steadily and rapidly improving. Up to a certain point, the increase in the value of lands is in a ratio much greater than that of the population living upon them. The reason is obvious. The first settlers are always farmers. It is the addition of other classes that creates a dense population, and a home market for the products of agriculture. If with a population of five to the square mile, land would be be worth $1.25 per acre, the government price, it would be worth ten times this sum, with a population of 25 to the square mile. That the demand, and consequently the price increases in greater ratio than the population, is a fact within the observation of every one.

Under all its vicissitudes, consequently, the actual condition of the Illinois Central has been steadily improving. The value of its lands in the outset may have been over-estimated, and with it, the ability of the people of the State to purchase and pay for them. The disappointment resulting therefrom may have caused a great fall of the securities of the company; but their actual value was never less at one period than at a previous one. The same was true whether the purchasers of lands paid for them or not. They were paid for as fast as the settlers had means. These were greatly reduced by three years of short crops. But in the meantime the company adopted the wise policy of selling on easy terms, as far as credit was concerned, and in this way attracted an immense migration into the State, from which it could not fail to be greatly benefitted, even if not an acre of its lands had been sold thereby. The population is either upon or in the immediate vicinity of the line of the road. It is all productively employed. From its presence in the State the actual value of the lands of the company has been doubled, and the product of its industry is now swelling the traffic of the road.

Here then is something affecting the value of this enterprise, which a person abroad can understand as well as one directly upon the ground. If the lands owned by the Central Railroad Company, were worth five dollars the acre, with a population in the State equalling 15 to the square mile, they must be worth more than 10 dollars the acre with 30 to the square mile. There can be no mistake in this proposition. The next question is what ought lands in Illinois to be worth with a population of 30 or rather of 33 to the square mile, which is about the present rate. Ten dollars per acre is certainly a low price. But it is not our object to establish, or estimate their value, only to show that whatever it may be, and whether sold or not, they must continue to advance very rapidly, and that nothing has been lost by lapse of time, or failure to make present sales or collections. It is enough to know that within 10 years, 1,000,000 people have gone into the State, attracted by the cheapness and fertility of its lands and that this movement of population must, for an undefinite period continue equally great in volume, if not in ratio with previous decades. The State is as rich in minerals as in soil. In position among

her sister States, in climate and in commercial and manufacturing facilities, she is unsurpassed. With 300 to the square mile, the State would not be crowded, when the extent of her resources is considered.

The recent census discloses the remarkable fact that the emigration into the State since 1855, has been nearly as great as from 1850 to 1855. It has been supposed that the crisis of 1857 had put a stop in a great measure to the movement of our people westward. That the contrary is true has been shown by the recent poll in this State which exceeds by 103,000 that of 1856, which was a very excited canvass. As votes polled to the whole population are in ratio of about one to five and a half of population, the increase in this State since 1856 would, by this test, be 550,000.

Whether these figures have been reached or not, certainly there never was so grand a movement of people in so short a period, nor any previous one followed by such great results. Within the 10 years, 1,000,000 souls have been added to the population of the State. In its material interests there has been vastly greater progress. Since 1850 the entire railroad system of the State, embracing 3,000 miles of line in operation, has been planned and executed, The sum invested in these works will exceed $100,000,000. But this is not a tithe of the investments made in the State, in other enterprises; in the cities and towns that have been built; the manufacturing establishments that have been put in operation; the expensive works constructed to facilitate commercial operations; in the purchase of lands and in the improvements made upon them. The building up of such a State as Illinois in so short a period, is the most exhaustive work that a people can possible undergo. For many years in succession, it is all expenditure and no income. A point is now reached in which the balance other side of the ledger is being made up. The Railroads of the State like the people have had their share of hard times. We have good reason to believe that such companies as have been able to live through the past will be able to present satisfactory results for the future.

Rolled and Hammered Axles.

As far as hammering is concerned, it injures the iron if continued until after the latter has cooled below a good working heat. Cold hammering is practiced at many forges, and we doubt if its injurious effects are counteracted even by subsequent annealing. The hammer is undoubtedly the best instrument for expelling impurities in the earlier stages of the manufacture of an axle, but the finishing process is best performed, we think by rolling. There is a common opinion that a rolled axle journal heats sooner than one which has been hammered. We doubt if this be so, inasmuch as all the hammer-hardened surface of a hammered journal is turned off in finishing. We should be glad to see the whole question of the comparative merits of rolled and hammered axles settled by experiment. The southern roads now use rolled axles almost entirely, but the weight and speed of trains in the South is insufficient to decide the matter fully. The Pennsylvania Central road, however, which has some very heavy sleeping cars on its express trains, now use rolled axles exclusively, and, we believe, with the best results. The Hudson River road would give still better opportunities for testing both kinds of axles conclusively, and we should like to see a trial made there. The trains are the fastest in America, and the weight of some of the new 64-passenger cars is as much as 29,000 lbs. On the Erie road some of the cars are still heavier, but the Erie road now makes its own axles, from scrap hammered under a steam hammer at the Susquehanna shops. There are many railroad men who will commence some comparison of different kinds of equipment or railroad materials, but where the comparison must necessarily extend over several years they are apt to neglect it. For any proper comparison, therefore, every axle should bear the date of its manufacture. So far as we are aware the practice of stamping the date on each axle is followed only by Mrs. A. & P. Roberts, of this city, who make both rolled and hammered axles and have no preference for one over the other. Messrs. Bush & Lobdell cast the dates of manufacture also on their wheels.—*Engineer.*

Railroad from Nashville to Mobile and Pensacola.

We copy the following letter in reference to lines of railroads designed to connect the South-west with the Gulf of Mexico. It is addressed by J. W. Sloss, Esq., of Athens, Ala., to S. D. Morgan, Esq., of Nashville, Tennessee, both of whom are well known for their efforts in the cause of interna improvements in the Southern and South-western States.

ATHENS, ALA., Oct. 6th, 1860.

S. D. MORGAN, Esq., NASHVILLE, Tenn.

Dear Sir:—I am in receipt of your letter of 21st ult., making enquiry as "to what had been done and what is likely to be done in extending the line of road from Decatur to Mobile and Pensacola, &c."

For many years, the subject of uniting the Gulf of Mexico with the Lakes of the North, by means of a Central Trunk Railway, has been prominently before the citizens of Alabama, and many efforts have been made to consummate this much desired end; but until within a few years past, nothing has been accomplished that promises success. At this time, however, I am pleased to have it to say, that from the city of Nashville to Mobile and Pensacola, every mile upon the line is let to contract, and every company without a single exception have the ability, and is pushing forward the work with great energy.

By reference to the accompanying map, you will find, that between Pensacola or Mobile and Decatur, there are five lines, all of them being "links" in this Central Trunk Railway, that is to say:

1st. Alabama and Florida Railroad.
2nd. South and North Alabama Railroad.
3d. Tennessee and Alabama Central Railroad.
4th Mobile and Great Northern Railroad,
5th. Selma and Gulf Railroad.

I propose to show the points connected by these several lines—their progress and prospects, and to do so comprehensively, I will take them up in the order in which they are mentioned.

1st. The Alabama and Florida Road extends from Pensacola to Montgomery, a distance of 160 miles. Its construction is very nearly complete—having 110 miles finished and running—the remaining 50 miles nearly graded—with the iron bought and being laid as rapidly as the road bed is ready to receive it. It is expected to be finished and running through by next spring.

2d. The South and North Alabama Road takes up the line at Montgomery and extends to Montevallo. This company have ample means to construct this road, and, being of light grades, its cost will be comparatively small. The grading will be done by a company force, now at work. It is expected to be finished and in running order within the next eighteen months.

3d. The Tennessee and Alabama Central Road takes up the line at Montevallo and extends to Decatur. This company organized a few weeks since, and will commence operations by the 1st of January next. They have ample means to build the road, having received in addition to individual subscriptions, a large appropriation of money as a bonus from the State, and some 400,000 acres of land by the Congress of the United States. This road will also be built by a company force, and they have secured 400 hands to be placed upon the work by the 1st of January next. No doubt is entertained as to the certain completion of this road at the earliest practicable period.

4th. The Mobile and Great Northern Road extends from Mobile to Fort Crawford, a point upon the Alabama and Florida Road. This road is in safe hands—they have the means and are pushing forward the work with great energy—the whole is let to contract, all of the iron is purchased and it is contemplated to have 65 miles in running order by the 1st July next.

5th. The Selma and Gulf Road will connect Selma with Pensacola and Mobile, and will intersect with the Mobile and Great Northern and the Alabama and Florida Roads at or near Fort Crawford. Its construction is being energetically pushed forward. Selma is also the terminus of the Alabama and Tennessee Rivers Railroad, and is nearly due South from Montevallo.

The following table of distances will show the length of the several links in the main line as well as the distance from Pensacola or Mobile to Nashville:—

	miles.
Pensacola or Mobile to Montgomery	160
Montgomery to Montevallo	65
Montevallo to Decatur	121
Decatur to Nashville	120
	466

Making the length of the Central Trunk line from Pensacola or Mobile to Nashville, by way of Montgomery or Selma, (both lines being about the same length,) four hundred and sixty-six miles, and about as near an "air line" as can be obtained.

It will not be amiss to mention some of the advantages arising to this line by means of its connections and crossings, as well as the character of country and productions through which it passes.

From Nashville to Decatur it traverses the richest portion of Middle Tennessee. At Decatur, which is in the centre of the Tennessee Valley, it crosses the Tennessee river, where it intersects with the Memphis and Charleston Railroad, a distance of 180 miles from Memphis. Leaving Decatur, it reaches Montevallo, having passed through centrally, the mineral region of Alabama, which according to Prof. Toumey, State Geologist, abounds in Iron and Coal, and according to which statement the road runs through an area of about 5,000 square miles of Coal, which having been tested, is found to be well adapted to steam marine purposes. At Elyton, 30 miles North of Montevallo, it crosses the North-east and South-west Railroad which going South-west, extends into the State of Mississippi, and by the connection of this road *as near a route is offered from Nashville to New Orleans* as by that of any *other route now projected.* At Montevallo it intersects with the Alabama and Tennessee Rivers Railroad. At this point two lines are presented going South to Mobile or Pensacola, the one by way of Montgomery and the other at Selma. At Selma a number of roads are built and being built extending into the very heart of the cotton growing region of Alabama and Mississippi. At this point and at Montgomery the Alabama river affords a good navigation to Mobile for the greater portion of the year. At Montgomery a number of roads are built and being built leading in every direction from the city. The most important one to them and to the "main line" (aside from the "main line" to Pensacola and Mobile) is the Montgomery and Eufaula Road, which, running in a South-easterly direction, penetrates the richest and most extensive Cotton growing region of Alabama and South-west Georgia, and it is designed by this road to reach the South Atlantic at Brunswick. At Fort Crawford, the two main lines, viz: by way of Montgomery and Selma, come together, when they connect with the roads leading directly to Mobile and Pensacola.

Thus it will be seen that the time will soon come when there will be a Central Trunk Railway, extending from the Gulf to your city and beyond to the Lakes, which will traverse almost every degree of latitude—every character of soil and climate, and every variety of products.

It is a striking fact in the principle of constructing public thoroughfares, and especially is it true when applied to Railways, that that location is most remunerative as an investment, as well as most beneficial when constructed across parallels of latitude. The reason is obvious. The productions of latitude differ and there must of necessity be an interchange of commodities.

How then will the construction of this Central Trunk Road affect commerce. In my judgment it takes no prophetic eye to discern the result, and it behooves the commercial men of your city as well as of those cities lying beyond you, to examine well into this matter, and see the bearing the opening up of this great thoroughfare will have upon your future commerce.

Two causes have operated *very greatly* to the detriment of the Commerce of the ports upon the South Atlantic and Gulf of Mexico. One is the visitations during the summer months of that dreadful scourge of the South—yellow fever,—the others is the incapacity of their harbors, to admit any but the smaller class vessels. Every one of them, without a single exception, *having communication* with the interior, are inaccessible to the larger class vessels, and suffer more or less from the yellow fever, and without dwelling upon this point, I repeat, that these two causes have done more to injure and destroy the commercial interests of the South Atlantic and Gulf Ports, than every other cause combined. Remove these difficulties from Charleston and New Orleans, and the result to their Commerce can be hardly computed.

Pensacola is, perhaps, *the best, if not the only good harbor upon the Gulf*, and is the best in the Southern States, except Norfolk. It will admit vessels drawing 22 feet water. It is also *remarkable* for its healthfulness.

Mobile under a system of dredging lately adopted is endeavoring, and it is confidently believed will very greatly improve her harbor.

When Pensacola and Mobile shall have completed the various lines of Railways now projected and under construction—extending in almost every direction into the interior, especially the Central Trunk Railway, they will become easy of access from all sections of the Union. And furthermore, with all the advantages arising to them by these railroad connections—with their inexhaustible supplies of Ship timber—with the immense coal fields of Alabama opened up to them—with the further fact, that they are in close proximity to the Gulf Islands, and of the Central and South American States, and being nearly due North of Tuhuantepec and the other "lines" of travel of the Central and South America States, they could by an increase of shipping and establishing lines of steamers to run between these various points, draw to them and control a very large proportion of the Commerce of the Gulf. Especially would they be enabled to concentrate to them and transport a large proportion of the immense travel, which is now for the most part, controlled by New York; and instead of the freight and travel from the West and North-western States, going to the West Indies, Central and South America and California, having to seek a means of transportation at New York, as is now the case, this route being nearer, more direct, safer and cheaper, would concentrate and control a large proportion of it.

To conclude. Our trade with the Gulf Islands, Central and South America, is principally in *provisions*, and a close observer of the commercial world cannot fail to have seen the rapid growth of this trade, and the public mind has not been unmindful of the fact, that the shipping upon the Gulf has been, and is now, wholly inadequate to meet the demand. To increase the shipping and to foster and build up this trade, nothing more is required, than a *good safe harbor* upon the Gulf—made acceptable to every portion of the Union. With a Port, affording such advantages, it would in a short time become the "Queen City" of the Gulf.

I have extended this letter much beyond my expectations.

Very respectfully,
J. W. SLOSS.

Detroit and Milwaukee Railroad.

C. J. Brydges, President of the Detroit and Milwaukee Railroad, has addressed a letter to the bondholders and other creditors of the old Company, giving the present financial condition of the corporation, and asking that the interest maturing on the 1st and 2nd mortgage bonds may be funded. We copy a few figures from Mr. Brydges' letter, showing the rapid increase on the traffic of the road.

The following statement of the weekly receipts since the last harvest, as compared with last year, is very satisfactory, and gives every hope for the traffic of the line in future, viz:

		1859.	1860.	Inc.
11th	Aug.	$10,337 70	$10,505 84	$ 168 14
18th	do	11,472 24	13,154 76	1,682 52
25th	do	14,490 53	13,432 05	1,941 52
1st	Sept.	14,214 92	15,655 78	1,440 81
8th	do	14,269 01	22,476 87	7,207 86
15th	do	15,286 26	21,735 26	6,419 00
22d	do	14,497 54	20,645 84	6,148 30
29th	do	17,332 27	20,849 67	3,517 40
6th	Oct.	19,688 90	20,849 56	5,460 66
13th	do	17,048 31	23,886 18	6,837 87
20th	do	16,876 06	25,470 37	8,894 31
		$163,513 74	$212,662 13	$49,148 39

Making the average traffic since August 11, amount to $10,332 92 per week. These receipts place beyond doubt the ability of the company, if it had not certain debts which must be paid in cash, to pay interest upon its bonds.

The cost of running the steamships forming the connection between this city and Grand Haven, is about $130 a day each, or $260 a day for both, against a cost of $460 a day paid for the insufficient boats previously chartered.

The cost of working the boats first chartered and of those now owned by the company, and the comparative amount of through traffic which each brought upon the railway, will be best seen by the following statement, corrected as to date to make a proper comparison.

In the following statement, the boats are credited with their proper proportion of the receipts:

	Earnings.	Expenses.
Old boats	$48,679 75	$104,555 14
New boats	70,619 74	70,583 80
Increase in earnings in favor of new boats	$21,939 99	
Decrease in expenses in favor of new boats		$33,971 34

And the benefit of the through traffic of the line is equally satisfactory, viz:

	Passengers.	Freight.	Total.
Old b'ts run'g	$65,585.51	$44,618.57	$110,204.08
New b'ts run'g	91,124.14	144,105.61	205,229.75
Inc. caused by new boats	$25,538.63	$69,487.04	$95,025.84

In regard to the new organization Mr. Brydges says:

The court, on the 6th August, 1860, ordered a decree for the sale of the road, and on the 4th October last it was by the officers of the court sold by public auction, and bought in by trustees, acting for a proposed new company. This company is now provisionally formed, subject to the future concurrence of the holders of securities to those of the first and second bonds. If this concurrence is procured, these provisional arrangements will be carried out by the actual completion of the new company; if such concurrence is not given, the direction of the court will be required as to the step necessary to be taken to permit of the floating debt creditors asserting any rights that they may have, and which for the present they have agreed to waive for the purpose of saving all parties from the great expense and delay of a harrassing legal contest.

In the mean time, the first and second bondholders of course retain their original position.

The Great Western Railway Company, which holds the bonds of the third and fourth mortgages now under foreclosure, although they have not received any interest upon their loans, have been receiving a very large and continuous accession to their traffic from this railway, to an amount which has yielded a very handsome percentage upon their loans, and this benefit is constantly increasing as the traffic of this line itself becomes developed.

Winans' Incrustation Powders.

We invite attention to the Avertisement of Mr. H. N. WINANS, of 11 Wall St., this city, to be found in another column. The testimonial of Mr. Congdon speaks very highly of the value of this preparation. The following article in reference to it is from the *American Railway Times*:

The formation of incrustations in steam boilers, from impurities in the water used for making steam, has proved the destruction of much life and machinery. Some engineers assert that blowing off is all sufficient for the prevention of scale; but if it is, the persons in charge of the thousand boilers using dirty water won't blow their boilers off, and so the evil continues and explosions are not prevented. The impurities in water are either mechanical or chemical; perhaps only mud and dirt in suspension, or perhaps lime more closely combined. Filtering has been found an efficient remedy in many cases, and boiling the water in connection with charcoal has been thought well of. If the water before being filtered can be heated to expel all the air and carbonic acid, which is often the solvent of the foreign matter, the operation will be more complete. If, however, no precaution is taken before the water comes to the boiler, it is necessary that something should be done afterwards. The managers of the locomotives upon our railways in the west, can testify as to the need of some decided remedy for the scale precipitated by the waters of that region.

Scale being a non-conducter of heat, it prevents that imparted to the metallic surface from being readily taken up by the water. Standard authorities report 1-16 of scale equal to a loss of 14.7 per cent. of heat or fuel. The plates of a boiler never get hotter than the water, when in contact with them, whatever may be the outside temperature, and the water never gets hotter than some 330 degrees, under 100 pounds pressure. So clean boiler plates would last for years; but when coated with scale, and thus removed from direct contact with the water, get so overheated as to deteriorate in quantity and quality. This burning out of the boiler plates is one great cause of repair, equal in many instances to as high as 25 per cent; and in waste of fuel from 10 to 40 per cent. But the cost is not the only disadvantage; it is a source of positive danger. When the scale gets thick, and the plates consequently very hot, the former is liable to crack off, bringing the water in contact with the overheated metal, thereby causing explosion.

Since the depository of scale is a chemical operation, it seems proper to apply a chemical remedy to dissolve the same. This is done by the compounds called incrustation powders, which are thrown into the tender or into the boiler. These powders claim to be compounded upon scientific principles, and from testimonials from many sources they act with the best effect.

We are assured upon the best authority that the material does not cause "foaming," and is effectual in stopping leaks. Mr. Grier, at Attoona, thinks it invaluable for that purpose. The fact that it is largely in use on the New York Central, Michigan Central, and other leading Roads is suf-

ficient guarantee of its excellence. Its use on the Virginia and Tennessee Railroad since 1857, under Robert Gwynn and George Glass as Master Machinists and W. C. Smith and Mr. Gill Superintendent at the present time, speaks volumes in its favor.

The Dayton and Michigan Railroad use it as one of the *necessaries*, and would as soon do without oil and fuel as this powder of Mr. Winans. W. & E. T. Fitch, of New Haven, Conn., have replaced their old cylinder boilers, with tubular ones, as this material was found to *prevent*, as well as to remove the crust.

Railroads in Georgia.

EXTRACTS FROM THE MESSAGE OF THE GOVERNOR OF GEORGIA.

It will be seen upon an examination of the Report of Dr. John W. Lewis, the able and faithful superintendent of the State Road, that the road is in excellent condition in every department; and that the net amount paid into the State Treasury, for the past fiscal year, is $450,000. This sum has been paid into the Treasury, after deducting all expenditures and making all necessary repairs, and after paying $22,940 of bonds and coupons of funded debt of the road, which fell due 1st January and July last; together with over ten thousand dollars of other old claims, which originated before the commencement of my term in office, and which had been for years in litigation. It affords me pleasure to add, that the officers of the road, in every department of its management, have generally been diligent and attentive, and have acquitted themselves with much credit, during the past year.

The crop just matured in this and adjoining States, is known to be a very short one; and great demand for bread is anticipated during the approaching season. With a view to affording all the relief in my power to our people I shall exert all the influence I may possess, in favor of a through rate upon corn, wheat and other grain, from the West, which will bring them into this State at as low a rate of freight as the different roads can afford to carry them. This can be effected only by concert of action among the authorities of all the roads, over which the grain must pass; and it is to be hoped that none will be found wanting in liberality, in this emergency. It is true that these low through freights will diminish the amount of incomes from the Road which might otherwise be paid into the Treasury during the present fiscal year, but our people will be amply compensated by a cheaper supply of bread.

I have considered the propriety of bringing grain, to be consumed in the State, over the Road free of charge; or at a figure that would pay only the actual cost of transportation, without any profit. Were such a rate of freight adopted, I am satisfied the result would be, that the company roads, which form links in the chain from the West, would advance there rates of freight so as to keep the cost of transporting grain over the entire line, but little, if any, below what it is now. The result would be, that the price of grain would be nothing less to the consumer, while the State Road would lose her just proportion of the through freights, which she receives under the present schedule. Suppose, for instance, it costs twenty-five cents, per bushel, to bring corn into this State, from the West, over the route by way of Baltimore, or by the way of New York. The roads forming the route by way of Chattanooga, will not be likely to bring it for much less; as the demand is here, and must be supplied; and they will do the carrying if they keep but a cent or two, in the bushel, below the other routes. Interest will prompt them to keep their freights as high as they can, without losing them by the competition with other roads. Should the State Road carry for nothing, in the case supposed, the other roads forming the line, would still charge twenty-three or four cents, on the bushel; which would be one or two cents less than the freight charged on the other routes. This would secure to them almost as complete a monopoly in the business of carrying corn, as if they carried it for half the sum. The State would lose her part of the freight, while company roads, mostly out of the State, would divide it among themselves; which would greatly increase their profits, lessen the incomes of our Road and result in no material benefit to consumers in the State.

Again it would be impossible to determine what grain, passing over the road, was intended for consumption in this State, and what for other States, or for exportation to other countries.—Speculators, buying to sell in other States, or for exportation, shipping over this route, might report their grain for Georgia consumption, and consign it to Atlanta, Macon, or Augusta, and take the benefits of through rates over the line; and of free transportation over the State Road. They could then arrange with the consignees at those points, to reship it to South Carolina, Alabama, or other destinations beyond the limits of this State, for consumption in which it was originally intended.

For these and other reasons, I am satisfied that the free transportation of grain, or other bread-stuffs over the State Road, would result mainly to the benefit of other railroads, and speculators, without material benefit to the consumer. I do not, therefore, consider that it would be wise to adopt that course; but think it best that the authorities of the State road, act in concert with the authorities of the other roads, and do all in their power to procure from the roads, such rates of through freight as will afford grain to our people at as low a price as possible. If the State had the control of the other roads over which it must pass, the case would be very different, as she would then have the power in her own hands, to regulate the price on all; but it should be remembered, that the road over which the State has control, is only one of the shortest links in the chain.

I trust the cause of alarm on account of the scarcity of grain in the country, is much less than many have supposed. My opinion is, that abundant supplies can, and will be brought into the State, and sold at prices nearly, or quite as low as those paid during the past year. I shall contribute all in my power to this result; which I consider of vital importance to our people. I will cordially sanction any law which may be devised by the wisdom of the Legislature, for the assistance of the afflicted, or more indigent and distressed portion of the people. As a tax-payer and a citizen, I will cheerfully contribute my part towards the assistance of those who are in distress and are unable to help themselves. I commend this subject to the careful consideration of the legislature.

In my last annual message, I gave somewhat in detail, the reasons which influenced my judgment, in arriving at the conclusion that it would be, not only sound and safe, but wise policy on the part of the State to lend her aid, by allowing the use of her credit, to such Railroad companies in the construction of their roads as will accept it upon the terms, and subject to the liabilities and restrictions therein prescribed. My mind has undergone no change upon this question. Observation and more mature reflection have fully confirmed my previous convictions. I therefore, for the reasons given in said message, renew the recommendation therein contained.

A reference to the past history of *State Aid* to Railroads, in Georgia, is probably one of the strongest arguments that can be adduced in its favor, in future. The State, by payments from her Treasury and the use of her credit, built the Western & Atlantic Railroad; which has not only developed a rich section of her territory, and added many millions to her wealth, and thousands to her population, but is now paying into the Treasury ten per cent. per annum, upon the whole sum paid out of the Treasury and raised by the sale of bonds, for the construction of the Road; besides affording the means of transporting into the State the supplies of grain at present absolutely necessary to the support of her people. Georgia, has not, therefore, been injured by her first grant of State Aid in the construction of a Railroad. The second instance was that of the Milledgeville and Gordon Road, in which she took $20,000 of stock. Upon this stock, she received interest at the rate of six per cent. per annum, while she owned it; and on the sixth day of June last, under the provisions of the Act of 1859, she sold it at par, for cash, to the Central Railroad and Banking company; with which it is now consolidated. The third and last case of direct aid by State appropriation, in the construction of a Railroad, is the Atlantic and Gulf Road, in which she bound herself to take $1,000,000 of stock. This road is being rapidly constructed; and I am informed that the State will have no difficulty in disposing of her stock in it, at par, so soon as the road is completed. To do this, in my opinion, would be good policy; provided that the money is again invested in the construction of such other roads as develop the resources of other sections of the State.

I again visited this road in May last; and found that fifty-two miles of it had been completed since my visit one year previous. There is probably no road in the State so well built, upon which more rigid economy has been practiced. Its construction and management reflect great credit upon its able and energetic president and other officers.—The road is developing a most interesting portion of our State; and it is believed that the increase in the value of the lands in the counties through which it passes, from the day when it was commenced to the day of its completion, will be more than the entire cost of its construction.

Spain—Its Efforts and Progress.

The subjoined synopsis of railway progress in Spain is from the pen of Mr. Charles Vignoles, an authority of more than ordinary eminence:—

"South Madrid a line is open from Cadiz to Seville, with a continuation to Cordova; another through Aranjuez and Albuceta, to Alicante, with one branch to Toledo and another to Valencia.

"North of Madrid, two great arterial lines are under construction: one proceeding north-west to Avila and Valladolid, and thence north-east, by Palencia, Burgos, Miranda de Ebro, and Vitoria, to Alsasua, at the foot of the Cantabrian, Pyrenees. The other running north-east, through Guadalamara and Calatayud to Zaragoza, thence turning north-west, and following the left bank of the Ebro to Tudela and Castejon; here diverging north, crossing the Ebro, and following the valley of the river Aragon, and afterwards that of its tributary, the Zadacos, through Tafalla to Pamplona, and from Pamplona changing direction to the westward by the Barunda Valley to Alsasua.

"From Alsasua, where the two meet, one line only proceeds to cross the Cantabrian Pyrenees—winding through the Pass of St. Adrian and down the flanks of the mountains to Onate and Villareal, and thence along the tributaries and main valley of the river Orio past Tolosa to Lasarte;—here, crossing a low ridge through a winding gorge to the sea-coast, passing St. Sebastian, Passajes, and Renteria, to the frontier of France, which is here formed by the river Bidassoa flowing between Behovie in France and Yrun, the last town in this part of Spain.

"From Yrun, the the French authorities are laying out the continuation of the line through St. Jean de Luz and Biarritz to Biayonne, skirting that town east of the fortifications, and crossing both the rivers there to join the existing railway from Paris, through Tours and Bordeaux, which terminates at Bayonne.

"These lines are nearly all in various stages of construction. The western is known as the Northern of Spain, and is under the same general management all the way to the French frontier. Portions are nearly finished between Valladolid and Palencia, and on the other parts the progress

making may be seen from many places on the highroad between Bayonne and Madrid.

"The eastern is called the Madrid and Zaragoza, as far as the latter city. It has been opened from Madrid to Gaudalamara, and the works are advancing on the other parts. The continuation west and north is known as the Zaragoza and Alsasua; and considerable progress has been made in many places, particularly north of the river Ebro.

"In a few years the railway communication from Paris will be completed across the Cantabrian Ridge, and thence in two directions to Madrid. Meanwhile, a branch of the Northern of Spain is advancing northward from Palencia, running parallel to the Grand Canal of Castile; at the head or termination whereof, at Alar del Rey, a railway, already in operation, extends about 25 miles, still proceeding north, to Reinosa a small town high up on the southern slope of the Cantabrian Ridge, not far from the source of the Ebro. Another section comes up from the Bay and town of Santander towards Reinosa, for something more than 20 miles to Somahoz, a village in the valley of the river Besaya, from which point the line is being extended some miles further to Barcena, in the same valley; but between Barcena and Reinosa (a difficult and expensive section) the works have only lately been commenced.

"On the eastern side of the Peninsula two or three short lines run from Barcelona, of which the coast line, opened to beyond Mataros, on the north, will be extended by the Spaniards through Gerona, to Figueras on the French frontier, and there taken up by the French, will be connected with their south system, at Perpignan.

"Besides these is the railway from Barcelona towards Zarogoza; about half of which, that is, as far as Lerida, has lately been completed, and the remainder is in course of construction. A coast line has been studied and approved of, from Barcelona, by Tarragona, Tortosa, and Castellon de la Plana, to join the line from Madrid at Valencia.

"A line has lately been approved of by the Spanish Government to proceed westward from Palencia to Leon, and thence, winding through the Cantabrian Ridges by Lugo, to Corunna and Ferrol.

"An important line is making from Bilbao to Orduna, through the Gujuli Pass of the Cantabrian Pyrenees, and along the valley of the river Bayas, by Poves, to Miranda on the Ebro, where it connects with the Northern of Spain coming from Valladolid and Burgos through the Pass of Pancorbo, and proceeding to Vitoria and Alsasua towards Bayonne. This line will be opened to Orduna early next year, and by the end of that year to Miranda de Ebro.

"The line from Bilbao, after crossing the river Ebro to Miranda, follows the left bank for 90 miles through the towns of Haro and Briones, the marts for the celebrated wines of the Rioja district, sent largely to France to strengthen the Bordeaux wines; and from Haro by the once famous Convent de la Estrella, Montalvo, and Cenicero, to Logrono, one of the most pleasant towns in Spain, where the warrior Espartero, Duke of Vitorio, lives like a Cincinnatus; from Logrono, always closely skirting the Ebro, by Calahorra, famous in Roman history, Rincon de Soto, and Alfaro; beyond which last town, at Castejon, this line, which is called the Tudela and Bilbao, joins that coming from Zaragoza through Tudela, and proceeds as previously described, to Pamplona and Alsasua, and by the Northern of Spain ultimately to Bayonne. The Todela and Bilbao will be entirely completed before the end of 1862.

"Spain it will be thus seen, is rapidly improving her internal communications; and indeed the whole country is advancing in prosperity with a silent though regular and unceasing step; and a few more years of continuance in this wise and healthy career will enrich our inhabitants and consolidate her government and institutions, bringing her also into more intimate connection than hitherto with the rest of Europe."

During the year the Spanish Government has approved of a concession of the Ciudad-Real and Badajoz to Don Jose Forus, with a subvention of 970,000*l.* in specie or in State "obligations." The concessionist represents four banking houses, besides contractors. M. Salamanca, the well-known capitalist, obtained the concesson for the Albacete and Carthagena. Before the works commence, the original surveys upon which the concession was based are to be checked by the engineers, and is said that some important modifications will be introduced into the details.

The Barcelona and Saragossa will be in full working order, shortly. The new line from Carthagena to Alicante has been sent out by the engineers, and will have stations at Murcia, Oribuela, Collosa, Catral, and Elche. The concession of the Tarragona and Barcelona has been granted to Don Magin de Grau.

Patent Exhaust Steam in Locomotives.

UNITED STATES CIRCUIT COURT.

Before Judge Nelson, Shipman and a Jury.

Ross Winans vs. Charles Danforth, et al.—This was an action for damages for an alleged infringement of a patent granted in November, 1846, to the plaintiff, for an improvement in the machinery of locomotive engines, by which the exhaust steam which was made to discharge itself into the smoke-pipe, was so regulated as to increase or decrease the draught of the smoke-stack, according as the engineer desired to increase or decrease the working power of the engine. This object the plaintiff effected by carrying his exhaust-pipe to the bottom of the smoke-pipe, and fitting them there with conical plugs, by the motion of which in the pipes, the discharge of the steam into the smoke-pipe was increased or diminished. The defendants, who are engine-builders at Paterson, N. J., have built engines in which the two exhaust-pipes are brought into one, in which a conical plug was fitted, by means of which the exhaust steam was discharged, not into the smoke-pipe, but into the bottom of the smoke-box. They claimed that this was no infringement upon the plaintiff's patent. They also claimed that the machinery built according to the plaintiff's patent would not be available, and they denied the novelty of the plaintiff's invention.

Judge Nelson charged the jury that the idea of the plaintiff was the regulation of the exhaust steam for the purpose of increasing the draught according to the necessities of the engine, which idea was not denied to be a useful one, and if this idea was to be found in the arrangement which was placed at the bottom of the smoke-box, it was just as much an infringement of the plaintiff's rights as if it was placed anywhere else. That as to the denial of novelty, several points were relied on. One was an engine called the McNeil, but as it appeared that this was only an experiment which proved unsatisfactory and was abandoned, that might be laid aside, as it was necessary not only that a man should have an idea, but should embody it in a working machine, to secure him the benefit of the patent laws. Another reference was based on machinery described in the *Mechanics' Magazine*, but in that there was no idea of regulating the exhaust steam for the purpose of affecting the draught, but only for the purpose of checking the progress of the piston in the cylinder. Another matter relied upon to impeach the novelty of the plaintiff's invention was some experiments which were made to find out what was the proper amount of steam to discharge into the smoke-pipe of any locomotive by a fixed aperture, but which when ascertained would leave the pipes just the same as the pipes previously used, and had no idea of regulation of the exhaust steam in them.

That another defence relied upon was a patent granted to Mann & Tyng. But this was simply a plan of diverting a portion of the steam into the boiler, when there was more made than was needed for the draught and not a regulation of the body of the steam discharged, and could not therefore be relied on.

That if on all the evidence, the Jury should find n the defendants' machines the ideas of the plaintiff embodied into a machine corresponding with he machine of the plaintiff, they must find a verict in his favor.

The case has been on trial for several days. The Jury, after a short absence, found a verdict in favor of the plaintiff for the sum of $3,000.

For plaintiff, Mr. Blatchford and Mr. Keller; for defendants, Mr. Cozzens and Mr. Stoughton.

Population of the Northern District of Illinois.

The following table shows the returns of the census in the Northern District of Illinois, complete, and also the population of each county in 1850 and 1855.

Counties.	1860.	1855.	1850.

Texas and New Orleans Railroad.

We have recently reported the progress of this work from the Neches river at Beaumont, towards Houston, where it connects with all the railroads in Central Texas, extending to the Colorado river. The road is finished and working from Beaumont to Liberty, and will be complete to Houston next month. The Beaumont *Banner* gives an interesting account of the work now in progress on the road from that place to Orange, on the Sabine—the line between Louisiana and Texas. We extract as follows from the editor's account of a trip on that part of the road:

Crossing the ferry just above where the road bridges the Neches, we found workmen busily engaged in putting up the draw, and in completing unfinished parts of the structure. The piling is of the most substantial character, and the centre pier, on which the draw rests, is filled with concrete, making it as solid as granite itself.—The frame work of the bridge is being rapidly put up, and in less than two months we may expect to say "finis."

For about a mile and a-half from the bridge, the Neches bottom yet remains to be piled for trestle work. At this point the grade commences, and the magnitude of the work, with the amount

of labor performed, becomes apparent. For four miles, through very heavy timber, an embankment is thrown up, ranging from two to twelve feet, and twelve wide at the top; this is, however, interrupted by piling and trestle-work at intervals along the line—over Ferry Bayou, small creeks, sloughs, etc., to the three-mile prairie, six miles from the river, to which point the grade is completed.

The piling, caps, stringers, and the whole catalogue of railroad "fixins" are ready for the iron. The grade already completed embraces a section of about five miles.

The task of clearing the timber, as well as the grading, has been entrusted to them, and the clearing is already accomplished to Adam's Bayou, within one mile of the Sabine. The piles over gum-sloughs, prairie-sloughs, Simmons' woods and Cow Bayou are all driven.

Journal of Banking Law.

BANK CAPITAL: LIABILITY OF THE STATE TAXATION ALTHOUGH INVESTED IN STOCK OF THE UNITED STATES.

Under the constitution of the United States, the property belonging to the general government is exempt from State taxation. The Bank of the Commonwealth, in the city of New York, invested the sum of $103,000 of its capital in United States stocks of the loan of 1858, and claimed that the said stocks and the amount of the capital invested therein was exempt from taxation.

The commissioners of taxes and assessments of the city and county of New York denied the application and petition of the Bank to have the sum so invested deducted from the amount of its capital liable to taxation for the year 1859, as personal property, and decided that such sum was not exempt as claimed.

On the relation of the Bank a writ of certiorari was issued by the Supreme Court to the commissioners, and upon the above facts the Court at Special Term, sustained the commissioners and decided that the assessment should be confirmed. From this decision the Bank applied to the General Term of the court, which has now rendered its decision affirming the judgment of the Special Term. The following is the substance of the decision.

BONNEY, J.—The question in my opinion depends entirely upon the construction to be given to the "Act in relation to the assessment of taxes on incorporated companies" passed April 15th, 1857; and for the purposes of this decision I assume that all stocks of the United States are exempt from taxation by the State governments; and not only that such stocks cannot be so taxed *eo nomine*, but that individuals who are the owners and holders thereof cannot be so taxed for the amount or value of the same as for personal property owned by them.

This relator (the Bank of the Commonwealth) is a domestic corporation created by and under the laws of this State, and subject to its authority and legislation. Under the statutory provisions of the State of New York, the assessment in this case has been made, and as it appears to me, in exact accordance with those provisions. There is no question here of surplus profits, or reserved funds; or as to the actual value of the stock, neither does it appear that any part of said stock was held by the State, or by any incorporated literary or charitable institution, or was excepted in the assessment roll, or was by law exempt from taxation. But the relator insists that a deduction should have been made, not of any particular part or shares of the stock, as being for any cause exempt by law from taxation, but of the sum of $103,000 from the aggregate amount of the whole capital stock not invested in real estate, for the reason that such an amount ($103,000) of the moneys paid in for shares in said capital had been by the bank invested in stocks of the United States, and that such United States stocks are not subject to taxation by State authority.

Under the statutes of New York, as I understand them, *taxes are assessed upon the amount of the capital stock* of a corporation ascertained in the manner prescribed, and not upon any property purchased or otherwise obtained by the corporation, or in which such capital or any part thereof may be invested—excepting only the real estate held by the company which is subject to special rules of taxation, and must be assessed at the place where situated, whether in this State or elsewhere; and it is to be observed that the statute neither requires nor authorizes the insertion in any statement made under Sec. 3, of any account or statement of the use made by a corporation of any part of its capital or other property, excepting only the part which has been used in the purchase of real estate, nor of any specification of the personal property held by such corporation.

In my opinion these statutes clearly require that every monied or stock corporation shall be assessed for and pay taxes upon the whole amount of the balance of its capital stock, paid in and remaining after deducting the shares of stock excepted, or exempt, as above mention, notwithstanding a portion or even the whole of such balance may be invested in stocks of the United States held by such corporation.

But it is urged in behalf of the relator that the said statutes, if this be their true construction are unconstitutional, in so far as they provide for, or authorize taxation, by State authority of any part of the capital stock of the corporation which is invested in stocks of the United States. I cannot assent to that proposition. The State of New York has by its laws created, or authorized the formation of their Commonwealth Bank and other like corporations, granting to them certain powers and privileges. and has also provided by law for the taxation of the capital stock of every such corporation.

As soon as the capital stock of any such corporation is paid in, it becomes *as stock* the subject of and liable to taxation; and as I view the law, it must, during the continuation of the corporation, remain so liable to taxation as stock irrespective of the property in which the money paid for the stock may be invested, or any use that may be made of such money by the corporation; and if any part of the money paid in for its stock shall at any time be invested in stocks of the United States, such investment cannot affect the right of taxation for the reason that the assessment of taxes is not upon stock of the United States, or other property owned or held by the corporation, excepting only its real estate, but continues to be as it was before such investment was made, an assessment upon the capital stock of the company, created under the laws of the State, and thereby expressly made the subject of taxation. The corporation which accepts and enjoys the privileges granted must take them *cum onere*.

And, in my opinion there is no foundation for the suggestion now made, that the decision by the Court below is an evasion of the admitted rule of law, that United States stocks are not liable to taxation by State authority. It is not in form merely but in fact and in principle, that this assessment of taxes is upon the capital stock of the relator, and not upon the property in which the money paid in for the capital is invested; which property may be and doubtless is changing from day to day. But to permit the relator to escape taxation upon so large a portion of its capital, because it has seen fit to invest such portion in stocks of the United States, would in my judgment be an evasion of the law of the State, which created the corporation and made it liable to taxation on the amount of its capital. The order made at Special Term should be affirmed with costs.

Punjaub, India, Railway.

It will doubtless be of interest to our readers to learn how our railway progresses. European as well as native are no doubt anxiously watching the advancement of railroads in India, and the residents of the Punjaub have a peculiar interest of the line now under construction in this province, and which is to pass through the capital. This being the case, we proceed to state that the works from Lahore to Umritsur are in such a state of forwardness, that if materials arrive from England as expected, a locomotive will be running over the line *this year*. In last December the railway department started the earthworks between Lahore and Sher Shah, 12 miles on the other side of Mooltan. These works run through a district where there was every reason to dread want of labor, but we are glad to state that at this moment two-thirds of the whole is completed. The Lahore passenger train station is being proceeded with in a highly satisfactory manner, and the Umritsur station will be commenced with whenever the Government's sanction to the work is received. Stations, moreover, at Meean Meer, and Attaree (between Lahore and Umritsur) are being erected, and, in short, every effort is being made to complete the portion of the line to Umritsur as quickly as posible. Rails have been laid down on 29 miles along side of the line, ready for putting down, and the rest which will be required are on their way up from Kurrachee. Twelve English platelayers are on their way out to assist in the work. This rapid progress, this great success, is doubtless attributable to the assistance rendered to the engineers by all officials, from the Lieut.-Governor to the Assistant-Commissioner, and to the cordiality which has uniformily subsisted between the services. But even this would have availed us nothing if we had not Mr. Brunton with his science, his perseverence, his patience, and his energy, to the force.—*Lahore Chronicle.*

Kansas City and Cameron Railroad.

This road is nearly all sub-let in contracts of one to three miles each. Two hundred men are already at work grading. Five of the sub-contractors are at work between Kansas City and Liberty, and three of them are at work between Liberty, and Centerville. Todd & Co., who have the contract for all the masonry, have commenced opening their quarries. The sub-contracts are all engaged to be done by March 31st, 1861. We are assured by authority which we deem reliable, that there will be at least one thousand men at work on the line during the course of this month. The contract for the running of the road by the Hannibal and St. Joseph Co., is completed. The Clay county bonds, to the amount of $50,000, are negotiated, and $40,000 in cash are now in bank, ready to be drawn upon to pay for the work as fast as it progresses. Nothing now remains in the way of the speedy completion of the road, which will be prosecuted with the utmost vigor till finished.—*Wyandott Gazette.*

Wright's Patent Dust Deflector & Obviator.

We mentioned the fact, a few days ago, that Mr. Richard C. Wright, of this city, had received letters patent for an apparatus for protecting railroad passengers from the eternal nuisance of dust and sparks. Since that time Mr. Wright has, through the kindness of Col. Wm. Mahone, the talented President of the Norfolk and Petersburg Railroad, being enabled to test its utility.—The apparatus, which may be denominated a window, was attached to the single window of the mail department of the car, and every facility afforded the inventor for testing its usefulness. During a recent ride over this well regulated railroad, we had our attention called to the patent, and passed the most of our time in a close examination of its merits. This day was warm and dry, and, as a natural consequence, dusty; but no dust entered the department to which the *Deflector* was attached; nor could a spark reach the interior through this window, as was the case with the others. * *

Mr. Wright has devoted several years to the ventilation of railroad cars, and the concomitant of excluding dust and sparks from them, and this Deflector is the result of that long and patient investigation.

The *Deflector* is simply a window, one-half of which is glass, the other half wire gauze. The glass, instead of standing parallel to the side of the car, sets off at an angle, and deflects the dust and sparks on the outside, and rushing past the glass, causes a strong current from within to follow it; said current finding egress through the wire gauze which divides the aperture or space made by the window frame; in other words, the glass covers one-half of the window and the wire gauze the other. The peculiarity consists in the ingenious manner in which the whole device is applied to the window, since it makes no difference which direction the cars move, the glass pane, or *Deflector* can be adjusted to suit, and that in so speedy and handy a manner that a brakesman can do it while the car is in motion.—*Norfolk Day Book.*

Southern Railroad Connection.

Mr. A. G. Gower, Engineer of the Southern Kentucky Railroad, who was commissioned by the committee appointed by the meeting held at the Merchants' Exchange in this city to visit the South, and report the result of his examinations for the proposed rail connection with Tennessee, has returned to Lexington. We understand that he visited Knoxville, Chattanooga, Nashville Talehama, &c., and secured a large amount of general information upon the subject, which will be submitted to the committee. His notes of surveys heretofore taken will require some days to plat and arrange for inspection, but will be very full and complete.

A letter from M. B. Prichard, Chief Engineer of the Memphis and Charleston Railroad, to the Cincinnati committee, is accompanied by profiles of the surveys made in 1837-38 of the route from Knoxville to Lexington, by the Charleston and Cincinnati Railroad Company, under Major McNeil. Mr. Prichard thinks the route for a railroad to Chattanooga or Knoxville should pass through London or Williamsville, Ky., through Wheeler's (Elk) Gap and down Cone Creek. He says it could not go further West without encountering the waters of the south fork of the Cumberland River, from which it would be impossible to ascend the Cumberland Mountains. The work from the Tennessee line to London, forty miles, would be very easy, not costing over $14,000 per mile when ready for the engine. From London Mr. Prichard thinks the line should bear north-easterly.

The valuable information gathered by Mr. Gower, together with the various letters and surveys received, will be laid before the Committee at an early day, and some definite action, with a view to secure the object of their appointment, will then be taken. The report of the Committee will be looked for with much interest by the business men of our city and of the South.—*Cincinnati Enquirer Nov.* 14.

Washington County Railroad.

The annual meeting of the stockholders of the Washington County Railroad Company, took place at Brenham, on the 29th ult. The following gentlemen were elected Directors for the ensuing year: J. D. Giddings, J. W. McDade, A. Groesbeeck, Jno. P. Key, R. R. Peebles, A. G. Compton, W. H. McCutchen, H. C. McIntyre, A. M. Lewis, T. J. Jackson, N. Kavanaugh.

The Board of Directors subsequently met and elected the following officers for the year, viz: J. W. McDade, President; A. G. Compton, Secretary; N. Kavanaugh, Treasurer; A. M. Lewis, Attorney.

It will be seen that this enterprise is under the charge of the best men of Washington County. The officers are especially well known for their perseverance and experience in the management of railroads.

We understand the work on the road to Brenham is now rapidly approaching completion. The bridge across the Brazos is nearly ready to be raised. Both the contractors on the road and on the bridge have now full compliments of men, and it is expected that the work will be completed so that the locomotive will reach Brenham early in January, if not by the 1st of that month.

The Air Line extension of this road to Austin, is now, as our readers are aware, in the hands of a well organized company, with contracts given to reliable men for the first section. We are informed that the work is already commenced and there is no doubt of the final success of the enterprise.

It is hard to look at these enterprises without permitting the imagination to stray off into the future, and dwell upon the results which we all hope to see accomplished when these roads are completed. Such a vast scope of country, whose population and wealth will be increased ten fold by them, so large a trade from the far far west, beyond the mountains and plains of North-western Texas, as they will draw to us, there is no telling what ten or fifteen years with the Austin road completed, may bring to pass in this State.—*Houston* (Texas.) *Telegraph.*

Cincinnati and Mackinaw Railroad.

We learn from reliable authority that the Cincinnati and Mackinaw Railroad is being pushed forward from Owosso, on the D. & Mil. road, toward Lansing, at a rapid rate. Twelve miles of iron are already laid, and the workmen are progressing at the rate of ½ mile a day. The work will be completed to Lansing at an early day, and will be pushed forward toward Jonesville, on the Michigan Southern Railroad, where (or at Jackson) it will probably terminate. This will give us a railroad communication with the central and northern parts of Michigan, of considerable importance. We learn that that part of the road leading to Saginaw is also in a fair way to be completed ere long.—*Toledo Blade.*

The Iron Steam Passenger Car.

The Massillon *Times* gives the following statement in regard to the new steam passenger car, which recently made a trial trip over the Pittsburg, Fort Wayne and Chicago Road:

The advantages of this over the common cars now in use for carrying passengers, are many and obvious. In the first place the cost of a car of this description is about $6,000. The cost of a train of cars of equal capacity is: For locomotive, $10,000; two passenger cars, $5,000; baggage car, $1,000; total, 16,000. Here then, is a saving of about $10,000 on first cost. Again, it will not take more than one-fourth the amount of fuel and oil to run the car, and will only require two or three persons at the farthest to manage it, when five is the least number that could be employed on the other. The weight of this car is about seventeen tons; while that of a train the size we have named is about eighty-five tons, and hence the wear and tear of the road in running would be proportionately less. It is also safe because being so much lighter can be stopped quicker, and even in case of collision the concussion would not be so great, and the flexibility of the iron would cause it to give, and thus partially break the violence of the shock. These considerations, with others we might mention, are such as will eventually cause this car to supercede, for the most part, those now in use.

Union Depot at Terre Haute, Indiana.

The Several Railway companies having roads centering at Terre Haute have contemplated, for some time the erection of a Union depot at that city. Arrangements are now making to carry this project into effect.

Buffalo, Bradford and Pittsburg Railroad.

Favorable report is made of the progress of the work on the Buffalo, Bradford, and Pittsburg Railroad. A second shipment of four hundred tons of rails is being received, which will complete the track beyond Limestone, which is the first important point on the line for a good local business. The village of Bradford, twelve miles from the New York and Erie junction, will soon be reached, and from that point the amount of promiscuous freight opening to the road will keep pace with the increasing capacity of the rolling stock of the line

Galena and Chicago Railroad.

This company have declared a dividend of 5 per cent., papable January 1, 1860. The dividend day has been changed from 1st of February to 1st of January. We understand that the Company had $281,000 in cash in hand, out of which the above dividend was declared.

Railroad Earnings.

The net receipts of the Harlem road for the month of October are as follows:—

October, 1859	$97,857 39
October, 1860	111,172 99
Increase	$13,315 60

The net receipts for the same month for the last three years were—

1857	$83,675 78
1858	85,302 64
1859	97,857 39

The following is an approximate statement of the earnings of the Pittsburg, Fort Wayne and Chicago Railroad Company for the month of October, 1860, compared with the same period of last year, viz:

	1860.	1859.
From Freight	$166,755 48	$101,586 11
" Passengers	100,015 86	80,763 25
" Express	2,700 00	3,250 00
" Mails	7,825 00	7,825 00
" Rent of road	7,082 33	5,500 00
" Rents and Miscel.	1,015 50	504 87
Totals	$285,394 67	$199,429 23
Increase		$85,965 44

The following is a statement of the earnings of the New York Central Railroad for the month of October, 1860, compared with its earnings for the corresponding month of the previous year:

1860	$810,890 33
1859	709,671 26
Increase	$101,219 67

The earnings of the Cincinnati, Hamilton and Dayton Railroad for October were:

October, 1860	$57,978 17
" 1859	46,257 46
Increase, 1860	$11,720 71

Of this increase, about $9,000 was on freight, the balance on passenger, mails, express, etc.

The annexed statement shows the business of the Housatonic Railroad Company for October, 1860, in comparison with the corresponding month in 1859:

October, 1860	$33,784 70
" 1859	28,234 64
Total increase (nearly all in freight)	$5,550 06

The following is an official comparative statement of the earnings of the Bellefontaine line for the month of September, 1859 and 1860:

Bellefontaine and Indiana Railroad.

Earnings for September, 1859	$29,487 90
" " " 1860	34,740 92
Increase	$5,253 02
Increase for first nine months of 1860, compared with same months of 1859	24,951 20

Indianapolis, Pittsburg and Cleveland Railroad.

Earnings for September, 1859	$24,554 65
" " " 1860	25,916 86
Increase	$5,363 21
Increase for first nine months of 1860, compared with the same months of 1859	$37,720 08

The revenue of the Baltimore and Ohio Railroad for October was as follows:

MAIN STEM.		
From Passengers	$70,494 67	
" Mails	7,833 34	
" Express	9,636 18	
" Tonnage	327,184 63	
		$415,078 77
WASHINGTON BRANCH.		
From Passengers	$31,592 32	
" Mails	1,000 00	
" Express	1,350 00	
" Tonnage	7,161 48	
		41,103 80
N. W. VIRGINIA BRANCH.		
From Passengers	$4,379 25	
" Mails	866 66	
" Tonnage	24,234 07	
		29,479 98

Summary of Revenue for Oct., 1859 and 1860.

	1859.	1860.
Main stem	$359,421 08	$415,078 77
Washington Branch	37,866 29	41,103 80
N. W. Virginia Railroad	22,280 99	29,479 96
Totals	$411,148 27	$485,662 55

Showing a net increase over October, 1859, of $74,514 28.

The following is a comparative statement of earnings and expenses of the Buffalo and State Line Railroad Company for the month of October, 1859 and 1860:

EARNINGS.	1860.	1859.
From Passengers	$47,946 75	$38,990 24
" Freight	49,581 10	40,279 97
" Other sources	1,940 00	1,701 00
Total	$99,467 85	$80,971 21
Total increase		$18,496 64
EXPENSES.		
Maintaining road	$30,394 78	$8,371 14
Repairs of machinery	8,874 85	4,130 18
Operating road	13,304 74	15,637 64
Total	$52,574 27	$28,138 99
Increase		$24,435 28

The increase of expenses over last year was as follows:—

Masonry, $10,000; iron, $3,700; cross-ties, $1,500; engine for car shop, $1,000; bridge timber, $1,250; wheels, $1,000; water station, $500; chairs, $850; tyre, $500; repairs engines and tenders, passengers, freight and baggage cars, $4,100. Total, $24,400.

The earnings of the Macon and Western Railroad for October, 1860, were | $39,531 89
October, 1859 | 41,727 27
Increase | $2,195 38

The Watertown and Rome Railroad earned in October:—

	1860.	1859.
From Passengers	$15,421 72	$14,271 23
" Freight	28,193 00	26,263 61
" other sources	2,463 02	1,809 88
Total	$46,077 83	$42,344 72
Increase		$3,733 11

The following is a statement of the earnings of the Potsdam and Watertown Railroad (owned by the Watertown and Rome Railroad Company), for October in 1859 and 1860:

1860	$12,807 95
1859	11,028 68
Increase	$1,779 27

The traffic of the Great Western Railway of Canada for the week ending Nov. 9th, 1860, was as follows:

Passengers	$21,379 69
Freight and live stock	25,369 17
Mails and sundries	1,598 49
Total	$48,347 35
Corresponding week last year	44,100 61
Increase	$4,246 74

The following are the comparative earnings of the Pacific Railroad of Missouri, for October, 1859 and 1860:

MAIN LINE.	1859. (168 miles.)	1860. (176 miles.)
Passengers	$29,583 34	$26,679 81
Freight	30,442 56	50,150 15
Mails	2,100 00	2,200 00
	$62,125 90	$79,029 96
Increase		$16,904 03

SOUTHWEST BRANCH.	(18 miles.)	(71 miles.)
Passengers	$578 05	$3,095 75
Freight	694 78	5,901 20
Mails		295 83
	$1,272 83	$9,292 78
Increase		8,019 95

The earnings of the Cleveland, Columbus and Cincinnati Railroad for the month of October are:

	1860.	1859.
Freight trains	$64,907 17	$51,466 82
Passenger trains	38,709 80	34,444 88
Rents	6,470 80	6,161 67
Total	$110,087 27	$92,073 37
Increase in 1860		18,030 90
Earnings for the last 4 months	$442,933 54	
Do. same months in 1859	359,097 75	
Increase in 1860	$83,835 79	

The October earnings of the Norwich and Worcester Railroad were:—

	1859.	1860.
Passengers	$11,853 00	$11,795 00
Freight	19,958 00	24,464 00
Total	$31,811 00	$36,259 00
Increase in 1860		$4,467 00

The earnings of the Great Western Railroad Company of Ill., for Oct., 1860 were | $44,938 68
Earnings for October, 1859 | 36,411 91
Increase | $8,526 77

The October earnings of the La Crosse and Milwaukee Railroad were as follows:

	1860.	1859.
Freight	$112,194 18	$90,283 80
Passengers	34,260 44	19,919 59
Express and miscell's	737 11	1,086 47
Total	$147,191 73	$111,240 46
Increase		$35,951 27

The earnings of the New York and New Haven Railroad Company for October, 1860, were as follows:

Passengers	$75,706 26
Freights	14,000 09
Total	$89,706 26
For October, 1859	85,850 02
Increase	$3,855 64

The earnings of the Central Railroad Company of New Jersey, for the month of October, 1860, were | $109,291 20
For the same months last year | 88,249 84
Increase, 24 per cent. | $21,041 36

The receipts of the Grand Trunk Railway of Canada for the week ending November 10, 1860, was | $81,847 15
Corresponding week last year | 56,154 40
Increase | $25,692 75
Tot. traffic from July 1, 1860, to date. | $1,292,003 00
Corresponding period, 1859 | 949,032 09
Increase | $342,970 91

New Application of India Rubber.

India Rubber has been applied to so many purposes that one is induced to ask what is likely to be the limit of its application? It was only on Thursday calling at the Messrs. Silver, the large outfitters in Bishopsgate street, that we saw India Rubber applied to a purpose the last of any which we should have expected, that is to the enlargement or reduction of maps to almost any scale, and with a surprising degree of accuracy. If the map is to be enlarged an even sheet of India Rubber in its ordinary state of tension is laid over the map and an impression of it taken on the India Ruber, which is then by mechanical means stretched out equally in length and breadth, pressed on the paper prepared, and a correct impression taken of almost any scale intended. If a smaller scale than that of the map to be copied is wanted the reverse process is adopted, that is taking the impression from the map to be reduced on the sheet of India Rubber equally stretched out, and then suffered to contract to the size wanted provided it be not less than the size to which the India Rubber would contract when left to itself. The copy we saw was between 40 and 50 times the superficial size of the original map.—*Herapath, Nov. 3d.*

American Railroad Journal.

Saturday, November 24, 1860.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Politics vs. Business.

This country was undoubtedly founded to teach great political lessons. One of these we are at present undergoing. A class of politicians have been telling us all along that we should never achieve a perfect millennium till we were entirely relieved from allegiance to the central government; that the degree of the prosperity of the States was to be in exact ratio of their freedom to act upon any caprice that might seize them, and that the greatest extravagance of speech and action would, in the end, prove to be the profoundest political wisdom.

We have begun to act upon such premises, but with results far different from those promised. The fear of extreme measures, before an insubordinate step is taken, has thrown the whole country into convulsions. Business is brought to a complete stand-still. Property and merchandise, which a few days ago was in eager request, no one will now touch at any price.

This is the first commentary upon the theory that any State can do just what it likes, irrespective of the concurrence or wishes of the others. It has demonstrated some great facts—that, however they may differ in opinion on political matters, they are an unit in respect to their *material* interests, and that the mere suggestion of the abrogation of the present federal compact, is but another word for their destruction.

We have learned so much after a schooling of a very few days. The penalty does not wait for any overt act, but has to be paid upon the very threat of one. This may take some parties by surprise, and may, in the end, produce a salutary

change. But of this all may rest assured, that, though every State is involved, the party moving must suffer the most, and that the self-inflicted penalty to be paid, will be just in proportion to the magnitude of the offence committed.

It is this common suffering that, in the end, will compose the present differences. In the meantime, a tremendous loss will be sustained. The public improvements of the country must come to a dead halt. The means of those building them will have been sacrificed, or are rendered unavailable, and nothing can be borrowed. It is only in fair weather that capitalists let out their money—not when political ties are proclaimed to be only ropes of sand.

We speak of course irrespective of party, and discuss political questions only in their bearing upon our material interests. We have seen enough to prove that all assertions of the independence of one section of the country of the other is nothing but arrant nonsense. The dependence is necessary and mutual—more necessary in this country than in any other from the great diversity which prevails in soil, climate, and in the habits of our people. All this will be soon found out, if it has not been already; but not, unfortunately, till an immense loss has been sustained. This will soon be sufficient to bring all parties to reason, and provide some way of adjustment of the present political differences; for it is certainly safe to conclude, that in the long run, men will be true to their own interests, and that they will not long sacrifice these for the gratification of an excited temper, much less for the indulgence of political theories or abstractions.

Pacific Railroad.

A meeting was held in the Cooper Institute in this city, on the 15th inst., to give a popular impulse to the project of a railroad to the Pacific.

Samuel L. Hotaling was elected President, and Peter Cooper, Wilson G. Hunt and others, Vice Presidents. Mr. Perham, one of the corporators, made a statement of the plan of the road, and dwelt at length on its advantages. The State of Maine has granted an ample charter for the construction of the road. Speeches were also made by Horace Greeley, J. C. Lovejoy and others, and a committee of fifteen was appointed to call a future meeting, and take other measures to forward the enterprise.

Meetings like the above are well enough as a means of creating a popular feeling in favor of a railroad across the continent, but this, in the end, must resolve itself into a government work. Individual enterprise is quite unequal to such an undertaking. It is needed as a national highway, irrespective of the profit or loss resulting therefrom. It is quite certain that, for a long time, it could not be profitable. Still, there are sufficient reasons why it should be undertaken without delay and pushed forward with all reasonable haste. With all the force that could be brought to bear upon it, 10 or 15 years would be required for its construction—a long period in this fast age. If Government could be induced to have surveys made of the several routes proposed, an important step would be taken. It would require years to make good surveys of any route. If any person can exert influence in this matter, let it be directed upon the General Government, to induce it to undertake an elaborate system of working surveys.

Share and Money Market.

The share and money market has been exceedingly depressed the present week under a most stringent money market. Relief now appears to be obtained in this quarter through the concerted action of the Banks, which provides that any bank may deposit with a committee an amount of its bills receivable, United States, stocks, Treasury notes or stocks of the State of New York, to be approved by the said committee, who may issue thereupon to the depositing Bank certificates of deposit, bearing interest at 7 per cent. per annum, in denominations of $5,000 and $10,000 each, as may be desired, to an amount equal to 75 per cent. of such deposit. These certificates may be used in settlement of balances at the Clearing-House, for a period of 30 days from the date thereof, and they shall be received by creditor banks, during that period, daily, in the same proportion as they bear to the aggregate amount of the debtor balances paid at the Clearing-House. The interest which may accrue upon these certificates shall at the expiration of the 30 days, be apportioned among the banks which shall have held them during that time.

In order to carry out this agreement, the specie belonging to the associated Banks, is to be considered and treated as a common fund for mutual aid and protection, and the committee shall have power to equalize the same by assessment or otherwise. For this purpose statements are to be made to the Committee of the condition of each bank on the morning of every day before commencement of business, which shall be sent with the exchanges to the manager of the Clearing-House, specifying the following items, viz:

1. Loans and discounts.
2. deposits.
3. Loan certificates.
4. Specie.

After the 1st of February next every bank in the Clearing-House Association is to have on hand at all times, in specie, an amount equal to one-fourth of its net liabilities, and any bank whose specie shall fall below that proportion is not to make loans or discounts until their position is re-established.

The effect of this measure will be a steady relief in commercial affairs, and will undoubtedly have an immediate influence on prices at the stock exchange, the extent of the improvement in this quarter must depend largely upon the aspect political affairs may assume. An immediate advance may, however, be reasonably expected in State and dividend paying stocks.

Erie Railroad--Improvements at the Long Dock.

The tunnel which is to bring this improvement into use is so far completed as to allow the passage last week of an excursion train. Only a comparatively small amount of work remains to be done to bring the road to the finest water front of our harbor, and from which it is reasonable to anticipate a great increase of traffic. With this improvement, and the completion of the western extensions, now in progress, the Erie will be in a position of strength vastly superior to any ever yet enjoyed.

Mobile and Ohio Railroad.

The passenger and freight trains of this road are now running through to Baldwyn Station, Tishomingo county, which is nearly three hundred miles from Mobile.—The distance from that point to Corinth, on the Memphis and Charleston Railroad, is about thirty-one miles. A hack will leave Baldwyn every morning, and reach Corinth before night. With this gap—which is a pleasant relief in the route—persons traveling west or east can reach their destinations sooner than by any other route.

The county of Tishomingo is one of the wealthiest of Mississippi, and the Baldwyn Station is just at the corner of the county, abutting on Itawamba, Tippah and Pontotoc. It looks over four counties of the richest part of the State. The latitude is about that of Memphis, and the region, while having extreme fertility, is one of the healthiest in the country. It is a beautiful place for country seats, and will turn out to be a very flourishing settlement, perhaps ultimately to the dignity of a city.

Baltimore and Ohio Railroad.

We have before us the annual report of the President of this company for the fiscal year ending September 30th, 1860, from which we learn that the aggregate revenues, working expenses, and net results of the Main Stem, Washington Branch and Northwestern Virginia Railroad, for the fiscal years terminating respectively 30th September, 1859 and 1860 were:—

REVENUE.

	1859.	1860.	Increase.
Main St..	$3,618,618.45	$3,922,202.94	$303,584.49
Wash.B..	422,219.53	462,880.44	20,660.91
N.W.Va..	240,171.29	269,203.12	29 031.83
Total.	$4,301,009.27	$4,654,286.50	$353,277.23

EXPENSES.

	1859.	1860.	Decrease.
Main st'm.	$1,684,997.84	$1,616,615.61	$68,382.23
Wash, Br.	173,679.25	172,042.33	636.92
N.W.Va .	198,279.58	194,586.65	3,683.93
Total...	$2,056,947.67	$1,984,244.59	$72,703.08
Total increase of gross revenue.....			$353,277 23
Total decrease of working expenses..			72,703 08
Total increase of net earnings...			$425,980 31

An aggregate reduction is shown of $72,703 08 in working expenses, compared with the preceding year, although the large additional traffic has improved the revenue $353,277 23, making an increase net gain of $425,980 31. The same comparison with 1858 exhibits an increase of gross revenue of $80,373, and a reduction in working expenses of $1,002,661 13, presenting an increased net gain of $1,083,034 86.

Memphis, Clarksville and Louisville R. R.

The Paris (Tenn.) *Sentinel*, of the 24th ult., says: "The track-laying on the Memphis, Clarksville and Louisville Railroad was commenced to-day at this point, and will be pushed forward with all alacrity till finished. We are informed that the grading is now complete over the whole line, connecting the Memphis and Ohio road with the Nashville and Louisville road. This will place us in daily communication with Louisville, an important junction to our people in West Tennessee, as there are two markets opened to us instead of one. This road is bound to be the great Southern thoroughfare, and one day will be the great national route of the Union."

Shelbyville Railroad.—Branch of the Louisville and Frankfort Railroad.

We learn from the Shelbyville *News* that the Directors of this road, after full consultation and deliberation, Mr. Gunn, the engineer being present, have determined not to put the road under contract until more money could be secured. The President reported that $255,000 had been secured by subscription and negotiation. This, added to the unexpended old subscription of $40,000, makes a total of $295,000. Mr. Gunn, who surveyed the work during the spring of 1859, has recently reviewed his estimates, and reports that the completion of the road and the rolling stock will cost $295,000. This, however, does not include the expense for depot grounds and buildings, water stations, engineering expenses, and pay of officers. By the terms of the ordinance of the city of Louisville, loaning the road $120,000, the Company are required to pay the interest for one year on the bonds, which, at 6 per centum, will take $7,200. This, added to the items mentioned as not included in the $295,000, will make the additional sum of $25,000. The Directors have, therefore, prudently determined not to put the work under contract until this additional sum is secured, and we can have no doubt that the call upon the friends of the road will meet a prompt and liberal response.

Action of Pittsburg Councils Affecting Railroad Bonds.

The Select and Common Councils of the city of Pittsburg, in order to protect the home creditors of the corporation, in view of the numerous suits pending against the city for interest on railroad bonds, several of which are to be tried at the present term of the United States Circuit Court, passed a resolution directing the Mayor "to execute and deliver to Thos. Bakewell, John Bissell and James B. Murray, a mortgage upon any or all of the real estate belonging to the city of Pittsburg, for a sum not exceeding one million five hundred thousand dollars, in trust for the benefit of the legal holders of municipal obligations or certificates heretofore issued for purposes of 'city loan,' 'water loan,' or 'work,' as the same are now registered and set forth in the book of 'city obligations,' in the Controller's office." The Mayor at once, under proper legal advice, executed the mortgage, notwithstanding a formal protest from John H. Hampton, Esq., who as attorney for Messrs. Oelrich & Co., of New York, holds coupons from bonds issued by the city to various railroad companies, amounting to $74,000. The result of this mortgage will be to leave the payment of railroad obligations to revenues derivable only from direct taxation. The municipal bonds are older than the railroad bonds, and the effect of the action of Councils, if it have any legal effect at all, is to make the holders of the municipal bonds preferred creditors over the holders of railroad bonds.

Henderson and Nashville Railroad.

Sealed proposals will be received by this company at Henderson, Ky., until the 1st prox. for the construction of ten miles more of their road. We understand that the first five miles have been completed, and the tax is now being collected to pay for the work already done. Those owing taxes have paid up readily and willingly. The work upon the second five miles is now being commenced, and will be vigorously pushed forward to completion.

Artesian Well Tubes.

Messrs. Morris, Tasker & Co., of No. 209 South Third street, Philadelphia, proprietors of the *Pascal Iron Works*, manufacture cast iron artesian well pipe, with Bolles' patent flush joint; wrought iron artesian well tube with flush joints; wrought iron artesian well pipes, socket joints, etc., of different diameter, and weight, and price per foot. The patent issued to J. N. Bolles for "mode of rendering cylinders or tubes flush, or upon a line on their exterior surfaces, for artesian wells, or for other purposes," is owned by Morris, Tasker & Co., who grant no license to others to manufacture, or for the use of any but their own manufacture.

Philadelphia, Wilmington and Baltimore Railroad.

This company is now engaged blasting the large rock in the Susquehanna, which is in the direct line of their ferry boat. Much care has always been required, particularly at night, to avoid this rock, which is entirely under the water. The Havre de Grace *Times* says they are succeeding pretty well, but it will no doubt require some weeks yet to complete the work.

Ohio Canals.

The amount of Canal tolls, etc., paid into the State Treasury during the month ending October 31, 1860, was as follows:—

Ohio Canal	$13,489 47
Miami and Erie Canal	17,564 99
Muskingum Improvement	1,459 34
Hocking Canal	3,259 43
Walhounding Canal	61 36
Western Reserve and Maumee Road	497 01
Total	$36,331 60
Same month last year	22,277 73
Increase	$14,053 87

Reading and Columbia Railroad.

This road is the last link (being built 42 miles long) of a continuous air-line route of railroad between New York and Baltimore, via the New Jersey Central, the Allentown and Eastern, Allentown and Reading, then the Reading and Columbia, there crossing the Susquehanna Bridge to Wrightsville and York, and thence by the Northern Central Railroad to Baltimore, being the same gauge all the way. It is now being located, and will be completed within the next year.

Manassas Gap Railroad.

The tenth annual meeting of the stockholders of the Manassas Gap Railroad Company, was held in Alexandria, Va., on the 16th inst. President Marshal's report shows the gross earnings of the road for the year to amount to $160,427 24—an increase over the last report of $24,028 76; the working expenses, $81,823 68; amount paid the Orange and Alexandria road, $31,430 25, leaving a net revenue of $50,293 33, or $7,331 over last year's report.

The committe of examination report the road, from its junction with the Orange and Alexandria line to Mount Jackson, to be substantial, and in the best possible order. On the portion from Mount Jackson to Harrisonburg the work was much farther advanced than they expected to find it. The masonry for the bridges is nearly all completed, with a good part of the timber on the ground. The rails for the completion of the entire route are purchased, and by this time are probably shipped for Alexandria. In view of all the circumstances, the board feel confident that the entire road will be finished by the opening of the next harvest.

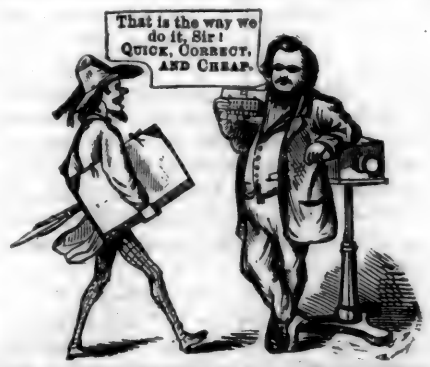
Evansville and Crawfordsville Railroad.

The extension of the Evansville and Crawfordsville Road, from Terre Haute to Rockville, will be completed in about two weeks, and cars regularly run over the road.

☞Col. R. W. Humphries, of Clarksville, has been elected President of the Memphis, Louisville and Clarksville Railroad, and has accepted the position.

DON PEDRO II. RAILROAD.

THE Board of Directors of the Railroad of Don Pedro II. proposes to contract for the construction of eleven and a-half English miles, from the egress of the large tunnel, west of the Serra do Mar, to a point selected for a station near the junction of the rivers Pirahy and Parahyba; and with this view will receive proposals, in sealed letters, to be opened on the 28th day of February, 1861, the competitors, or bidders, to be guided by the following regulations:—



Proposals will be received for the whole eleven and a-half miles, or for any portion thereof not less than four miles—for, 1st, the road-bed; and, 2d, the superstructure; or for the road-bed and superstructure combined; but, in the latter case, the price of each must be stated separately. It being understood that only on inspection of the proposals will it be determined to make the award in whole or in part.

The specifications, which may be seen at the office of the directory, at the central station, must govern the construction in all that is essential; each proposal, however, may suggest such modifications as may be deemed useful, in order that they may be duly considered. At said office can be seen all the plans and inclinations, or profiles of the ground.

The directory insists upon the clause that the technical direction belongs exclusively to its own engineers. It also requires that specific prices shall be stated in the contract for every kind of work; and whether the contract be for specific prices or for a total one, the periodical payments shall be made by measuring the work done, and calculating the value according to the stipulated prices.

The deduction made for security can be substituted by a deposit of money or equivalent bonds, at the discretion of the directory; and the interest or revenue of the security shall be long in all cases to the parties to whom contracts are awarded.

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.			SHEET No			
1.	General Table for all Bases and all Slopes.		13.	for Base 18 ft.	Slop.	1½ to 1
2.	For Side Hill Cuts and Fills.		14.	" 20	"	1½ to 1
3.	Base 12 ft.	Slopes 1½ to 1	15.	" 24	"	1½ to 1
4.	" 14	" 1½ to 1	16.	" 24	"	1½ to 1
5.	" 15	" ¼ to 1	17.	" 25	"	1½ to 1
6.	" 15	" 1 to 1	18.	" 26	"	1½ to 1
7.	" 15	" 1¼ to 1	19.	" 28	"	¼ to 1
8.	" 16	" ¼ to 1	20.	" 30	"	1 to 1
9	" 16	" 1 to 1	21.	" 30	"	1¼ to 1
10.	" 18	" ¼ to 1	22.	" 30	"	1½ to 1
11.	" 18	" ¾ to 1	23.	" 32	"	1 to 1
12.	" 18	" 1 to 1	24.	" 32	"	1½ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at **25c.** each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

Notice to Contractors.

OFFICE GEORGIA WESTERN RAILROAD Co.,
Atlanta, Oct. 4th, 1860.

SEALED PROPOSALS will be received at this office until the 1st day of December next for executing the Grading and Masonry on fifty miles of the Georgia Western Railroad, commencing at Atlanta, and extending into Haralson county.

Profiles and plans, with approximate estimates of quantities, will be exhibited at this office on and after the 15th of November. Payments to be made in cash, monthly. The work is in a healthy locality, and will present superior advantages to contractors in obtaining supplies.

By order of the Board of Directors.

L. P. GRANT, Chief Engineer.

STRATTON & CO.,
COMMISSION MERCHANTS,
No. 1 PINE STREET, N. Y.
AGENTS FOR
Bauman & Co.'s Poco Metallic Paint.

FOR WOOD PAINTING.—It retains a beautiful lustre; kills knots and will protect it under any circumstances. It covers 6,000 square feet per hundred pounds, and will neither fade, blister, or wash, and a better fire-proof than any other Paint, for it will stand a heat that will melt lead. It is proof against sea, air and storms.

Refer to JOHN LEISENRING, Sup't and Eng'r. Lehigh Coal and Navigation Co., Mauch Chunk, Pa.

FOR BRICK AND PLASTER.—It makes all the fanciful stone colors, and will cover 4,000 square feet per 100 pounds. When laid out in blocks, it is truly beautiful.

Refer to SEMPLE & BROTHER, Easton, Pa.

FOR SHIP AND BOAT PAINTING.—It hardens under water to the hardness of Iron, preventing the ravages of the wood-worm effectually. On deck it is impervious to water, expands and contracts with heat and cold, and we warrant it on the forecastle six months.

Refer to CAPTAIN MASON, Schooner 'Adolph Ugel,' Philadelphia.

FOR RAILROADS.—It preserves Bridges and Ties from dry or wet rot and freight cars from burning and leaking.

Refer to R. H. SAYER, Sup't and Eng'r, WM. KELLOG, Master of Repairs, Lehigh Valley Railroad, Bethlehem, Pa.
A. G. BRODHEAD, Sup't and Eng'r, Beaver Meadows R. R., Mauch Chunk, Pa.

FOR ROOFING.—It covers 8,000 feet per 100 pounds, and may be used in the rain, as it never runs.

Refer to M. CULLOUGH & CO., HENRY BUCKWALTER, Philadelphia.

FOR IRON.—It will stand 300 deg. Fah. and gives satisfaction to all the Iron men in Philadelphia, on gas holders, steam boilers, Iron fronts and ornamental iron. It is equal to Red Lead, for steam and hot water joints.

Refer to J. W. and J. F STARR, Camden, N J. MORRIS, TASKER & CO., MERRICK & SONS, Philadelphia.

FOR IRON FOUNDERS' PATTERNS.—Five parts by weight of it to one of gum shellac dissolved in alcohol, will make a covering more impervious to the damp sand or loam than shellac alone of equal consistency.

Refer to THE NOVELTY IRON WORKS, New York.

FOR STAINING.—Oak, Mahogany, Rosewood and Walnut Stains for Furniture, we warrant it equal to Turkish Umber. Its natural colors are Umber, Brown, Lake, Olive and Lead color, which may be combined in endless variety. We hope soon to have other colors much lighter.

ANALYSIS.

DENNIS BAUMAN & CO.,
Parryville, Carbon County, Pa.

The following are the results of Analysis of your Poco Metallic Paint.—Peroxyde of Iron 55.84; Red Oxyde of Manganese, 1.65; Lime, 2.52, Magnesia 1.29; Alumina, 9.00; Silex, 29.70;—100 parts.

The Analysis proves that this paint is not likely to be altered in the slightest degree by ordinary atmospheric agents, such as sunlight, rain, cold, or heat. We therefore regard your Poco Metallic Paint as of the most durable character

NATIONAL FERTILIZER.

The attention of Agriculturists is requested to this ECONOMICAL and SUPERIOR **FERTILIZER.** It possesses all the good qualities of the best known manures, without any of the injurious effects produced by the over-active Ammonia in Guano and kindred FERTILIZERS, while its *price* is **less than one-half of the Peruvian** Guano. The various materials composing this Fertilizer, are so chemically combined, that they are gradually evolved by the heat and moisture of the earth, and furnish to the plant all the requirements for a **rapid and luxurious vegetation.**

[COPY.]

NEW YORK, Sept. 8, 1860.

I have used about one ton of the NATIONAL FERTILIZER manufactured under Dr. L. Harper's patent, on my sugar plantation in the Island of Cuba, and although tried upon very poor soil, realized a fine crop. I used it in the same way and in the SAME QUANTITY as I use Peruvian Guano. I can confidently recommend it as in every respect equal to Peruvian Guano for sugar cane.

HISTORY
OF THE
RAILROADS
AND
CANALS
OF THE
UNITED STATES
OF AMERICA
EXHIBITING THEIR
Progress, Cost, Revenues, Expenditures
AND
PRESENT CONDITION.

By HENRY V. POOR, Esq.,
Editor of the 'AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Contractors, Railroad Companies, Masons and others. Dealers, etc. Address, **Hudson River Cement Company,** Please address, **Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

ROSENDALE HYDRAULIC CEMENT.

ROSENDALE AND KINGSTON CEMENT CO. Manufactory at Kingston, N. Y. on the West Bank of the Hudson River. Office 48 Pine st., New York City.
E. M. BRIGHAM,

ROOFING.

THE Cheapest and most DURABLE ROOFING IN USE. Sent to any part of the country with *directions for application.*

GUTTA PERCHA CEMENT ROOFING.

SPECIMENS and *references* can be seen, and any desired information obtained on application, by *letter* or in *person,* at our OFFICE, **510 BROADWAY, N. Y.** (Opposite the St. Nicholas Hotel).
JOHNS & CROSLEY.

This Roofing can be applied to new and old Roofs of all kinds. It is FIRE and WATER PROOF.

Gutta Percha Cement applied to Tin and other Metal Roofs will render them perfectly and permanently water-tight.

JOHNS & CROSLEY,
Sole Manufacturers,
510 BROADWAY.

PATENT ASPHALTIC
ROOFING FELT.
THE BEST, CHEAPEST AND
MOST DURABLE ROOFING KNOWN.

THE IMPROVED PATENT ROOFING FELT furnished by the Subscribers is entirely free from the objections hitherto urged against articles that have been furnished under similar names by various parties.

It makes a **light, cheap, durable,** and perfectly **Fire** and **Water-proof Roofing** for **Churches, Farm Buildings, Railroad Depots, etc.**

It forms the best and cheapest lining for Stores, Granaries, Barns and Wooden Buildings, as rats, mice and other vermin will not touch it.

It stands all climates and has been extensively furnished to the British Government for use in their widely scattered foreign possessions. The Turkish Government used large quantities of the Felt for roofing their hospitals and stables in the late war.

In this country first class dwelling houses have been roofed for three years with this Felt, and the owners who used tin now prefer this Roofing Felt.

Also an entirely new, superior and cheap **ROOFING CEMENT** for the above Felt and leaky tin roofs.

For Samples, Circulars, etc., apply to

EDMISTON BROS.,
No. 3 Bowling Green, New York.
N. B.—Agents wanted.

CEMENT ROOFING.

PATENT MICA
AND
Fibrous Cement Roofing.

IT HAS STOOD THE BEST OF ALL TESTS—TIME!

IT fully sustains the high reputation it has gained, as a PERFECTLY RELIABLE, DURABLE and WATER PROOF ROOFING. It is adapted to every variety of Roof, new or old, and is the best and cheapest Cement in use for repairing OLD LEAKY TIN or other Roofs.

ALL WORK WARRANTED.

Cement for sale by the Barrel, and sent to any part of the Country, with printed instructions for use.

Also, for sale, State and County Rights for a portion of the United States.

DITTO, PORTER & CO.,
Successors to JOSEPH DITTO & Co.,
207 Broadway, cor. of Fulton st., N. Y

GUTTA PERCHA
ROOFING,

IN Rolls which anybody can put on; waterproof, elastic, durable, fire-proof; needs NO repairs; costs about half as much as Tin, and **lasts twice as long.**

These Roofs are suitable for any style of building. They can be steep or flat, or of any required inclination. Also,

LIQUID
Gutta Percha Cement,

Preferable to paint for covering Tin Roofs, protecting them for many years from rust, and rendering them water tight.

Samples, Terms, Price, etc., furnished on application.

American Railroad Journal.

PUBLISHED BY J. H. SCHULTZ & CO. No. 9 SPRUCE ST.

New York, Saturday, December 1, 1860.

Baltimore and Ohio Railroad.

The business of this company for the fiscal year ending September 30, 1860, as set forth in the recent report of the President, exhibits a very gratifying increase. This is attributable to the increased crops of 1859, combined with the gradual improvement in the general business of the country, which have developed, for the fiscal year, the largest aggregate results in tonnage, obtained since the construction of the road. Notwithstanding the rates for transportation have ruled generally at a low standard, the advantages of this company in cheap fuel, and its ability for relative economy in working, have produced the largest net gain accomplished in its history—a gain exhibiting the best return heretofore realized upon capital invested in any similar railway enterprise either in this country or Europe. The large crops of the present season assure increased business; and the future, therefore, promises favorably.

The gross earnings of the Main Stem during the year were $3,922,202 94 being an increase of $303,584 49 over the preceding year, and of $65,717, 15 over the fiscal year 1858. The expenses of working and keeping the road and machinery in repair amounted to $1,616,615 61 being 41.21 per cent. upon the revenue, exhibiting a decrease of 5.35 per cent. compared with the previous year, and of 24.42 per cent. compared with the fiscal year of 1858. This continued improvement in the relation of expenditures to revenue results from economy of management. The reforms growing out of the thorough system of supervision of the expenditures of the company, embracing the details of the entire service, have been carefully and successfully maintained.

As interesting in this connection, and furnishing particulars of the reduction in expenses, the following analytic comparative statement of the revenue and working expenses on the Main Stem for the past fiscal years is presented:

	1858.	1859.	1860.
Revenue	$3,856,485 79	$3,618,618 45	$3,922,202 94
General expenses	$34,685 45	$28,481 65	$32,730 08
L'ss's b. accid'ts, etc.	21,357 89	7,664 71	4,766 81
Expenses of trans'n	662,222 48	533,487 03	480,467 26
Repairs of railway.	829,143 02	346,206 88	418,520 19
Do. of water sta's	11,677 90	7,249 99	5,057 64
Do. of depots	43,061 93	18,547 08	26,431 69
Do. of bridges	24,991 29	18,588 38	30,522 69
Do. of telegraph.	3,413 87	2,277 70	2,798 75
Do. of stationary machinery	38,310 84	24,543 84	25,809 37
Watching cuts	32,870 30	30,705 59	29,421 80
Watching tunnels	2,293 35	1,443 15	1,632 60
Watching bridges	7,441 30	6,168 95	6,393 65
Pumping water	10,357 13	9,917 33	6,782 70
Repairs of locomot's	372,849 92	281,458 16	230,794 72
Do. of dump cars	1,877 18	1,959 16	1,314 63
Do. of pass'r cars	52,213 06	49,305 50	38,088 71
Do. of burd'n c'rs	194,088 44	179,798 04	151,844 31
Clean'g eng's & cars	52,469 54	39,691 95	32,805 25
Contiug't expenses of mach'y depart't	2,550 00	3,149 25	2,437 83
Fuel	97,684 03	73,517 36	73,878 17
Preparing fuel and filling tenders	35,333 93	20,802 54	13,087 76
Repairs of su. pl'ws	2 79	-------	-------
	$2,531,199 29	$1,684,997 84	$1,616,615 61

It will be seen that whilst the gross revenue, in comparison with the last fiscal year has *increased* $303,584 49, the working expenses have been *reduced* $68,382 23, making an increase of net profits of the Main Stem of $371,966 72. As compared with the fiscal year 1858, (the increase of revenue being $65,717 15, and the decrease of working expenses $914,583 68) the increase of net profits amounts to $980,300 83.

By comparing the financial condition of the company at the close of the last fiscal year, it will be seen that the following payments have been made:

For increase of the Sinking Funds, exclusively by investments from the current net earnings, viz:—The Sinking Fund for the redemption of the City Loan, to $712,846 36, being an increase of	$41,231 60
For the redemption of the Mortgage Debts to $568,555 06, being an increase of	155,383 33
For redemption of Ground Rents on Camden Station to $74,969 93, being an increase of	14,250 00
Aggregate increase of Sinking Funds.	$210,814 93
For Rolling Power:—Payment to Ross Winans for locomotives, under contract assumed from the Northwestern Virginia Railroad Company	28,480 00
For additional advances, under the agreement, after crediting all revenue received to the Northwestern Virginia Railroad Company for payment of interest (including $90,0 0 on the bonds of that company, guarantied by the city of Baltimore,) and for expenditures in improving the condition of the road, etc.	285,359 51
For semi-annual cash dividend of 3 per cent. on the capital stock, on 9th November last	303,348 00
For semi-annual cash dividend of 3 per cent. on the capital stock, on the 13th April last	303,381 00
For interest on the dividend bonds of 1862	233,119 80
Making	$1,364,503 24
And the subjoined amount is held by the Treasurer for the payment of the remainder of the interest on the dividend bonds of 1862..	312,831 00
Exhibiting a total of	$1,677,334 24

In consequence of the improved condition of the Northwestern Virginia Railroad, and the greater economy in working, the advances to that Company have been reduced, as compared with the preceding year, $36,171.04; and $85,752 24, as compared with 1858.

The balance of cash in the Treasury, on the 30th of September, was $550,867 12, after deducting $165,000 for payment of interest on the city loan and the bonds of the company, which matures on that date. Included in this amount, is the sum reserved for the payment of interest on the bonds of 1862.

The bills receivable, and sum due from the Post

Office Department for mail service amount to $114,480 48, and the uncollected revenue is $370,-225 62.

After charging interest and ground rents for the twelve months, $735,314 38; $2,850 paid in compromise of suits of 1856 and 1858; $3,380, bonus paid to the directors of the steamship Great Eastern, in arrangement for her visit to the vicinity of the harbor of Baltimore; and $2,191 27, a loss in settlement with the Western Telegraph Company; and crediting the dividends and rents received from the Washington Branch, the increments of the sinking funds, house rents paid into the treasury, the difference in the amount of materials on hand in the machinery department, and the revenue, less all expenses,—the net gain is shown for the fiscal year, of $1,834,569 25, being upwards of 18 per cent. on the capital stock. Charging additionally, as legitimately due for the fiscal year, $181,983 60,—being one year's interest on the dividend bonds of 1862,—the remainder is $1,652,585 65, being upwards of 16 per cent. on the capital stock; and, deducting the entire interest on the dividend bonds for three years, accrued to the 1st June, 1860, (viz.: $545,950 80), the remainder is $1,288,618 45,—which still exibits upwards of 12½ per cent. upon the capital stock.

The strong financial condition of the Company, enabling it to purchase all its supplies for cash, and to avoid any necessity for borrowing money, has caused a further reduction, in the sum paid for interest, of $16,746 64, as compared with the preceding year, and of $79,883 96, as compared with 1858.

After all deductions—including the semi-annual dividends, $606,729, the extra dividend, $3,033,-060, and the entire interest accrued thereon, $545,950 80—the profit and loss account presents a surplus of $8,741,146 36.

The revenue of the Washington Branch for the year has amounted to $462,880 44, exhibiting an increase of $20,660 91 over the previous year. The working expenses have been $173,042 33, being $636 92 less than in 1859, and leaving net the sum of $289,838 11, thus presenting, comparatively, an increased gain of $21,297 83.

The ratio of expenses to revenue, for 1858, was 43⅛ per cent.; for 1859, 39.28, and, for the past year, 37.38 per cent.

The sums paid to the State of Maryland during the year, on account of the capitation tax, have been viz:

For tax on passengers between Baltimore and Washington Junction, for the fiscal year	$8,611 06
For tax on passengers between Washington Junction and Washington	69,210 89
Making	$77,821 95

—being 26.85 per cent. of the net earnings.

A semi-annual dividend of 4½ per cent. was paid in October, 1859, and the same in April and October, 1860.

The revenue of the Northwestern Virginia railroad for the year has amounted to $269,203 12; and the working expenses to $194,586 65.

The revenue is $29,031 83 greater than for the previous year, whilst the comparative expenses have been reduced $3,683 98. The net gain, as compared with 1859, is $32,715 76, and as compared with 1858, is $79,865 20.

The ratio of working expenses to revenue, for 1858, was 102.12; for 1859, 82.55; and for the past year, 72.28 per cent.

Under the arrangements made by the city of Baltimore with the Northwestern Virginia Railroad Company, the important work of arching the tunnels upon its line has been commenced. The largest and most difficult tunnels, (Nos. 1 and 6) have been first undertaken. It is understood that the work will be prosecuted as rapidly as the means at the command of the company will permit.

The aggregate revenues, working expenses, and net results of the Main Stem, Washington Branch, and Northwestern Virginia Railroad, for the fiscal years terminating respectively 30th September, 1859 and 1860, have been, viz:—

REVENUE.

	1859.	1860.	Increase.
Main St..	$3,618,618.45	$3,922,202.94	$303,584.49
Wash.B..	422,219.53	462,880.44	20,660.91
N.W.Va..	240,171.29	269,203.12	29,031.83
Total.	$4,301,009.27	$4,654,286.50	$353,277.23

EXPENSES.

	1859.	1860.	Decrease.
Main st'm.	$1,684,997.84	$1,616,615.61	$68,382.23
Wash. Br.	173,679.25	173,042.33	636.92
N.W.Va.	198,270.58	194,586.65	3,683.93
Total...	$2,056,947.67	$1,984,244.59	$72,703.08

Total increase of gross revenue	$353,277 23
Total decrease of working expenses	72,703 08
Total increase of net earnings	$425,980 31

An aggregate reduction is shown of $72,703 08 in working expenses, compared with the preceding year, although the large additional traffic has improved the revenue $353,277 23, making an increase net gain of $425,980 31. The same comparison with 1858 exhibits an increase of gross revenue of $80,373 73, and a reduction in working expenses of $1,002,661 13, presenting an increased net gain of $1,083,034 86.

The number of tons hauled, on Main Stem, in 1859, was 882,076 whilst during the past year the aggregate is 1,005,837 tons. The largest tonnage in any former year, was in 1857, viz: 895,401 tons. The excess of tonnage for the past year, over any previous year, is therefore 110,436 tons.

The tonnage between Baltimore and the Ohio River also proves to be greater than during any previous year.

The quantity of bituminous coal, paying frieght transported during the year, has been 427,798 tons—an increase compared with 1859 of 84,064 tons, and compared with 1858 of 94,996 tons. The deliveries of coal at Baltimore exceed those of the preceding year 23 7-10 per cent. The revenue from coal for the year has been $1,093,195 84, being $258,814 89 more than in 1859.

The shipments of cotton for the markets of Europe, and the Atlantic coast have been made, until recently, via New Orleans. In 1859, 6,888 bales sought the Baltimore and Ohio route; and during the past year these shipments have swelled to 14,182 bales. The Geographical relations of Tennessee, North Mississippi, Arkansas, and of their leading original mart, Memphis, point to the Mississippi and Ohio rivers for economical transit. A desirable outlet is offered for this extensive trade via Parkersburg, in view of its advantageous location on the Ohio river nearly 200 miles south of Pittsburg.

Liberal outlays have been made in improving the road; the expenditures for repairs of railway, on the Main Stem, having been $418,520 19, being $72,313 31 more than for the preceding year. 6,932 tons of new iron have been used, relaying 73¾ miles of track.—Large and superior white oak cross-ties have been selected, and 181,982 have been placed in the track during the year.

The Tarpeian Rock has been removed, and the tracks connected west of Ellicott's Mills—thus perfecting the line of double track to Marriottsville, and facilitating and adding security to the movement of trains.

A great improvement has been made on the 49th section of the road, at a cost of $6,500. A new line, with an improved grade, and a single curve of 1,520 feet radius, has been substituted for the line used for some years, which contained three curves, of but 300 feet radius.

The amount charged to repairs of bridges ($80,-522 69,) is largely in excess of the preceding year. The increase arises from desirable and permanent improvements. New and substantial abutments have been built for the bridges at Pikes' Fork and Cherry Run. At the latter stream a double-track iron bridge has replaced the culvert, which had caused occasional difficulties during periods of high water. The wooden structure over the South Branch of the Potomac (which was erected when the road was built), has been regarded as possibly not sufficiently strong for the increasing and prospective business of the road. In pursuit of the fixed policy of the Company, to insure safety, an improved iron suspension bridge is now being substitued. New abutments have been constructed, of solid masonry, with dressed granite facings. The iron work has been prepared by the machinery department, at the Company's shops at Mount Clare, at the cost of $11,772, and, although the structure has not yet been placed upon the road, the amount has been charged to the account of repairs of bridges for the past year.

The following remarks of the Master of Road appear to be fully justified by the experience of the Company:—"Our road has now attained a condition to challenge comparison with any other line in the country. Our tracks are in fine order; our ballasting and cross-ties have been steadily improved; our tunnels give continued evidence of durability; and our iron and other bridges are strong and reliable."

The entire equipment of locomotives and cars has been decidedly improved, and made so effective as to transact the large business of the Company with unfailing regularity and despatch.

The economy of burning coal in engines, both in the passenger and freight service, continues to demonstrate the immense advantage possessed by this Company in cost of fuel, compared with the competing Atlantic lines. The principal contract for coal, delivered on the cars of the company at Piedmont, has been made at 59 cents per ton of 2,240 lbs. The entire cost of fuel on the Main Stem (including its preparation and filling tenders,) for the fiscal year, has been $86,965 93, being $7,353 97 less than for the preceding year.

The Pittsburg and Connellsville road, by which a connection will be formed from Cumberland to Pittsburg, is a line of much promise and interest.

The more direct and intimate relations, and ex-

tensive business with the important city of Pittsburg, which the opening of this route would control, induce the hope that arrangements may be accomplished, at an early date, to insure its completion.

In order to present the magnitude of the interest of the State of Maryland and the city of Baltimore in the successful management of the Company, the following statement is presented of the payments to each, during the fiscal year, viz:

To City of Baltimore:—		
Extra dividend principal		$1,050,000 00
Interest thereon to 1st June, 1860, (3 years)		189,000 00
Dividends upon Main Stem stock, $3,500,000 (6 per cent.)		210,000 00
Tax on bonds, indemnified from taxation		472 11
Interest on Five Million Loan, (paid quarterly)		300,000 00
		$1,749,472 11
To State of Maryland:—		
Extr. divid'd (principal).	$205,680 00	
Interest thereon to 1st June, 1860 (3 years).	37,022 40	
Dividends on $685,600, Main Stem stock (6 per cent.)	41,136 00	
Dividends on $550,000, Washington Branch Road stock (9 per et.)	49,500 00	
Tax on passengers betw'n Washington City and Washington Junction	69,210 89	
Tax on passengers betw'n Washingt'n Junction and Baltimore	8,611 06	
Interest and tax on sterl. bonds	180,084 27	
		591,244 62
Making		$2,340,716 73

To the city exclusive of the extra dividend, $510,000 are now paid annually for regular interest and dividends on her investments in the road, and the principal and interest on the extra dividend amounted to $1,239,000.

The aggregate of interest, tax on passengers on the Washington road, and dividends paid the State, has been $591,244 62. Embracing the interest hereafter to be paid on the dividend bonds of 1862, the regular payment of dividends and interest will exceed $360,000 per year. Every taxpayer, therefore, of the State and of the city, has a direct and important interest in the effective and successful administration of the affairs of the Company.

The appreciation of these facts has led to great unanimity and co-operation among the respective representations in the Directory, and it is trusted will, for the future, induce the maintenance of the most harmonious relations.

The progress of the Sinking Funds, for the past five years is presented in the subjoined statement:

Sinking Fund from 1st October, 1856, to 10th September, 1860 (five years), viz:

	Totals of the three Sinking Funds for the five y'rs from Oct. 1, 1856, to Sept. 30, 1860.	Sinking Fund for the redemption of the Five Million Loan.	Mortgage Debts.	G. rents on Camden St'n.
1856	$489,086 17	$442,144 51	$20,000 00	426,941 66
1857	683,754 41	510,979 42	137,333 33	35,441 66
1858	987,284 13	619,675 81	270,666 66	46,941 66
1859	1,145,556 42	671,614 76	413,221 75	60,719 98
1860	1,356,371 35	712,846 36	568,555 06	74,969 93

The increase from $489,086 17 in 1856 to $1,356,371 35 in 1860, proves the system adopted by the company to be successful. In addition to the accretions from the interest on the investments held in the sinking funds, it will be recollected that, under the resolution adopted on the 17th December, 1856, $113,333 33 are to be annually appropriated to the reduction of the mortgage debts, and $6,000 are also to be invested for the redemption of ground rents on Camden Station. Upwards of $200,000 per year are now withdrawn from the current earnings, for the purchase of the mortgage bonds and indebtedness of the Company. Ample provision is thus wisely made for the payment of the entire funded debt.

Since the date of the report, the injunction case in regard to the Extra Dividend declared by this Company December 17th, 1856, and which was then pending before the Circuit Court of the United States for the Maryland District, has been heard and decided. The argument on both sides was full, and the opinion of the Court most elaborate. It establishes the existence of an amount of net profits, more than sufficient for the dividend, and their application to construction, under a pledge to return them to the stockholders; and decides that the power to return such net profits, so used, cannot be questioned, since the decision of the Court of Appeals of Maryland in regard to the bond dividend of 1846. The dividend, therefore, is sustained by this learned tribunal, on the very grounds of fact and law on which it was rested by the board. The injunction to restrain the payment of the dividend was, in consequence, refused, and the Court, for reasons assigned by it, proceeded further to dismiss the bill, so that the suit is at an end.

The Company has since proceeded in the delivery of the bonds of 1862, and in the payment in full of the entire amount of interest accrued.

Missouri Railroad Bonds.

In regard to the interest on the Missouri State debt, the St. Louis *Democrat* says: "We believe all of it is already provided for except some $250,000. The indebtedness of St. Louis County, the interest of which is due in New York Dec. 1, is large. The interest due at that time, amounting to $250,000, has just been provided for, arrangements having been made with our large institutions for that purpose."

The St. Louis *Republican* has the following upon the same subject: "As regards the payment of interest on our State bonds and of the bonds of the County falling due presently in New York, it may be answered, that there is no doubt of its being met promptly. The County has entered into arrangements that insure its being placed in New York at the day. Negotiations are in progress for anticipating the State revenue, so as to make it certain that the interest on the State bonds will be paid promptly."

The Treasurer of the State of Missouri has issued the following notice:

TREASURER'S OFFICE, Jefferson City, Nov. 21, 1860.

Notice is hereby given to all holders of Missouri Railroad bonds that the coupons for the semi-annual interest on said bonds will be paid on presentation at the Bank of Commerce, in New York, on and after the 1st day of January next.

A. W. MORRISON, State Treasurer.

Journal of Railroad Law.

DOMICIL OF RAILROAD COMPANIES: ASSESSMENT OF CORPORATIONS BY COMMISSIONERS OF HIGHWAYS.

The commissioners of the town of Cortlandt in Westchester county, New York, assessed the Hudson River Railroad Company as a stock corporation under the power conferred by Sec. 1 of chapter 431, of the laws of 1837. The company were taxed by name upon the last assessment roll of the town for real estate owned therein; and the land so owned by them was not assessed as land of a non-resident owner, but as land of a resident owner. The principal place of business of the company is in New York City, and the lands thus taxed were a portion of the track and certain depot grounds on the route of the road, which passes through the town. It was contended by the company that the assessment which was for highway labor, was erroneous and void, and that the commissioners should have assessed the lands owned by the company as lands of a non-resident owner according to another statute.

The case came up by *certiorari* before the General Term of the New York Supreme Court in the second Judicial District. The following is the opinion of the court.

EMOTT, J.—The question whether a railroad corporation is to be considered as a resident for purposes of taxation or otherwise in such county through which its road runs, or only in the city where its principal business office is situated, may perhaps be involved in some doubt. Residence and inhabitancy are terms which obviously can only be used of such a corporation in a qualified or accommodated sense. The term domicil, which had a somewhat different meaning, involves still more the idea of purpose or intention, and is, I suppose, not properly applicable to such an artificial being. Still the question whether such corporations are to be treated as residents or non-residents, occurs in various shapes. It is material in reference to taxation, and it arises in applying the statute regulating process from inferior courts, and the jurisdiction of those courts.

The proper mode of taxing the lands of railroad corporations for highway labor, as well as for the general purposes of government, must undoubtedly be ultimately determined by ascertaining whether they are to be regarded as resident or non-resident owners of their lands, in the various towns through which their track is laid. But I have been unable to see how we can reach the question in the present case. The first section of the act of 1837, under which the defendants made the assessment now complained of, directs these officers in apportioning the residue of the highway labor to be performed in their town, after assessing one day's labor upon every male inhabitant of full age, "to include among the inhabitants of such town, among whom such residue is to be apportioned, all moneyed or stock corporations which shall appear on the last assessment roll of the town to have been assessed thereon." The rule of action for the commissioners of highways, therefore, is to follow the previous action of the assessors. They are not to assess such corporations as are situated in their town, or such as may properly be considered inhabitants of such town. They are to take the last assessment roll for a guide, and to include in their assessment every corporation which they find assessed therein. The

corporations the act intends shall be included among, and treated as inhabitants for all its purposes. The highway law itself affords no rule or principle for discriminating between such corporation as are and such as are not taxable in the towns, nor between such portions of the property of these corporations as may or may not be thus taxable. It affords no data by which we can decide whether a railroad corporation may properly be deemed to have a residence in all or any of the towns through which its road passes. On the other hand the laws regulating the assessment and collection of general taxes, do contain directions and regulations as to the mode of taxing such corporations. The highway law does not even direct the commissioners to include in their assessment such corporations or such corporate property as ought to have been taxed in the town and upon the last preceding assessment. These officers are to be guided by the fact not the right. The question of right is to be determined by one set of officers only, the assessors; and is not left open for independent and possibly conflicting action by two assessing boards in the case of the two taxes.

If we were disposed or felt justified in considering the merits of the main question which was somewhat argued at the bar, that of the residence of the relators, we could only do so in reference to the assessment of the general tax. If we could say that the statute meant that the commissioners should include in their assessment such corporations as were rightly and legally taxable in their town, we must refer that question to the general tax, and we should be brought to the question, how the lands of this company ought to be taxed by the town assessors. If it be not the corporations which were actually and as a matter of fact upon the last assessment roll, which are to be taxed as inhabitants of the town for highway purposes, it can only be corporations which properly and legally appeared upon that roll, which can be so included, I can discover no landmarks by which our investigations could proceed but these.

But this question the counsel for the relators declined to argue, and as it was intimated that it was to be presented to us directly in view of the proceedings of the town assessors in the case of the same company, it is proper that we should reserve any discussion of it at present.

We do so the more readily, because, as already intimated, we cannot consider the question brought before us by the present proceeding. This return states that the relators were assessed by name, as a corporation, upon the last assessment roll of the town of Cortlandt, and even if it also state facts which would show that they were improperly taxed in that roll, still the rule for the defendants was whether the relators appeared in the roll, not whether they ought to have appeared there. The error, if there be one, can only be reached by correcting the town assessment. Then the commissioners of highways will be bound to follow it; or rather they cannot tax by name, as an inhabitant of the town, any corporation which is not so assessed upon that assessment list. But while the relators appeared upon the town assessment roll in the manner stated in this return, the defendants were not only justified but required to assess their property in the manner in which they imposed this tax. The proceedings which this writ brings before us must, therefore, be affirmed.

Atlanta and Jacksonville Railroad.

Col. L. P. Davis, agent of this company, was in our place on the 6th. He had passed along the entire route down Terrapin creek and by Cross Plains, for the purpose of securing the right of way, and informs us that he had succeeded along the entire route, with some three or four exceptions. He has also traversed previously the direct route, which comes in due east, to within six miles of this place, and secured the right of way in every instance, and while here saw nearly all the settlers in the remaining portion, who gave him assurances, that the right of way would be unanimously given.

We sincerely hope that the company may find it to their interest, upon a careful and accurate survey of both routes to adopt the most direct and shortest by some six miles, which comes in directly east of this place. We feel perfectly assured, that at least fifty thousand dollars more of stock will be taken on this than any other route. Should they fail to do so, and intersect the Rome road some fourteen miles north of this, the Griffin road will certainly make the direct connection, and thereby divert a large amount of travel and business from this road.—*Jacksonville (Ala.) Republican.*

Blue Ridge Railroad.

At a meeting of the stockholders of the Blue Ridge Railroad Company of South Carolina, held on the 31st of October, the President, Hon. Edward Frost, submitted a report on the operations of the past year, and the present condition of the company. From this we learn that the Legislature at its last session directed a subscription of $300,000 to be made for the State to the stock of the company, payable in 6 per cent. bonds, for the purpose of completing the road between Anderson and Walhalla, and for no other purpose; and directing that the work beyond that village be immediately suspended unless further subscriptions could be obtained. Every part of the work beyond Walhalla was therefore immediately suspended.

From the report of Col. Walter Gwynn, Chief Engineer, we learn that the bridge over Eighteen Mile Creek is finished, and that the bridge over Seneca River will be completed by the 1st of January next. At that time the grading will be done, and the cross ties laid, so as to be ready for laying the iron; and he expects the road will be ready for operation in February next. All the materials necessary for the construction of the bridges at Seneca and Twenty-Six Mile Creeks had been purchased and delivered. The rails, chairs and spikes had been imported, and no delay in the completion of the road to Walhalla was anticipated. A section of 33 miles, or nearly one-sixth of the entire line to Knoxville will then be in operation.

A table is appended exhibiting a comparison of the several quantities and kinds of work originally to be done for the construction of the road in the several States of South Carolina, Georgia, North Carolina and Tennessee, from which it appears that the grading in South Carolina is more than double the grading in Tennessee, with the same length of road; and is nearly equal to the whole grading in North Carolina and Tennessee, 126 miles. The tunnels in South Carolina exceed all the tunnelling on the line; while the bridge and arch masonry in South Carolina is nearly equal to all the bridge and arch masonry of the whole road. The estimated cost of the road in South Carolina and Georgia, which is 70 miles in length, and 30 per cent. of the distance to Knoxville, is 58 per cent. of the estimated cost of the whole road.

The following statement exhibits the *per cent.* of the work which has been done:

	S. Car.	Ga.	Tenn.
Grading	80	45	30
Tunnels	66	15	..
Bridges and arch masonry	73	46	53
Square drains or culverts	84	75	48

—from which it will be seen that the principal part of the work has been done in South Carolina and Georgia. No work has been done in North Carolina. The work in Tennessee was done in order to comply with the conditions which were annexed to the grant of the charter and of aid by that State. The road might have been finished by this time to Rabun Gap, and far advanced to completion as far as Knoxville if the work had not been interrupted by frequent suspensions.

The estimated cost of finishing the road from Walhalla to Knoxville, in sections, is as follows:

From Walhalla to Clayton, S. Carolina portion, 22 miles.	$761,218	
Georgia portion, 9 miles....	558,946—	$1,320,165
From Clayton to Franklin, Georgia portion, 8 miles..	175,387	
N. Carolina port'n, 14 miles.	414,248—	589,636
From Franklin to Nantihala 28 miles..		899,958
From Nantihala to Tenn. line, 38 miles.		859,182
From Tenn. line to Marysville, 37 miles.		879,706
Finishing the road from Marysville to Knoxville, 18 miles.....		307,915
Sept. 1, 1860.—Total cost of finishing the railroad from Walhalla to Knoxv.		$4,586,512

The Treasurer's statement shows assets to the amount of $1,120,914, applicable to the construction of the road, leaving a balance of $3,465,598 necessary to finish the entire road; a guarantee of $1,000,000 more by the State, wil leave only $1,-465,000 to be provided. The sale of the balance of the first mortgage bonds will nearly produce this amount. What may be wanting can, confidently, be expected from North Carolina and Tennessee. The Board is confident that the proposed aid will be sufficient to carry through the road.

The original estimate of the cost of the road was $7,575,677. By adding the amount of expenditure to the estimated cost of completing the road from Walhalla to Knoxville, it appears that the road can still be finished at a cost within the original estimate. The estimate has been made in sections, which it is believed will be the stages in the progress of the road. The report says:

The first and most important section is from Walhalla to Clayton. In that distance the mountains are crossed and all engineering difficulties overcome. Clayton will present a point for the connection of other roads, west of the mountains, at a cost within the means of the people. To expect that they should construct a difficult, costly and unprofitable section of the road across the Blue Ridge, is even more hopeless than to expect that the same should be built, by individual contributions, from the eastern side of the mountains. The crossing of the mountains must be effected, if at all, by State aid. The State of South Carolina, alone, is interested in the construction of the Blue Ridge Railroad. Indeed, the States of Georgia and North Carolina are interested that it should not be finished. No aid can, therefore, be expected from either of those States. The enterprise must depend, exclusively, on aid from the State of South Carolina for its completion.

When the road is finished to Clayton, the people of Franklin will be stimulated to make a connection from that town. The citizens express confidence that, by their own effort, the road will be

graded from Franklin to the Georgia line. The people of Macon and Jackson counties have, at several large meetings, voted in favor of a subscription of $50,000 by each of those counties. The individual subscription can be increased. Thus the South Carolina Company will receive large aid in completing the road to Franklin.

The next stage is to Nantihala river. This point was taken as a station, because there the western extension of the North Carolina Central Road will cross the Blue Ridge road. This western extension is very nearly, if not quite, completed to Morganton, at the eastern base of the Blue Ridge mountains. From Morganton, the road across the mountains has been let to contract, and is in progress of construction to within a few miles of Asheville. A corps of engineers have, the past summer, located the western extension from Asheville to Ducktown. Those who are interested in this extension are confident of State aid to carry it through. A company is organized for the construction of a road from Ducktown to Cleveland. From this last town a road is finished to Chattanooga. When the road from Nantihala to Ducktown is completed, it will largely contribute to the business of the Blue Ridge road. The value of that road will effect the extension of the Blue Ridge road from Franklin to Nantihala.

When the Blue Ridge road is thus far extended, it will be taken up in Tennessee. For experience shows that, as soon as an advantageous railroad connection can be made, at a cost within the means of the people, they will be animated to the effort and provide the means to make it.

The State of Georgia has granted a charted to the Hiwassee Railroad Company to connect Ducktown with Clayton. Those who are interested in that road are sanguine of aid from that State. They are most desirous of that connection, as the best for them; but they can do nothing unless the Blue Ridge road is finished to Clayton. If that is long delayed, the impatience of the people will make them unite on the Ellijay Railroad, which will connect Ducktown with the Georgia road near Marietta. When this is done, a completed road, though much less advantageous than the Hiwassee road, will satisfy the people, so far as to make them desist from the effort and cost of making the latter. Besides, the interest of private stockholders and of the State, if aid is given to the Ellijay road, will create strong opposition to the making of a rival road.

The expectation of these extensions of the Blue Ridge road from Clayton, is not visionary. It is supported by observation of the progress of every existing railroad, to look no further than our own State. As soon as the north-eastern road was finished to Florence, it was carried on to Cheraw. It was no sooner finished to Cheraw, than its extension to the coal fields in North Carolina, and to Fayetteville, immediately engaged attention, and produced a combined effort to accomplish it. The South Carolina Central has shot out a branch from the north-eastern, to Charlotte. From Charlotte, a road to connect that town with Statesville, on the North Carolina Central, is being constructed. The same active tendency to extension will be noticed in every finished road in South Carolina. It pertains to every road, and its effect for progress is manifest in them all. In no section of country will this tendency operate more strongly than in Western North Carolina, East Tennessee, and North-western Georgia. The Rabun Gap is, to all that region, the shortest and best outlet to the Atlantic coast.

The Mississippi and Missouri Railroad.

This Road is to be completed, and cars running to Brooklyn before the 1st of January. The Des Moines *Reporter* says:

Six hundred hands have been placed upon the work between Brooklyn and Marengo. The terms of the land grant require the completion to Brooklyn by the time specified. But the Company have no intention of stopping there. They have informed the Stage Company that they do not intend to stop until they reach Grinnell, and there only long enough to accomplish the work beyond that point.

Railroad Earnings.

The report of the Receiver of the Central Ohio Railroad Company, for September, 1860, is as follows:

RECEIPTS.

Balance as per last report			$32,104 32
Receipts from passengers	$31,387 24		
Do. freight	40,071 21		
Do. mail	6,465 62		
Do. express	1,123 31		
Do. mileage on cars	777 35		
Do. other sources	162 30		
		79,979 99	
Total			$112,084 31

EXPENDITURES.

Amount brought forward		$5,740 57	
Various items		1,743 85	
Payments for liabilities incurred in August		58,087 96	
Payments for liabilities incurred in September		2,318 60	
		67,890 98	
Balance on hand			$44,193 33
Earnings from passengers	$26,091 47		
Do. express	1,879 78		
Do. mail	2,202 50		
Do. freight	35,307 57		
		$65,481 32	
Expenses		38 109 26	
Difference			$27,372 06
Liabilities incurred by Receiver, in September, and remaining unpaid, Sept. 30			$57,324 44
Liabilities incurred by others and due road		21,062 20	
Excess of liabilities due by the Receiver			$36,262 22

Annexed is an abstract of the statement of the Receiver of the Cleveland and Pittsburg Railroad from the 14th of June, the day of his appointment, to the 1st of September:

RECEIPTS.

Gross earnings from June 14, 1860, to August 31, 1860, two and a half months:	
Freight	$147,688 44
Passengers	69,086 75
Miscellaneous	22,059 60
Total	$238,834 79
Proceeds of assets received from the Company, and since reduced to available means	98,342 18
Total	$337,176 92

DISBURSEMENTS.

Operating expenses from June 14, 1860, to August 31, 1860, two and a-half months	$117,465 09
Payment of interest	98,281 29
Lease of P., Ft. W. & C. R. R. track.	1,250 00
New depot building, Pittsburg	6,187 51
New machine shop, Cleveland	19,912 71
New cars, etc.	8,576 06
Payments of notes issued and obligations assumed by the Company during the present year, and previous to the appointment of Receiver	10,011 41
Payment of operating expense incurred previous to June 14, 1860	66,692 82
	$337,176 92

The statement shows the operating expenses of the road to have been only forty-nine per cent. of the gross earnings. The track has undergone constant improvement, and is now in better condition than at any period in the history of the line, substantial buildings have been erected, new cars placed on the line, and the machinery kept in the most effective condition.

The reports of the Receiver of the Steubenville and Indiana Railroad for the months of May, June, July and August show the following receipts and expenditures:—

	Earnings.	Expenses.
May	$23,274 45	$22,218 18
June	20,932 55	19,681 34
July	24,894 92	18,509 86
August	31,688 37	26,847 09
Total	$100,790 29	$81,256 47
Net earnings	19,533 82	

The receipts of the Grand Trunk Railway of Canada, for the week ending November 17, 1860, were $81,847 15
Corresponding week, 1859 56,154 40
Increase $25,692 75
Total traffic from July 1, 1860 $1,292,003 00
Do. for same period last y.. 949,032 09
Increase $342,970 91

The following are the earnings of the Great Western Railway of Canada for the week ending November 16, 1860:

Passengers	$22,060 96
Freight and live stock	21,904 60
Mails and sundries	1,391 53
Total	$18,358 09
Corresponding week of last year	41,236 52
Increase	$7,120 57

Annexed are the receipts of the Sixth and Eighth Avenue Railroads for the past four months:

	Sixth Avenue.	Eighth Avenue.
July	$30,563 11	$39,610 03
August	29,691 44	33,644 42
September	32,038 87	34 525 11
October	34,578 22	35,054 56
Total	$126,871 64	$142,854 12

The following statement shows the business of the Reading Railroad during the month of October, 1860, compared with the same month of 1859:

	1860.	1859.
Received from coal	$267,457 06	$204,795 67
Do. merchandise.	66,148 21	46,842 27
Do. travel, etc.	35,351 17	32,007 96
	$368,956 41	$283,645 90
Transportation, roadway, dumpage, renewal Fund, and all charges	144,812 38	134,899 51
Net profit for the m'th.	$224,144 06	$148,746 39
Do. for previ's 10 mos.	1,269,781 10	981,022 19
Total net profit for 11 months	$1,492,925 16	$1,129,763 58

Chicago and Northwestern Railroad.

The work between Oshkosh and Appleton is being prosecuted with vigor notwithstanding the difficulty that has been experienced by the company in procuring workmen. We hear it reported unofficially, that two hundred and fifty hands could find employment on the works. The distance from Oshkosh to Appleton is twenty three miles. It is the design of the company to complete the road to the latter place before winter sets in.—*Chicago Times.*

Chicago, St. Paul and Fond du Lac Railroad.

It is the design of the Chicago and Northwestern Railway Company to complete their road to Appleton before winter sets in.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterisk* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in *"italics."*

Years ending.	Railroad. Main Line.	Railroad. Lateral and Branch Lines.	Railroad. 2nd Track and Sidelings.	Road in progress or projected.	Equipment. Engines.	Equipment. Cars. Passenger.	Equipment. American Railroad Journal.

Saturday, December 1, 1860.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Baltimore and Ohio Railroad.

The annual meeting of the stockholders of this company was held in Baltimore on the 19th inst., at which the 34th annual report was presented, and the following gentlemen elected directors for the ensuing year, viz: John Hopkins, Samuel W. Smith, Francis Burns, Wesley Starr, William A. Hack, Allen A. Chapman, John Spear Nicholas, John Gregg, C. Oliver O'Donnell, Henry A. Thompson, Richard H. Miles, James Harvey. At a subsequent meeting of the board, JOHN W. GARRETT, Esq., was unanimously re-elected President. JOSHUA I. ATKINSON, Esq., is Treasurer of the company; W. PRESCOTT SMITH, Esq., Master of Transportation; and THATCHER PERKINS, Esq., Master of Machinery. We give this week a pretty full abstract of the President's report.

This company seems at last to have terminated a *thirty years' war*, growing out of the necessity of providing the means for carrying forward and finally completing its great enterprise, which absorbed its earnings as fast as they accrued; and to have reached a position which will enable it to pay uniform dividends for the future. According to Mr. POOR'S history of the road, its total net earnings from 1832 to 1859, inclusive, were $17,421,250. The total dividends paid were only $4,589,866, of which only $1,204,243 were paid in cash. The balance of net earnings carried to construction up to 1859, after the payment of interest, was $6,092,317. A portion of this sum has been distributed in a stock dividend, the legality of which, though resisted by the city and State, has been fully sustained.

The experience through which the Baltimore

and Ohio has passed, is common to all companies, and seems to be a necessary training for all. In all its vicissitudes, however, this work has been admirably managed. To this, in fact, is to be ascribed the salvation of the enterprise. For two years past, pre-eminent success has been reached in this department, and the road may now be taken as a model, both in its management and results.

The Share Market.

The improvement in prices consequent upon the action of the banks has not been maintained, owing undoubtedly to the political questions now occupying general attention, and which are every day assuming greater importance. No satisfactory solution of them has yet suggested itself to the public mind. A crisis is evidently rapidly approaching, as not a month will, probably, elapse before one or more of the States will declare themselves out of the Union. The alternative to such a course will then have to be taken by the General Government. What this will be is yet a matter of conjecture. It is this uncertainty which weighs upon the market. In the meantime, the traffic of our roads continues excellent, and the stringency in the money market is being gradually relieved. The future, however, is full of unseen terrors, and till matters have taken a more definite shape, any considerable improvement in prices can hardly be expected.

North East and South West Alabama R. R.

At a meeting of the directors of this company recently held at Eutaw, Ala., the president reported that he had secured the loan of $218,000 from the State, and disposed of North Carolina bonds for a part of the loan at 98½, which, after fixing up the exchanges, netted to the company over 99 cents on the dollar. The agent of the company, who is negotiating for iron to lay the track, reports very favorable offers. Messrs. Scott & Adams have contracted to lay the track for the bonds of the company. Such an offer on their part manifests the highest confidence in the company and their interest in the early completion of the road. It is confidently expected that they will begin this work early in January. The Mobile and Ohio Railroad Company have tendered to the company, free of charge, the use of an engine and as many cars as they may need for the purposes of tracklaying, until the Directors purchase rolling stock; also, to bring the iron bars from Mobile to Meridian for three dollars per ton, and wait twelve months for the money.

Railroad from Decatur to Nashville.

We learn that the direct road leading from Nashville to Decatur, Ala., has been completed. The first train of cars has passed over it, and it is soon to be thrown open to general travel. The route to the south heretofore has deflected from Nashville one hundred and thirteen miles to the east by south on the Nashville & Chattanooga Railroad, as far as Stevenson, and thence turning back at nearly a right angle ran by the Charleston and Memphis road eighty-four miles to Decatur. The direct line from the latter point to Nashville is one hundred and twenty-two miles, so that seventy-five miles are saved to the Southern travel by the new route. The road is said to be well laid and finely equipped, and we congratulate the company and the public upon its completion.

Missouri Valley Railroad.

The gentlemen concerned in pushing this road through to Weston, are doing wonders. The counties of Ray and Carroll have subscribed $575,000 to the road, which will run through the most fertile region in the world, and fifty miles of it from Brunswick to Richmond, in Ray county, is over ground so level that the cost of road bed and superstructure will be less than $10,000 per mile. Wm. E. Moberly, Esq., of Randolph county, who has from the beginning manifested the most lively interest in the success of this road, has been elected President of the Ray county division, and it is presumed that the whole management of the road, as President, will be entrusted to him.—*St. Louis Republican.*

Locomotives for Sale.

We invite attention to the advertisement of the Boston and Maine Railroad Company in another column, headed "Locomotives for Sale," a pretty full description of the engines is given. The gauge of the road is 4 ft. 8½ inches.

Virginia Central Railroad.

The gross earnings of this road for the fiscal year ending September 30th, 1860, were $634,083 31
And the expenses of administration.. 274,954 10

Leaving as net earnings $359,129 21
From which deduct interest account $91,447 70
Sinking fund 23,000 00
Tolls to the State for use of Blue Ridge Railroad ... 24,006 04
Dividends declared during the year 156,565 46
295,019 20

Leaving a balance of $64,110 01

The construction and equipment account of the road up to the date of the report was $5,469,286 43. The total liabilities of all kinds, after deducting debts due the company, and cash on hand, were $1,533,521 48.

The gross receipts are $18,321 69 less than the previous year, and the expenses $5,246 09 greater—making a diminution in net earnings of $23,567 78.

Col. Edward Fontaine, has been unanimously re-elected president, and N. B. Hill and J. R. Woods, directors on the part of the stockholders.

Orange and Alexandria Railroad.

The earnings of this road for the fiscal year ending September 30, 1860, were:

From Passengers	$281,248 91
" Freight	136,687 51
" Mails and Express	32,490 47
	$450,426 89
And the expenses were	228,213 16
Leaving as net earnings	$222,213 73

The earnings are $161,627 97 in excess of those of the previous year.

Col. J. S. Barbour, Jr., has been re-elected president of the company for the ensuing year, and Henry Dangerfield, Esq., of Alexandria, and Mr. Coghill, of Amherst, directors on the part of the stockholders.

Little Miami Railroad.

The Directors of this Company have declared a dividend of four per cent., from the earnings of the past six months, payable on and after the 3d of December.

Galena and Chicago Union Railroad.

The Galena and Chicago Union Railroad Company has just declared its 19th dividend. The semi-annual dividends for August, 1859, and for February, 1860, were passed. This, however, was a default for which the directors had no remedy. In the meanwhile, the whole of the floating debt has been paid off, also a large sum of the bonded debt and the regular contributions have been made to the sinking fund.

For such times as the company has passed through during the last three years this is doing well, and augurs better things for the future. In order to show what the road has done in past times, we have compiled a table exhibiting the amount and rate of dividend paid from the first. The whole amount in 11 years has been $4,229,820, or 151 per cent. on the capital invested. The following are the details—

No.	Declared.	Amount.	Rate.	
1	May, 1850	$23,383	10	stock.
2	Nov. 1850	24,605	8	cash.
3	May, 1851	23,106	7	"
4	Nov. 1851	27,532	7	"
5	May, 1852	35,382	8	"
6	Aug. 1852	56,884	12	"
7	Feb. 1853	93,089	8	"
8	Aug. 1853	153,039	8	"
9	Feb. 1854	200,115	8	"
10	Aug. 1854	329,852	12	"
11	Feb. 1855	216,667	5	"
12	Aug. 1855	228,360	5	"

		538,704	12	stock.
14	Aug. 1856	273,770	5	cash.
15	Feb. 1857	278,940	5	"
		547,880	10	stock.
16	Aug. 1857	301,115	5	cash.
17	Aug. 1858	241,024	4	"
18	Feb. 1859	120,528	2	"
19	Nov. 1860	301,385	5	"
	Total	$4,229,820	151	

Railroad Applications.

The Camden and Atlantic Railroad Company intend applying to the next Legislature of New Jersey for power to construct a branch road from Absecom to Great Egg Harbor inlet, with authority to issue new stock to the amount of $100,000; also, power to establish a ferry, or take stock in those already established.

The West Jersey Railroad Company will apply for authority to subscribe to the stock of the Salem Railroad, or to endorse the bonds of the same. The Salem road will be a branch of the West Jersey road.

Another Application is also noticed for a railroad from New Brunswick to Orange to connect with the Morris and Essex Railroad at that point, and thence communicate with New York over the Morris and Essex and the new Hoboken road; also, another, understood to come from the New Jersey interest, to construct an independent line from some point opposite Philadelphia to another point opposite New York, to be called the "Main Trunk Railway of New Jersey," with $3,000,000 capital, and power to double the same. Also for a charter to build and operate a railroad from the State line near Nanuet, on the New York and Erie Railroad, to terminate either at Hackensack or at some point on the Northern Railroad of New Jersey.

Pacific Railroad.

This road is now completed to Smithton, in Pettis Co., 181 miles west of St. Louis.

Junction and Break-water (Del.) Railroad.

EDITOR AMERICAN RAILROAD JOURNAL:

In your issue of a few weeks back, I noticed an article in reference to the Millville and Glassboro' road, and its extreme cheapness. The fact of this road extending down one Peninsular, and that down the other of the two bordering the Delaware Bay, presents in their cost a striking example of the great similarity in the face of the two regions. I am now building the extension of this road to Georgetown, 16 miles from Milford. My estimate was $8,000 per mile. The contract as let for "grading, bridging, timber drains, cattle-guards, ballasting and track-laying" is in the aggregate $9,000 less than my estimate, or $600 per mile about. This reduces the cost to $7,400, if iron holds at $50 per ton which is my estimate. Now at that price, if Mr. Roberts use da 45lb. rail, instead of a 50lb. (my estimate) and taking 45lbs. for mine, which is of course fair in a comparison of the two we have the difference between 80 tons per mile, (50lb. rail) and 71 tons (45lb. rail)—9 tons at $50, which would reduce the cost of my road to less than $7,000 per mile. My estimate contains all that his does in the items of right of way, engineering, freight on materials, etc. The right of way was about the same per mile as in his case, while my estimates for depots, etc., was somewhat larger. I mention these facts as I perceive that Mr. Roberts says he believes there is not in the country such a cheap road. You can embody these rough items if you see fit in an article for your paper, as I believe such things are interesting to the Profession generally, and a comparison of such matters is favorable oftentimes to new undertakings.

Your obedient servant,

T. F. TILGHMAN, Chief Engineer.

Millville and Glassboro' Railroad.

The Millville and Glassboro' Railroad is fast approaching completion. The people in the southern part of the State seem to appreciate the advantage of these improvements, and the prospect of the early completion of a continuous railroad to Cape May is very encouraging.

Wilmington (N C.) and Weldon Railroad.

The gross receipts of this road the last year were $500,209, which is an increase of $22,654 over the year previous. The total expenses were $254,714, which leaves $245,495 as the net income. During the year, also, nearly the entire rolling stock has been renewed.

Finances of Arkansas.

Annexed is an extract from the message of Gov. Conway, of Arkansas:

The payments on the State debt due up to Oct. 1, 1860, amounted to $2,341,996 17. This sum includes $145,067 56, the amount of the 5 per cent. of the net proceeds of the sales of the public lands, which accrued to the State of Arkansas under the compact between the United States and this State, from Jan. 1, 1841, to Jan. 1, 1860, and also includes $5,012 16, which had accrued to this State under the acts of Congress to appropriate the proceeds of the public lands, approved Sept. 4, 1841, before this act was modified and the distribution of the lands fund to the several States suspended by the Tariff act of Aug. 30, 1842. These two funds were retained at the Treasury of the United States, and applied toward the payments of interest on 628 bonds of this State, held by the United States as trust funds. Of these bonds, 5,000 were issued to and sold by the Real Estate Bank of the State of Arkansas, and 128 were issued to and sold by the Bank of the State of Arkansas.

Virginia and Tennessee Railroad.

The Treasurer of this company gives notice that he is now prepared to cash the interest coupons of the first and second mortgage bonds of the Company, due in New York on the 1st of January next, without discount for pre-payment.

Ship Island Railroad.

A vote was recently taken in Rankin county, Miss., upon the question of taxing the county for the purpose of taking $100,000 worth of stock in the Gulf and Ship Island Railroad Company, and decided by a majority of 98 in favor of the tax.

East India Railway.

The half-yearly meeting was held in London, Oct. 30th. The report of the directors, of which the following is an abstract, was taken as read:—

The directors congratulated the shareholders on the satisfactory prospect of completing the line to Delhi. Should the views entertained by the engineers, be realized, the construction of 1,130 miles would be completed in a shorter space of time than had been anticipated, and in a manner reflecting the highest credit upon the executive officers of the company. The surveys of the Jubbulpore line had been completed. The line would start from Allahabad, and, taking a south-westerly direction, would join the Great Indian Peninsular system at Jubbulpore, thus forming a complete line of communication between Bombay, the North-western Provinces, and Calcutta. The total length of this line would be about 223 miles. The cost of the line might be expected to exceed about 2,700,000*l.* the sum of 17,000,000*l.*, anticipated last year. The line to Rajmahal was advertised to be opened to the public on the 15th inst., for the entire distance between Calcutta and Rajmahal, 203 miles. The first train ran through on the 4th of July, and the interval had been employed in putting the line into efficient order for public traffic. The permanent way and works continued in efficient working order, and had been maintained during the past half-year at a cost of 5½d. per train mile, the cost of the proceeding half-year being, under exceptional circumstances, 7d. per train mile. The working expenses were 44.68 per cent. during the half-year. The number of passengers carried during the last half-year was 810,306, of which 9,121 were first class, and 34,322 second class, the remaining 766,863 being third class. The amount for the carriage of the permanent way materials in the last half-year was about 8 per cent. The gross receipts for the half-year ended the 30th June amounted to 122,942*l.*, and the expenses to 54,925*l.*, leaving a balance of 68,016*l.* The gross receipts on the Cawnpore line for the half-year were 43,164*l.*, and the expenses 21,150*l.* leaving 22,014*l.* The company have now 249 miles at work in Bengal, and 126 open in the North-West Provinces, making 375 miles.

The CHAIRMAN, in moving the adoption of the report, said since the last half-yearly meeting 128 miles of line had been completed, upon which there were most difficult works. The opening of this section was of the utmost importance to them for the carriage of materials. In the upper provinces they had not opened any further length of line, but in February next the section from Cawnpore to Etawah, 86 miles, would be opened for traffic. It was probable that by the early part of next year a considerable quantity of earthwork and brickwork would be executed, culverts and other works on the line would also be finished, with the exception of five extension bridges. A further section of 75 miles in length would be opened from Bhagulpoor to Lucher Serah about the middle of next year. This would connect their line with a place of commercial importance on the Ganges. From that point the chief works are the execution of the bridge over the Soane, the execution of the bridge over the Tonse, and the execution of the bridge over the Jumna. They would have no other difficulty to surmount, as they would now be able to transfer the large accumulation of permanent way and other materials from Howrah to Rajmahal, and thence by their steam fleet to any point on the Ganges. They would thus have the means exclusively in their own hands of conveying the materials for the works where they pleased.—*London Railway Times.*

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT, Sup't.

Boston, Nov. 24, 1860. tf

DON PEDRO II. RAILWAY.

RIO DE JANEIRO, BRAZIL, September 18th, 1860.

PROPOSALS are invited for the Graduation, Masonry, and other items of Construction of 11¼ miles of this work, extending from the western end of the Great Tunnel of the Serra du Mar down the valleys of the Sacra Familia and Pirahy Rivers to the banks of the River Parahyta.

The work is generally heavy, comprising 1,200,000 cubic yards Earth, 250,000 cub. yds. Rock, and 7,500 cub. yds. of Tunnel excavation, 9,000 cub. yds. Bridge, 8,000 cub. yds. Culvert, and 5,000 cub. yds. retaining Wall Masonry, together with iron Bridge Superstructure, permanent way and stations.

At the Company's office in Rio de Janeiro, may be seen plans, profiles and specifications, where sealed proposals for the whole 11¼ miles, or any portion thereof not less than 4 miles, will be received until February 28th, 1861, at which time they will be opened and the work awarded.

The Directory determine, that the technical direction of the work shall be exclusively in the hands of their own Engineers, but will entertain proposals either with a scale of prices for the various kinds of work, or for the entire construction at a fixed price. In the latter case, the monthly payments will be regulated by a scale of prices.

All payments will be made monthly in cash, a percentage being retained as security for the faithful fulfilment of the contract. This, however, may be dispensed with, in case a deposit is made in money, stocks or bonds approved of by the Directory; in the latter case, the depositor will be entitled to the accruing interest upon said security.

Parties unknown to the undersigned will be expected to present evidence of their ability from officers of works upon which they have recently been engaged.

This work is in a mountainous and perfectly healthy region, within 7 hours' ride of Rio de Janeiro. About 200 additional miles are located and remain to be placed under contract.

C. B. OTTONI, President.

ANDREW ELLISON, Jr., Eng'r in Chief.

12.	" 15	" 1 to 1	24.	" 32	"	1½ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at 25c. each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,
By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

HISTORY
OF THE
RAILROADS
AND
CANALS
OF THE
UNITED STATES
OF AMERICA
EXHIBITING THEIR
Progress, Cost, Revenues, Expenditures
AND
PRESENT CONDITION.

By HENRY V. POOR, Esq.,
Editor of the AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

AGENTS FOR
Bauman & Co.'s Poco Metallic Paint.

FOR WOOD PAINTING.—It retains a beautiful lustre; kills knots and will protect it under any circumstances. It covers 6,000 square feet per hundred pounds, and will neither fade, blister, or wash, and a better fire-proof than any other Paint, for it will stand a heat that will melt lead. It is proof against sea, air and storms.
Refer to JOHN LEISENRING, Sup't and Eng'r, Lehigh Coal and Navigation Co., Mauch Chunk, Pa.

FOR BRICK AND PLASTER.—It makes all the fanciful stone colors, and will cover 4,000 square feet per 100 pounds. When laid out in blocks, it is truly beautiful.
Refer to SEMPLE & BROTHER, Easton, Pa.

FOR SHIP AND BOAT PAINTING.—It hardens under water to the hardness of Iron, preventing the ravages of the wood-worm effectually. On deck it is impervious to water, expands and contracts with heat and cold, and we warrant it on the forecastle six months.
Refer to CAPTAIN MASON, Schooner 'Adolph Ugal,' Philadelphia.

FOR RAILROADS.—It preserves Bridges and Ties from dry or wet rot and freight cars from burning and leaking.
Refer to R. H. SAYER, Sup't and Eng'r, WM. KELLOG, Master of Repairs, Lehigh Valley Railroad, Bethlehem, Pa.
A. G. BRODHEAD, Sup't and Eng'r, Beaver Meadows R. R., Mauch Chunk, Pa.

FOR ROOFING.—It covers 8,000 feet per 100 pounds, and may be used in the rain, as it never runs.
Refer to M. CULLOUGH & CO., HENRY BUCKWALTER, Philadelphia.

FOR IRON.—It will stand 300 deg. Fah. and gives satisfaction to all the Iron men in Philadelphia, on gas holders, steam boilers, Iron fronts and ornamental iron. It is equal to Red Lead, for steam and hot water joints.
Refer to J. W. and J. F STARR, Camden, N. J., MORRIS, TASKER & CO., MERRICK & SONS, Philadelphia.

FOR IRON FOUNDERS' PATTERNS.—Five parts by weight of it to one of gum shellac dissolved in alcohol, will make a covering more impervious to the damp sand or loam than shellac alone of equal consistency.
Refer to THE NOVELTY IRON WORKS, New York.

FOR STAINING.—Oak, Mahogany, Rosewood and Walnut Stains for Furniture, we warrant it equal to Turkish Umber. Its natural colors are Umber, Brown, Lake, Olive and Lead color, which may be combined in endless variety. We hope soon to have other colors much lighter.

ANALYSIS.

DENNIS BAUMAN & CO.,
Parryville, Carbon County, Pa.

The following are the results of Analysis of your Poco Metallic Paint.—Peroxyde of Iron 55.84; Red Oxyde of Manganese, 1.65; Lime, 2.52; Magnesia 1.29; Alumina, 9.00; Silex, 29.70;—100 parts.

The Analysis proves that this paint is not likely to be altered in the slightest degree by ordinary atmospheric agents, such as sunlight, rain, cold, or heat. We therefore regard your Poco Metallic Paint as of the most durable character

NATIONAL FERTILIZER.

The attention of Agriculturists is requested to this ECONOMICAL and SUPERIOR **FERTILIZER.** It possesses all the good qualities of the best known manures, without any of the injurious effects produced by the over-active Ammonia in Guano and kindred FERTILIZERS, while its price is **less than one-half of the Peruvian** Guano. The various materials composing this Fertilizer, are so chemically combined, that they are gradually evolved by the heat and moisture of the earth, and furnish to the plant all the requirements for a **rapid** and **luxurious vegetation.**

[COPY.]
NEW YORK, Sept. 8, 1860.
I have used about one ton of the NATIONAL FERTILIZER manufactured under Dr. L. Harper's patent, on my sugar plantation in the Island of Cuba, and although tried upon very poor soil, realized a fine crop. I used it in the same way and in the SAME QUANTITY as I use Peruvian Guano. I can confidently recommend it as in every respect equal to Peruvian Guano for sugar cane.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

ROSENDALE HYDRAULIC CEMENT.

ROSENDALE AND KINGSTON CEMENT CO. Manufactory at Kingston, N. Y. on the West Bank of the Hudson River. Office 42 Pine st., New York City.
E. M. BRIGHAM,

ROOFING.

THE Cheapest and most DURABLE **ROOFING** IN USE. Sent to any part of the country with *directions for application.*

GUTTA PERCHA CEMENT ROOFING.

SPECIMENS and *references* can be seen, and any desired information obtained on application, by *letter* or in *person*, at our OFFICE, 510 BROADWAY, N. Y. (Opposite the St. Nicholas Hotel).
JOHNS & CROSLEY.

This Roofing can be applied to new and old Roofs of all kinds. It is FIRE and WATER PROOF.

Gutta Percha Cement applied to Tin and other Metal Roofs will render them perfectly and permanently water-tight.

JOHNS & CROSLEY,
Sole Manufacturers,
510 BROADWAY.

PATENT ASPHALTIC
ROOFING FELT.
THE BEST, CHEAPEST AND
MOST DURABLE ROOFING KNOWN.

THE IMPROVED PATENT ROOFING FELT furnished by the Subscribers is entirely free from the objections hitherto urged against articles that have been furnished under similar names by various parties.

It makes a **light, cheap, durable,** and perfectly **Fire** and **Water-proof Roofing** for **Churches, Farm Buildings, Railroad Depots, etc.**

It forms the best and cheapest lining for Stores, Granaries, Barns and Wooden Buildings, as rats, mice and other vermin will not touch it.

It stands all climates and has been extensively furnished to the British Government for use in their widely scattered foreign possessions. The Turkish Government used large quantities of the Felt for roofing their hospitals and stables in the late war.

In this country first class dwelling houses have been roofed for three years with this Felt, and the owners who used tin now prefer this Roofing Felt.

Also an entirely new, superior and cheap **ROOFING CEMENT** for the above Felt and leaky tin roofs.

For Samples, Circulars, etc., apply to

EDMISTON BROS.,
No. 3 Bowling Green, New York.
N. B.—Agents wanted.

CEMENT ROOFING.

PATENT MICA
AND
Fibrous Cement Roofing.

IT HAS STOOD THE BEST OF ALL TESTS—TIME!

IT fully sustains the high reputation it has gained, as a PERFECTLY RELIABLE, DURABLE and WATER PROOF ROOFING. It is adapted to every variety of Roof, new or old, and is the best and cheapest Cement in use for repairing OLD LEAKY TIN or other Roofs.

ALL WORK WARRANTED.

Cement for sale by the Barrel, and sent to any part of the Country, with printed instructions for use.

Also, for sale, State and County Rights for a portion of the United States.

New York, Saturday, December 8, 1860.

The New Croton Reservoir.

A supply of pure water, abundant almost as the air we breathe, is come to be regarded as an indispensable necessity of every large city. None is more fortunate in this respect than NEW YORK, the works of which for the introduction of the Croton water, are on a scale corresponding to the grandeur of its natural features and position, to the magnificence of its harbor, and the extent of its population, commerce and wealth.

While the Croton aqueduct, which has a sectional area of about 64 square feet, and an uniform slope of 13 inches to the mile, can deliver a supply of water equal to the wants of all the people that could be crowded upon our island, it has long been felt that the provision for its accumulation and distribution within the city was entirely inadequate to meet, not only the ordinary wants of our people, but especially extraordinary emergencies which might arise. At particular periods of the year, the water has to be husbanded with a watchfulness and anxiety of which the public, so lavish and wasteful in its use, has hardly an idea. For the city to be left without it, would be equivalent to its depopulation, as upon it is based all its social and domestic economies, and its commercial and manufacturing greatness.

The elevation of the Croton river is so well maintained by the conduit that brings it to us, that the *Receiving Reservoir* first constructed lies upon the crest, or greatest extensive elevation of the island, from which the water can be conducted in every direction. Abundant room remained for the construction of another on a much grander scale, and so early as 1854, a commission was appointed by the Legislature for appraising lands necessary to be taken, who made their report in 1856. This report being confirmed in 1857, the city entered into contract with Messrs. Fairchild, Walker & Co., well known as enterprising and successful contractors, for the construction of the new works.

The construction of a work of the kind, although a colossal undertaking, and one in which great financial and administrative ability is always necessary to success, may not involve any difficult problems in engineering. In the present case, however, very great difficulties were encountered in the peculiar formation, or structure of the island which is exceedingly irregular in surface as well as in outline—precipitous and often perpendicular cliff or ledges of rock alternating with deep ravines. In the excavations, material was frequently encountered, entirely unfitted to retain the water, or for the foundations of the banks of the reservoir. These, consequently, had to be carried to a great depth, and often under the most difficult conditions; for, in this work not even the slightest contingency of failure, could be left unprovided for. What added to the difficulty is the seamy character of the stratification which is a vertical one, and which had to be examined with the utmost care, and impervious beds of concrete laid upon all the suspicious localities.

The surface elevation of the water both in the old and new reservoirs, will be about 115 feet above tide water. The old receiving reservoir covers an area of 30 acres, and has a capacity of 158,000,000 imperial gallons. The new one, with its exterior walls, or banks, covers an area of 107 acres—the available water surface being 96 acres. The average depth of the water within 4 feet of the top of the embankment, will be 38 feet, and its total capacity 1,000,000,000 imperial gallons.

The reservoir will be in two pretty nearly equal basins, divided by a centre or partition bank. This as well as the exterior banks have their inner and outer slopes, one and a-half base to one perpendicular. All the inner slopes are to be covered with 8 inches of broken stone, on which is placed a stone lining, or pavement, one and a-half foot thick, laid in cement. The outer slope to be covered with soil one foot thick. The banks will be 15 feet wide at their tops, exclusive of soil on the outer slopes. The top of the exterior banks will be 4 feet above water line. That of the division bank will be 8 feet *below* water line. In the centre of all the banks, puddle banks are constructed, extending from the rock to the paving of the middle bank, and to within two feet of the top of the exterior banks, to be 6 feet 2 inches wide at top in the middle bank, 4 feet wide at top in the exterior banks, and 16 feet wide at a plane, 38 feet below the top of the exterior banks.

For the foundations of the puddle, the excavations were in all cases carried to the solid rock. Such portions of the rock as were shelly, or unsound, were carefully examined and removed, and beds of concrete laid where a perfect foundation could not be had without it, so that the possibility of break hardly exists. The embankments were formed in layers of not more than six inches thick, of the best material, well packed by heavy rollers, or by ramming where rollers could not be used. The embankments were worked to their full width, and not more than two feet in advance of the puddle banks. These rest in all cases upon the rock, and are 16 feet wide at a level 38 feet below the tops of the exterior banks, from which level, the sides approach each other with slopes of 2 inch base, to 12 vertical, on each side.

Within the reservoir, the grounds were first cleaned of all soil and material not suitable for the embankments, and excavations then carried to an extent necessary to give an uniform surface at the bottom. Drainage ditches of suitable capacity and slopes have also been excavated.

But the most difficult, and at the same time most interesting portions of the work, and which are

the best monuments of scientific skill and artistic execution, creditable alike to the engineers and contractors, are the *Gate Houses* for the introduction and distribution of the water.

Before coming to these, however, we will give a brief account of the *Branch* aqueduct constructed for feeding the new reservoir. This leaves the old one at 92d street, is of similar section and dimensions, and has a capacity for the daily delivery of 60,000,000 gallons. To avoid the possibility of break or leakage, the excavations for the branch were extended to the solid rock from which concrete masonry is carried to the base of the aqueduct. This precaution was adopted to avoid the defects in the main aqueduct, which, for want of suitable foundations, is constantly settling at numerous points on its line. All such settling necessarily implies a break, or fracture. These have to be watched with the utmost care from the Croton river to the reservoir, a distance of 45 miles. If a leak at any point should get the upper hand, a whole section might in a few hours be entirely swept away. Till repaired, the city would have to depend entirely upon the two existing reservoirs, which have a collective capacity of about 175,000,000 gallons, or 5 days' supply, at the present rate of consumption. The cutting off of the Croton water would be a disaster, of the extent of which imagination cannot form an idea. It was the liability to such a disaster that led to the construction of the new works, which will have a capacity exceeding six times that of the present ones, and will place almost beyond possibility the contingency feared.

There are two gate houses, respectively in the most northern and southern extensions of the bank. They are both pretty much upon one plan. The work on the southern one is in the most advanced stage, and, consequently, the most appropriate subject for description.

The gate houses are necessarily in two divisions, to correspond to the two divisions of the reservoir, so that the water in one can be drawn entirely off for cleaning or repairs, while the other remains filled. The centre bank, consequently, forms a connection with the masonry of the gate houses. Ample provision is made for the entrance of water from either division through wide canals, or *fore* bays, which are formed of most massive granite masonry. From these, the water passes into the *back* bays, through twelve gate-ways—six on each side. The gates are to be placed and worked in deep groves cut in the solid masonry. In front of these gates will be placed screens to arrest the passage of anything but water. This, after passing through the gate ways enters the *back* bays, from which, through iron pipes, embedded in the masonry, the water flows either for direct distribution, or for the supply of the other reservoirs. There are six of such pipes, each four feet in diameter, 40 feet below the outside bank, and 36 feet below water surface at its ordinary stage. Each one is fitted with a stop cock within the gate house vaults, so that the water can be shut off from any one, for repairs or other purposes, without disturbing the flow in the others. Each division of the reservoir has also a drainage pipe, 3 feet in diameter, 42 feet below top water surface, through which all the water in the reservoir can be completely discharged. The drainage pipes connect with a sewer leading to the East river. They also connect with a well constructed in the masonry for the passage of surplus water, or of such impurities as may collect or float on the surface.

The southern gate house is 83 feet long, and 42 feet high above the floor or the pavement of the back bays. For its foundation, excavations were carried to the solid rock, upon which the masonry was laid in concrete. This is built of the best Maine granite, and thoroughly burned brick. The granite is of the firmest and most durable kind, and entirely free from iron. It can be quarried in blocks weighing hundreds of tons and of any desired form. Blocks weighing 15 tons have been transported from the quarries to the works. Some of them, after being dressed and placed in the work, weigh from 8 to 10 tons and present a massive appearance, and consitute a specimen of hydraulic masonry not to be seen elsewhere on this continent, and probably nowhere, as the works for the conveyance, reception and distribution of the Croton water are on a scale of magnificence and completeness unequalled in the world.

The new reservoir, which is included within the boundaries of the *Central Park*, is to be one of its chief attractions. It will present an unbroken water surface of 96 acres; for the centre-bank will, except in extraordinary emergencies, be always *below* water surface for the purpose of presenting one uninterrupted expanse. Upon the summit of the bank will be a promenade. Next to this will be a bridle path for equestrians; and then a grand carriage way. Between the carriage way and the top of the bank will be planted a thicket or grove to act as a screen to the dust raised by the winds from the carriage way. There will, however, be several elevated points on the grand drive, presenting excellent views of the reservoir and most magnificent views of the City, East and North rivers, the Palisades, etc., etc.

The engineering department of the work is under control of the Croton Board, of which ALFRED W. CRAVEN, Esq., is, and for many years has been, Engineer *in chief*. His first assistant upon the new reservoir is GEO. S. GREEN, Esq., under whose immediate supervision the plans and specifications for the work were made, and under whose charge it has been executed. His plans and the manner in which they have been carried out, reflect the highest credit. But it is proper, in this connection, to pay a still higher encomium than that of engineering skill upon this department of the Croton Board—that of the most scrupulous integrity and impartiality in the discharge of their duties—unawed by persons in superior official position, and uninfluenced by the importunities, or solicitations or inducements of parties holding, or desirous of obtaining contracts for work. This department is on the whole by far the most important in the city, as it has in hand the two great agencies of comfort and health—the supply of water and the sewerage. It has not yet been invaded and fouled by the hungry horde who make it their profession to infest and pillage the city. In this respect the Croton Department has been singularly fortunate. In its management, private interests have uniformly given way to considerations of the public good. When the appointment of Commissioners was about to be made under the first law, Mr. VAN SCHAICK, one of the most efficient of the early promoters of the Croton Works, then Senator in the Legislature of the State, in presenting to the Governor the names of persons to be appointed as Commissioners to assume the charge of the undertaking, took care not to include therein any member of the City Council, although it embraced many estimable gentlemen who had been co-laborers with him, for the purpose of avoiding anything like suspicion that personal interests were connected with the project. An example so worthily set has been followed to the present time, though vigorous efforts have recently been made to prostitute the department to party purposes.

The contractors of the new reservoir, Messrs. Fairchild, Walker & Co., have carried forward their great undertaking with energy and success, and have executed it in a manner to secure the hearty approbation of the Croton Board, and for the more difficult portions of it, to elicit the admiration of all who have an eye for elaborate, difficult and expensive structures. The whole will be completed in about a year from the present time, and, with it, the last great work necessary to supply at all times, and almost under every contingency, the wants of all the people that can be crowded upon our island.

Since the above was in type an event has occurred—for the first time—the breaking of the Fifth Avenue main, which has left the city *without* water. This is now being brought in buckets and barrels from the neighboring towns. All the steam engines and business in which water performs a part, is suspended. We are now reaping the fruits of Mayor Wood's suspension of work on the Fourth Avenue, which, if carried out by the Board, as commenced, would have given the city another source of supply. There could not have been a more striking commentary upon his arbitrary conduct, nor a more fatal one to his influence and popularity.

New York Canals.

The receipts at Tide Water by the New York Canals of Flour, Wheat, Corn and Barley from the opening of the canals to and including the 30th of November, for the years 1859 and 1860, have been as follows:

	Flour bbls.	Wheat bu.	Corn bu.	Barley bu.
1860..	1,151,700	18,237,600	13,907,900	2,791,900
1859..	79,200	4,674,900	2,634,900	3,808,600
Inc.	261,500	13,573,000	10,272,700	216,700

Reducing the Wheat to Flour, the excess in the receipts of 1860 is equal to 3,076,100 bbls. Flour.

The receipts at Tide Water of the principal articles of produce, from the opening of the Canals to and including the 30th of November, have been as follows:

	1858.	1859.	1860.
Canal open....	April 28.	April 15.	April 25.
Wheat flour, bbls.	1,837,000	790,200	1,151,700
Wheat, bush....	8,143,200	4,654,600	18,227,600
Corn, bush	6,632,600	2,634,900	13,907,600
Barley, bush....	3,367,500	3,008,600	2,791,900
Rye, bush....	499,400	370,909	319,700
Oats, bush..	5,012,600	5,908,800	6,447,100
Pork, bbls..	87,501	41,886	7,246
Beef, bbls	58,768	28,820	9,064
Cheese, lb..	8,865,000	12,527,900	11,880,000
Lard....	3,985,800	3,545,300	940,200
Butter....	3,664,600	3,260,300	2,479,100
Bacon..	3,190,600	1,773,400	449,800
Wool....	2,806,900	3,029,500	2,030,400

The Report of the Postmaster General.

The annual report of the Postmaster General shows that very considerable retrenchments have been effected in the expenditures of the department during the past year, while the efficiency of the service has not been diminished. On the 30th of June last there were in operation 8,502 mail routes. The number of contractors was 7,445. The length of these routes is estimated at 240,594 miles, costing $8,808,710, Compared with the service of the previous year, there was a decrease of 19,458 miles in the length of mail routes, and of $660,046 in the cost—about 7 per cent. There was paid to route and local agents, messengers and baggage masters, the sum of $614,767, which, added to the cost of transportion, makes a total of $9,423,477. The number of post-offices established during the year was 1,140; discontinued 1,181, showing a decrease of 41, and the number at the close of the year ending June 30, 1860, was 28,498. At the formation of the government in 1789, there were but 75 post-offices in the whole country.

The expenditures of the department for the past year were $19,170,782. This includes $4,296,009 paid for expenses incurred in 1859, and leaves the actual expenditures for 1860, $14,874,772. The gross revenue for the year was $8,518,067, being an increase of near seven per cent. over the revenue of the year ending June 30, 1859. Deducting the revenue of 1860, with earning of the department in carrying free mail matter, from the gross expenditure, leaves an excess of expenditure over revenue in 1860, of $5,656,705. The estimated expenditure for 1862 is $14,955,535, and the estimated deficiency $5,312,176.

The number of postage stamps sold during the year was 216,370,660, of the value of $5,290,939; number of stamped envelopes 29,280,025, value $949,377; total $6,870,316—an increase of $608,782 over the year 1859. Larger denominations of postage stamps have been adopted and introduced, especially for the purpose of affording requisite facilities to prepay the postage on letters to foreign countries, and of removing all excuses heretofore existing for paying such postages in money. The new denominations are twenty-four cents, thirty cents, and ninety cents. One cent envelopes for circulars and four cent envelopes for city postboxes are to be introduced at once.

The number of dead letters containing money or other valuables registered and sent out during the year was 24,035, being 5,662 more than in 1859. In addition, 6,982 other letters deemed important have been sent out. The number of dead letters opened at San Francisco was 75,127; number of foreign letters returned, 110,911. Although the number of letters sent by mail was increased by many millions, the number of dead letters has diminished.

The amount of postage, sea and inland, on European mails, was $1,376,402, of which $541,039 was by American steamers, $766,418 by the Cunard line, and $68,943 by the North German Lloyd and Hamburg lines. Of this amount $830,005 was collected in the United States, and $546,296 in European countries. The number of letters sent from the United States to Europe was 3,093,390; Newspapers sent, 2,127,870; newspapers received, 1,338,207. On the adjustment of accounts at the close of the year, there was a balance due Great Britain of $198,191, France $15,367, Bremen $17,125, Hamburg $13,879, and a balance due the United States from Prussia of $43,285. A liberal and advantageous postal treaty has been concluded with Belgium. Some further correspondence has taken place with the British post office on the subject of a reduction of postage upon international letters, but as yet without any satisfactory result.

The Postmaster refers to the troubles experienced with the California ocean mails, owing to the failure of Congress at its last session to make provision for their continued transmission, and urges that the promise made to Mr. Vanderbilt, who has been carrying the mails, should be fulfilled, viz: that he should receive a further allowance above the postage sufficient to constitute a fair remuneration. The various Pacific mail routes—one ocean and three overland—cost so much above the receipts, and being maintained in a great measure for the purpose of developing our national resources, the Postmaster renews his recommendation of last year, that they be put upon the public treasury. The cost is as follows;

	Cost.	*Receipts.*
N. Y. to San Francisco (ocean).	$350,000	$170,825
Overland, *via* El Paso, &c.....	600,000	119,767
St. Joseph to Salt Lake City...	125,000	4,306
Salt Lake City to Placerville..	83,241	978
San Antonio to Camp Stockton.	70,000	593

The service between San Antonia and San Deigo has been reduced in the year, saving $101,000, and it yet "meets every postal want." The Charleston, Savannah and Key West service costs $40,000 and earns $500 per annum, and this, the report thinks, should be charged upon the general treasury. Nearly $124,000 has been retrenched on the Mississippi River service. The Postmaster General says that neither of the great routes from New York to New Orleans has fulfilled the promises made for it, or been satisfactory; but he thinks the schedule time beyond Charleston can be reduced, so as to improve the coast route. The mails are now sent wholly by the central route.

The report defends the course of the department in insisting upon pre-payment of carriers' fees for letters posted in the mail-boxes; dicusses the penny-post decision in Philadelphia; advises further legislation to protect city post routes, and claims that the penny-post thus far has done all that could have been expected. The registry system for many valuable letters is declared to have failed, as is shown by diminishing receipts for registration. A rate of ten cents by the overland mail is advised. The Postmaster general reiterates his demand for retrenchment, and urges anew that expenses incurred from state policy should not be confounded with the real expense of the department. He speaks briefly but severely of Fowler's defalcation in New York, hints that the defense made by Fowler's sureties shows a gross fraud somewhere, and perhaps a systematic preparation for the embezzlement, and remarks that if the defense is sustained by the Court, Congress must provide for the interest of the department, as all the bonds given to it will be worthless.

Recent negotiations have resulted in arrangements for an interior night train, leaving New York at 8 P. M., and running through New Haven, Hartford, Springfield and Worcester, reaching Boston in not more than nine hours, and returning from Boston to New York in similar hours. —In this manner, correspondence prepared in either city to the close of the latest business hours is taken through and delivered at an early hour of the succeeding morning. A connection is also made at New York with the morning mail from the South—which is thus expedited some thirteen hours—so that letters (and passengers) leaving Washington in the morning, arrive at Boston in less than twenty-three hours, and from Baltimore in about twenty-one hours; conversely, correspondence leaving Boston at eight o'clock one evening, is received and delivered at Washington before the same hour the next evening.

The arrangement is for three months only, it being an experiment, to result in a permanent arganization, should it prove successful as a postal measure and remunerative to the contractors as a passenger conveyance.

The Census of Baltimore.

The census returns of the city of Baltimore makes the total population 214,037, white and colored, bond and free, with a good margin for an increase. The total statistics of the wards, as far as the reports of marshalls are concerned, is 211,824 free inhabitants, and 2,213 slaves. Deaths within the year, 2,583.

To show the growth of the city from the year 1790, when the first census was taken, up to the year 1860, a period of seventy years, the following figures are given, showing the increase of population during each decade:

Year.	Population.			
1790....	18,502	Increase in ten years		18,111
1800....	26,614			
1810....	46,555	"	"	19,941
1820....	62,738	"	"	16,183
1830....	80,625	"	"	17,886
1840...	102,313	"	"	21,688
1850...	169,045	"	"	66,741
1860...	214,037	"	"	44,988

It will be seen that the increase for the last ten years is 44,983, while between the years of 1840 and 1850 it was 66,741, a difference of 22,758.—*Baltimore Sun.*

Galena and Chicago Railroad.

The annexed extract of a letter from Chicago in reference to this company, is based upon official information:

"The dividend of 5 per cent. declared by this company on the 21st November, was so declared out of cash then on hand to the amount of $330,000, after payment in full of all interest and sinking fund due, as well as all current expenses. Nearly enough to pay this dividend had, fortunately for the company, already been remitted to New York before the recent rise in exchange, at an average cost of only about three-fourths of 1 per cent. Our Winter errnings will, of course, be light, as they always are, but we have reason to think they will be better than last year, in spite of the political troubles and disturbance of the currency, as there are a great many hogs and cattle to come forward during the cold weather. This State, as well as Wisconsin, Iowa and Minnesota, is still full of wheat and corn, held in reserve, and there are immense numbers of hogs and cattle to come forward.

The wheat and corn must remain over until Spring and Summer, but a good portion of the hogs and cattle will be marketed this Winter."

Reading and Columbia Railroad.

Mr. Lyons with two corps of engineers is now rapidly progressing with the location of the Reading and Columbia Railroad, and the line promises to be more practicable even than his report of his first survey set forth. The contractors are ready to commence to work at any time.—*Lancaster Examiner.*

General Intelligence.

Virginia has remitted $46,000 of specie funds to this city to be sent forward by the next steamer for the payment of the interest due 1st January in London on £373,000 of the Five per cents of that State.

The New Jersey Railroad and Transportation Company has notified the holders of the scrip stock that the final instalment of 50 per cent. or $25 per share, will be received on the 2d of Jan'y next, or payment may be postponed, on the payment of 6 per cent. interest to the 1st of Febr'y; shares on which the instalment is unpaid will be liable to forfeiture.

The transfer books of the New York Central Railroad Company were closed on the 5th inst., and will remain shut until the 12th inst., on which latter date the annual election of directors occurs, at the Merchants' Exchange in Albany. Some two or three vacancies by death exist in the present Board.

John Gardiner, Esq., has been elected president of the Cleveland and Toledo Railroad Company, in place of J. B. Waring, Esq., deceased.

The interest on the bonds of the 2nd Avenue Railroad Company due December 1st, is being paid by Messrs. O'Brien, No. 29 Wall st.

The interest on the State debt of Missouri will be promptly paid, the suspended banks at St. Louis having agree to furnish a sufficient amount of coin so that the Treasurer will not be forced to buy exchange at the present high rate.

The coupons on the bonds of the Buffalo, New York and Erie Road, due 1st December, will be paid at the Bank of Commerce.

The Bonds of the New York and New Haven Railroad, due December 1, 1860, will be paid at the Company's office, corner of Fourth avenue and Twenty-seventh street. The December coupons will be paid at the Bank of the Republic.

The Portland, Saco and Portsmouth Railroad will pay a semi-annual dividend of 3 per cent. on the 10th to holders of shares December 1st.

The Board of Directors of the Columbus and Xenia Railroad Company have authorized the exchange of their 7 per cent. mortgage bonds at par for the bonds of the company due in 1861 and 1862.

The Delaware and Hudson Canal Company have declared a semi-annual dividend of 3½ per cent. payable on the 22d inst.

The books of the Erie Railroad will open on the 10th inst. The election of directors takes place on the 8th inst. It is understood that Com. Vanderbilt will be added to the Board. He is now one of the largest, if not the largest, holder of the securities of that company.

The Commissioners of the Sinking Fund for the extinguishment of the Second Mortgage Bonds of the Hudson River Railroad invite proposals until the 16th inst. for the surrender of $30,000 of those bonds, that amount having accumulated in their hands for the purchase.

The total tonnage of the Philadelphia and Reading Railroad for the year ending November 30, 1860, was 1,878,866 tons.

The annual election of directors of the Cleveland and Pittsburg Railroad Company will be held at the office of the Company in Cleveland on the 2d of January next.

Great Indian Peninsula Railway.

The half-yearly meeting was held in London, Oct, 31st. The report, of which an abstract is subjoined, was taken as read:—

"Satisfactory progress in the prosecution of the enterprise had been effected during the half-year ending the 30th June last. At the beginning of the half-year 245 miles were open. This length of line was increased in the course of the half-year to 297½ miles by the opening of the following sections, viz:—On 2d January, 1860, Barsee-road to Mohol, 28¼ miles; on 2d February, 1860, Wassind to Shapoor, 3¾ miles; and on 6th June, 1860, Mohol to Sholapore, 20½ miles; total, 52⅛ miles. Of the 297½ miles open, 92¼ miles are in the Concan, and 205¼ in the Deccan. The Deccan portion is entirely on the southern line, and is separated from the Concan portion by the break at the Bhore Ghat, across which steep ascent of eight miles the whole of the traffic has to be transported by carts and pack-bullocks.

In the half-year the company realized from all sources of traffic the sum of 101,250*l.*, by an expenditure of 60,091*l.*, which leaves the sum of 41,159*l.* at the credit of net revenue. This sum, added to the previous net earnings, raises the amount which the company have to place against the advances made by Government as interest upon paid-up capital to 256,160*l.* The amount of those advances to the 30th June, 1860, was 1,034,431*l.* On comparing the receipts, on an average of 279 miles, during the past half-year, with those on an average of 194¾ miles in the corresponding half of 1859, it appears that the receipts for passengers amounted to 40,041*l.*, against 32,369*l.*; for merchandise, 53,352*l.*, against 48,607*l.*; total receipts, 101,250*l.*, against 87,607*l.* The average receipts per mile were 363*l.*, against 450*l.* The total expenditure was 60,091*l.*, against 39,091*l.*, or 215*l.* per mile against 201*l.* per mile; and the net profit 41,159*l.*, or 148*l.* per mile, against 48,515*l.*, or 249*l.* per mile, in the corresponding half of 1859. The receipts from the carriage of permanent way materials were 9 per cent. of the cross receipts, against 21½ per cent. in the corresponding half of 1859. The last opening of 20½ miles was made in the final month of the half-year, after the close of the trading season. The permanent way, works, and stations of the open line have been maintained in good order during the half-year, at a cost of 6½d. per train mile. The rolling stock has also been thoroughly upheld, and was at the end of the half-year in a highly efficient state. The number of miles of railway in process of construction at the end of the half-year was 512. Upon the Bhore Ghat incline the engineer expresses his entire satisfaction with the results of the operations, notwithstanding the extraordinary and adverse circumstances which have retarded their progress. Upon the 22¼ miles of the north-eastern division of the Concan line from Shapoor to Kassarah, at the foot of the Thul Ghat incline, the works were, at the date of the chief resident engineer's report, finished with the exception of a few cuttings through basalt of the hardest description. That portion is to be completed in December. It is also expected that at the same date 32 miles from Egutpoora, at the summit of the Thul Ghat incline, to Nassick, will be opened, and that a further section of 61 miles from Nassick to Nandgaon will be completed in the course of next spring. Satisfactory progress is being made on the other less advanced portions, with the exception of those comprised in Messrs. Duckett and Stead's contracts, in respect to which the board are taking active measures for the protection of the company's interests. The total receipts on capital from the beginning of operations to 30th June have amounted to 6,016,304*l.*, and the total expenditure to 5,481,342*l.*, leaving an available balance of 534,962*l.* The company have been able, without pressing upon the money market up to the present time, to borrow on debentures which are not convertible into stock, 119,700*l.*, in addition to the sum of 333,300*l.*, which had been received previously to 30th June. Proposals for loans continue to be received daily."

The chairman in moving its adoption, said there were one or two points on which he might make a few observations, particularly with regard to the progress they were making with the great Bhore Ghat incline and the Thul Ghat incline, on which they had been at work during the past year. In the Bhore Ghat incline, which was one of the most expensive portions of the undertaking, there were tunnels to the extent of 3,939 yards—the longest being 437 yards long. Out of these, 3,619 yards of heading had been completed, and about 1,300 yards to the body; and in the long tunnel to which he had alluded, out of 437 yards, 300 yards of heading had been completed. They would therefore see that very considerable progress had been made. And with regard to the Thul Ghat, the contractors had been making considerable progress; and with regard to one of the tunnels, they had succeeded in carrying two shafts by which they were enabled to work from six forces instead of two, thereby expediting the work. The contract from Egutpoora to Bhosawul, 190 miles, was let to the same contractor, and the progress was most satisfactory.—*London Railway Times.*

Population of the City of New York.

The census returns from the city have all been received at the Marshall's office, and the figures are given below. The table published some days since was incomplete in two or three districts, as we stated at the time. The following is the official census:

Ward.	1860.	1855.	1850.
1	18,120	13,486	19,754
2	2,507	3,249	6,655
3	3,757	7,909	10,335
4	21,994	22,895	23,250
5	22,341	21,617	22,686
6	26,698	25,562	24,698
7	40,006	34,442	32,690
8	39,722	34,052	34,612
9	44,386	39,982	40,657
10	29,051	26,378	23,316
11	59,663	52,979	43,758
12	30,647	17,656	10,451
13	32,917	26,597	28,246
14	28,087	24,754	25,196
15	27,588	24,016	22,564
16	45,182	39,823	52,882
17	72,955	59,548	43,766
18	57,464	39,415	31,546
19	32,841	17,866	18,465
20	67,554	47,055	new ward.
21	49,063	27,914	do.
22	61,754	22,605	do.
Total	814,277	629,810	515,547

Increase since 1855 184,467
" " 1850 298,730
" from 1850 to 1855 114,263
Excess of increase of last five over preceding five years 70,204

Condition of the Georgia Banks.

Of the banks doing business, Savannah has nine, with an authorized capital of $10,000,000, but they only use $5,101,337. Augusta has six, with an authorized capital of $3,400,000, but are using only, $2,675,000. The Bank of Columbus (the only bank in that city) is now using its full capital of $500,000. The banks doing business in Macon have an authorized capital of $750,000, but they are only using $259,550. The bank of Athens has an authorized capital of $200,000, and is only using $100,000. The bank of Rome has an authorized capital of $500,000, and is only using $153,000. The bank of Fulton, at Atlanta, has an authorized capital of $300,000, and is only using $96,200. The North-western Bank at Ringgold, Catoosa County, has an authorized capital of $200,000, it is using $50,000. The banks at Dalton in Whitfield county, have an authorized capital of $750,000, and are only using $193,000. The bank at La Grange has an authorized capital of $500,000, and is only using $150,000.

The Kingdom of Italy.

STATISTICS OF REPRESENTATION.

According to statistics published in a recent number of the *Nationale*, of Naples, which are supposed to be correct enough for all practical purposes, the population of the several provinces of which the Italian monarchy is likely to consist will be as follows:

Naples	6,843,356
Sicily	2,208,392
The Two Sicilies	9,051,747
Piedmont	4,368,972
Deduct for Savoy and Nice	513,500
Total	3,855,472
The Island of Sardinia	547,112
Piedmont and Sardinia	4,402,584
Lombardy	2,835,219
The Roman States, minus Rome and Comarca	2,681,771
Tuscany	1,817,466
Modena	600,677
Parma and Piacenza	508,784
General total	21,897,247

New York Central Railroad.

The last semi-annual dividend of 3 per cent. upon the stock of the New York Central Railroad was paid August 20, from the six months earnings ending July 31, 1860, since which the earnings have been for four months as follows:

August	$689,125 28
September	851,795 62
October	810,890 83
November (semi-officially reported)	700,000 00
Total	$3,071,811 73
Estimated for all charges, including transportation expenses, pro rata interest, contribution of Sinking Fund, and rents as required per the Directors' report to the Legislature	2,025,691 41
Surplus	$1,046,120 32

—being 4⅓ per cent. upon the capital—$24,000,000—for the past four months. The ensuing winter business (canal navigation being suspended), considering our large moving crops and foreign demand, promises very large.

Illinois River Railroad.

A correspondent from Peoria, Ill., writes us that this road is not opened from Peoria to Jacksonville, as stated in the Journal of November 10th. The iron is laid from Pekin, 10 miles below Peoria, to Virginia, 16 miles north of Jacksonville, and a daily train passing over the same. Before the road can reach even the bed of the Hannibal road, opposite Pekin, and 8 miles below Peoria, the Illinois river will have to be bridged at a cost of some $80,000, the masonry for which is only partly done. The 16 miles between Virginia and Jacksonville includes much heavy work.

Clinton Air Line Railroad.

The great yield of oil at the Mecca oil wells, and the rapid increase of business consequent therefrom, has developed a project for completing the Clinton Air-line Railroad from Jamestown, in Mercer County, to that point. The work will be completed under a different company from that of the Clinton Air-line Company. It is thought that the road can be bought from the orignal owners, or those who own it at present, for a mere trifle, and that the road can be completed at a compartively small expense, as the grading on the entire length of this division of the road is already completed, and the stone necessary for the building of culverts, bridges, &c., all quarried and on the ground ready for putting up.—*Pittsburg Chronicle.*

Railroad Earnings.

The following are the earnings of the Great Western Railway of Canada for the week ending November 23, 1860:

Passengers	$20,603 98
Freight and live stock	21,457 91
Mails and sundries	1,453 85
Total	$48,515 74
Corresponding week of last year	37,833 08
Increase	$5,682 66

Below we give the earnings of the Central Ohio for the month of October compared with the same period last year:

	1859.	1860.
Freight earnings	$27,035 09	$29,232 93
Passenger do.	26,057 69	29,802 78
Total.	$53,092 78	$69,035 71
Increase		$15,942 93

The report of the Receiver of the Cincinnati, Wilmington and Zanesville Railroad for October is as follows:

Earnings from passenger business	$8,515 45
" freight "	13,564 06
Total gross earnings	$22,079 51
Total expenses	13,705 77
	$8,373 74
Balance on hand October 1, 1860.	$26,122 52
Received in October on Passenger acc't	7,957 95
Do. on Freight do.	14,520 42
Rent, etc.	92 73
	$48,693 62

The Hudson River railroad earnings were in

November, 1860	$169,548 71
Do. 1859	157,442 09
Increase	$12,106 52

Earnings for the last three years, in

November, 1858	$137,094 50
Do. 1859	157,442 09
Do. 1860	169,548 71

The following is a statement of the earnings of the Buffalo, New York and Erie Railroad (Buffalo to Corning) for November, 1860, compared with the same month of last year:

November, 1860	$60,393 16
" 1859	56,340 01
Increase	$4,053 15

The following is a statement of the earnings of the New York Central Railroad, for the month of November, 1860, compared with its its earnings for the corresponding month of the previous year:—

1860	$730,591 58
1859	637,792 13
Increase	$92,799,45

Cedar Rapids and Muscatine Railroad.

Mr. John Weare, of Cedar Rapids, the Treasurer and active Agent of this road, was in town yesterday. He was on his way home from a trip west as far as Boonesboro,' on the Des Moines, securing stock and the right of way for the contemplated road. He reports that the people on the Southern line have taken stock to the amount of $90,000—$10,000 in the southern portion of this country, and the balance in Tama, Marshall, Story and Boone. He says the contract for the first forty miles is let, and that the contractors will break ground on the first of December. We infer from his conversation that the Southern route will undoubtedly be selected, which follows the valley of Prairie Creek to Hickory Grove, in Le Roy township, thence cuts across the bluffs to Guinnville, in the south-western portion of Benton county, and follows the Iowa Valley to Indiantown, leaving Toledo two miles to the right.—*Vinton (Iowa) Eagle.*

English Railways.

AGGREGATE CAPITAL.—By a return presented to the House of Commons at the instance of Mr. Hutt, it appears that the capital authorized on 31st December, 1859, was 399,745,279*l.*, including 16,028,928*l.* on abandoned lines. The total paid up was 254,806,955*l.*, including 1,672,143*l.* on abandoned lines. The loans outstanding amounted to 80,628,955*l.* The total raised by shares and loans was 335,435,071*l.*, of which 1,672,143*l.* on abandoned lines. A return of the amalgamations and working arrangements effected during the year shows that there were three amalgamations and several working agreements, with sales and leases. The third branch of the document shows the railway, or branch, and the length thereof, as to which the powers granted by Parliament for the compulsory purchase of land required for its construction had expired. The length of line in respect of which the powers had expired was 2,546 miles and 5¼c. The capital appropriated for the construction was 41,117,954*l.*

Wabash and Erie Canal Debt.

"The Legislature of the State of Indiana is to assemble next month, when a question is to be submitted for their consideration of great importance to a number of English investors, but of still more importance to the American character. About 13 years back the State, after a suspension of payment for six years, made an arrangement with the holders of its foreign debt of £2,900,000 to give new bonds for one half of the amount, and the property, tolls and revenues of the Wabash and Erie Canal for the other half, it being also part of the agreement that a sum requisite for the completion of that canal should be advanced by the bondholders. As an inducement for this new outlay the Governor of the State, the State Engineer, a Commissioner appointed by the Legislature, the financial agent of the State in New-Nork, and, indeed, all the competent authorities, concurred in the representation that the canal must henceforth form the great channel of traffic through the country; and for a few years abundant evidence seemed to be afforded that these assurances had been well-founded. Apparently nothing could effect the work unfavorably, because no competing route could be opened up without the sanction of the Legislature, and it was not to be supposed that, in the face of the pledges given, the State would fail to guard the property with the same care that would have been exercised if it had remained in their own hands. In fact, on this point the Legislature, in a public discussion, and by formal votes fully recognized their equitable obligations, and refused to grant charters for railway projects which would interferfere unfairly with the canal. Unfortunately for the credit of the State, this course was maintained but for a short period. The task of completing the canal was commenced in 1847, and occupied six years through the greater part of which time the local traffic continued satisfactorily to increase. But within twelve months of the date when the outlay of the bondholders was to terminate and they were to reap the result, the State withdrew all protection by passing a general law enabling companies and individuals to construct railways wherever they might feel disposed. The consequence was that the country was soon overrun by a network of railways, some of them occupying almost the very banks of the canal, and all competing with it. The property, therefore, was absolutely destroyed, so far as any return to the stockholders was concerned, and in that condition the matter has remained to the present day. Three years back a memorial for relief was presented to the general Legislature of the State, and on its reassembling next month a new appeal will be

made. To the State, in its present condition of prosperity, the cost of rendering compensation would be insignificant, however severely the want of it may press upon individuals, and, looking at the extraordinary destiny of these Western communities, and the manner in which their progress and rivalry must be influenced in each case by financial reputation, Indiana can have no well-wishers who will not look anxiously for a generous decision of the question—*London Times.*

Brazil and the Brazilians.

As the Railroads of Brazil are now attracting great interest in this country, we give in connection with an advertisement for extensive lettings on these works, an abstract of an interesting lecture recently delivered in this city upon that country by Rev. J. C. Fletcher. Mr. Fletcher is thoroughly familiar with his subject and entirely reliable and trustworthy.

After a few introductory remarks the lecturer referred to the fact that through a most unaccountable supineness on the part of the American government and people, the greater portion of the commerce of Brazil was with Great Britain. This was principally owing to the establishment of steam communication between the latter country and the port of Rio Janeiro. Great Britain had completely got the upper hand of the United States in that respect, as, indeed, had also France and Germany, and even the commerce of Spain and of effete Portugal contest the palm with us. The remedy of this was to establish a line of steamships between our ports and that of Rio Janeiro. It was a remarkable fact, though one not creditable to the American enterprise, that of the immense quantity of coffee supplied to this country by Brazil, the orders for three fourths of it must go by the way of Great Britain. To have coffee cheap they would have to establish a line of steamers connecting our ports with Brazil, not for the purpose of freight so much as for swiftly and surely carrying letters, that we may know the state of the market as soon as Great Britain. Senor Almeida had lately submitted to the legislature a document, which he had seen translated in the New York *Herald*, setting forth the advantages which both countries would derive from such communication. Brazil stood in need of the produce of the United States, and we could not do well without the products of Brazil, the most important of which, however, was coffee. In 1840, and up to 1850, the commerce of the United States with Brazil surpassed that of England, because our clipper ships were the swiftest carriers. But in the latter year English steamships were put upon the line and the consequence was, that in five years her commerce increased 300 per cent. France had one line of steamers with South America, England had two, but the United States had no steam communication with that country. One thing, however, was particularly required to give a healty impetus to this commerce. That was a proper kind of treaty between the two governments. At present there was no commercial treaty whatever between the two countries; no treaty, indeed, existed between Brazil and any other country with anything discriminating in favor of another land except, perhaps, with France. France, under this treaty, claimed the right of administering the estates of those of her subjects who died their intestate; while if an American died their intestate, the Brazilian government would administer the estate. Brazil, however, claims that France has no right to such a construction. The principal products of Brazil consisted of coffee, sugar, hides, India rubber, rosewood, drugs, &c., the first of which was admitted free into this country, while upon our flour, of which we send more than three million dollars worth, we have to pay, according to the last tariff; $1,25 a barrel. Brazil charged an export duty upon coffee, but some years ago the amount had been reduced, in consequence of a little more enlightened policy and of the presentations of the American Minister. What was wanted was a proper treaty of reciprocity. We may furnish Brazil with our flour, but we must have her coffee. The right sort of a man to negotiate this treaty and for a while to see to its proper enforcement was wanted. This commerce could thus be greatly increased, for there were many things which Brazil wanted which we could supply cheaper than any other country. There was cotton, and hardware, and flour, and heavy machinery, and even in the article of codfish a profitable trade could be carried on. Notwithstanding the advantages they possess to secure a profitable trade with Brazil, all the American residents he could count at Rio Janeiro in 1854 did not number more than fifty, babies and all. This number, however, has increased, for many of the Brazilian railroads were under American contractors and American engineers. There was a very erroneous impression abroad with reference to the extent of Brazil. He could assure them that the empire of Brazil was larger than the United States, with all their Territories added, extending as our country does from the Atlantic to the Pacific—from the ocean lakes north to the Gulf of Mexico on the south. The fact was that to make the area of the United States equal to that of Brazil, there should be added a number of new Territories or States equal in size to New York, Massachusetts, Connecticut and Vermont. Brazil, by her own claim contained some four hundred square miles more land than the United States. The soil of this vast area of the country was of surprising richness and fertility, being composed of decomposed granite, the most favorable soil for the Caucasian race. Its plains of agricultural capabilities were immense in the South, while its forests were of such extent as to draw forth the most wonderful expressions of surprise even from the great Humboldt. The lecturer here described at length the natural causes which conduced to the salubrity of the climate. He then referred in beautiful language to the floral, horticultural, arboricultural and mineral productions of Brazil, which this favored land teemed. The lecturer gave also a most pleasing and graphic description of life upon the plantations in the interior. Touching slightly upon some of the historical events in South American history, he said it was here fighting against the Bomba of South America—Rosas, of Buenos Ayres—that Garibaldi first learned the art of war. He spoke very favorable of the government and constitution of Brazil, which were as liberal as could be desired. There was trial by jury, free speech, a free press, and toleration to all religious denominations. The only restriction upon other denominations than the Roman Catholic—which was the State religion—was that none other could worship in temples, which was interpreted buildings with spires and bells. Without these they could get on well enough. Rio Janeiro, he said, was a flourishing port of 300,000 inhabitants—the New York of South America—becoming more and more improved as the necessities of commerce demanded. When he first landed at Rio Janeiro there were no wharves or quays. Now these were being built, and the whole city was being improved by the sewerage of streets, &c. Slavery existed in Brazil; but since the abolution of the African slave trade the system was dying out, and its utter extinction was only a question of time. Many of the Africans in Brazil, he said, were a far superior race to those among us, and many of them had risen to stations of eminence in the literary and scientific world. From this topic the lecturer turned to a personal description of the Emperor Don Pedro II., personally and mentally. In statue he said the Emperor measured six feet four, and in all mental accom plishments he has been ranked by all travelers in his dominions as one of the first monarchs in the world.

Throughout, the reverend lecturer was listened to with deep attention, and when he concluded he was greeted with general manifestations of the pleasure he had conferred upon his audience, and a resolution, with appropriate remarks, was offered by Rev. Dr. Osgood, and Rev. Mr. Fletcher was requested to give a series of lectures in a larger hall. A vote of thanks to the lecturer was carried with acclamation, after which the assemblage dispersed.

Population of Indiana.

The population of this State has increased 356,742, during the past ten years, and will be seen by the following census returns of 1860 compared with those of 1850:

Counties.	1860.	1850.	*Counties.*	1860.	1850.
Adams	9,252	5,774	Madison	16,574	12,497

† Estimated.

Railways in France.

The *Moniteur* contains an account of the railway works executed in France since 1851, under the influence of the Imperial Government, which presents some interesting details.

At the end of 1851 the length completed was 3,544 kilometres. At the end of 1859 the length was found to have increased to 9,076. The quantity of iron used for rails and other purposes is estimated at 1,700,000 tons. How much remains yet to be done may be judged from the fact that the total length conceded on 1st Jan., 1860, would reach 16,352 kilometres if completed. The cost of the whole represents a sum of 280,000,000*l.* sterling, towards which the State supplies 38,500,000*l.* The cost of the portion already executed would be about one-half. As soon as the railways are finished, all the eighty-five departments of France will be traversed, and the principal ports connected with the capital. Belgium will be approached at seven different points; the German States at five; Switzerland at four; Sardinia at four; and Spain by one.

In 1851 France was, in reference to railway con

veyance, due regard being had to her population, far behind not only Great Britain and Belgium, but the German States, Prussia, and Austria. Notwithstanding the greatly increased development of the system the cost to the State has been diminishing; for instead of having to bind itself to engagements equalling 110,000f. the kilometre, the liability of the State does not now exceed 40,000f. The outlay of Government, which, between 1847 and 1851, averaged 75,000,000f. a year, does not now go beyond 25,000,000f. The companies have, on the other hand, expended something like 375,000,000f. a year.

At the commencement of 1851, concessions had been granted for construction to the extent of 3,000,000 kilometres (2,410 miles), representing an estimated outlay of 60,000,000*l.* sterling. The State had contributed 1,680,000*l.* to this outlay, but on the other hand remained answerable for the execution of 645 miles, not conceded to any company, and the expense of which was computed to exceed 20,000,000*l.* By the end of 1851, the actual expenditure amounted to 58,560,000*l.*, of which the State had supplied 23,160,000*l.*

Only thirty-seven departments were in 1851 traversed by any railway, and there were but thirty one principal towns furnished with stations. Not more than sixteen ports and harbors enjoyed access to the railway, and the whole system touched the French frontiers only at four points—namely, Turcoing, Blanche-Misseron, Forbach, and Basle.

This system, within the eight following years, was more than quadrupled in extent, the annual average length of lines obtaining new concessions being 1,116 miles. On the 1st of January, 1860, concessions had been granted for 10,138 miles.

Among the statistical details comprised in Dr. Veron's paper the following are of chief interest:

The French railways already completed have cost on the average nearly 26,000*l.* per mile. They occupy 75,000 acres of land, which was purchased at a cost of 300,000,000f. There are 11,500 crossings, of which 5,500 are on the level, 2,000 bridges, and 4,000 sub-passages. Without reckoning minor works, the entire length of the large bridges over water is 30 kilometres, of viaducts 20 kilometres, and of tunnels 100 kilometres.

The number of stations is about 1,200, divided as follows:—12 above classification, including Paris, Lyons, Marseilles, Bordeaux, &c.; 130 first-class stations, which comprise junctions, terminal towns, the chefs-lieux of departments, and principal provincial towns; 200 of the second-class, and 852 of the third. The rolling stock comprises about 3,000 locomotives and tenders, 7,000 passenger carriages, and 60,000 wagons. There are not less than 70,000 persons engaged in various departments, from the director to the common laborer.

The traffic has increased in much larger proportion than their extent. In 1851 there were 3,544 kilometres at work, and in 1859, 9,074. But while at the former date the "passenger mileage," as it is called in England, was equivalent to 860,000,000 kilometres, performed in 20,000,000 journeys, as counted by the number of tickets issued; the total passenger traffic of 1859 exceeded 2,650,000,000 kilometres, and require the issue of 52,000,000 tickets. Of merchandise or heavy goods there was in 1851 a mass conveyed equivalent to the transport of 363,000,000 tons over one kilometre, the actual weight conveyed being 4,600,000 tons. In 1859 the total movement corresponded to the conveyance of 2,750,000,000 tons over one kilometre, and the gross weight moved was more than 20,000,000 tons. In 1851 the average charge for conveyance was ten centimes (one penny) per ton per kilometre, and in 1850 little over seven centimes. If the former rates had been retained, customers would have to pay 80,000,000f. beyond their real outlay last year; and as compared with the costs of the old systems of conveyance, their gain has been at least 350,000,000f. Finally, the gross receipts for 1851 were 108,000,000f., and the working expenses about 50,000,000f. In 1859 the receipts rose to over 400,000,000f., the working costs being 180,000,000f., or 45 per cent.

Southern Pacific Railroad.

We are gratified to learn by an interview with Dr. Fowlkes, that the prospects of this important enterprise, are now, in several particulars, more flattering than at any former period. He confirms the report from Texas, published some weeks since, that several hundred hands are now employed in grading the contract let to Messrs. DeGraffe & Smith, in July last, and are rapidly pushing the work forward. A part of the iron for this section is purchased and in the hands of the company, and negotiations are going forward for the remainder. This is a strong move in the right direction, as every mile the road advances, strengthens it in every particular.

But the most encouraging information derived from our interview with Dr. F. is an explanation of the contract made in September last with the American representative of an important and powerful association of French capitalists. By the terms of this contract the French company are to take $1,200,000 of the convertible bonds of the company, for which they are to pay cash at par; after which they contract to build the entire road across Texas, and prospectively to the Pacific Ocean—including iron and rolling stock—on a simple pledge of the road and other securities of the company, which they hold for sale to actual settlers, crediting the company with the full receipts for the same, less the commission. A more favorable contract for the Pacific Company can scarcely be conceived, as it not only frees it from money embarrassments and gives it strength to press rapidly through to the Pacific, but insures full returns for the lands received from Texas. Of the ability of the French capitalists to carry out their contract there can be no question, as their very exalted financial position has been certified in this country by the highest financial and official evidence from Paris.

The contract, it is true, was conditioned on its ratification in Paris, but letters received by Mr. Bisbie, of Virginia—who is now in the city—from one of the leading members of the association in France, leave little doubt but that the contract will be fully ratified. Mr. B. was the principal party in bringing about this negotiation.

Another encouraging prospect for the company is in the strong probability of the passage of the bill in its favor now before Congress, which would have passed last winter had it been reached. It is now the special order for 17th December, and for reasons not necessary to enumerate, will receive a most favorable consideration, and, it can scarcely be doubted, will pass that body.—*N. O. Picayune.*

Report of the Secretary of the Treasury.

We copy from the Report of the Secretary of the Treasury the following portion, referring directly to the state of the finances.

On the 1st day of July, 1859, being the commencement of the fiscal year 1860, the balance in the Treasury was $4,339,275 54

The receipts into the Treasury during the fiscal year 1860 were as follows:

For the quarter ending September 30, 1859:

From customs	$15,947,871	
" public lands	470,245	
" miscella's sources.	379,650	
" treasury notes, per act Dec. 23, 1857	3,611,300	
From loan, per act June 14, 1858	210,000	—20,618,866

For the quarter ending December 31, 1859:

From customs	$10,785,849	
From public lands	445,536	
From miscellan's sources.	149,893	
From treasury notes, per act Dec. 23, 1857	4,064,500	
From loans, per act June 14, 1858	60,000	—15,505,278

For the quarter ending March 31, 1860:

From customs	$14,962,784	
From public lands	505,592	
From miscellan's sources.	245,447	
From treasury notes, per act Dec. 23, 1857	5,588,200	
From loan, per act June 14, 1858	1,110,000	—22,412,028

For the quarter ending June 30, 1860:

From customs	$11,491,208	
From public lands	357,186	
From miscellan's sources.	236,274	
From treasury notes, per act Dec. 23, 1857	6,131,200	—18,215,867

Making the aggregate means for the service of the fiscal year ending June 30, 1860 ..... $81,091,309

The expenditure during the fiscal year ending June 30, 1860, was as follows:

For the quarter ending Sept. 30, 1859.	$20,007,175
" " " Dec. 31, 1859..	16,025,527
" " " Mar. 31, 1860.	20,377,503
" " " June 30, 1860.	21,051,899
Which amount of.....	$77,462,103

was applied to the respective branches of the public service as follows:

To civil, foreign intercourse, and miscellaneous services.....	$27,969,871
To service of Interior Department (Indians and pensions).....	8,955,687
To service of War Department.....	16,409,767
To service of Navy Department.....	11,513,150
To the public debt.....	17,613,628
Exhibited in detail in statement No. 1.	$77,462,102
Deducting the expenditure for the fiscal year 1860 from the aggregate receipts during that year, there remained in the Treasury on the 1st July, 1860, the balance of	$3,629,207

The receipts for the first quarter of the fiscal year 1861, from July 1 to September 30, 1860, were:

From customs.....	$16,119,831	
From public lands.....	281,101	
From miscellan's sources.	318,858	—17,719,790

The estimated receipts during the three remaining quarters of the current fiscal year, 1861, are:

From customs.....	$40,000,000	
From public lands.....	2,250,000	
From miscellan's sources.	750,000	
From loan, authorized June 22, 1860.....	21,000,000	
		$64,000,000
Making the total of ascertained and estimated means for the service of the current fiscal year, 1861.....		$84,348,997

The expenditure of the first quarter of the current fiscal year—that ending Sept. 30, 1860, were as follows:

For civil, foreign intercourse, and miscellaneous services.....	$6,440,004	
For service of Interior Department.....	1,679,575	
For ser'e of War Departm't.	5,352,771	
For ser'e of Navy Depart..	2,578,678	
For payment of creditors of Texas.....	1,283	
For redemp. of trea'y notes.	375,400	
For interest on public debt.	115,560	
		$16,543,472
The estimated expenditure during the three remaining quarters of the current fiscal year, 1861, is.....		46,935,238
The loan of June 22, 1860, the amount of which is stated among the means of the fiscal year, 1861, is expressly required to be applied to the redemption of treasury notes, is.....		20,624,600
Making the aggregate expenditure, ascertained and estimated, for the current fiscal year, 1861.....		84,103,105
Which amount, deducted from the total of ascertained and estimated means for the service of the current fiscal year, 1861, as before stated, leaves a balance in the Treasury on July 1, 1861, being the commencement of the fiscal year, 1862, of.....		245,891

The foregoing statement assumes that the whole sum embraced in the estimated expenditure for the remaining three quarters of the current fiscal year will be actually called for within the year. The amount stated, $16,935,232 58, does not include the entire balance of the appropriations heretofore made by law, but such sums as the respective departments have indicated may probably be required. But, in practice for many years past, the sums drawn from the Treasury during any year have been much less than the amounts estimated as required within such year, according to the character of the appropriations and the exigencies of the public service. It may be, therefore, fairly anticipated that, should the operations of the Government proceed in their ordinary course, that at least $4,000,000 more may be deducted from the estimated expenditure of the current fiscal year, increasing the balance in the Treasury on July 1, 1861, to that extent.

ESTIMATES FOR THE FISCAL YEAR FROM JULY 1, 1861, TO JUNE 30, 1862.

Estimated receipts from customs	$60,000,000
Estimated receipts from public lands..	3,000,000
Estim'd rece'ts from miscella's sources.	1,250,000
Estim'd bal. in the Treas. July 1, 1861.	245,892
Aggregate estimated means for the fiscal year 1862.....	$64,495,892
Estimated expenditure from permanent appropriations.....	9,626,386
Estimated expenditure from balance of former appropriations not before required.....	12,198,113
Estimates now submitted by the executive departments for appropriation by Congress	46,589,227
Aggregate estimated expenditure for the fiscal year 1862.....	68,363,726
Showing a deficit of estimated means for the service of the fiscal year ending June 30, 1862, of	3,867,834

The suggestions above made, as to not drawing from the Treasury during the year the whole amount of the appropriations authorized by law, will apply to these estimates, so that, instead of the above deficiency of $3,867,834 53, there will probably remain in the Treasury on the 1st July, 1862, a balance of about $8,000,000.

The correctness of this estimate of expenditure for the present and next fiscal years may be illustrated in another and simpler form, The entire expenditure of the Government for the fiscal year ending June 30, 1860, exclusive of the repemption of treasury notes, which are otherwise provided for, and the interest on the public debt, was $59,848,474 72, and in that sum was included $1,446,009 26, to meet a deficiency in the Post-Office Department, produced by the failure of the Post-Office Appropriation bill at the second session of the Thirty-fifth Congress—thereby causing this amount to be paid and charged in the expenditure of the fiscal year ending June 30, 1860, though, in point of fact, the service was rendered and the liability incurred in the preceding year. It should be borne in mind that this sum of $59,848,474 72, included not only payments growing out of such appropriations as had been estimated for by the department, but all other sums appropriated by Congress. There is no reason why the expenditure for the present or next fiscal year should exceed that of the last year. Allowing, however, a margin for an increase, it may be safely stated that the expenses for the two years will not exceed $60,000,000 each—making the amount to be provided for $120,000,000. The estimated means of the Treasury for the same period are, for the present fiscal year, $63,348,996 75, and for the year ending June 30, 1862, $64,250,000, which would leave an excess of estimated means over estimated expenditure of $7,598,996 75.

The estimate of receipts into the Treasury have been made without reference to the financial and commercial panic, which has assumed so threatening an aspect within the last few days, and of which I shall speak more fully hereafter. The country was never in a more prosperous condition. Our planters and farmers have been blest, as a general rule, with abundant crops, and were realizing remunerative prices for all kinds of products. The exports of the last fiscal year had reached the enormous sum of $400,122,296, and the imports for the same period were 362,163,941, yielding a revenue from customs of $53,187,511 87. The exports of domestic produce for the present fiscal year, as far as they have been received, indicate an increase fully equal, if not greater, than that of preceding years, thus authorizing the estimate of increased revenue from that source. Apart, therefore, from the threatened embarrassments in the trade and business of the country, these estimates, both of expenditure and receipts, would be submitted to Congress with great confidence that they would not vary very far from the actual results.

Street Cars for London.

American street railroads, started by Americans, owned by Americans, and equipped with American cars, have at last got a footing in the British capital. Right under the morning shadow of Westminister Abbey, Train has made a beginning with his flat-rail track—just such a rail and just such a track as those wherein the Quaker City railroads are superior to those of New York—and, turning his back on the House of Lords, he has Victoria street and, morally if not geographically, all London before him. Victoria street, Westminister, is one of the widest, newest, and yet among the least traveled thoroughfares of London. It is, however, in an almost direct line from the Houses of Parliament to Belgravia, the most aristocratic quarter of the metropolis, and with the American street cars it is likely to become the axis of fashionable locomotion.

On Tuesday last, the ship Wyoming, which left this port for Liverpool, took with her the first of three Philadelphia-built street railroad cars for the new line about to be opened in London. The order for these cars was given by Charles Hathaway, Esq., who has been in London for the last few weeks arranging for the general introduction of our railroad system there. So little time was given, that Messrs. Kimball and Gorton, to whom the order was sent, were compelled to send cars already commenced for the Pittsburg city railroads. The Londoners, therefore, will have no more than a fair sample of our work, neither better nor worse than that which is exemplified wherever Philadelphia-built cars are running in this country. In describing the new car—the Prince Royal, as it is named—we are describing merely the type of the cars used in Cincinnati, Pittsburg, Baltimore, and Boston. The Prince Royal is smaller, and is built for a narrower gauge than the Philadelphia cars, but it is as superior, in capacity, elegance, and comfort, to any public conveyance now running in London, as it is superior to a furniture wagon, to which a London omnibus may which propriety be compared. The Philadelphia street railroad gauge is 5 ft. 2½ in., or 6 inches more than the "narrow gauge" of railroads generally, to which—the 4 ft. 8½ in. gauge—the new London line corresponds. Our cars are reckoned as 22 passenger cars, (often carrying 50,) while that under notice is rated as an 18 passenger car. The body is 14 ft. long, exclusive of the platforms, 7 ft. wide, and the height from the floor to the underside of the turtle-back roof is 7 ft. 6 in. The framing is of ash, which is ligther, stiffer and less subject to shrinkage and warping than oak. The panneling is of white wood. The wheels are Whitney's 30 inches in diameter. The axels are from the Pencoyd Works of A. & P. Roberts, of this city. The springs are of India rubber, which seems to answer the best purpose under the rough usage of street cars. The boxes are oil tight, a close packing being employed around the axle between the journal and wheel. The brasses have a recess, on top, in which a hemispherical projection, on the inside of the upper part of the box, rests, forming a sort of ball and socket bearing. The pedestals (axle-guards, the English mechanics will call them) are of cast-iron, and of the common pattern. The car has brakes, as usual. Inside, the finish is exceedingly plain but neat. Like all American cars and omnibusses, and therefore unlike all conveyances of that kind in England, the windows extend all around the car. Each is a single large plate of American glass. Above each window is a gothic-shaped plate of ground glass, ornamentally figured, and relieving the entablature. The body is painted in lemon chrome, with arabesque ornaments on the sides, and the name, Prince Royal, in shaded skeleton letters below. The style of the whole is, of

course, unlike anything in England, yet it is of that character which, familiarized as we are with it here, would be pronounced simple and appropriate. John Bull *may* pronounce it gaudy. The weight of the car is 3,462 lb., and it will comfortably affort sitting room for a dozen John Brights or two dozen little Lord John Russells. It is expected to be on the track by Christmas, when we have no doubt there will be a general turn-ous among the parliamentary digitaries of Westminister to see it. Our English readers will obtain an accurate idea of the appearance of the new car by referring to the cut in Messrs. Kimball and Gorton's card, in our advertising columns.—*The Engineer.*

Journal of Railroad Law.

LIMITATION OF PASSENGER TICKETS TO BE USED IN A SPECIFIED TIME, AND ON A CONTINUOUS TRIP.

The case of Barker *vs.* Coffiin grew out of the custom of railroad companies of placing conditions and limitations upon the tickets which they sell to passengers, as to the time and manner of using them, in conforming to which, the passenger will be entitled to transportation over their roads.

The action was to recover damages for an assault, and for ejecting the plaintiff from the cars of the New York Central Railroad. The defendant was a conductor on the cars. On the 12th of August, 1858, the plaintiff purchased of the Hudson River Railroad Company, at its depot in New York city, a ticket for a passage to Buffalo. He inquired what the fare to Buffalo was, and was told $5.00, which he paid and received a ticket reading thus: "Good for one seat in first class car from New York to Buffalo, by Hudson River and New York Central Railroads, *to be used within three days from date; good for a continuous trip only;* issued by the Hudson River Railroad Company," signed C. H. Kendrick." On the back was printed "Hudson R. R. Ticket Office, August 12th, 1858."

The plaintiff left the city immediately and rode to Albany, where he remained until the 18th or 19th of August, when he took the cars of the Central Railroad and rode to a place west of Syracuse. The defendant came into the cars as conductor, at Syracuse, and after calling upon the passengers for tickets or fare, the plaintiff exhibited the ticket, and the conductor refused it and told him it had expired and was not good, and that the plaintiff must pay fare. The plaintiff refused and the defendant removed him from the cars, using no unnecessary force, and acting under instructions from the New York Central Railroad Company. After the plaintiff was thus removed he returned to the car, paid fare and continued his journey. The reduction of fare to $5.00 was owing to competition; the usual fare from New York to Buffalo was about $9.50.

Upon the trial the court non-suited the plaintiff and gave judgment to the defendant. The plaintiff then moved for a new trial, which motion was heard at the Erie General Term of the Supreme Court. The following is the decision.

MARVIN, J.—At the circuit, I was of the opinion that the case was to be controlled by the contract between the plaintiff and the railroad companies, and that the contract was simply that the plaintiff, for the consideration of $5, should have a seat and be conveyed in the first class cars from New York to Buffalo by the Hudson River and the New York Central Railroads, in case he availed himself of the contract within three days, and made the journey by a continuous trip. It was assumed that the agent selling the ticket had authority to bind the Hudson River and New York Central roads, and the question was made to turn upon the contract. The ticket was produced and given in evidence by the plaintiff, and it furnished the evidence of the contract. It was the only evidence furnished by the plaintiff to the defendant of the right of the former to remain in the cars. The defendant recognized the contract, and claimed that it gave to the plaintiff no right to a seat and passage in the cars, at that time. If the ticket is to be regarded as the evidence of the contract, and the contract was not illegal, then I confess that I am unable to take any other view than that taken at the circuit. The contract conferred upon the plaintiff a right of passage, to be exercised within three days, and during a continuous trip only. The plaintiff took a seat in the cars and was carried to Albany. Instead of proceeding on to Buffalo in the cars of the New York Central Railroad Company, he left the cars, remained in Albany six or seven days, and then took the cars and claimed the right, under contract, to be carried to Buffalo. He certainly had no such right under the contract, as I construe it.

Had the railroads the right to make such contract? Was the contract legal? I confess I am not able to see any reason why they had not the right to make such contract, and why it was not legal. They were common carriers of passengers, and had a right to make any special contract not unreasonable and illegal. May not common carriers of passengers say, to-day, or this week, we will carry you, a passenger, over our route, for a sum specified, though to-morrow or next week our price may be double the sum we will now accept? If this right is taken away from railroad companies, or common carriers, what power will they have to protect themselves against overloading? It is claimed that having once received the fare established at any given time for a passage from one place to another, the person paying the fare will be entitled to the passage at any future time whatever may have been the terms of the contract, as to the time within which the passage should be made. Establish this as a principle, and the right of passage may be claimed by such numbers upon a particular day or occasion as to render it impossible for the carrier to perform his contract. The contract may be made at any time when the fare by the stage or car is very low, and its execution be claimed at a future time when the reasonable fare is much higher; or the tickets may be purchased, as in this case, when competing roads have reduced temporarily the fare, and the passage may be claimed weeks or months after the fare has been greatly increased. In short I know of no reason why the carrier may not, by agreement, provide that the passage shall be made within a time specified and in one continuous trip. As it is the duty of a common carrier to carry the passenger, the terms of the contract as to the time and the trip should be reasonable.

In Cheney *vs.* Boston and Maine Railroad Company, the plaintiff purchased a ticket for a passage from Durham to Boston. It was a rule of the defendant, that the passenger should go through in the same train of cars. The plaintiff after taking his seat was informed and remonstrated. He stopped at an intermediate place, and went aboard of the next train and was required to pay fare again. The action was for money had and received and for breach of contract. The court held that the plaintiff could not recover. This case is, in principle, in point.

If I am right as to what the contract was, and that it was not illegal, then the plaintiff was not rightfully in the car after refusing to pay fare, and the conductor was right in removing him. The motion for a new trial must be denied.

Population of Georgia.

The population of this State has increased about 170,000 during the past ten years, as will be seen by the following census returns, compared with those of 1850.

American Railroad Journal.

Saturday, December 8, 1860.

Railroad Reports.

Railroad Companies will oblige us by sending us copies of their Reports as soon as they are published.

Share and Money Market.

The share market has suffered a serious decline the past week under constantly increasing apprehensions for the future. No solution of the political *embroglio* suggests itself. The President's message has accomplished nothing. The whole question is one over which no influence or control can apparently be exerted by government. The future can be seen only just so far as events daily develop themselves.

As far as we can judge, there is no disposition on either side to resort to *force*. Still, history has never yet given us a peaceable solution of a question of the kind, involving the partition of a great nation. In case of secession, hostilities are looked upon as almost inevitable, though deprecated by all. Such apprehensions cast a general gloom over the public mind, producing almost complete stagnation in all the circles of business.

In the meantime such remedial influences as can be brought to bear upon the question are actively at work. Every person who has a penny to lose, has already been a severe sufferer. Thousands have been irretrievably ruined. The work of destruction is still rapidly going on. All have been taught the great truth, that, however slight the affection different sections of the country bear to each other, they are as closely linked in the material interests, as if the most intimate and friendly relations prevailed. This fact shows that the Union, in the protection of property, and in the development of the resources of the country, has accomplished most perfectly the great object of its formation. A federal government like our own can hardly have any other. This tie of ma-

terial interest still remains unbroken. The most strenuous efforts will, no doubt, be yet made to preserve it. Such steps are already being taken. The Governor of Virginia is about to appoint a commission to visit South Carolina, to see if a reconciliation cannot be effected. The Governor of Kentucky is about taking similar action. These are border slave States, from which the most vigorous efforts may be expected to prevent a rupture.

The great thing to be cultivated on both sides is mutual forbearance. If the present differences cannot be composed, a peaceful separation should be sought, which may leave the commercial and business relations of the two sections unimpaired. We have on the north, a foreign country, extending along our frontier from the Atlantic to the Pacific. The most cordial relations exist between us and it, as much so as if it formed a part of our confederacy. Why may not similar relations exist on the other side of us? Certainly, the example cited should not be without its lesson.

In money matters little is doing outside the Banks, which are doing all they can to relieve the public; the street rates are high and nothing but the best kind of names will go at any price.

Finances of North Carolina.

From the recent message of the Governor of North Carolina, we learn that the assessed value of real estate in this State in 1815 was $53,521,513; in 1836, this value had actually decreased, and in 1850, thirty-five years later, it had only increased to $55,600,000. But in 1860, it reaches $126,000,000, or $70,400,000 more than 1850. This result, the Governor believes, comes solely from the internal improvements, which only fairly commenced in 1850.

The public debt of the State is $9,129,505. To this is to be added $4,699,900, for which the public faith is pledged to certain railroads. Of this latter sum, about $1,500,000 will be required within two years. The expenditures of the two next years are estimated at $728,424 76, to meet which the estimate of receipts is $1,726,425 06. It is therefore evident, not only that there need be no increase of taxes, but that they may be reduced. The statement, however, is predicated on the supposition that the Sinking Fund will be charged with the payment of $170,000 of the public debt falling due before October, 1863, which the Governor recommends.

To meet the principal of her liabilities the State has, in stocks and bonds of various railroads, A. and C. Canal, and Sinking Fund, $7,663,140. The Sinking Fund, from which the public debt is to be paid, and which is made up of dividends of stock owned by the State, and any accruing balances, now amounts to $457,040, and for the last two years has received $419,570. After this year the Governor estimates that the annual addition to this fund will be not less than a million of dollars, to come from railroad dividends.

Evansville and Crawfordsville Railroad.

The last rail on the extension of the Evansville and Crawfordsville Railroad from Terre Haute to Rockville has been laid, and trains have commenced running regularly over the new road. The road will be an important feeder to the Terre Haute and Indianapolis line in the way of freights and passengers.

Philadelphia, Germantown and Norristown Railroad.

The receipts of this road for the fiscal year ending September 30, 1860, were:

From passengers Norristown Branch	$98,650 33
" " Germantown "	85,545 95
" freight on both branches	79,404 35
" rents, sales of materials, etc.	4,234 66
	$267,835 29
And the expenses were	185,640 93
Making the net earnings	$82,194 36

During the past year 7,250 trains were run to Manayunk, carrying 211,883 passengers, with an average of 29 to each train; 5,580 trains to Conshohocken, carrying 68,025 passengers, averaging 12 to a train; 5,580 trains to Norristown, 207,515 passengers, averaging 37 to a train; and 13,040 trains to Germantown, with 972,663 passengers, averaging 75 to a train. The number of miles run by engines over the road was equal to 247,902, carrying 1,629,777 passengers which is equal to carrying 12,828,509 passengers one mile. The receipts per mile run on the Norristown branch were 93 cents, and on Germantown 78 cents; the cost of running of both branches was 54½ cents.

Cleveland, Zanesville and Cincinnati R. R.

This road is 61 miles in length, extending from Hudson, in Summit county, to Millersburg, in Holmes County, Ohio. It passes through Akron, Cuyahoga Falls, Orville, Fredericksburg, and other flourishing towns. The cost of the road, including equipment, etc., at the close of the year 1858, was $1,574,693. The share capital paid in was $369,673. Bond and Mortgage debt, $575,250. Floating debt, $632,486. The gross earnings in 1858 were $68,120, and the net income, $19,763. In 1859, the aggregate income was $60,426; the expenses $44,013; and the net earnings $16,413.

Lexington and St. Louis Railroad.

Col. Thomas H. Allen has been elected President of this Company to supply the vacancy occasioned by the resignation of Judge Smith.

Jacksonville and Alton Railroad.

Mr. Shepherd, the President of this Company has returned from New York, where he has recently been engaged in negotiating with certain parties for the iron necessary to finish the road. We learn that he was very successful, and that the road will be energetically pushed to completion.—*Jacksonville Journal.*

Galena and Chicago Union Railroad.

At a meeting of the Board of Directors of this Company, held at Chicago on the 21st ult., the following resolutions were adopted:

Resolved, That the days for the payment of the regular Semi-Annual Dividends of this Company be changed from Feb. 15 and Aug. 15 to January 1 and July 1 in each year, until otherwise ordered.

Resolved, That a dividend of five per cent. upon the Capital Stock of this company be, and the same is hereby declared, payable at the office of the Company in Chicago, on the 1st day of January next, to holders of said stock at the close of business on the 31st day of December next, in Exchange on New York at par.

Dayton and Cincinnati (Short Line) Railroad.

Mr. John G. Jones has been appointed by the Superior Court Receiver of the Dayton and Cincinnati (short line) Railroad, (known as the Tunnel Company), at the suit of George Sage and others.

Illinois Central Railroad.

The following are the earnings, land sales, and cash collected, of the Illinois Central Railroad Company for the month of November in the years named:

	1858.	1859.	1860.
Earnings of road	$156,037	$235,671	$241,606
Land sales	31,219	33,493	187,314
Cash capital	69,377	54,042	99,845
Total	$256,633	$323,206	$528,765

Another large sale of land was made, some $25,000, of which did not get into the month's report. Here is a sinking fund of $200,000 per month, the effect of which very few appear to estimate, and a sinking fund which does not come out of earnings, but is an absolute donation. Of the 64,000 Optional Rights outstanding, the holders of about 45,000 have accepted the terms of the extension, and paid up in full on ten per cent. This gives the company about $350,000, and enables them practically to extinguish the floating debt.

(*From "The Engineer."*)

The Giffard Injector.

Most of our readers will have seen the published report of the surveyors of the British Board of Trade on the Great Eastern, and have noted the expression therein contained as to the "uncertainty of action" of the Giffard Injector. From this report some have supposed that the Injector was a failure. On the appearance of the report, the English manufacturers of the Injector wrote at once to the engineering director of the big ship—Mr. Daniel Gooch, the locomotive superintendent of the Great Western Railway—to learn the truth of the matter. It was by the orders of Mr. Gooch that the Injectors were placed in the Great Eastern, and as he came out and returned in the vessel he had ample facilities for informing himself fully in the matter. We may say also, as one of the forty-two passengers of the Great Eastern on her first trip across the Atlantic, and as an almost daily visitor to her boiler rooms, that we heard no mention of the "uncertainty of action" of the Injectors. The following, which comes to us through Messrs. Sharp, Steward & Co., is a copy of Mr. Gooch's reply:

Oct. 22, 1860.

GREAT WESTERN RAILWAY,
Engineer's Office, Paddington.

DEAR SIRS:—I am in receipt of your note, and can assure you you could not be more astonished than I was at seeing in the report of the Board of Trade made by one of their inspectors, that the Injectors in the great ship were a failure, or uncertain in their action. Before I put them into that ship I had ascertained, by my own experince on the railway, that the most perfect reliance could be placed upon them; indeed so much am I satisfied with this, that I am putting them upon all our new engines instead of the ordinary pumps. I also made the voyage to America and back with the Great Eastern, and am equally satisfied there is not the slightest grounds for the statement of the Board of Trade Inspector, that they did not work well in that ship. The only fault was in the size; although quite equal to the evaporation of the boilers to which they were applied, they were insufficient to provide for the water that was blown off by the brine-cocks. This, however, had nothing to do with the principle of the Injector. I personally noticed their working, and could discern no defect, Indeed there was none. We used water from the hot-well at a temperature of about 110°.

Yours very faithfully,
DAN. GOOCH.

Messrs. Sharp, Steward & Co.

Delaware, Lackawanna and Western R. R.

This company failed to pay off the principal of the Income Bonds of 1857, upon which, by public notice six months ago, the interest was made to cease on 1st December. The reasons for the default are set forth in the following private circular to the bondholders:

"By a resolution of the Board of Managers, adopted on the 14th day of June last, this company proposed to issue additional stock for the purpose of providing for the payment of the 'Income Bonds' maturing in 1862, 1865 and 1867. Notice was given to the holders of those bonds that they would be paid on presentation; and that the interest on such as were not presented, would cease on the 1st December proximo. Of the bonds of this issue, amounting to $1,321,322, there have been paid $1,021,136, leaving only about $300,000 unpaid. As the present difficulties in the money market will doubtless delay the payment of the instalment due 1st December on the increased capital stock, it has this day been

Resolved, That interest be paid on the outstanding Income Bonds of the Company until the 1st June, 1861; and that all bonds of a less denomination than $500, be paid on presentation. Coupons, for interest due on 1st December proximo, will be paid as usual."

Boston and Worcester Railroad.—New Iron Bridge.

The new bridge which the Boston and Worcester Railroad are building as a viaduct over the Brighton branch of the Milldam, about five miles from this city, is, we believe, of longer *span* than any plate-iron bridge yet attempted in the United States. There are other longer *bridges* of the same construction, but they are divided by intermediate supports into shorter spans. This bridge requires a peculiar form, as will be remembered by the many who have passed over the existing structure, upon the railroad, or have passed under it in driving between Watertown and Boston. The Railroad crosses the common road at such an oblique angle, that, although the roadway under the bridge, between the abutments, is but about 30 feet wide, the length of either side of the bridge, from one support to the other, is about 90 feet; and a person driving over the carriage road has fairly passed the abutment upon one side before he comes to that upon the other.

The old structure requiring renewal the company have taken the opportunity both to straighten the line of their road and make an equalization of its grade, by building this substitute bridge a few rods east of the former road-crossing. They have thus been enabled to make the change and improvement without any interruption to or from the immense traffic over their road at this point. We believe that they expect to begin to use the new track and bridge, in the course of the present month.

This new bridge has been built upon the designs and under the superintendence of Mr. E. S. Philbrick, the engineer of the road, who has furnished the drawings and measurements for the minutest parts. The mason work, which will strike even an inexperienced eye as being appropriately massive and thorough, was entirely done by the workmen of the company, with stone from a quarry upon the Millford branch. It contains some 4,500 tons of stone including the deep foundations and arch culvert under one abutment, while it cost but about $6 per cubic yard, although the expenses of transporting the stone have been charged to the bridge. The stone is "ashlar" cut laid in hydraulic cement, many of the stones being over 10 feet long, and weighing from three to four tons each.

But we wish to speak more particularly of the bridge itself. This is composed wholly of wrought or rolled iron and will weigh about 60 gross tons. We believe it is the first bridge built entirely of American iron. The length of the three girders or beams, each of which is seven and a half feet high, is 97 feet 6 inches. The clear space between the bearings is 87 feet 9 inches, and the width of the floor is 28 feet. The bridge is substantially composed of three plate-iron girders or beams of the kind known in England as the "Fairbairn girder," with such modifications as became necessary to adapt it to the extreme obliquity of the angle between the tracks and the abutments (21°30′) and such changes as had been suggested by experience. Upon the top of these girders the road and track rest, but from no part of the support. The plates are of Abett & Sons' double worked, charcoal iron, rolled at Baltimore. The angle iron is from the Phœnix Iron Co., Philadelphia, and the rivets are from the Pembroke Iron Co. The iron work is finished and set up by Wm. Adams & Co. of this city. The edges of the plates have been all planed and the rivet-holes drilled. This is considered an advance in workmanship, because the plates and angle iron of the English and all other plate-iron bridges yet built have been *punched*, a process which, though more expeditious can hardly equal that of drilling in accuracy of position or cleanness of cut, and it must impair the strength of the iron around the hole more than drilling.

The sheets of which the "web" or vertical member of each girder is composed are 6 feet 8½ inches wide and 7½ feet high, and vary from ¼ to 7-16 of an inch in thickness; the thickness of metal used throughout being adjusted, as nearly as may be, to the strains at the several parts. The iron used was carefully tested and found to be of remarkable uniformity of texture by the excellent apparatus at the Watertown Arsenal, kindly offered for the purpose by Capt. Rodman. The strains imposed upon the metal of the girders by the meeting upon the bridge of two trains composed of the heaviest locomotives, will not exceed one-fifth part of the ultimate strength of the matertial used, as found by actual experiment. This is considered by competent judges to be a safe margin to guard against the depreciation of the iron by vibration, and to meet such imperfections in workmanship as all the work of human hands is subject to, which might reduce the *actual* below the *theoretical* strength of the structure.

The vertical and diagonal bracing which has here been applied is thorough and ample, and will tend to check in a great degree the minute vibrations to which all railroad bridges are unavoidably subjected. The usual method has been adopted to allow the whole structure to contract and expand with the changes of temperature. One end of it rests upon turned rollers of gun iron, between two large planned plates of the same material, while the other end is made fast to the masonry. The great obliquity which we have mentioned of the angle between the line of this bridge and that of its supports, although rendering the mechanical arrangement of the parts a matter of some study, is not without its advantages if we compare it with a right angle bridge of the same span; for it gives opportunity to attach the beams laterally to the abutments, and thereby not only preserve their vertical position, but check, in a very efficient manner, their vibration.

It may be still a question whether such a thorough and expensive structure as this is "economical" in this country, when a substantial timber bridge can be had for about half the money or a lattice iron bridge for about 80 per cent. of the cost of this. Yet the question of insurance against fire and the enormous loss from the interruption of the traffic of such a throughfare as the Worcester road for even a single day by the burning of a bridge, are items of no small importance, compared with a wooden structure, while the great rigidity of this form of beam renders it much more lasting and secure than any kind of iron frame work for *railroad* bridging. At any rate, the traveling public will be glad to see all railroad companies, in removing their bridges, follow this praiseworthy example. —*Boston Advertiser.*

Bank of England.

The following is a summary of the position of the Bank of England, the average price of wheat, the price of consols, and the rate of continental exchanges, at the close of November, 1860, compared with the same period in 1850 and 1857:

	1850	1857.	1860.
Circulation.	£20,407,000	£22,285,800	£21,438,000
Pub.depos's	8,240,800	5,433,800	5,804,000
Other dep's	9,385,500	13,959,100	12,603,700
Gov. securit.	15,228,900	6,407,100	9,490,200
Other secur.	11,320,500	30,299,200	20,310,500
Not's & coin	11,073,600	1,552,000	7,130,500
Coin & bul'n	16,175,000	6,484,000	13,314,800
Bank rate of discount.	2½ per ct.	10 per ct.	6 per ct.
Price of consols..	97	89¼	93⅜
Av. price of wheat...	39s. 11d.	51s. 8d.	58s.6d.
Exch'ge on Paris(sh.)	25.10	25.35	25.35
Do. Amsterdam, do.	11.15	11.17	11.14½
Do. Hamb'g (3 mos.)	13.4½	13.12	13.7½

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT, Sup't.

Boston, Nov. 24, 1860. tf

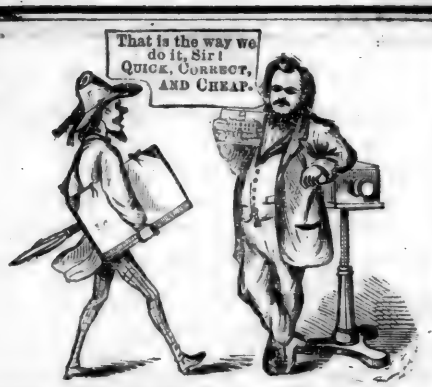
DON PEDRO II. RAILWAY.

RIO DE JANEIRO, BRAZIL, September 18th, 1860.

PROPOSALS are invited for the Graduation, Masonry, and other items of Construction of 11¼ miles of this work, extending from the western end of the Great Tunnel of the Serra du Mar down the valleys of the Sacra Familia and Pirahy Rivers to the banks of the River Parahyta.

The work is generally heavy, comprising 1,200,000 cubic yards Earth, 250,000 cub. yds. Rock, and 7,500 cub. yds. of Tunnel excavation, 9,000 cub. yds. Bridge, 8,000 cub. yds. Culvert, and 5,000 cub. yds. retaining Wall Masonry, together with iron Bridge Superstructure, permanent way and stations.

At the Company's office in Rio de Janeiro, may be seen plans, profiles and specifications, where sealed proposals for the whole 11¼ miles, or any portion thereof not less than 4 miles, will be received until February 28th, 1861, at which time they will be opened and the work awarded.



The Directory determine, that the technical direction of the work shall be exclusively in the hands of their own Engineers, but will entertain proposals either with a scale of prices for the various kinds of work, or for the entire construction at a fixed price. In the latter case, the monthly payments will be regulated by a scale of prices.

All payments will be made monthly in cash, a percentage being retained as security for the faithful fulfilment of the contract. This, however, may be dispensed with, in case a deposit is made in money, stocks or bonds approved of by the Directory; in the latter case, the depositor will be entitled to the accruing interest upon said security.

Parties unknown to the undersigned will be expected to present evidence of their ability from officers of works upon which they have recently been engaged.

This work is in a mountainous and perfectly healthy region, within 7 hours' ride of Rio de Janeiro. About 200 additional miles are located and remain to be placed under contract.

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.
In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.
For further information apply to the Commissioners of Central Park, New York, where it is extensively used.
E. GOMEZ,
Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.
WASHINGTON ARSENAL, December 10th, 1857.
COLONEL H. K. CRAIG, CHIEF OF ORDNANCE, Washington, D. C.
On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.
I am, sir, most respectfully, your obd't servant,
W. H. BELL, Major of Ordnance.

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

Sheet No.			Sheet No		
1.	General Table for all Bases and all Slopes.		13.	for Base 18 ft. Slop.	1½ to 1
2.	For Side Hill Cuts and Fills.		14.	" 20 "	1½ to 1
3.	Base 12 ft. Slopes	1½ to 1	15.	" 24 "	¾ to 1
4.	" 14 "	1½ to 1	16.	" 24 "	1½ to 1
5.	" 15 "	¾ to 1	17.	" 25 "	1½ to 1
6.	" 15 "	1 to 1	18.	" 26 "	1½ to 1
7.	" 15 "	1¼ to 1	19.	" 28 "	¾ to 1
8.	" 16 "	¾ to 1	20.	" 30 "	1 to 1
9	" 16 "	1 to 1	21.	" 30 "	1¼ to 1
10.	" 18 "	¼ to 1	22.	" 30 "	1½ to 1
11.	" 18 "	¾ to 1	23.	" 32 "	1 to 1
12.	" 18 "	1 to 1	24.	" 32 "	1¼ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.
Sent, **free by mail,** in separate sheets, at 25c. each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,
By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—
1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.
It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

HISTORY
OF THE
RAILROADS
AND
CANALS
OF THE
UNITED STATES
OF AMERICA
EXHIBITING THEIR
Progress, Cost, Revenues, Expenditures
AND
PRESENT CONDITION.
By HENRY V. POOR, Esq.,
Editor of the 'AMERICAN RAILROAD JOURNAL.
Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.
The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.
The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**
The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

OIL! OIL!
PEASE'S
IMPROVED ENGINE and SIGNAL OIL,
FOR
RAILROADS, STEAMERS, PROPELLERS,
AND FOR EVERY CLASS OF
MACHINERY AND BURNING.

PRACTICAL TESTS, by Engineers and Machinists, of Thousands of Gallons, PROVE this Oil to be **superior** for **Burning**, and **TWENTY-FIVE** per cent. more **durable** than Sperm Oil, for Lubricating, and the **only** Oil that is in all cases **reliable,** that will keep bearings **cool,** and
WILL NOT GUM.
In no case has it failed to meet the approval of the consumer.
The SCIENTIFIC AMERICAN and MANUFACTURER'S JOURNAL, after testing this Oil, pronounce it **superior** to any other for Lubricating.—For sale **ONLY** by the Inventor
F. S. PEASE, 61 Main st., BUFFALO.
Reliable orders filled for any part of the United States or Europe.

STRATTON & CO.,
COMMISSION MERCHANTS,
No. 1 PINE STREET, N. Y.
AGENTS FOR
Bauman & Co.'s Poco Metallic Paint.

FOR WOOD PAINTING.—It retains a beautiful lustre, kills knots and will protect it under any circumstances. It covers 6,000 square feet per hundred pounds, and will neither fade, blister, or wash, and a better fireproof than any other Paint, for it will stand a heat that will melt lead. It is proof against sea, air and storms.
Refer to JOHN LEISENRING, Sup't and Eng'r. Lehigh Coal and Navigation Co., Mauch Chunk, Pa.

FOR BRICK AND PLASTER.—It makes all the fanciful stone colors, and will cover 4,000 square feet per 100 pounds. When laid out in blocks, it is truly beautiful.
Refer to SEMPLE & BROTHER, Easton, Pa.

FOR SHIP AND BOAT PAINTING.—It hardens under water to the hardness of Iron, preventing the ravages of the wood-worm effectually. On deck it is impervious to water, expands and contracts with heat and cold, and we warrant it on the forecastle six months.
Refer to CAPTAIN MASON, Schooner 'Adolph Ugel.' Philadelphia.

FOR RAILROADS.—It preserves Bridges and Ties from dry or wet rot and freight cars from burning and leaking.
Refer to R. H. SAYER, Sup't and Eng'r, WM. KELLOG, Master of Repairs, Lehigh Valley Railroad, Bethlehem, Pa.
A. G. BRODHEAD, Sup't and Eng'r, Beaver Meadows R. R., Mauch Chunk, Pa.

FOR ROOFING.—It covers 8,000 feet per 100 pounds, and may be used in the rain, as it never runs.
Refer to M. CULLOUGH & CO., HENRY BUCKWALTER, Philadelphia.

FOR IRON.—It will stand 300 deg. Fah. and gives satisfaction to all the Iron men in Philadelphia, on gas holders, steam boilers, Iron fronts and ornamental iron. It is equal to Red Lead, for steam and hot water joints.
Refer to J. W. and J. F STARR, Camden, N J. MORRIS, TASKER & CO., MERRICK & SONS, Philadelphia.

FOR IRON FOUNDERS' PATTERNS.—Five parts by weight of it to one of gum shellac dissolved in alcohol, will make a covering more impervious to the damp sand or loam than shellac alone of equal consistency.
Refer to THE NOVELTY IRON WORKS, New York.

FOR STAINING.—Oak, Mahogany, Rosewood and Walnut Stains for Furniture, we warrant it equal to Turkish Umber. Its natural colors are Umber, Brown, Lake, Olive and Lead color, which may be combined in endless variety. We hope soon to have other colors much lighter

ANALYSIS.

DENNIS BAUMAN & CO.,
Parryville, Carbon County, Pa.

The following are the results of Analysis of your Poco Metallic Paint.—Peroxyde of Iron 55.84, Red Oxyde of Manganese, 1.65; Lime, 2.52, Magnesia 1.29; Alumina, 9.00; Silex, 29.70;—100 parts.

The Analysis proves that this paint is not likely to be altered in the slightest degree by ordinary atmospheric agents, such as sunlight, rain, cold, or heat. We therefore regard your Poco Metallic Paint as of the most durable character

NATIONAL FERTILIZER.

The attention of Agriculturists is requested to this ECONOMICAL and SUPERIOR **FERTILIZER.** It possesses all the good qualities of the best known manures, without any of the injurious effects produced by the over-active Ammonia in Guano and kindred FERTILIZERS, while its *price* is **less than one-half of the Peruvian** Guano. The various materials composing this Fertilizer, are so chemically combined, that they are gradually evolved by the heat and moisture of the earth, and furnish to the plant all the requirements for a **rapid and luxurious vegetation.**

[COPY.]
NEW YORK, Sept. 8, 1866.
I have used about one ton of the NATIONAL FERTILIZER manufactured under Dr. L. Harper's patent, on my sugar plantation in the Island of Cuba, and although tried upon very poor soil, realized a fine crop. I used it in the same way and in the SAME QUANTITY as I use Peruvian Guano. I can confidently recommend it as in every respect equal to Peruvian Guano for sugar cane.
D. DE HEIVE, M.D.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER,** 104 Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

ROSENDALE HYDRAULIC CEMENT.

ROSENDALE AND KINGSTON CEMENT CO. Manufactory at Kingston, N. Y. on the West Bank of the Hudson River. Office 48 Pine st., New York City.
E. M. BRIGHAM,

ROOFING.

THE **Cheapest** and most **DURABLE ROOFING** IN USE.
Sent to any part of the country with *directions for application.*

GUTTA PERCHA CEMENT ROOFING.

SPECIMENS and *references* can be seen, and any desired information obtained on application, by *letter* or in *person,* at our OFFICE, 510 **BROADWAY, N. Y.** (Opposite the St. Nicholas Hotel).
JOHNS & CROSLEY.

This Roofing can be applied to new and old Roofs of all kinds. It is FIRE and WATER PROOF.
Gutta Percha Cement applied to Tin and other Metal Roofs will render them perfectly and permanently water-tight.
JOHNS & CROSLEY,
Sole Manufacturers,
510 BROADWAY.

PATENT ASPHALTIC
ROOFING FELT.
THE BEST, CHEAPEST AND
MOST DURABLE ROOFING KNOWN.

THE IMPROVED PATENT ROOFING FELT furnished by the Subscribers is entirely free from the objections hitherto urged against articles that have been furnished under similar names by various parties.

It makes a **light, cheap, durable,** and perfectly **Fire** and **Water-proof Roofing** for **Churches, Farm Buildings, Railroad Depots, etc.**

It forms the best and cheapest lining for Stores, Granaries, Barns and Wooden Buildings, as rats, mice and other vermin will not touch it.

It stands all climates and has been extensively furnished to the British Government for use in their widely scattered foreign possessions. The Turkish Government used large quantities of the Felt for roofing their hospitals and stables in the late war.

In this country first class dwelling houses have been roofed for three years with this Felt, and the owners who used tin now prefer this Roofing Felt.

Also an entirely new, superior and cheap **ROOFING CEMENT** for the above Felt and leaky tin roofs.

For Samples, Circulars, etc., apply to
EDMISTON BROS.,
No. 3 Bowling Green, New York.
N. B.—Agents wanted.

CEMENT ROOFING.

PATENT MICA
AND
Fibrous Cement Roofing.

IT HAS STOOD THE BEST OF ALL TESTS—TIME!

IT fully sustains the high reputation it has gained, as a PERFECTLY RELIABLE, DURABLE and WATER PROOF ROOFING. It is adapted to every variety of Roof, new or old, and is the best and cheapest Cement in use for repairing OLD LEAKY TIN or other Roofs.

ALL WORK WARRANTED.

Cement for sale by the Barrel, and sent to any part of the Country, with printed instructions for use.

Also, for sale, State and County Rights for a portion of the United States. **DITTO, PORTER & CO.,**
Successors to JOSEPH DITTO & Co.,
307 Broadway, cor. of Fulton st., N. Y

GUTTA PERCHA ROOFING,

IN Rolls which anybody can put on; waterproof, elastic, durable, fire-proof; needs no repairs; costs about half as much as Tin, and **lasts twice as long.**

These Roofs are suitable for any style of building. They can be steep or flat, or of any required inclination. Also,

LIQUID
Gutta Percha Cement,

Preferable to paint for covering Tin Roofs, protecting them for many years from rust, and rendering them water tight.

Samples, Terms, Price, etc., furnished on application.

American Railroad Journal.

PUBLISHED BY J. H. SCHULTZ & CO. No. 9 SPRUCE ST.

New York, Saturday, December 15, 1860.

Vicksburg, Shreveport and Texas Railroad.

The time for closing the fiscal year of this company has been changed from the 26th, to the 1st of September. The late report of the Directors, therefore, covers a period only of about eleven months. At the commencement of this period, as stated in their previous report, the cars were running to Quebec, on the Tensas river, 27 miles, and the contractors were at work laying down the rails, and daily extending the line of the road towards Monroe. There were ten or twelve miles of clearing and grubbing, and about 80,000 yards of earthwork to be done to complete the grading of the eastern division; but the work was so far in advance of the track-laying as not to delay the progress of the road. A moderate force had also been employed upon the western division. The company had on hand rails, chairs and spikes sufficient to lay seven miles of track; and had purchased 5,250 tons of rails, with chairs to match, sufficient to complete the road to Monroe, and lay the track across the parish of Caddo, from Red river to its junction with the Southern Pacific Railroad at the Texas State line. After the adjournment of the annual meeting in 1859, the force was increased until the number of hands employed amounted to about six hundred. At the close of the past fiscal year there were more than five hundred at work on the road. All the materials above referred to, as having been purchased, had arrived in New Orleans, and 2,685 tons of rails, with chairs and spikes to lay them down had been delivered upon the line of the road, viz: 1,500 tons at Monroe, 443 tons at Shreveport, and 742 tons at De Soto. In addition to which, 167 tons had been shipped up Bœuf river, and was awaiting a rise of the water, a few miles below the crossing of the road.

During the period embraced in the last report 27¾ miles of track have been laid, viz: 4¾ miles at Shreveport, 8¼ miles at Monroe, and 14¾ miles in extension of the track previously laid from De Soto, and carrying it about 3 miles west of Delhi, leaving 26 miles of track to be laid in order to connect the two roads, and bring the cars to Monroe. This gave altogether 53¾ miles of finished road on the 1st of September last, and the contractors were still engaged in laying down the iron at both ends of the eastern division. The bridges over the Tensas and Bayou Macon were so far completed as to admit of the cars making daily trips to Delhi. These bridges are good and substantial, as are those across Joe's Bayou and Cow Bayou and all the other intermediate trestling put up during the past year. The contractors have such a force employed in putting up the bridging between Delhi and Bœuf river, as they think will not delay the track-laying. The bridge across Clew Cape, between Monroe and Bœuf River, is nearly finished. The sub-contractors have also a force engaged in hewing and sawing timber, and driving the piles for the Lafourche Swamp bridge. They are confident they will have their bridging all done before Christmas. In the mean time the iron will be laid down between Lafourche and Bœuf river. As there is plenty of time to lay the track, and to erect the bridge over Bœuf River, there seems to be eno reason why the road may not be completed to Monroe within one week from the time the bridging is finished across Lafourche Swamp, as that will be sufficient time to lay the track over the bridge.

About 75,000 cubic yards of earth work will complete the grading of the Western division.—There has been expended upon this division (charging it with a fair proportion of the expenses of the road) $299,788 40. Of this sum the parish of Caddo has contributed $99,612 48, the citizens of Shreveport $20,906 67, and individuals $19,999 12. The citizens of Shreveport and the parish of Caddo still owe on their subscriptions more than $30,000. The means to meet the expenditures on this division have been made up as follows:

Contributed by the citizens of Caddo Parish and the City of Shreveport	$140,518 81
Stock and bonds paid to contractors	80,001 40
State bonds proportioned to that division	35,596 04
Balance of interest and discount on cash loaned	2,951 43
Proportional part of cash on sales of land	1,470 26
House rent	535 90
Advanced by the eastern division	38,715 06
	$299,788 40

The following is a statement of the amount expended within the period embraced in this report:

For work done and materials furnished, including iron and rolling stock	$482,602 26
Depot grounds and right of way	11,485 13
Engineering	5,412 96
Salaries	7,100 00
Commissions	2,023 25
Law charges	1,570 34
Land office expenses	2,785 95
Office expenses, printing, etc.	2,029 16
Interest and discount	30,062 66
Total	$545,071 71

These amounts, added to the expenditures previously reported, give the following as the entire amount expended from the commencement of operations to the date of the report:

For construction and materials	$1,403,476 51
Depot grounds and right of way	33,675 37
Engineering	85,697 50
Salaries	40,275 51
Commissions	14,889 40
Law charges	12,261 20
Land office expenses	5,962 55
Office expenses, printing, etc.	14,851 24
Interest and discount and coupons paid	51,602 23
	$1,662,691 51
Bills receivable	24,858 57
Cash	23,269 22
Total	$1,710,819 30

The entire amount received by the company from commencement of operations to the close of their last fiscal year is as follows:

Individual subscriptions		$173,749 84
Less reduction of tax		24,398 35
		$149,351 49
Contractors paid on their subscription		356,874 12
State of Louisiana on its "		241,000 00
Parish of Madison " "		94,758 85
Parish of Caddo " "		99,612 44
City of Shreveport " "		20,906 67
City of Vicksburg " "		20,512 40
Land sold, rent, voluntary subscriptions, etc.		32,713 41
Bonds earned by contractors		129,969 30
Cash due contractors		37,685 93
Bonds sold for cash		119,000 00
Bills payable		52,333 33
Due on purchase of iron		56,101 36
		$1,710,819 30

The means of the company for prosecuting the work to completion is as follows:

Individual subscriptions		$291,550 16
Less amount supposed uncollectable		125,000 00
		$166,550 16
Parish of Madison, payable in cash		7,169 41
" Caddo "		18,000 00
City of Shreveport "		9,093 33
" Vicksburg "		79,487 60
State of Louisiana " bonds		454,000 00
Contractors' subscription		1,460,965 00
First mortgage bonds.	$2,000,000 00	
Less am't disposed of.	269,969 30	
		1,730,030 70
Cash assets	$48,127 79	
Less bills renewable	15,615 83	
		32,511 96
Capital stock unsold	$416,718 53	
Sale of which will complete the State's subscription	105,000 00	
		512,718 53
Total		$4,479,526 69

The first mortgage bonds of the company are included in the above statement, and the amount of the notes held for lands sold deducted. The estimated value of the lands unsold are omitted, because, according to the stipulations of the mortgage, the entire proceeds of the sales of the land must be faithfully applied to the redemption of the bonds until the whole issue is cancelled; and although the estimated value of the lands is considerably more than the amount of the bonds, the surplus cannot be made available in the construction of the road, as it is the policy of the company to build it in advance of the sales. Should no more stock be sold, the resources of the company will be:

Am't due upon stock subscriptions		$2,195,265 50
Bonds remaining in hands of the company		1,730,030 70
Cash and cash assets		82,511 96
		$3,957,808 16

The estimated outlay required to finish the road, exclusively of interest and discount on bonds, and exclusive of the bridge across Red River, is for—

The Western Division	$160,000 00
Eastern "	300,000 00
Middle "	2,862,000 00
Total	$3,322,000 00
To which add present indebtedness,	146,120 62
Balance	489,687 54
Total	$3,957,808 16

This balance will be more than sufficient to cover the discount, and pay the interest upon the bonds until the 1st of March, 1864, after which the revenues of the road may be safely relied upon for this purpose. About $530,000 of the bonds remaining unsold will be taken by the contractors at par, and a large amount will be cancelled to release the mortgage for lands which shall be sold, leaving less than a million of bonds to be sold at a discount. The assets of the company consist of—

Stock subscriptions unpaid		$2,195,265 50
Bonds unsold		1,730,030 70
Capital stock unsold		521,718 53
350,000 acres of land unsold		2,800,000 00
Construction, work done and materials furnished		1,403,476 57
Engineering, salary and general accounts		259,215 00
Cash and bills receivable		48,127 79
		$8,957,834 03

Its liabilities are:

Capital stock		$4,000,000 00
2,000 first mort. bonds	$2,000,000	
Less cancelled for lands sold	21,000	
		1,979,000 00
		$5,979,000 00

During the past year the company have received from the Commissioner of the General Land Office a clear list for 353,000 acres of the lands granted by Congress to aid in building the road, leaving about 120,000 acres suspended for future decisions. The company have disposed of 4,797.37 acres of land for the aggregate sum of $30,818 47; of this amount, $13,143 62 was paid in cash, and $17,175 85 in mortgage notes running one, two and three years, and bearing 8 per cent interest. The prices have ranged from $2 50 to $20 per acre. About 719 acres were sold at the minimum price, under a special resolution of the board of directors, in relief of persons, who, having entered it in good faith in the Government office, had their entries cancelled because of some informality. Deducting this from the aggregate sales, will leave 4,078 acres sold for $28,519 37—being an average of $7 per acre. Had the above lands, which were sold for $2 50 per acre have brought their fair value, the sales would have averaged over $10 per acre, notwithstanding they were all sold in advance of the finished road.

The progress of construction of this road has necessarily been slow, on account of the difficulty of transporting materials to the points required. But the directors seem to have manifested a great degree of energy and prudence, and to have exhibited a singular regard to the best interests of the stockholders. This road will be an important link in the great chain of roads that will ultimately connect the Atlantic with the Pacific oceans. From Vicksburg, eastward, the Southern (Miss.) Road is being successfully prosecuted, soon to establish a connection between the Atlantic Ocean and the Mississippi river, while the Vicksburg, Shreveport and Texas road will connect the same river with the Pacific line. The directors and officers for the current year are as follows:

President—CHARLES G. YOUNG.

Directors—David Faulk, J. C. Cummings, Jas. H. Stevens, F. P. Stubbs, H. M. Bry, C. H. Morrison. C. H. Dabbs, John Ray, and Charles G. Young of Ouachita; C. H. Manlove, of Vicksburg; D. M. Pugh, of Madison; John W. Webb, of Morehouse; S. P. Gee, of Claiborne; W. M. Burns of Bossier; and L. M. Nutt, of Caddo.

Treasurer.—JOSEPH F. MCGUIRE.

Secretary—O. D. STILLMAN.

Chief Engineer—J. W. GREEN.

Pittsburg and Connellsville Railroad.

The fiscal year of this company ended November 30th. According to the report of the directors recently issued, the gross revenue for the year from operations of the 48 miles of road between Turtle Creek and Connellsville has been...$80,553
And the expenses.. 59,511

Leaving as net revenue $21,042

—which has been expended upon the new road, machinery and buildings and in the liquidation of outstanding claims for right of way, &c. The new road referred to, is about one mile east of Connellsville, and connecting with the Fayette County Railroad, opened to Uniontown in January last.

During the year the company have paid off $107,681 of their floating debt, which is now reduced to $67,869, from $788,863, which it was in 1856, at the commencement of the present administration of the Company's affairs. The existing debt, (which embraces all but interest over due on the funded debt,) is secured by collaterals which will liquidate it before long. The total expenditures of the company to the 31st of October of this year, upon construction and equipment, have been $1,564,016 between Turtle Creek and Connellsville, $218,925 between Connellsville and Cumberland, and $183,749 between Turtle Creek and Pittsburg, making a grand total of $1,866,690. The report says:

The new road between Pittsburg and Turtle Creek is progressing towards completion, and, although delayed by sundry causes, will be opened, it is expected, early next Spring to the Company's depot, between Try and Grant streets, on the river bank. The business and revenue of the road are increasing in a satisfactory ratio. The increase over last year is forty per cent., while that of last year over the preceding was but 19 per cent. A much larger addition is expected after the extension into the city, for which parties engaged in the coal and coke, and other mineral trades, are preparing. The country along the Youghiogheny valley traveled by the road is rapidly settling, and local freight and passengers increasing. The road has been worked more cheaply than last year, notwithstanding a fire which destroyed the engine house and shops at Connellsville, and damaged several engines. The number of miles run by engines has been 113,775, or 16,751 more than last year, and the cost per mile—the true criterion of economy—has been fifty-three and one-tenth cents against fifty-seven and thirty-three one-hundredth cents. Thus forty per cent more revenue has been earned with only seventeen and one-third more service performed, and that at a proportional cost of about seven per cent. less. This economy must increase as the road is lengthened towards Cumberland, the business enlarges, and the general or fixed expenses become relatively less. But one train has been off the track during the year, and that caused by the fall of a rock immediately before it, and no passenger has been injured.

The net revenue this year is 25 per cent. of the gross—last year, but 10 per cent. The local trade is encouraged by low rates, and is being steadily developed by them, and will be still more when the road is finished into Pittsburg. The prospects of the Company are encouraging, although no move eastward from Connelsville can

be made until the road is completed at this end. The Baltimore and Ohio Railroad Company continues to manifest a warm interest in the line, and will, no doubt lend it effective aid in due time. New York may also tender assistance to complete an independent line from near Cumberland to Harrisburg, recently surveyed with favorable results.

The Company closes its report by invoking the aid of Pittsburg for an early opening of their road into that city; to accomplish which, they require to dispose of the residue of their First Mortgage Bonds, of which but about ten per cent. of the whole amount now remains to be placed, in order to insure that object.

Georgia Railroad and Banking Company.

The earnings of this road for the fiscal year ending March 31, 1860, were:

From passengers		$412,307 90
" freight		702,376 75
" mail		44,503 57
		$1,159,188 22
And the expenses were:		
Conducting transport'n.	$143,838 83	
Maintenance of motive power	188,495 00	
Maintenance of way	149,468 28	
" cars	59,691 71	
	$541,493 62	
Relaying iron, outfit, etc.	89,651 03	
		$631,144 65
Net from road operations		$528,043 57
Receipts through bank for discount, interest, premium and rent	$104,124 97	
Dividends on stock	147,406 00	
	$251,530 97	
Less commissions, salaries, interest on b'nds, taxes, incidental expenses, etc	56,556 10	
		$194,974 87
Net from all sources		723,018 44
Add reserved fund		740,846 03
Total		$1,463,864 47
From these profits two dividends have been decl'd of $4 per share each		332,480 00
To credit of reserved fund 31st Mar.		$1,131,384 47
Compared with the preceding year the gross earnings show an increase of		4,567 14
The expenses an increase of		20,886 70
Making the decrease in net earnings		$16,319 56

The comparatively large increase in the expenses of working is mainly due to the expenditures for relaying iron, outfit, etc., during the year having exceeded those of the preceding year by $30,362 95. The transportation expenses proper show a decrease of $3,476 25.

It will be seen that the earnings have slightly increased over those of the preceding year. Even this result is more favorable than was anticipated by the board. A heavy loss in *travel* was anticipated from increased competition north, and especially by the completion of the line through Virginia. On the contrary, the falling off has been in *freights* to the amount of $53,178 01, while the receipts from travel have *increased* $57,745 15. It is feared, however, that the apprehended reduction in income has only been averted by temporary causes. The increase in travel is attributed to "an unusually large emigration from the more Northern Slave States, stimulated by occurrences in Virginia which are sufficiently well known." The up freights were also "better sustained than anticipated by unusually large purchasers in Charleston by southern and western merchants." A statement referring to the elements of income, with the comparative increase and decrease, is annexed to the report, from which it appears that though the local business of the road is in a prosperous condition, the through business is at several points declining, owing to the increased competition of rival lines, and the want of sufficient steamers in connection with the Georgia line. The report says:

Competition for our Through Business is continually increasing by the progress and completion of rival lines, and the question is forced upon us, whether we should not do *something* to protect and preserve our business by improved connections and extensions. The Virginia line has been completed, and threatens to compete for freight, as well as travel, and the Charleston and Savannah Railroad is also complete, and will affect our travel and perhaps freight also, to some extent. A Road is also progressing from Griffin, by way of Newnan, to North Alabama, and an extension from Eatonton to Madison is proposed and provided for. Thus pressed in upon the South, cut off on the West, met at both termini, and threatened at the centre, it is time to think of adding strength to our position, that we may, at least, preserve the business that remains to us and if possible obtain indemnity for what has been lost. The Board would not encourage any measure in a spirit of rivalry to other interests, but would earnestly urge the consideration of the best means of preserving our own.

The location of the eastern *terminus* of the Western and Atlantic Railroad, fixed at an early day the direction of our main line as a part of the system of Georgia improvements. The want of extensions and more direct connections *West and South-west*, was felt at an early day, and an effort was made so early as 1836, through "The Middle Branch Railroad," to supply this obvious want. For various reasons—the most important of which has been the want of means, and for a portion of the time, *the want of chartered power*—these extensions so important to the permanent prosperity and safety of our enterprise, have been heretofore neglected. The company is now in a position of decided strength, the necessary charters are now in force, and it is believed very liberal co-operation may be obtained from the citizens, and others equally interested with ourselves. Whether some effort should not be made to secure this important object by the offer of material aid, is deemed well worthy of the serious consideration of the Stockholders.

Applications have been made through Committees for aid to Roads from Warrenton to Macon, from Madison to Barnsville, from Covington to Griffin, from Atlanta to Jacksonville, and from Marietta to Jacksonville. All these routes have their advocates, and all have their merits, more or less. Upon the great importance of some of them to our enterprise, it is presumed there will be no difference of opinion among the Stockholders. *All* of them we can scarcely expect, but some one or more of them, the Board deem very essential, to secure the permanent prosperity of our Road, and the interests connected with it.

It will be seen that the profits of the Banking Department continue to increase, and the Stock investments of the Company are also improving. The Nashville and Chattanooga Railroad paid dividends the last year at the rate of 6 per cent. and it is hoped that rate of dividend may be continued hereafter. It shoul d be mentioned, however, that the large item of "dividend on stocks" is not reliable as an estimate for *regular* income from this source, as it includes a *bonus* on the Stock of the Atlanta and West Point Railroad at 30 per cent.

The following is a general statement of the affairs of the company March 31, 1860:

	Dr.
Capital stock	$4,156,000 00
Bonds of the company	312,500 00
Income from earnings of the road	1,142,516 67
Reserved fund	740,846 03
Discount, interest, rent, etc.	104,124 97
Dividends on stock	147,406 00
" unpaid	25,846 34
Due corporations and agents	135,408 98
Deposits	289,114 16
Circulation	1,069,579 90
	$8,123,343 05
	Cr.
Cost of road and outfit	$4,156,000 00
Conducting transportation	680,939 65
Salaries, office expenses, etc.	33,880 45
Interest and taxes	28,487 20
Real estate, etc.	163,408 66
Materials on hand	152,798 89
Stock in other roads	952,150 00
Bonds of other companies	51,500 00
Discounted notes and domestic bills	549,295 00
Bills of exchange	642,887 85
Assessments on stock unsettled	335 50
Due by banks, corporations and agents	73,185 94
Notes of other banks	159,851 00
Specie	528,620 91
	$8,123,343 05

The officers and directors elected April 12, 1860, are as follows:

President—John P. King.

Directors—John Bones, Jas. S. Hamilton, Wm. M. D'Antignac, Asbury Hull, George T. Jackson, Richard Peters, Ferdinand Phinizy. John Cunningham, George W. Evans, William D. Conyers, James W. Davies, Elijah E. Jones, Antoine Poullain, Benjamin H. Warren, Massillon P. Stovall, Edward R. Ware.

Superintendent—George Yonge.

Cashier—J. Milligan.

Debt of Arkansas.

The amount of outstanding debt on account of the Bank of the State of Arkansas, is $1,098,717 50; and the liability of the State for bonds sold by the Real Estate Bank and interest due on them was $1,654,825 28 on the 1st day of October. There is beside an additional liablity for principal and interest up to the 1st day of October, 1860 of $267,405 71, on account of the $121,336 59, borrowed by the bank on the 7th of September, 1860, upon the 500 bonds of the State, which the bank, in violation of law, hypothecated to the 'North American Trust and Banking Company of New York. This company sold the bonds, and placed them beyond the control of the State. The whole value of property taxed to the State in the year 1852, was $42,900,080, and the increase during the subsequent eight years has amounted about $100,000,000. There remained in the Treasury on the 1st of October, for ordinary expenses, $304,106 98 in gold and silver. An appropriation of $130,000 out of the five per cent. fund accruing from the sales of public lands, is recommended for the completion of the Memphis and Little Rock Railroad, and of the Mississippi, Ouachita and Red River Railroad.

American Railway Inventions in Europe.

Joints for Railway Bars or Rails.—Patentee, George S. Avery, of Cross River N. Y.—About a foot of the end of one rail is bent outside of the adjoining rail, the latter having its end cut off at an angle of about 45 deg., so as to prevent any openings between the ends of the rails and thus obviate the jar.

Railways.—Patetnee, George W. R. Bayley, of Brashear, La. This invention relates to a peculiarly formed reversible rail, and the mode of securing and bracing it.—*Scientific American*

BLAKE'S STONE BREAKER.

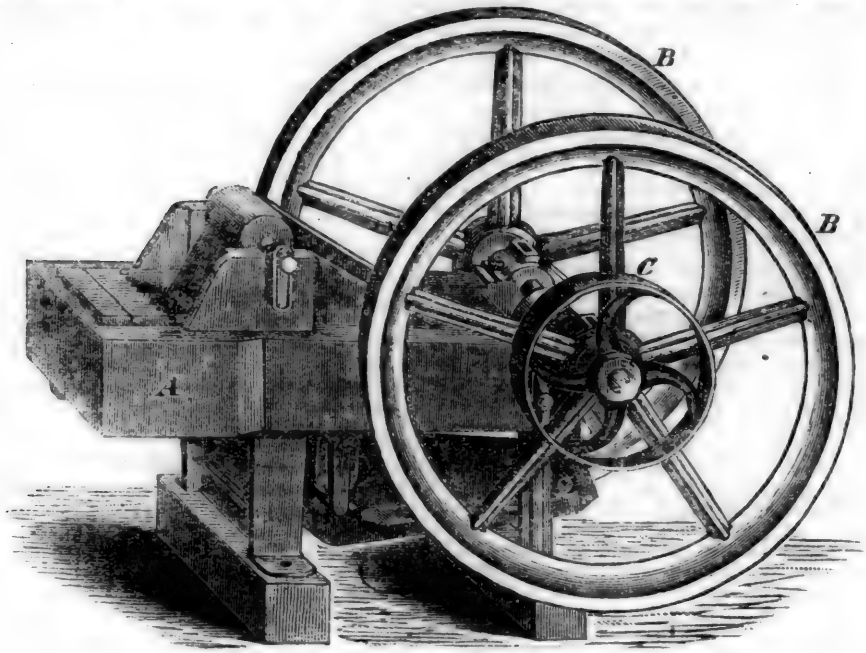

Figure 1.

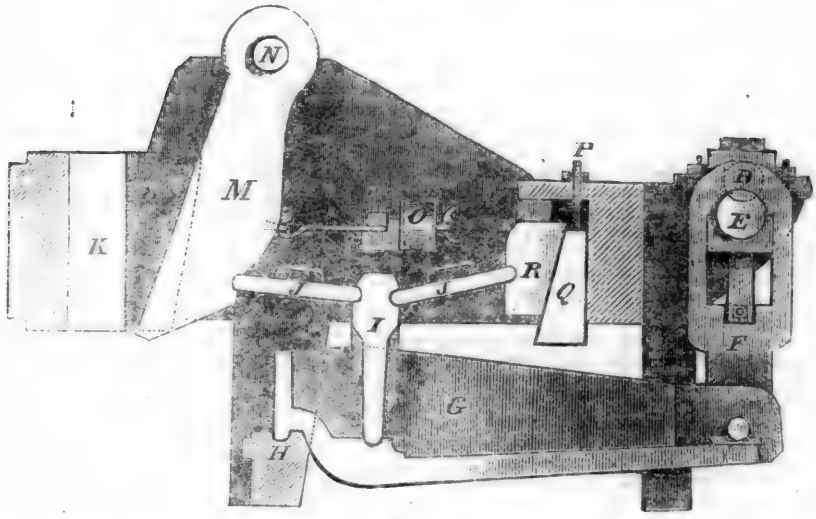

Figure 2.

We give in connection herewith cuts of a new and very valuable machine designed for breaking or crushing stone or ores of various kinds, of which the following is a brief description:

Figure 1 is a perspective view of the machine entire. The *Frame*, A, which receives and supports all the other parts, is cast in one piece, with feet to stand upon the floor or on timbers. These feet are provided with holes for bolts by which it may be fastened down if desired; but this is unnecessary, as its own weight gives it all the stability it requires. B B are *Fly wheels* on a shaft, which has its bearings on the frame, and which, between these bearings, is formed into a short crank. C is a *Pully* on the same shaft, to receive a belt from a steam engine or other driver.

Figure 2 shows a side view or elevation of the other parts of the machine in place, as they would be presented to view by removing one side of the frame. The parts of this figure which are shaded by diagonal lines, are sections of those parts of the frame which connect its two sides, and which are supposed to be cut asunder, in order to remove one side and present the other parts to view. The dotted circle D is a section of the fly-wheel shaft; and the circle E is a section of the crank. F is a *Pitman* or connecting rod which connects the crank with the *Lever* G. This lever has its fulcrum on the frame at H. A *Vertical* piece, I, stands upon the lever, against the top of which piece the *Toggles* JJ have their bearings, forming an elbow or toggle joint. K is the *Fixed Jaw* against which the stones are crushed. This is bedded in zinc against the end of the frame, and held back to its place by *Cheeks* L that fit in recesses in the interior of the frame on each side. M is the *Movable Jaw*. This is supported by the round bar of iron N, which passes freely through it and forms the pivot upon which it vibrates. O is a *Spring* of India rubber, which is compressed by the forward movement of the jaw and aids its return.

Every revolution of the crank causes the lower end of the movable jaw to advance toward the fixed jaw about ¼ of an inch and return. Hence, if a stone be dropped in between the convergent faces of the jaws, it will be broken by the next succeeding bite; the resulting fragments will then fall lower down and be broken again, and so on until they are made small enough to pass out at the bottom. The readiness with which the hardest stones yield at one to the influence of this gentle and quite movement and melt down into small fragments, surprises and astonishes every one who witnesses the operation of the machine.

It will be seen that the distance between the jaws at the bottom, limits the size of the fragments. This distance, and consequently the size of the fragments, may be regulated at pleasure. A variation to the extent of ⅝ of an inch may be made by turning the screw nut P, which raises or lowers the *Wedge* Q, and moves the *Toggle block* R forward or back. Further variations may be made by substituting for the toggles JJ, or either of them, others that are longer or shorter; extra toggles of different lengths being furnished for this purpose.

The machine has been thoroughly tried, two of them having been constantly at work at the new reservoir for a year past, in crushing the vast quantity of stone required for lining the great basin, for concrete, roads, etc., etc.

The quantity of stone a machine will break per hour depends upon the distance between the jaws at the bottom; second, the width of the jaws; third, the number of revolutions per minute; fourth, the power applied. The power required to break a given quantity per hour will also vary with the hardness of the stone. The 15 inch machine, with the jaws set at 1¼ inches asunder, driven by a 12 horse power, making 200 revolutions per minute, will break from 5 to 8 cubic yards per hour of the hardest stones into fine road-metal. The 10 inch machine will do two-thirds as much with two-thirds the power.

Another excellence of the machine is the superior quality of its works. For concrete, a cubic yard of stone requires about one-third *less* of cement than stone broken by the hammer, for the reason, that the stone broken by the machine packs closer. The harder the stone, the greater the quantity the machine will break, as the product runs off more freely.

We regard this as one of the most valuable inventions of the day, from the vast number of uses to which it can be applied—the construction of all kinds of roads; the supplying of material for hydraulic works and concrete of all kinds; the crushing of ores, coal, etc., etc. It can be furnished at very low cost, and has been so thoroughly tested, that its value is fully demonstrated. It is not liable to get out of order, and the only portions subject to any considerable wear are the *jaws* which are made of cast iron with *chilled* surfaces and which can be readily replaced.

The machine can be taken to pieces, and packed so as to be conveniently transported to any portion of the country.

The weight of the 15 inch machine is about 8,100 lbs., and of the 10 inch, 5,800 lbs. When taken to pieces for transportation, the heaviest piece of the 15 inch machine weighs about 3,400 lbs., and of the 10 inch 2,300 lbs. The extreme length of the 15 inch machine is 7 feet 8 inches; width, 4 ft. 6 in.; height to top of wheels, 5 ft.

The manufacturers and patentees are BLAKE BROTHERS, New Haven, Connecticut, to whom orders may be addressed. Messrs. FAIRCHILD, WALKER & Co., 229 Broadway, N. Y., contractors on the new reservoir in New York, are prepared to contract for breaking stone for roads, or other purposes, in all parts of the country.

Reference relative to the working of the machine may be made to J. H. SCHULTZ & Co., *Railroad Journal Office*, No. 9 Spruce st., N. Y.

Railroad Earnings.

The following is an abstract of the operations of the Ohio and Mississippi Railroad for October:

Balance from September account		$36,623 94
RECEIPTS.		
From express freight earnings of September	$1,959 36	
From pass'ger earnings from Sept. to October	18,251 69	
From freight do.	13,163 01	
		33,374 06
From passenger earnings on October account	45,399 46	
From freight do.	33,270 50	
		78,769 96
From General Post Office, for mail pay to 30th Sept.		10,856 25
From other sources		1,601 16
		$161,225 37
DISBURSEMENTS.		
Charges advanced on acc't with other roads	$4,564 69	
Advances of former months	15,000 00	
Interest and discount	1,160 15	
Office and other expenses	1,286 54	
Paid on account 1st mortgage conpons due July 1, 1858	35 00	
Do. July 1, 1859	21,385 00	
Do. January 1, 1860	630 00	
Do. July 1, 1860	21,875 00	
On acc't of October current expenses	6,751 66	
On acc't of former arrearages	1,838 80	
Current operat'g expenses, and construction work for September	69,211 27	
		143,738 11
Balance carried to November acc't		$17,487 26

The following is a statement of the earnings of the St. Louis, Alton and Chicago Railroad for the month of November:—

Passengers	$28,325 95
Freight	42,516 88
Mails and express	3,362 33
Total	$74,205 16
Corresponding period in 1859	76,040 00
Decrease in 1860	$1,834 84

The Michigan Southern and Northern Indiana road earned in November as follows:

	1859.	1860.
Passengers	$65,795	$71,193
Freight	111,274	132,226
Mails, etc.	9,430	7,680
Total	$186,195	$211,199
Increase in 1860		$24,925

The receipts of the Grand Trunk Railway of Canada, for the week ending December 1, 1860, were $75,033 14
Corresponding week, 1859 68,483 21
Increase $6,549 93
Total traffic from July 1, 1860 $1,525,655 45
Do. for same period last y. 1,141,462 93
Increase $384,192 52

The net receipts of the same month for the last three years were as follows:

1857	$75,265 10
1858	83,221 46
1859	85,784 80

The receipts of the Cleveland and Toledo Railroad for November, 1860, were $83,574
November, 1859 76,904
Increase $7,270

The following is the Illinois Central Railroad Company's statement for November, 1860:

Land Department.

11,376 94 acres sold for		$187,314 31
60,216 37 " "	since Jan. 1	986,215 38
1,237,260 55 " "	previously,	15,735,837 02
1,297,476 92 " "	Total	$16,722,052 40
Bonds canceled in November		$56,500 00
" " previously		1,668,000 00
Total bonds canceled		$1,724,500 00
Cash receipts in November, 1860		99,845 37
Total since Jan. 1		695,968 80
Total cash and bonds received to November 30, 1860		$4,003,396 70

NOTE.—Cash receipts in October applicable to cancellation of Construction Bonds, $56,272 07; applicable to Free Land Fund, $8,132 12; applicable to Interest Fund, $27,691 82; miscellaneous accounts, $7,749 36.

Traffic Department.

Total receipts for November, 1860	$242,945 90
Do. do. 1859	235,670 83
Increase	$7,275 07
Total receipts since Jan. 1, 1860	$2,428,296 16
Do. correspond'g period, '59	1,909,096 57
Increase	$519,199 59

The earnings of the Toledo and Wabash Road for November, 1859 and 1860, were as follows:

November, 1860	$77,599 32
" 1859	81,872 17
Decrease	$4,272 85

The November earnings of the Michigan Central Railroad were:

November, 1860	$196,182 17
" 1859	181,617 19
Increase	$14,565 08

The receipts of the Grand Trunk Railway of Canada for the week ending November 24, 1860, was $78,423 59
Corresponding week last year 63,182 79
Increase $15,240 80
Tot. traffic from July 1, 1860, to date $1,450,622 31
Corresponding period, 1859 1,072,979 72
Increase $377,642 59

The following statement exhibits the earnings of the Milwaukee and Mississippi Railroad for November, in comparison with the earnings for the corresponding month of last year:

	1860.	1859.
Freight	$69,683 01	$67,937 77
Passengers	15,475 58	16,497 73
Rents and Mails	3,356 88	1,835 42
Total	$88,515 47	$86,270 92
Increase		$2,244 55

The following are the earnings of the Great Western Railway of Canada for the week ending November 30, 1860:

Passengers	$18,602 87
Freight and live stock	20,424 29
Mails and sundries	1,515 57
Total	$40,542 73
Corresponding week of last year	38,527 85
Increase	$2,014 38

The earnings of the Chicago and Rock Island Railroad in November were $88,657 30
November, 1859 99,329 58
Decrease $10,671 28

The earnings of the Chicago and Northwestern Railroad for November, 1860, were $79,529 54
November, 1859 48,503 94
Increase in 1860 $31,025 60

The earnings of the Chicago, Burlington and Quincy Railroad Line in November, were:

	1859.	1860.
Freight	$115,438 71	$112,086 00
Passengers	46,402 46	43,738 70
Mails and miscellan's,	8,950 00	2,741 66
Total	$170,791 77	$158,566 36
Increase in 1860		$12 825 41

The net receipts of the New York and Harlem Railroad for November are as follows:—

1859	$85,784 80
1860	99,460 54
Increase	$13 675 74

Rock Island Bridge.

The trial of J. W. Bissell for an alleged conspiracy to burn this Bridge was to have been commenced in the Recorder's Court of Cook County, Illinois, on the 10th inst. This bridge, says the Chicago *Tribune*, is a link in the great East and West thoroughfare, connecting the Rock Island Railroad with the Mississippi and Missouri road, and completing the line of uninterrupted communication between the interior of Iowa and the Northwestern Lakes. Our readers are aware of the long pending litigation, set on foot by St. Louis and the steamboat interest against this bridge. That case is now in the Supreme Court of the United States after having passed through the U. S. District Courts both of Illinois and Iowa. The interests involved are of great magnitude, and upon the final decision depends the construction or abandonment of numerous contemplated railroad bridges across navigable streams in various parts of the country. These facts give increased interest to the trial of the alleged conspiracy case, about to take place in this city.

Mississippi and Tennessee Railroad.

The City Council of Memphis, Tenn., have refused to authorize a vote of her citizens to be taken on the proposition to sell the bonds held by the city in this road for $125,000. The city will, therefore, retain its $250,000 of bonds. There remains but eleven miles of this road to be completed, when it will reach its terminus at Grenada, and form a portion of the direct road from Memphis to New Orleans. It is contemplated to allow the Mississippi and the Ohio lines of road to unite, by laying a track along the landing. When that is completed a direct route will exist from New Orleans through Memphis to Cairo, where the Illinois Central starts from and gives connection with the Ohio and Mississippi, with Cincinnati and Chicago, and all the great Western, Northern and Eastern roads.

Connellsville Railroad.

The trestle work of the Connellsville Railroad over Turtle Creek has been completed. The work extends over a distance of nearly half a mile, and is built in the most substantial manner.

Lock Haven and Tyrone Railroad.

This road was sold at public auction in Philadelphia on the 27th ult., under a decree of the Supreme Court of Pennsylvania, for $51,000. A considerable portion of the road is graded.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Share and Money Market.

There has been a much better feeling the latter part of the present week, and a very considerable improvement in the Share Market. There is evidently a strong re-actionary movement going on throughout the Southern States. Conservative men of influence and character are everywhere moving. A more powerful element is the immense pecuniary loss and distress already sustained, and which must be aggrevated to a ten-fold degree by an actual rupture of the Government. The tie of interest is the only one that can hold the country together, and we still believe this to be too strong to be broken. If sufficient time could be gained for reflection and deliberation, we believe that everything would yet end well. The news from Europe is much more favorable than was expected. Gold is coming from England in considerable quantities, which will have the effect to place the exchanges between the two countries on a more satisfactory footing. We shall probably gain a further relief by becoming habituated to the political questions, that have caused such a disturbance. We are, however, by no means at the end of our troubles, and the events of a day may unsettle everything and leave us more doubtful than ever at the prospects of the future.

Tredegar Works.

The Richmond *Dispatch* says: "At the TREDEGAR WORKS, in this city, are two handsome and powerful locomotives, just being completed for some of the Southern railroads, and will be shipped in the course of a few days. One of these engines is to run in and out of Charleston, S. C."

Platte County Railroad

The track on the Platte County Railroad, south of this city, is nearly completed to Iatan. A number of hands are busily engaged in putting down the iron, and as soon as the cars commence running to that point, the company's boats will stop there instead of coming as far up as Atchison. —*St. Louis News.*

Ottawa Ship Canal.

It is well known that the attention of both the British and Canadian Governments has for some time past been directed to the subject of opening a new route of commerce between the St. Lawrence and the upper Lakes by way of the Ottawa river, and Lake Nipissingue and its outlet, French river, to Georgian Bay.

We have now before us a copy of the report of the survey of this route by Thomas C. Clarke, Esq., Engineer for the Government of Canada, which contains a minute description of the route, and of the works necessary to be executed, with estimates of cost, etc., etc.

The route commences at Montreal, follows up the Ottawa, to Mattawan river, a distance of 315.87 miles; thence up the Mattawan to the summit between the Ottawa, and Lake Nipissingue, 16.22 miles; thence across the Summit to the mouth of Lake Nipissingue 51.15 miles. Thence by the French river to Lake Superior 47.52 miles, making the whole length of the improvement 430.76 miles, of which 20.82 miles will be the *Lachine* Canal already constructed. The work, or improvement is to consist of a series of dams, locks and canals, and slackwater navigation. The following table will give the length of such canals and navigable basins; the number of locks; lift of same, with the estimated cost of each.

	Distances.		Levels.		
	Rivers and Lakes.	Canals.	No. of Locks	Feet Lockage	Cost.
Lachine Canal	....	8.50	5	43.75	Not est'd
Lake St. Louis	13.31	....	-	....	Do.
Saint Annes	....	1.19	1	1.00	469,672
Lake of Two Mountains	24.70	....	-	....	.....
Carillon to Greenville	7.73	5.00	7	58.50	1,649,909
Green Shoals	....	.10	-	....	136,105
Ottawa River	55.97	....	-	....	.....
Chaudiere and des Chenes	3.75	2.61	6	63.00	816,733
Des Chenes Lake	26.69	....	-	....	.....
Chats	1.70	.60	5	50.00	681,932
Chats Lake	19.28	....	-	....	.....
Snow's to Black Falls	13.32	1.05	11	104.00	1,258,840
River and Lake Coulonge	24.93	....	-	....	262,514
Chapeau and l'Islet	4.85	.14	2	18.00	243,507
Deep River	33.58	....	-	....	.....
Joachim's to Mattawan	51.74	2.26	14	148.20	1,757,658
River Mattawan	16.22	1.08	11	144.00	1,162,154
Summit level and cut	51.15	5.97	--	....	2,160,369
French River	47.52	0.82	7	77.00	886,117
Add engineering and superintendence	....	....	-	....	574,175
	401.44	29.32	64	685.70	12,057,680

These estimates are, exclusive of the Lachine Canal, 20.82 miles of Canals, and are equal to $579,134 per mile of Canal. But the cost of the whole navigation, from St. Annes to Lake Huron, 408.76 miles, is but a trifle under $29,500 per mile.

The locks are to be 250 feet wide, with 12 feet depth of water. The canals 13 feet deep, with a width at bottom of from 100 to 146 feet. The locks and canals will pass the largest propellers navigating the Lakes, which have a capacity of about 900 tons. These propellers have an average length of nearly 200 feet, with about 31 feet beam, and a draft of about 11 feet.

The improvement when completed will be a series of navigable pools, connected by locks and short canals. For such, the Ottawa is peculiarly fitted. It has a very uniform flow of water, while the bed of the river is well adapted to the construction of the dams, which, in almost every instance will rest on the solid rock.

The summit between Lake Nipissingue and the waters flowing into the Ottawa will be fed from that Lake, the waters of which, for this purpose, will be raised 9.46 feet by a dam. The Summit section is expensive, but the fact that it can be fed from Lake Nipissingue is an interesting illustration of the topography of the country bordering the great Lakes. The Summit between Georgian Bay and the Ottawa is the only 47 feet above the former. On the South, the Summit between Lake Michigan and the Illinois river is only 8 feet; Lake Superior being some 12 feet higher than this Summit. The great Lakes thus occupy the crest of the great interior plain of the continent, and might with a comparatively slight expense be turned into the Gulf of Mexico, instead of being precipitated over the Falls of Niagara.

The saving in distance by the proposed route between Montreal and Chicago, over that through Lake Erie is 342 miles. The former is made up of 575 miles Lake navigation; 406.74 miles of inland, (river), and 29.62 miles of Canal, making a total distance of 1,005.76 miles. Upon this route there would be 69 locks having a lift of 709.45 ft., and a descent, by current, of 21.4 feet,—making a total rise and fall of 730.85 feet. Upon the Lake Erie route, the Lake navigation would be 1,145 miles; inland, (river), 134 miles; canals, 69 miles; total 1,348 miles. There are upon this route 54 locks, having an aggregate lift of 534.75 feet. The descent by current is 26.5 feet, making the total rise and fall, 561.25 feet.

The improvement of the Ottawa for its local traffic, is a matter of considerable importance. There would seem to be sufficient reason for opening this route, considering its low cost, for the Lake trade. We presume, however, that the work will not, at present, be attempted. The Canadas are in an unsettled state, as well as ourselves. Assuming this improvement would take the trade of the Lakes Michigan and Superior, and a portion of Huron, an equal amount would be withdrawn from the St. Lawrence Canals, by which, what would be gained on the one hand would be lost on the other. The Canadian Government, however, probably proceed on the assumption that the new route would command a large portion of the Lake trade which now seeks its outlets through the public works of the United States. If the proposed Caughnawaga improvement, by which Lake Champlain and the St. Lawrence would be united by a canal of large dimensions, should be completed, a large diversion by way of Montreal might be effected. Without this, we doubt whether it could be done.

There is no country in the world, the natural configuration of which invites to the construction of artificial works on a grand scale, as Canada, and by no people have works of greater magnitude, in comparison to their numbers and wealth, been constructed. They have not proved productive, but the incidental benefits resulting from them have been vastly greater than their cost. Such very probably would be the case with the proposed Ottawa improvement.

The surveys appear to have been executed, in an able and thorough manner, by the Engineer for the Government, Mr. Clarke, assisted by Thos. E. Blackwell, Esq., well known in the United States as an accomplished and skilful engineer. Detailed estimates are given for each class of work. The report contains a great amount of information in reference to the topography of the country traversed, and upon the general subject to which it relates, and is a valuable document for every person interested in this, or in kindred subjects.

New York and Erie Railroad.

Mr. Nathaniel Marsh, the Receiver of the New York and Erie Railroad Company, has filed his reports in the mortgage suits against the said company. The following table will show the receipts and disbursements:

Joseph Walker et al., Trustees, agt. The New York and Erie Railroad Company, (2d, 3d, 4th and 5th mortgage suits).

Unpaid interest on 2d and 3d mortg.	303,185 00
Available balance	$52,794 28

Journal of Railroad Law.

ABANDONMENT OF ROAD BY COMPANIES: NATURE OF RAILROAD FRANCHISES: RIGHTS OF THE PUBLIC.

A motion was recently made in the New York Supreme Court, by the Attorney General, to restrain the Albany Vermont Railroad Company from removing the iron rails upon some twenty miles of the eastern portion of its road. The company was organized in 1851, under the general railroad act, to construct a railroad from the city of Albany to Eagle Bridge in Rensselaer county. The road was completed and put in operation somewhere about 1853, and was run until September 1859. The railroad was sold under a mortgage foreclosure, on the 19th of September, 1859. The purchaser, with certain associates, on the 6th of October, 1859, organized the road anew, over the same track, by its present name of the Albany and Vermont Railroad Company, but, with the exception of some twenty days, the defendant had not run, or in any manner operated, the eastern portion of its road since that time, and had removed a portion of the iron rail therefrom. On the 12th day of June, 1860, the defendant leased to the Rensselaer and Saratoga Railroad Company, during defendant's corporate existence, that portion of its road lying between the city of Albany, and a point one thousand feet north of its intersection with the Rensselaer and Saratoga road, at an annual rent of twenty thousand dollars, with a clause in the lease, making it void at the option of the lessee, in case any part of the defendant's road, east of the Hudson River, should be operated to carry freight or passengers. This provision applied to the portion of the road in controversy.

It appeared that the defendant's road originally cost over two millions of dollars, more than half

of which was contributed by the citizens of Albany, and that the city in its corporate capacity, advanced $300,000 towards the completion of the road, but that it cost its present owners only about one hundred and sixty thousand dollars; that a responsible offer to hire said road and its property for ten years, at an annual rent of twenty-one thousand dollars, and to keep the same in good running order, was made to defendant before the company made the lease above alluded to. This offer was declined.

It also appeared that parties owning stock in the Rensselaer and Saratoga Company, uniting with stockholders in the Troy and Boston Company, or that the friends of those roads, in April, 1860, purchased a majority of defendant's stock, and therefore controlled the defendant's road, and under their direction the lease was made to the Rensselaer and Saratoga road, and the track on the eastern portion of defendant's road was directed to be taken up.

In this way a transhipment of freights was made necessary to cross the river at Albany, and a large increase of expense thereby necessarily incurred.

The following is the opinion of the Court upon the foregoing facts:

PECKHAM J. The complaint herein, on behalf of the People, asks for an injunction, and also prays that the defendant may be compelled, by the decree of this court, to put its road into repair as to its eastern portion, and to operate the same. This case is novel in this country, and by no means free from difficulties.

By the present arrangement, the main purpose for which the defendant's road was orginally constructed, is destroyed. Yet if no law has been violated, the remedy is not with the court.

It is insisted that the defendant has a right to abandon any portion of its road whenever it chooses, and the public is without remedy; that there is no imperative direction by any statute requiring its continued operation—hence, that this court has no power to compel defendant to repair its road. The defendant has failed to find any statute authorizing a railroad company, absolutely at its pleasure, to abandon part of its road; and I am not aware of any common-law or inherent right to do so after the road is completed.

Railroads are constructed for the public use. They are authorized to go over and occupy and own the land of any citizen, against his will, thus exercising the right of eminent domain on the sole ground that such road is for the public use and benefit. In some cases, lands are donated to them to aid in their construction. If they are for the public use, it would seem rational that the public should have some rights in respect to them after their construction.

It is laid down as a general principle, that there is an implied obligation on the part of the grantees of all franchises to execute the conditions and duties prescribed in the grant; the grantee of the franchise of a ferry "is obliged to provide and maintain facilities for accommodating the public at all times with prompt and convenient passage," the public have an interest in such franchise.

The statute provides that every railroad "shall start and run their cars for the transportation of passengers and property at regular times, to be fixed by public notice;" and shall take, transport, and discharge such passengers and property on the due payment of the freight or fare legally authorized therefor, and shall be liable to the party aggrieved in an action for damages, for any neglect or refusal in the premises.

This provision seems to be plain and imperative. Railroads are common carriers in this State, and it is their duty to be ready and prepared, at all reasonable times, to transport freight and passengers.

Suppose a road, without necessity, ceases to run over a portion of its track for a week, or a month, would that be any answer to an action for not transporting freight tendered for transportation? I think not. Would it be any better answer for the road to say it had concluded not to carry freight over that portion of the road any more at all? If not, then this proceeding to tear up its rails, and to abandon transporting of persons and property on its eastern portion, is a violation of its duty and its charter.

Abandoning a portion of a road after large business interests have grown up in connection therewith, to further other rival interests of roads or communities, must operate disastrously and oppressively; and if done without authority, there should be, and I think there is, a remedy in the courts to see that it is not done without imperious necessity.

If the obligation of the defendant be conceded, to continue the operation of its road, I do not understand the high power of the court to prevent the defendant, by injunction, from depriving itself of the power of fulfilling its chartered obligations, in that respect to be seriously contested.

I think the power of the court is sustained both by principle and authority. I will refer to a single case in the Court of the King's Bench, in England (Rex against the Severn and Wye Rail Railroad Company, 2 Barin & Ald., 646). The railroad company, in view of favoring a particular colliery, discontinued a branch of their road, and took up the iron thereon—the chief owners in the road having become interested in the favored colliery. The court, in application, unanimously granted a mandamus against the company to compel them to relay and operate their road. BEST, J., after alluding to speculators obtaining charters from Parliament under the idea of great public benefits, adds, "and where their sanction is obtained, is it to be permitted to those persons to say that they will do only that which is beneficial to themselves, and disregarding entirely the interests of the public?"

It is urged here that the court should not interfere, because any one now has the right to make a road along the track proposed to be abandoned, under the general railroad act. The Legislature had the power to grant that right to any one prior to the passage of the general law, so that the principle is unchanged. Since the decision of the Supreme Court of the United States in the case of the Charles River Bridge Company *vs.* the Warren Bridge, the power of the Legislature on this subject has been unquestioned. Again, it is insisted that the defendant cannot operate its whole road without loss, and without endangering its solvency. If that were so, I should not interfere; no court would be justified in doing so; but I am not satisfied that such is the fact. There is great difference in the statements on this subject by the parties; and a decided impression is left upon my mind, that the motive for abandonment is not apprehension of loss to the owners so far as respects this road.

The proposition to lease and run the whole road for $21,000 per annum, seems to have failed to command any attention from the defendant, though it would have paid a large interest upon the present owner's investment.

It seems to me the public interest demands the running of this branch of the road.

The owners thought so in October last, and so declared, in their articles of association organizing the road anew. It is said that a large portion of the rails will have to be removed in any event, even with the view of putting the road in order for operation. This I have no doubt is the fact, and the injunction should restrain the removal only of that portion not indispensably necessary to repair and refit the road for operation.

In this modified form, in my opinion, the injunction should be continued, and it is ordered accordingly.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT, Sup't.

Boston, Nov. 24, 1860. tf

DON PEDRO II. RAILWAY.

RIO DE JANEIRO, BRAZIL,
September 18th, 1860.

PROPOSALS are invited for the Graduation, Masonry, and other items of Construction of 11¼ miles of this work, extending from the western end of the Great Tunnel of the Serra du Mar down the valleys of the Sacra Familia and Pirahy Rivers to the banks of the River Parahyta.

The work is generally heavy, comprising 1,200,000 cubic yards Earth, 250,000 cub. yds. Rock, and 7,500 cub. yds. of Tunnel excavation, 9,000 cub. yds. Bridge, 8,000 cub. yds. Culvert, and 5,000 cub. yds. retaining Wall Masonry, together with iron Bridge Superstructure, permanent way and stations.

At the Company's office in Rio de Janeiro, may be seen plans, profiles and specifications, where sealed proposals for the whole 11¼ miles, or any portion thereof not less than 4 miles, will be received until February 28th, 1861, at which time they will be opened and the work awarded.

The Directory determine, that the technical direction of the work shall be exclusively in the hands of their own Engineers, but will entertain proposals either with a scale of prices for the various kinds of work, or for the entire construction at a fixed price. In the latter case, the monthly payments will be regulated by a scale of prices.

All payments will be made monthly in cash, a percentage being retained as security for the faithful fulfilment of the contract. This, however, may be dispensed with. In case a deposit is made in money, stocks or bonds approved of by the Directory; in the latter case, the depositor will be entitled to the accruing interest upon said security.

Parties unknown to the undersigned will be expected to present evidence of their ability from officers of works upon which they have recently been engaged.

This work is in a mountainous and perfectly healthy region, within 7 hours' ride of Rio de Janeiro. About 200 additional miles are located and remain to be placed under contract.

C. B. OTTONI, President.
ANDREW ELLISON, Jr., Eng'r in Chief.

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

E. GOMEZ,
Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.

WASHINGTON ARSENAL, December 10th, 1857.
COLONEL H. K. CRAIG, CHIEF OF ORDNANCE,
Washington, D. C.

On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.

I am, sir, most respectfully, your obd't servant,
W. H. BELL, Major of Ordnance.

12.	" 18	"	1 to 1	24.	" 32 "		1½ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at **25c.** each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

PRESENT CONDITION.

By HENRY V. POOR, Esq.,
Editor of the AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of **AMERICAN RAILROADS AND CANALS** through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

OIL! OIL!
PEASE'S
IMPROVED ENGINE and SIGNAL OIL,
FOR
RAILROADS, STEAMERS, PROPELLERS,
AND FOR EVERY CLASS OF
MACHINERY AND BURNING.

PRACTICAL TESTS, by Engineers and Machinists, of Thousands of Gallons, PROVE this Oil to be **superior** for **Burning**, and **TWENTY-FIVE** per cent. more **durable** than Sperm Oil, for Lubricating, and the **only** Oil that is in all cases **reliable**, that will keep bearings **cool**, and

WILL NOT GUM.

In no case has it failed to meet the approval of the consumer.

The SCIENTIFIC AMERICAN and MANUFACTURER'S JOURNAL, after testing this Oil, pronounce it **superior** to any other for Lubricating.—For sale **ONLY** by the Inventor

F. S. PEASE, 61 Main st., BUFFALO.

Reliable orders filled for any part of the United States or Europe.

STRATTON & CO.,
COMMISSION MERCHANTS,
No. 1 PINE STREET, N. Y.
AGENTS FOR
Bauman & Co.'s Poco Metallic Paint.

FOR WOOD PAINTING.—It retains a beautiful lustre, kills knots and will protect it under any circumstances. It covers 6,000 square feet per hundred pounds, and will neither fade, blister, or wash, and a better fire-proof than any other Paint, for it will stand a heat that will melt lead. It is proof against sea, air and storms.

Refer to JOHN LEISENRING, Sup't and Eng'r.
Lehigh Coal and Navigation Co., Mauch Chunk, Pa.

FOR BRICK AND PLASTER.—It makes all the fanciful stone colors, and will cover 4,000 square feet per 100 pounds. When laid out in blocks, it is truly beautiful.

Refer to SEMPLE & BROTHER, Easton, Pa.

FOR SHIP AND BOAT PAINTING.—It hardens under water to the hardness of Iron, preventing the ravages of the wood-worm effectually. On deck it is impervious to water, expands and contracts with heat and cold, and we warrant it on the forecastle six months.

Refer to CAPTAIN MASON,
Schooner 'Adolph Ugel.' Philadelphia.

FOR RAILROADS.—It preserves Bridges and Ties from dry or wet rot and freight cars from burning and leaking.

Refer to R. H. SAYER, Sup't and Eng'r.
WM. KELLOG, Master of Repairs,
Lehigh Valley Railroad, Bethlehem, Pa.
A. G. BRODHEAD, Sup't and Eng'r,
Beaver Meadows R. R., Mauch Chunk, Pa.

FOR ROOFING.—It covers 8,000 feet per 100 pounds, and may be used in the rain, as it never runs.

Refer to M. CULLOUGH & CO.,
HENRY BUCKWALTER, Philadelphia.

FOR IRON.—It will stand 800 deg. Fah. and gives satisfaction to all the Iron men in Philadelphia, on gas holders, steam boilers, Iron fronts and ornimental iron. It is equal to Red Lead, for steam and hot water joints.

Refer to J. W and J. F STARR, Camden, N J.
MORRIS, TASKER & CO.,
MERRICK & SONS, Philadelphia.

FOR IRON FOUNDERS' PATTERNS.—Five parts by weight of it to one of gum shellac dissolved in alcohol, will make a covering more impervious to the damp sand or loam than shellac alone of equal consistency.

Refer to THE NOVELTY IRON WORKS, New York.

FOR STAINING.—Oak, Mahogany, Rosewood and Walnut Stains for Furniture, we warrant it equal to Turkish Umber. Its natural colors are Umber, Brown, Lake, Olive and Lead color, which may be combined in endless variety. We hope soon to have other colors much lighter

ANALYSIS.

DENNIS BAUMAN & CO.,
Parryville, Carbon County, Pa.

The following are the results of Analysis of your Poco Metallic Paint.—Peroxyde of Iron 55.84, Red Oxyde of Manganese, 1 65; Lime, 2.52, Magnesia 1.29; Alumina, 9 00; Silex, 29.70;—100 parts.

The Analysis proves that this paint is not likely to be altered in the slightest degree by ordinary atmospheric agents, such as sunlight, rain, cold, or heat. We therefore regard your Poco Metallic Paint as of the most durable character

NATIONAL FERTILIZER.

The attention of Agriculturists is requested to this ECONOMICAL and SUPERIOR **FERTILIZER.** It possesses all the good qualities of the best known manures, without any of the injurious effects produced by the over-active Ammonia in Guano and kindred FERTILIZERS, while its *price* is **less than one-half of the Peruvian** Guano. The various materials composing this Fertilizer, are so chemically combined, that they are gradually evolved by the heat and moisture of the earth, and furnish to the plant all the requirements for a **rapid** and **luxurious vegetation.**

[COPY.]

NEW YORK, Sept. 8, 1860.

I have used about one ton of the NATIONAL FERTILIZER manufactured under Dr. L. Harper's patent, on my sugar plantation in the Island of Cuba, and although tried upon very poor soil, realized a fine crop. I used it in the same way and in the SAME QUANTITY as I use Peruvian Guano. I can confidently recommend it as in every respect equal to Peruvian Guano for sugar cane.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling. The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER,** 104 Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

ROSENDALE HYDRAULIC CEMENT.

ROSENDALE AND KINGSTON CEMENT CO. Manufactory at Kingston, N. Y. on the West Bank of the Hudson River. Office 45 Pine st., New York City.

ROOFING.

THE Cheapest and most DURABLE ROOFING IN USE. Sent to any part of the country with *directions for application.*

GUTTA PERCHA CEMENT ROOFING.

SPECIMENS and *references* can be seen, and any desired information obtained on application, by *letter* or in *person,* at our OFFICE, 510 BROADWAY, N. Y. (Opposite the St. Nicholas Hotel).
JOHNS & CROSLEY.

This Roofing can be applied to new and old Roofs of all kinds. It is FIRE and WATER PROOF.

Gutta Percha Cement applied to Tin and other Metal Roofs will render them perfectly and permanently water-tight.

JOHNS & CROSLEY,
Sole Manufacturers,
510 BROADWAY.

PATENT ASPHALTIC
ROOFING FELT.
THE BEST, CHEAPEST AND
MOST DURABLE ROOFING KNOWN.

THE IMPROVED PATENT ROOFING FELT furnished by the Subscribers is entirely free from the objections hitherto urged against articles that have been furnished under similar names by various parties.

It makes a **light, cheap, durable,** and perfectly **Fire** and **Water-proof Roofing** for **Churches, Farm Buildings, Railroad Depots, etc.**

It forms the best and cheapest lining for Stores, Granaries, Barns and Wooden Buildings, as rats, mice and other vermin will not touch it.

It stands all climates and has been extensively furnished to the British Government for use in their widely scattered foreign possessions. The Turkish Government used large quantities of the Felt for roofing their hospitals and stables in the late war.

In this country first class dwelling houses have been roofed for three years with this Felt, and the owners who used tin now prefer this Roofing Felt.

Also an entirely new, superior and cheap **ROOFING CEMENT** for the above Felt and leaky tin roofs.

For Samples, Circulars, etc., apply to
EDMISTON BROS.,
No. 3 Bowling Green, New York.
N. B.—**Agents wanted.**

CEMENT ROOFING.

PATENT MICA
AND
Fibrous Cement Roofing.

IT HAS STOOD THE BEST OF ALL TESTS—TIME!

IT fully sustains the high reputation it has gained, as a PERFECTLY RELIABLE, DURABLE and WATER PROOF ROOFING. It is adapted to every variety of Roof, new or old, and is the best and cheapest Cement in use for repairing OLD LEAKY TIN or other Roofs.

ALL WORK WARRANTED.

Cement for sale by the Barrel, and sent to any part of the Country, with printed instructions for use.

Also, for sale, State and County Rights for a portion of the United States.

American Railroad Journal.

PUBLISHED BY J. H. SCHULTZ & CO. No. 9 SPRUCE ST.

New York, Saturday, December 22, 1860.

Missouri River Valley Railroad.

At a meeting of the Stockholders of this road held at Richmond, Mo., on the 3d inst., the following persons were elected directors, viz: John Doniphan, of Platte county; James H. Adams, of Clay county; Geo. J. Wasson, Benj. A. Rives, James Hughes, Aaron H. Conrow, and C. T. Garner, of Ray county; Hiram Wilcoxin, James A. Prichard, A. B. Mason, and F. S. Robertson, of Carroll county; Wm. E. Moberly, of Chariton county, and Thomas P. Ruby, of Randolph county.

The board was subsequently organized by the election of Dr. Benj. A. Rives as President. Capt. James A. Prichard was chosen Vice-President; C. P. Reeves, Secretary and Treasurer; and George C. Pratte, Chief Engineer.

On motion a committee was appointed to act with the President in negotiating a consolidation of the Missouri Valley Railroad, and the Chariton and Randolph Railroad Companies, and to make the best arrangement that can be made with the North Missouri Road, and report to the Board at the earliest practicable period. The following resolution was adopted:

Resolved, That we will immediately proceed to survey the line from Brunswick to Richmond, or as soon as our Engineer can make his arrangements, to commence the work, and that this Board now make a call of ten per cent. on the private stock subscribed to the road; that the same be payable on or before the 1st of January, 1861; and that the Engineer take obligations for the right of way for said road.

Wilmington and Weldon Railroad.

The twenty-fifth annual meeting of the stockholders in this road was held at Wilmington, N. C., on the 8th of November, at which the annual report of the President and Directors, the Chief Engineer and Superintendent, and other officers were presented. From these we have compiled the following abstract:

The gross earnings for the fiscal year ending September 30, 1860, were:

From through passengers		$133,896 36
" way "		118,347 72
" freights		185,204 44
" mails		48,600 00
" miscellaneous sources		14,161 05
		$500,209 57
And the expenses were:		
Repairs of track	$57,597 85	
" bridges	5,327 15	
" engines	32,936 01	
" cars	14,116 29	
Fuel	15,133 49	
Oil and waste	3,947 70	
Pay of condu's, eng'rs etc.	35,052 23	
Station expenses	25,388 00	
Cost of new engines & cars.	32,736 89	
Salaries of officers	10,158 35	
Miscellaneous	21,321 48	
		253,714 94
Net earnings		$246,494 63
Extraordinary expenses	$71,633 62	
Interest and exchange	54,794 97	
		126,428 59
Balance		$120,066 04

The above extraordinary expenses have been incurred on account of the completion of the permanent way; for increased equipment, new buildings, making wharves, grading streets, etc., about shops in Wilmington—being an increase of the assets of the company, in most cases, and should be carried to account of capital stock.

For the purpose of comparing the expenses of operating the road for the past and previous years, the cost of new rolling stock should be deducted. This in 1859 was $3,990 15, against $32,736 89 in 1860. The difference is $28,746 24; which taken from the expenses of operating, $246,494 63, leaves $224,968 70, against $226,931 22 for 1859.

The total expenditures, exclusive of interest and exchange were $325,348 56; last year they were $242,353 75—being an increase of $81,994 81.

The total receipts were $500,209 57; last year they were $477,554 75—being an increase of $22,654 82.

The decrease in net earnings was, therefore, $59,339 99.

The aggregate receipts and expenditures for a series of years are given below:

	Receipts.	Expenses.
1847	$331,480 20	$140,995 32
1848	317,459 50	180,254 92
1849	310,397 00	148,392 85
1850	422,325 12	171,232 87
1851	497,219 41	154,638 02
1852	510,038 72	173,879 11
1853	568,890 67	200,654 17
1854	482,880 62	288,321 39
1855	441,994 06	268,818 23
1856	475,893 64	273,895 70
1857	491,219 60	295,331 90
1858	444,275 45	248,518 37
1859	477,554 75	242,353 75
1860	500,209 57	325,348 56

The equipment of the road consists of 26 locomotives; 16 first class passenger cars; 11 second class and baggage cars; 80 box, and 50 flat freight cars, and 25 gravel cars. The mileage made by all the trains was 318,701 miles. During the year 1,356 trips were made by passenger trains, with only 12 failures to connect regularly with the great mail lines. There were carried over the road during the year 25,595 through passengers, and 81,051 way passengers. The preceding year the numbers were 27,964 through, and 68,498 way passengers—showing a decrease of 2,469 through, and an increase of 12,553 way passengers.

The receipts from all sources during the year were $683,687 66; and the expenditures $615,-

179 81. Cash on hand, $21,478 85. Bills receivable, and debts due the company from Post office, agents, other companies and railroads, $47,029.

GENERAL STATEMENT.

Capital Stock	$1,340,213 21
" Tarboro' Branch	59,646 70

Chief Engineer and Sup't—S. L. Fremont.

Sec. and Treasurer—James S. Green.

Master of Machinery—Francis McMillan.

Railroad Decisions.

The case of Charles Hughes *vs.* the Pennsylvania Railroad Company was recently tried at Hollidaysburg, Penn. The plaintiff's claim amounted to $10,000, and was for one hundred tons of railroad iron, taken from the Portage road, and damages. The plaintiff claimed to own it under a purchase made from the State, or the Agent of the State, before the sale of the public works, while the Company lay claim to it under the purchase of the Main Line, in 1857. The jury rendered a verdict for the plaintiff, for $575, the value of ten tons of iron. It is said the company will take the case to the Supreme Court.

A suit was recently tried in the Common Law Court at Memphis, Tenn., by the Memphis and Ohio Railroad Company to secure the subscription of Daniel Hughes, of $5,000, to the capital stock of the road. Hughes resisted paying the subscription on the ground that the road had changed the connection at Bowling Green. Each side was represented by able counsel, and the contest has finally resulted in a decision compelling Hughes to pay the subscription with interest.

The General Term of the Superior Court at Buffalo, N. Y., have decided a case involving the right of a railroad company to affect the rights of individuals by standing its locomotive in front of their premises. The Buffalo *Courier* thus states the case as it appears in the appeal:

Lonergan, respt. *vs.* New York Central Railroad, appl't.—The defendant's freight track crosses Ohio street and terminates in its depot on that street. The plaintiff's house and lot is on that street, opposite the depot, and adjoining the defendant's track. He complained that in the construction of the track the defendant's land was so raised as to throw the water upon his premises, and into his cellar; and, also, that the track at the corner of his house was made a standing place for defendant's locomotives and trains, to his nuisance and damage.

On the trial, evidence being given tending to establish this and other allegations of the complaint, Mr. Justice Clinton charged the jury, among other things, that "if the evidence established that the defendant had made its track by the plaintiff's house a standing place for its engines, whereby the plaintiff was injured in the enjoyment of the house by the steam and noise of the engines whilst standing there; and if it also established that the use of that standing place was unnecessary for the conducting of that business, or that an equally convenient standing place might have been selected on the track in the rear of the plaintiff's house or premises, without so annoying or injuring others; then the defendant was liable in this action, for the damages sustained by the plaintiff, by such use of that portion of the track by his house as a standing place." The plaintiff had a verdict and judgment. *Held*, that the defendant had an absolute, legal right to put any portion of its track to such use. Judgment reversed and a new trial ordered.

New York and Harlem Railroad.

The following is an abstract of the report of this company for the fiscal year ending September, 30, 1860. The report shows a surplus of $40,833 on the year's business after the payment of all charges and interest. This is nearly 3 per cent. on the preferred stock. The present business of the road shows an average gain of over 10 per cent. on the business of that year:

Capital stock, by charter		$8,000,000 00
Stock paid in—		
Common stock	$4,217,100	
Preferred stock	1,500,000	
		5,717,190 00
Funded debt, 1859		5,353,297 21
Do. 1860		5,372,179 21
Mortgage on real estate, not included in above		218,573 35
Outstanding Albany extension certificates		465,000 00
Average rate of interest on debts		7 per cent.
Cost of road and equipment, 1859		8,019,671 19
Cost of road and equipment, 1860		8,022,786 69
Real estate owned by the company,		1,136,849 46
Less mortgage		218,573 35
Albany extension certificates owned by the company		1,535,000 00
Length of main track—New York to Chatham	130.75 miles.	
Length of double track	29.60 "	
Length of branches	2.12 "	
Number of passengers carried—regular	514,303	
No. of do. commuters	253,349	
No. of tons freight carried	153,511	
No. of passengers carried in city cars	3,990,930	
No. of miles run by city cars	564,351	
Expenses of maintaining road, etc., by items:		
Repairs of road-bed, except iron	$127,542 46	
Cost of new iron	36,703 73	
Repairs of building	9,281 60	
New station houses	1,575 00	
Repairs of fences, gates, etc.	1,749 18	
Taxes	20,412 93	
		197,264 90
Expenses of machinery and fixtures		142,814 72
Do. operating the road		369,055 19
Receipts—Passengers	$533,690 83	
Freight	524,410 93	
Other sources	80,349 11	
		1,142,850 87
Payments—Transportat'n	709,134 81	
Interest	392,882 83	
Surplus	40,833 24	
		1,142,850 57

Dayton and Western Railroad.

We have received a copy of the annual report of the president of this company for the fiscal year ending August 31, 1860, from which we learn that the construction account, which is now closed, embracing the cost of the road, machinery, buildings, etc., is $1,025,798 99, being an average for the 38 miles of $26,994 71.

At the date of the report, the accounts for July and August had not been adjusted, but the net earnings for those months had been estimated at $9,569; which, added to the ten preceding months, gives $62,045 12 as the total net income of the company for the year. This amount has been disposed of as follows:

Paid balance due Indiana Central Railroad Company for 1859	$6,702 95
Paid acceptances of 1859	12,000 00
" track repairs, etc. "	8,181 80
Total paid for year ending Aug. 31, '59.	$21,884 75
Interest on 1st and 2d mortgages	27,081 10
" " Mr. Schenck's note	350 00
Paid Col. & Xenia R. R. Co.	525 86
Taxes Montgomery & Prebble counties	1,429 72
Indiana Central R. R. Co.—excess of investment interest	1,643 99
Repairs of buildings and bridges	471 86
Graduation and ditching	337 34
Track repairs	5,240 76
Ties and labor	2,880 24
Total to Aug. 31, 1860	$62,045 12

This road is operated in connection with the Indiana Central Railroad, and receives as its proportion of the net earnings 29 per cent. of the net earnings of both roads.

The amount received, says the report, "would, in previous years, have been sufficient to meet the annual interest upon all our bonds, first, second and third mortgages, also the interest upon the bonds received on loan from the city of Dayton, and left a liberal reserve for the payment of the expenses incident to the repairs of the road. But our road, as is common to all such enterprises, seems to be entering into that phase in which the iron rails, ties and rolling machinery require frequent repair or renewal. * * * The present embarrassments of the company, and which must be considerably extended and felt for some time to come, have their origin in those years when the revenues of the road were too inadequate to meet the expenses of the company, viz: the bond interest and other accounts on which interest was due, and which we were compelled to pay. The only means which could then be resorted to, and which is still pursued, was to anticipate the revenue by means of acceptances drawn against it." Of these, three, amounting in the aggregate to $12,000, the proceeds of which were expended in 1858-9, are included in the above sum of $21,884 75, as properly belonging to that year. The present fiscal year was commenced with outstanding acceptances which will mature during the coming six months, amounting to $31,000, the proceeds of which have been used. There are also unpaid accounts for track repairs and other items, belonging to the previous year, and which the company were unable to meet, amounting to $3,764 96—making $34,764 96 having preference upon the future earnings of the road before all other claims. But, unfavorable as the prospects appear, the company are not without hope that the increased earnings of the road may mitigate their embarrassments, or that some plan may be

devised that shall place their affairs upon a firm basis. The whole road and its machinery was believed to be in good condition for transportation of all the anticipated increase of business during the fall, winter and spring season.

The report of the president, of which the above is an abstract, was referred to a committee with instructions to condense the same for publication, and at the same time report some plan of relief for the company from its financial embarrassments. The report of this committee, dated Nov. 27th, 1860, is before us. It presents a condensed statement of the past, present and prospective business of the road. The general condition of the company at the close of the fiscal year is thus stated:

RESOURCES.

Machine shop, and fixtures	$25,051 73
Engine house	11,508 82
Dayton and N. Paris warehouses	12,644 23
Extension track through Dayton	18,104 50
Dayton depot ground and dwelling	12,378 34
Equipment of road	104,911 91
Road construction, bridges, etc.	919,486 35
	$1,104,085 88

LIABILITIES.

Capital stock	$307,240 26
1st mortgage	300,000 00
2nd "	250,000 00
3rd " sold	109,000 00
Debt to Dayton City	57,000 00
Other liabilities	80,845 62
	$1,104,085 88

In addition to the liabilities on account of 3rd mortgage bonds stated above, there are $41,000, outstanding as collateral to the liabilities of the company, but which will be cancelled on payment of the claims to which they are pledged. In addition to the liabilities stated, there are perhaps $1,500 or $2,000 due for unadjusted claims of right of way, and other matters not brought into account. There should be added to the resources also an estimated balance due on joint running account from Indiana Central Co. $1,873 41
Mad River and Lake Erie Income b'ds. 2,000 00

The tables given by the committee exhibit the total income for the year ending August 31st, 1859 $66,386 50

Ordinary expenses	$56,444 42	
Extraordinary "	7,940 08	
		64,386 50
Income account for year ending Aug. 31st, 1860		62,025 66
Ordinary expenses	$58,460 75	
Extraordinary "	1,691 50	
Balance due D. & W. Co. by joint account	1,823 41	
		62,025 66

The following table presents an estimate of the probable receipts and expenditures for the year ending August 31, 1861.

RECEIPTS.

Dayton & Western Co.'s proportion of net earnings	$65,000 00
Balance due from Indiana Central Co.	1,873 41
	$66,873 41

EXPENDITURES.

Expense account, embracing taxes	$2,500 00
Track repairs and bridges	12,000 00
Cross-ties for renewal	3,000 00
Interest on Haines' debt	490 00
Salaries and contingencies	1,510 00
Interest on first mortgages	21,000 00
Applicable to debt of Company	26,373 41
	$66,873 41

It will be perceived that the foregoing estimate contemplates payment of interest only on the 1st mortgage *bonded* debt and is based on the supposition that the plan for capitalization submitted will be carried out.

Should the foregoing estimate be realized, and the propose plan for liquidating debts be resolved upon, there would still remain after 31st August, 1861, about $7,000 of floating debt chargeable upon the revenues of 1862. Against which, and for contingencies, there would remain undisposed of $19,220 64 of the new stock.

The plan hereafter submitted is based upon the liquidation of all the 3rd mortgage bonds at the rate of 83 per cent., but some modification may be required from the fact that the Cincinnati, Hamilton and Dayton Company holds of those bonds $28,500 given for purchase of track through the city of Dayton, and to secure which, said company holds a first mortgage on our road from Ludlow to Wayne street. Your committee entertains no doubt that the directors of that road will be disposed to act with liberality in the adjustment of their claim. It is also hoped that the several roads entering the city from the east and west, will unite in the ownership of the two tracks through the city, and that by a sale of a portion of our road in the city, we will be able to liquidate the debt to the Cincinnati, Hamilton & Dayton Company.

The table last presented showing an estimate for the year 1861 includes payment of interest on the first mortgage bonds. There would remain unprovided for the following:

2d mort. b'ds.	$350,000 00	Interest.	$17,500 00
3d do.	109,000 00	Do.	7,630 00
City of Dayton	57,000 00	Do.	3,920 00
Other debts	80,845 62	Do.	4,850 70
			$33,900 70
To which surplus, as shown by estimate for 1861, may be applied			26,373 41
Leaving annual deficit			$7,227 29

If no adjustment of the floating debt is made, the above deficit will be increased by sale of 3rd mortgage bonds held as collateral for a portion of the floating debt.

From the foregoing presentation of the affairs of the company, it is apparent that the receipts are inadequate to the requirements of the company, and that were it possible to struggle along, and carry the debts of the company even for years, its condition would grow worse, and end in utter bankruptcy. Your committee can see no means of averting such a catastrophe, but by adopting some plan of capitalization, requiring a voluntary sacrifice from stockholders and every class of creditors. The following plan is proposed:

PLAN OF CAPITALIZATION.

The First mortgage to remain; and by contract with the holders of bonds to continue a debt for not exceeding twenty years, payable at any time, at the pleasure of the company, but payment not to be coerced except after default in paying interest for sixty days. New sheets of coupons to be issued for each bond for the extended time, but the lien of security of such bondholders to be in no manner changed or impaired. In consideration of the advantages that will result to the holders of first mortgage bonds, by cancelling all other debts of the company, including all other mortgages, thereby making their mortgage, a security, safe beyond contingency, and insuring the prompt payment of interest, and the final extinguishment of the bonds, the holder will be required to surrender to the company the coupon due March 1st, 1861, to be cancelled without payment. The plan presented by your committee cannot be carried into effect otherwise; and they feel confident that a greater loss will fall upon the holders of such bonds, should it become necessary to protect their rights by legal proceedings. From the disposition evinced by holders who have been consulted, they are warranted to conclude that this proposition will meet with general approval.

It is proposed that all bonds (except the first mortgage,) and all debts (except one of $7,000, due the Estate of Job. Haines, secured on real estate, and all stock shall be graduated and sunk into a new capital stock, ont exceeding the aggregate $300,000 00, as follows:

$250,000 00 2nd mortgage bonds at 78 cts. on the dollar	$195,000 00
109,000 00 3d mortgage bonds 8,000 00 3d (collateral.	
$117,000 00 counted at face *a* 33 cts. on the dollar	38,610 00
$50,000 00 Debt City of Dayton Old stock collateral 15,381 37 Floating debt	
$65,381 37 at 25c. on the dollar	16,345 34
307,240 26 old st'k at 10c. on the dol.	30,724 02
Stock reserved for contingencies and overlooked debts	19,320 64
Total	$300,000 00

One interest coupon is to be donated by 2d mortgage bondholders being six months interest, and interest on 3d mortgage bonds and floating debt is excluded, and to be sunk by the holders.

The foregoing schedule disposes of all the debts of the company except the following.

Debt to Job. Haines' Estate secured by mortgage on dwelling house and Depot ground, to remain a debt $7,000.

Debt to J. N. C. Schenck, secured by 3d mortgage bonds, chattel mortgage and personal security	$7,000 00
Due Columbus and Xenia Railroad	1,858 60
Track hands estimated	3,764 96
Acceptances outstanding	31,000 00
	$43,623 56
To pay above, we have contribution of 6 months' interest by 1st mortgage bondholders as per schedule	$10,500 00
Estimated surplus for the year 1861	26,373 41
To be paid in reserved stocks or by receipts of 1862	6,750 15
	$43,623 56

Your Committee has not expected to attain entire accuracy, either in the amount of debts due by the company, nor in the assets, as there are several unadjusted claims that may change the estimate here presented, but can in no wise materially effect the result. Having now discharged the duty committed to us, we submit our labors to those interested. We do not expect universal approval. It is an unpleasant task to propose to creditors a surrender of claims that may have cost them the value expressed on their face; but it must be remembered that the value is already sunk, and we only propose a plan to save further sacrifice. The holders of the first mortgage are secure, but if no plan for relieving the company is adopted, their interest must be protected by law. What they are required to contribute to so desirable a result, is a half years interest, which will be less than the costs necessarily to be incurred in protecting their lien on the road, besides, the proposed arrangement if carried into effect, will enhance the market value of their bonds, and provide against any future trouble on their part.

The holders of the second mortgage must submit to the plan proposed, or prepare themselves to protect their interest by the purchase of the Road, and the payment of the first mortgage, and whatever may be the final issue, they will succeed only after warm litigation with creditors and stockholders who will each struggle to save something from the wreck.

It is not assuming too much to say, that the holders of the third mortgage, all unsecured creditors and stockholders, must take the proposed plan, or lose all. If the road goes into liquidation the sacrifices to be made, the cost to be incurred, and the damage arising to the business of the road, will sweep away everything save

the claims of the first, and what may remain for the second mortgage bondholders. If any thing is done, it must be done *now*. Time cannot be given to deliberate. The claims against the company are pressing, and if the creditors and stockholders reject this plan of adjustment, the directors of the company will be compelled to take such measures as shall seem just and expedient, or more likely to be compelled to surrender the Road into the hands of the courts.

If the plan presented shall be adopted, the committee feels confident that the road will at once feel the favorable influences of restored credit, and be enabled by its unimbarrassed position to increase its earnings. The future revenue of the road cannot fail to provide the interest for the remaining bonded debt, and after the first year, pay a fair and certain dividend on the new stock. Should the plan of your committee be adopted and approved by the Board, we recommend an immediate call for a meeting of stockholders and creditors to give assent thereto, and in the mean time we recommend that steps be taken to procure the consent of all interested prior to the time of such called meeting.

The officers and directors elected for the fiscal year commencing September 1, 1860, are:

President.—J. W. KIRK.

Directors.—Valentine Winters, Jonathan Harshman, Robert W. Steele, J. D. Phillips, Henry Herrman, E. F. Drake, Sylvester Brinley, Henry L. Brown, George W. Cass, E. C. Frost, John W. Owens, Richard Green, J. W. Kirk.

Treasurer.—VALENTINE WINTERS.

Secretary—LEONARD MORE, to Nov. 1, 1860.
" W. F. DOGGETT, (bal. of year.)

Vermont Central Railroad.

MEETING OF THE FIRST MORTGAGE BONDHOLDERS.

We copy from the Boston *Journal* the following report of a meeting of the holders of the first mortgage bonds of the Vermont Central Railroad Company, held in that city on the 12th inst. for the purpose of hearing the report of the committee appointed at the meeting held in February last to conduct the law suit in which the bondholders are interested. The meeting was organized by the choice of Mr. Henry Rice of Boston as Chairman, and Estes Howe as Secretary.

Mr. J. W. Emery, from the Committee, made a verbal report of the present condition of the two suits now pending in the courts of Vermont. The first suit was brought for the purpose of imposing the lease and agreement given to secure the same, by the Vermont Central to the Vermont and Canada Railroad, which was that the Vermont Central company should pay to the Vermont and Canada Company eight per cent. on the cost of their road. The Chancellor of Vermont, before whom the suit was pending, had decided that the cost of the Vermont and Canada road was $1,251,227 73, and that the amount of rent due them from the Vermont Central was $616,683 28. This amount is less by $80,000 than the amount claimed by the Vermont and Canada, an amount which accrues to the benefit of the first mortgage bondholders. This suit is now pending in the highest Court in Vermont, and will come up at St. Albans on the 10th of January next.

The second suit is brought by the Trustees of First Mortgage Bondholders, for the foreclosure of their mortgage. This suit is now pending in Chittenden county, Vt. The court referred it to a Master in Chancery, who made a report, and exceptions were filed. A hearing was made last Spring, and the exceptions were overuled. The suit is now pending before the Chancellor, to be heard upon its merits.

A third suit was brought by Mr. Cook and others bondholders, in the Circuit Court of the United States for the district of Vermont, for the purpose of procuring the removal of the Trustees, and for an account. The cause was argued in October last upon the question whether the court had jurisdiction, and a decision is expected soon.

By a report made by the Directors to the stockholders of the Vermont and Canada Railroad, it appears that for the year ending June 30, 1860, the gross earnings of the two roads was $775,568 91; the working expenses, $575,232 98; paid for extraordinary outlays, $72,609 40—leaving the net earnings $127,686 68. From this it was fair to presume that the road might be made to earn enough to pay the rent to the Vermont and Canada and a fair interest on the bonds.

It was for the meeting to consider whether they would prosecute this matter further or abandon it.

After discussion, the following resolution, offered by Mr. Emery was adopted:

Resolved, That the committee be instructed to draw up a paper requesting the trustees of the first mortgage bonds of the Vermont Central Railroad to sell the property and rights mortgaged to them at auction, in the manner prescribed in the mortgage, and to present the same to the bondholders for signature, and to obtain, if possible, the signatures of two-thirds of the holders of said bonds.

New York Central Railroad.

The annual meeting of the stockholders of this company was held at Albany on the 12th instant, at which the following board of directors were chosen for the current year, viz: Erastus Corning, Albany; Dean Richmond, Buffalo; John H. Chedell, Auburn; Livingston Spraker, Palatine; Alonzo C. Paige, Schenectady; Cornelius L. Tracy, Troy; Jacob Gould, Rochester; Nathan'l Thayer, Boston; John V. L. Pruyn, Albany; Charles H. Russell, New York; Henry H. Martin, Albany; Richard M. Blatchford, New York; Hamilton White, Syracuse.

The annual statement of the operations of the company was submitted at the meeting, of which we subjoin the following abstract.

EARNINGS AND RECEIPTS.

From passengers	$2,569,265
From freight	4,095,934
From other sources	292,042
Total	$6,957,241

PAYMENTS OTHER THAN FOR CONSTRUCTION.

For transportation expenses, viz:		
For passenger business	$1,665,014	
For freight business	2,613,827	
		$4,278,841
For interest, including interest on debt certificates held for the sinking fund	$985,272	
For sinking funds	115,267	
For rent of Niagara bridge and Canandaigua R. R.	60,000	
		1,160,539
For dividends, viz:		
February, 1860, 3 per cent.	$720,000	
August, 1860, 3 per cent.	720,000	
		1,440,000

SUMMARY *of all Transportation Expenses for the year ending Sept.* 30, 1860, *as shown by the preceding tables.*

	Amount.	Allotted to—Passenger Tranportation.	Freight
Maintain'g roadway and real estate	$1,551,484	$620,584	$930,900
Repairs of machin'y	803,904	328,243	475,661
Operating the road,	1,923,452	716,187	1,207,265
Total	$4,278,840	1,665,014	2,613,826

The cost of road and equipment has been increased during the year $265,381, for superstructure, buildings, and land damages.

COMPARATIVE STATEMENT *of Funded Debt and Capital Stock, on the 30th Sept.*, 1859 *and* 1860:

	1859.	1860.
Debt certificates, less am't held for sinking fund	$7,925,000	$7,745,000
Bonds for convertible loan	3,000,000	3,000,000
Debts of the former companies outstanding	637,737	550,371
Bonds for fund'g the debts of the former companies	1,225,000	1,308,000
Bonds for railroad stocks.	770,000	680,000
Bonds for real estate	195,000	175,000
Bonds to Buffalo and Niagara Falls R. R. Co.	90,000	86,000
Bonds of B. & N. F.R.R.Co.	45,000	35,000
Bond to Telegraph Co.	10,000	.....
Bonds and mortgages	254,034	253,152
Convertible bonds payable in 1876	182,000	500,000
Total amount of funded debt	$14,333,771	$14,332,523
Capital stock	24,000,000	24,000,000
Total amount of funded debt and capital stock.	$38,333,771	$38,332,523

During the last fiscal year, $318,000 of 7 per cent. convertible bonds, payable in 1876, being bonds of the issue representing part of the surplus income of the company heretofore expended for construction, have been disposed of at par, and the amount thus refunded to income account has been re-invested in Lake Propeller Stock.

STATEMENT *of earnings from passenger, freight, and all other sources for the years ending Sept. 30th*, 1853, 1854, 1855, 1856, 1857, 1858, 1859, *and* 1860.

	Passengers.	Freight.	Other Sources.	Total.
1853.	$2,829,668	$1,835,572	$122,279	$4,787,520
1854.	3,151,513	2,479,820	286,999	5,918,384

Annexed is the report of the Committee of Stockholders of the New York Central Railroad Company, submitted to the meeting:

The undersigned, members of the Committee appointed by the Stockholders of the New York Central Railroad Company, for the purpose of examining into the accounts and transactions of the said company, and to report thereon, respectfully report that they have devoted themselves to such an examination of the affairs of the company in the general office as they have deemed needful; and a portion of them have personally examined the road and structures during the last month, and they are happy to say, that every facility for a thorough and minute examination of the accounts and mangement of the affairs of the company was afforded by the officers and persons having charge of the various departments.

The accounts of the company have been found to be in the usual good order, and to correspond with the statements in the annual report for the last fiscal year.

This report shows a net income, applicable to dividends, of 6 324-1,000 per cent., and an expenditure, in maintaining and operating the road, of 61 49-100 per cent, of its gross receipts.

These facts will, doubtless, be among the first to engage the attention of the stockholders, as showing a small per centage of net income upon the capital, and a large per centage of expenses, as compared with the receipts. They are, however, in a great degree, the legitimate result of sound policy adopted by this company, and which must eventually be adopted by all railroad companies that have their roads substantially completed, and mean to avoid ultimate bankruptcy, *the policy of treating the construction account as substantially closed.*

During the past year only $265,380 have been charged to construction account, and that amount consists of $61,272 paid for real estate purchased, $75,106 paid for the construction of new engine and car-houses, chiefly on the grounds of the company at West Albany, $127,446 paid for new track toward completing the double track between Syracuse and Rochester, and $1,555 expended on station buildings.

These items we consider fairly chargeable to construction account, if such an account is allowable, being substantial additions to the value of the property. About twelve miles of the new double track have been constructed during the year, which, with side-tracks and turn-outs, amount to about twenty miles of new single track. It is desirable, no doubt, to have this line of double track completed as the means of the company will admit. The expenditure for the construction of the machine-shop at West Albany, as we understand from the engineer, is already mostly made, and it seems to us that the next most pressing necessity of the company is for further accommodations for the freight traffic in the City of Albany.

In regard to the expenses of the last year, it should also be borne in mind that the previous year was one of remarkable depression in the business of the road, necessitating the most limited expenditure, and consequently throwing an increased amount into the business of this year.

We do not ourselves feel competent to say what proportion of the expenditures of this road should bear to its receipts, nor do we believe that this question as to railroads generally can be determined with any degree of accuracy by any statistics as yet furnished. Nearly all the figures we have on the subject are derived from the experience of roads having a construction account, and, where such is the case, they are entirely unreliable, as their accuracy is wholly dependent upon the charges to that account, and we think the experience of this road is beginning to show that a much larger allowance must be made out of the receipts of roads generally, for annual expenses, than has heretofore been thought necessary.

The income of the road from passenger receipts for the last three years had shown but a very inconsiderable variation in amount, while the freight traffic varies in amount from year to year, according to circumstances beyond the control of the company, but has thus far shown, as will be seen by a table annexed, an almost invariable reduction in price.

These considerations seem to us to suggest, with great force, the policy of avoiding all expenditures, except such as can be made from surplus income, and such as, when made, will diminish the annual expenditures to an amount equivalent at least to the interest of their costs.

Under the operation of the sinking funds during the last year there have been extinguished:

Of the debt certificates	$180,000
Of the bonds issued for railroad stock	90,000
Of the bonds issued for real estate	20,000
Of the bonds to stockholders of Buffalo and Niagara Falls Road	4,000

All of which we have examined and found duly cancelled.

Bonds of the old companies have been extinguished as follows:

Of the Albany and Schenectady Co.	$1,000.00
Of the Rochester and Syracuse Co.	65,669.34
Of the Buffalo and Rochester	9,696.31
Of the Rochester, Lockport and Niagara Falls	12,000.00
Of the Buffalo and Niagara Falls	10,000.00
Also bond issued by this company to Telegraph Company	10,000.00
Total	$401,365.65

On the 13th of November, three of your Committee commenced an examination of the track of the road, machine-shops, stations, &c. They found the track in good condition, and the bridging greatly improved; 580 lineal feet of iron superstructure has been substituted for old wood structures, and the remainder of the bridges required for immediate use have been repaired and strengthened, and nearly all have been covered. A considerable expense has been incurred in the substitution of embankment for trestle bridging, which is a permanent improvement.

349,100 cross-ties have been purchased and paid for during the fiscal year, at an average cost of 33 4-10 cents per tie, and most of these have been laid in the track.

This is a fair average of the number of cross-ties required annually for keeping the track in good condition.

The machine-shops were in good order, and the roadway and its management fully up to the standard reported last year; but whether more or less than the requisite number of men were employed to keep in good condition the road and rolling stock of the company, is difficult for the Committee to determine.

A good and substantial elevator has been erected at Buffalo, at a cost of about $80,000 which is of sufficient capacity for storing 500,000 bushels of grain.

Metropolitan (Boston) Horse Railroad.

The annual meeting of this company was held on the 13th inst. The following gentlemen were elected directors: Benjamin Poole, W. J. Reynolds, B. W. Thayer, A. G. Greeley, E. S. Dane, Noah Lincoln, W. H. Hill, Charles Emerson, Dudley H. Bailey.

The President read the annual report of the doings and condition of the corporation. The following is a brief abstract:

The receipts for the year have been—from passengers, $342,928 64; from all other sources, $6,245 41; total, $349,174 05. Of the expenditures, the sum of $15,000 is charged to depreciation, and the other expenses amount to $274,910 98 making a total of $289,910 98, and leaving $59,263 07 as the net earnings. Although there has been an increase in the expenses, the increase in the earnings and receipts has been upon a much larger ratio.

The total indebtedness of the company at the close of the last fiscal year was $102,491 54. This amount has been decreased during the past year as follows: Payment of floating debt, $30,918 65; and of mortgage debt, $5,545 32; total, $36,158-98. The indebtedness at the present time is as follows: Flopting debt, $15,932 73; secured by mortgage on real estate, $50,099 54; total, $66,032 57.

The cost of equipments for the road has been increased $53,988 16. This amount includes the purchase of fourteen new cars, the purchase of land in Brookline for stables, and the erection of a new stable and workshops at Waitt's Mill.

During the year 18,335 feet of new track have been laid, and over 15,500 feet of old track relaid and for the most part repaved. With the exception of a few hundred feet in Eustis street, the entire road, both in its main and branches (now comprising 18 miles and 1,419 feet of single track), is laid throughout with wrought iron rails, and is in good running order and repair. The total increase cost in the extensions and improvements amount to $85,148 77.

In pursuance of a vote of the stockholders, the Directors have leased the Dorchester and Roxbury Railroad for a term of five years from June 1, 1860, at six per cent. on its cost, and reserved the right to purchase the same in the meanwhile if desirable.

The company employs 268 men, 546 horses and 77 cars, and its records show that 182,566 miles were run and 6,410,850 passengers transported. Such care has been exercised that no serious accident has occurred, and the damage occasioned by accidents has been exceedingly small.

Richmond and Danville Railroad.

The annual meeting of the Stockholders of this Company was held in Richmond, on the 12th inst., at which the 13th Annual Report of the Directors was presented. From this we learn that the gross income of the company for the fiscal year ending September 30, 1860, was $560,904 43; and the working expenses $278,575 96, leaving as net earnings $282,328 47. Compared with the previous year, the gross income shows an increase of $6,701 37, with an increase in expenses of $17,361 28, making the decrease in net earnings $10,659 91. The net earnings were 50.33 per cent. of the gross receipts, which is a fraction over 14 per cent. on the capital stock of the company. The increase in receipts from local passengers was less than $1,000, whilst the falling off in receipts from through passengers was near $30,000, making a total loss on passengers of over $29,000—a fact due to the completion of the Orange and Alexandria Railroad to Lynchburg, and its union at that point with the Virginia and Tennessee Railroad, and its whole system of Southern and Southwestern connections.

In outward freight the falling off was about $200; but the increase on inward freight was about $26,000. The increase in intermediate freight was about $13,000.

Since the last annual report, of the $1,000 remaining unpaid, because uncalled for, of the debt of $250,000 due first of August, 1859, $500 has been paid, leaving only $500 of that debt outstanding. Of the debt of $150,000 due the 1st of November, 1860, the sum $149,700 has been paid, leaving only $300 outstanding of the original debt. But the Directors have been compelled to issue new bonds of the company to the amount of $65,400, payable at various periods from May, 1861, to November 1863, which will be promptly met by the accruing revenues of the company.

The report concludes by saying that the financial condition of the country, in the opinion of the Board, make it unwise to declare a dividend at this time. But they trust, at no distant day to declare semi-annual dividends of three per cent.

The committee of examination made a voluminous report. It recommends the laying of a heavy rail along the entire line, as a measure of economy and safety; says that the depot arrangements, &c., at Richmond have been improved; that the station-houses along the line are in good condition; that the books at the office in Richmond and along the line, with a few exceptions at stations on the line, (owing to the hands being new,) were well kept; that the establishment of an Auditor's office proved beneficial, as it was calculated to show thoroughly and accurately the business of the company; that the workshops of the company are likely to prove advantageous to the company; that in the construction of cars in those shops, twenty per cent. was saved, while the locomotives made there cost about the same, and were of better materials than those bought; that a telegraph was constructed along the line at the cost of $7,402, and that the erection of telegraph offices of the different stations was about to be proceeded with.

Long Island Railroad.

The annexed figures are from the report of the Long Island Railroad Company for the year ending September 30, 1860:

Capital Stock as by charter		$3,000,000 00
Amount Stock subscribed		2,900,000 00
Amount Stock paid in		1,852,715 79
Funded Debt, 1859		636,997 67
Funded Debt, 1860		755,997 67
Floating debt as by last report		17,539 12
Amount now of Floating Debt		12,282 80
Cost of Road and Equipment, as by last report		2,566,270 07
Cost of Road and Equipment by present report		2,566,270 07
Length of Road, including Brooklyn and Jamaica R. R.	99 miles	
Length of double track	10.8 miles	
Number of Pass. carried	417,106	
Numb. tons (2,000 lb.) Freight carried 102,413 65-2,000		
Expenses of maintaining Road and Real Estate		45,943 33
Expenses of Repairs of Machinery		40,827 12
Expenses of operating the Road		101,677 34
Earnings—Passengers	$192,565 91	
Freights	135,037 10	
Other sources	15,417 74	
		$343,020 75
Payments—Transport'n	$188,652 79	
Interest	32,904 50	
Other expenses	91,083 25	
		$312,640 54

Journal of Railroad Law.

CONTRACT OF SALE: POWER OF TRUSTEES UNDER A TRUST MORTGAGE TO SELL ON TIME.

The Philadelphia and Reading Railroad Company were the purchasers of the Lehigh Coal and Navigation Company. But conceiving it to be out of the power of the Navigation Company to comply with the terms of the sale, from their inability to make a title clear of the incumbrances of a certain trust mortgage dated the 7th of March, 1842, on the ground that it was a sale not within the terms upon which the trustees under the mortgage were authorized to sell, they sought by a bill in equity in the Supreme Court of Pennsylvania to obtain a decree to compel a conveyance on a certain specified extinguishable ground rent.

The defendants claimed that a conveyance under the terms of the contract was within the power of the trustees, but if it was not, they still could not be compelled to execute a contract for a sale on ground rent which they never had made.

The power of the trustees under the mortgage was two-fold, either to sell for a price or consideration in money to "be paid out and out;" or upon ground rent extinguishable or otherwise as might be agreed upon; and the main question in the case was as to the power of the trustees under the trust mortgage to sell on time. The case came up on appeal from a decree entered at *Nisi Prius*. The following is the opinion of the Court:

THOMPSON J. The agreement entered into was for a sale on credit payable in money, in instalments at one, two, and ten years, and to be secured by bond and mortgage. This was clearly not a sale on reservation of ground rent. Was it a sale for a "price or consideration to be paid out and out in money?"

Lexicographers define this expression as meaning "completely," "entirely," "without reservation." Consequently, when applied to an act to be performed "out and out," it must mean, ended and completed. The meaning of idiomatic expressions, is not, as is the case in defining words, to be found in origin or root, but is ascertainable only from the usual and ordinary sense in which it is used; the common acceptance of it. Even unaided by the context, I would understand the words to mean a sale for cash, not on credit—a completion of the transaction by the execution of a conveyance and payment of the consideration at the same time, ending and closing the matter of one process. This would undoubtedly be the meaning of a "cash sale," or a "sale for cash." No one even supposed these terms thus standing, meant a sale on time. The universal understanding, it is believed, is the contrary of this, and that the words "cash sale," exclude the idea of credit on time to be given for payment. The words here, to be "paid out and out" in money, were but a definition attempted of a cash sale, as is evident, when we consider the alternative sales provided for. One of them was to be a sale on ground rent, extinguishable or otherwise, as might be agreed upon. In one sense this was a sale for money, and according to the argument of the defendants, if eventually extinguished by money, would be a sale "out and out in money." By this the meaning, the provision in the mortgage for a sale to be "paid out and out in money," was rendered meaningless; for any sale, payable at any time in money, and nothing but money, would be within the meaning of these words, whether it was on time ten years hence, or by instalments running for forty years. The expression must be taken, and can be understood in no other sense than as used in emphatic contrast with the provision for the ground rent sale. The sale agreed upon, payable in instalments, and secured by mortgage, was not a ground sale; nor was it a sale for money out and out, for the price or money was not to be paid. It follows neither alternative provided by the trust deed. It was a sale to be secured by mortgage, but the security authorized to be taken is ground rents. There is no provision for a mortgage, and the maxim, "*expressio unius exclusio est alterius*," is peculiarly applicable to the construction of delegated powers. It was not intended that there should be securities, excepting in the event of a sale on ground rent. The absence of any other provision for security, almost demonstrates that the other alternative in the sale being adopted, the money was to be "paid out and out," and no credit given, but the cash to be paid down.

The company evidently intended by these different terms of sale, to provide for two contingencies which might arise, and which they supposed would be best met by those adopted; that is to say, it might become the interest of the company for other reasons than the immediate receipt of the proceeds, to sell a part of their property, and hence they provided for a sale on ground rent, the ecurities to be held by the trustees upon the same trusts as that of the prop-

erty itself. But to meet a contingency in which the company might need money, they provided for a sale, the proceeds to be paid directly to themselves. This was doubtless to meet sudden emergencies, or perhaps to enable the company in some advantageous manner, to deal with the bond holders, and for which cash might be required. Again: I do not see how a mortgage could be made to the company on a sale of property, the legal title to which is in the trustees. If it could be done in one instance, successive instances might follow, and eventually the company might become the holders of mortgages covering the whole property, and by transfers of them, destroy entirely the security of the bondholders. These considerations point plainly enough, I think, to the true construction of the power of sale. It must either be for money "paid out and out" for the purposes of the company, or on ground rent for the benefit of the trust. The sale was neither the one nor the other; and we agree with the positiontaken by the Phila. and Reading Railroad Company, that the trustees of the Lehigh Navigation Company cannot make a title to them clear of the mortgage, upon the terms of the sale agreed upon. Have they a right to a specific execution of the contract on any other terms?

Equity regards compensation in cases of defective execution, if the contract can with it be substantially executed, as equivalent to performance. It looks to the substance of the contract, and does not allow small matters to interfere with it, when compensation can be made. But substantial defects will be regarded in equity. And such may depend upon the party praying specific execution. Thus a vendee may insist on the specific execution of a contract to convey so much as the vendee has title to, even if it be but for a portion of the whole. But I have not been able to find any case in which a different contract from that made by the parties has been enforced. Here the plaintiffs ask that the defendants be required to convey on an annual ground rent of $6,000, the principal to be extinguishable in the same amounts and at the same times, as the payments, under the mortgage, were to be made. There need, perhaps, be no further answer to this, than that it would be an attempt to enforce the execution of a contract never made by the parties. Equity will not make contracts for the purpose of arriving at a supposed desirable end. It acts only with contracts of parties with a view to prevent them from being defeated by the rigid rules of law; it makes no new ones. It will not do to say that the results will be precisely the same as the one attempted, but defeated for want of authority. If that contract did not bind, then there is no contract between the parties, and it is for them to make new ones, or a substitute for the old, and not the court.

All the results are not the same, however. The company intended, for so they have said, that when there was a sale for money, the proceeds should go directly to them. But if we were to decree a sale on ground rent, the proceeds must be secured to the trustees for the general purposes of the trust, and hence a very different result, so far as the proceeds are concerned, would follow. They would not go to the company but to the trustees for the benefit of the trust. We must therefore refuse to decree as prayed for and in doing so we leave the parties *in statu quo*, which is always an important consideration in refusing a decree for specific performance.

Albany and West Stockbridge Railroad.

The following is the report of the Trustee of the Albany and West Stockbridge Railroad Sinking Funds, for the year ending November 30, 1860:

		DR.
Bonds and mortgages on hand per last report		$431,200 00
Bonds and mortgages paid since		77,713 79
Leaving		$353,486 21
Bonds and mortgages loaned since last report		118,559 41
Bonds and mortg's amount this day		$472,045 62
Albany city bonds cancelled		55,000 00
" " water loan		60,000 00
" city coupon (per last report)	$41,000 00	
	5,000 00	
		46,000 00
Cash on deposits in Mechanics and Farmers Bank, Albany		16,004 99
		$649,050 61
		CR.
Contributions by Western R. R. (see last report)		$263,111 10
Contributions by Western R. R. since		10,000 00
Total		$273,111 10
Interest on investments per last report	$332,864 66	
Interest on investments since last report	44,570 13	
	$377,434 79	
Less amount credited, profit and loss for salaries, fees and accrued interest	1,495 28	
		375,939 51
		$649,050 61
Interest due not paid	$5,810 25	
" accrued not due	6,303 44	
	$12,113 69	

Pacific Railroad.

The following is an abstract of a letter from T. D. JUDAH, Esq., Civil Engineer, of California, and one of the corporators named in Col. CURTIS' Pacific Railroad Bill. It is addressed to Hon. JOHN C. BURCH, of Me., and is dated, San Francisco, Nov. 9, 1860. He says:

"Believing that a practicable line existed for the Pacific Railroad across central California, I have determined, before the next session of Congress, to examine the various passes of the Sierra Nevada in the vicinity. I have examined a route through Georgetown, in El Dorado county, a route via Illinoistown and Dutch Flats, near the old Truckie route, and also Thenness' route, via Nevada and Eureka. The result is that I have found a practicable and good Railroad route across the Sierra Nevada via Illinoistown, Dutch Flats, and Lake Pass. The distance from Sacramento to the summit is 104 miles, to the State line about 115, to Neill's crossing on the main track is 132 miles, and to Virginia City 162 miles. There is no grade over 15 feet to the mile. We got out of Summit valley, through what I call Lake Pass, while Fremont's route, or the old emigrant road, goes over Truckie Pass, which is about 700 feet higher than a few miles off my route.

"We strike the foot of the Truckie lake, or the cabins of the Downer party, nine miles from the summit, and from there it is an easy grade down, the Truckie river descending about 40 feet per mile, over a smooth country.

"The elevation of the pass is 66.90 feet There are two other passes leading out of Summit Valley which I had not time to explore, but either of them is practicable, at least 150 miles shorter than the Beckwith route, crossing the State at its narrowest part, and on a direct line to the Washoe mines.

"I will undertake to build a railroad over the route in two years, for $70,000 a mile from Sacramento City to the State line, or Washoe. Thus the question of crossing the Sierra Nevada I consider settled."

Steubenville and Indiana Railroad.

A proposition for a compromise between all the parties interested in the Steubenville and Indiana Railroad has been devised and is now presented for their consideration and approval or rejection.

Who are the parties interested?

They are first the stockholders, constituting in the aggregate the corporation or Company. They undertook to construct the road, and paid in and expended upon it the amount of their subscriptions.

1st. Any interest unpaid to creditors up to 1861 to be taken in stock at 50 per cent. on its nominal value.

2d. The interest on the first and second mortgages, except the Garrett claim, at seven per cent. up to October, 1, 1862, to be added the principal, constituting the first lien, amounting to $2,565,000, the interest at six per cent. payable semi-annually; the first payment January 1, 1863, $135,000, to cover incidentals, to be added.

3d. The sum due Robert Garrett & Sons, to constitute a second lien, to bear interest at six per cent. from August 1, 1862, the first semi-annual payment of interest to be January 1, 1863. All interest due up to August 1, 1862, is relinquished. The principal of all the above, payable January 1, 1883 and 1884.

4th. All other claims against the Company to constitute a third class, all interest up to July 1, 1862, being relinquished, and to be funded in irredeemable bonds, interest at six per cent., payable April and October 1st. after July 1, 1862, whenever the funds are earned.

The 2d and 3d classes of claims not in the aggregate to exceed $800,000. Any excess over this sum to be relinquished.

The Pennsylvania Railroad Company to relinquish all its claims except what are above provided for.

The net earnings of the road before interest begins to accumulate, to be applied to completing the road and making its connections.

This arrangement to be completed by the assent of all parties, by May 1, 1861.

This will determine the amount of indebtedness at:

1st lien, interest at 6 per cent from October 1, 1862	$2,700,000
2d lien, interest 5 per cent. from August 1, 1862,	
3d " " " July 1, 1862,	800,000
Total	$3,500,000
Amount of intesest at 6 per cent	210,000
Reduction of annual interest	42,000

The advantages of the arrangement will be exclusively to the third class of creditors under the arrangement, and to the Stockholders.

This is manifest from the following considerations.

1st. All the mortgages make large concessions of interest over due, taking it in new stock of the Company at half its nominal value, which is an indication of their idea of its value under the proposed arrangement.

They agree to fund two years' interest into a principal at six per cent. interest.

3d. They reduce their rate of interest from seven to six per cent.

4th. The creditors relinquish large sums of principal due them.

5th. The payment of the principal is postponed twenty-three years.

6th. The annual interest payable to them is reduced by $42,000.

7th. The Company have untrammeled the net earnings of the Road to make substantial improvements, add to its equipments, and complete its connections with other roads, all of which will very materially add to its efficiency and business.

Mobile and Great Northern Railroad.

A special meeting of the stockholders of this road was held in Mobile on the 6th inst., at which a statement was made by the President, showing the past operations and present condition of the company and the work.

The President stated, that in consequence of the litigation with which the company was embarrassed during the last spring and summer, the Directors were prevented from selling the whole of the "city bonds" last spring, when they could no doubt all have been disposed of upon satisfactory terms. The company were, however, from the means realized from the stockholders, and the limited amount of bonds sold before the institution of these proceedings, able to proceed with the work, but by no means so rapidly or effectually as it could otherwise have done.

After the final determination of the suit, the President went to New York in September, and with the assistance of very efficient friends there, had succeeded in establishing a market for the bonds at par, and sales had continued to be made from that time up to the late election quite as rapidly as the wants of the company required the proceeds, and the company had been able thus far to meet all liabilities promptly at maturity. Since the election, however, no further sales had been effected, nor was it believed that further sales could now be relied on with confidence. Three hundred and eighty-six thousand dollars had thus far been sold; of these one hundred and twenty-two were for rails and material, and the other for cash. Large contracts had been made for machinery and equipments, which the company have the privilege of paying for in bonds.

That including the negroes and other property purchased by the company, and the bills due in this month and the next, which it is believed can be met, the company will have invested in the work a half million of dollars. There is now at the other end of the road some eighteen or twenty miles almost ready for the rails, and a large amount of work done on this end and on other parts of the road; every mile of which from the Tensas east is under contract.

That notwithstanding the embarrassments growing out of the litigation above mentioned, the company had been in the most prosperous condition, and up to the election there was every prospect of the road being in operation from the Tensas river to the Alabama and Florida road in August, if not in July next.

That from the statements made by the Chief Engineer, three hundred and sixty-seven thousand five hundred dollars in cash would enable the Company to put the work in opertion from the Tensas to the other road, and it was believed that this might be accomplished with three hundred thousand, for it was thought that we could rely on being able to use the bonds to some extent. That from the same statements of the Engineer, that a suspension of the work would be attended with very large losses. That the loss of interest on the funds already invested, depreciation of the work done, and the probable increased price at which the Company would have to relet over present contracts, would not be less than one hundred thousand dollars, and the loss of one season's business, should the work be suspended so as not to be able to bring the next crop over the road, could not be less than one hundred thousand dollars, making a loss of more than half the amount now wanted to put the road from the Tensas in operation.

That we were advised that it was the intention of the Alabama and Florida Company to continue the prosecution of their road and complete their connection with Pensacola, which could not be otherwise than greatly detrimental to the best interests of Mobile, unless our connection was completed soon afterwards.

That under these circumstances the work ought not to be suspended if possible to avoid so great a calamity. That every effort should be made to go on. That in the present financial condition of the country there was no source to which we could look for relief and support but to the Stockholders and citizens of Mobile, who were all directly and greatly interested in the early completion of the road. It was under this embarrassing state of the affairs of the Company that the Board of Directors desired me to call this meeting, and consult with you as to the best means of prosecuting the work, and it now remains with you to say, shall we proceed, and if so, how are the means to be raised. The question was asked by one of the stockholders, whether an instalment of ten per cent. a month would enable the work to go on? The Chief Eengineer replied that if the amount could be collected there would be no necessity of stopping the work. After remarks made by a number of those present upon the great importance of the road being finished by the next business season and the great sacrifice by delay.

It was on motion.

Resolved, That the President and Directors be requested to call on the stockholders for ten per cent. instalments payable monthly until the whole amount of stock subscriptions shall be paid up.

On motion it was further

Resolved, That the President and Directors pass resolutions directing a stock interest account to kept so that all payments for stock shall be equalized in stock as far as possible.

Public Works of Ohio.

The fiscal year on the public works of Ohio closed on the 15th of November. Annexed is a table showing their receipts and expenditures for the year:

	Receipts.	Expend'es.
Miami and Erie Canal and Lewistown Reservoir..	$158,755 35	$149,392 19
Ohio Canal	94,457 54	181,541 57
Hocking Canal	16,768 36	11,613 08
Walhounding Canal	839 30	4,587 49
Muskingum Improvem't.	17,535 53	36,855 84
National Road	16,181 46	18,837 36
W. R. & Maumee Road..	9,181 55	8,544 03
Salary of members		4,500 00
Contingent expenses of board and salary of Sec.		2,386 65
Total	$313,769 10	$418,258 56
		313,769 10
Excess of expend'es over receipts		$104,489 13

Report from the Pension Bureau.

The report from the pension bureau shows that the whole number of pensioners of all classes now remaining on the roll is 11,284; and the sum required to pay their pensions is $1,001,018 95. During the past year the amount thus expended was $1,108,562 08.

Compromise of the Wheeling R. R. Bonds

The Council of Wheeling have issued an ordinance for the compromise and retiring of the bonds of that city formerly issued to the Hempfield Railroad Company, the Marietta and Cincinnati Railroad Company, and Cleveland and Pittsburg Railroad Company, and for securing the new bonds on making such compromise. Where the compromise of the old bonds is at the rate of fifty cents on the dollar, the new bonds are to be made redeemable in twenty years, with interest at six per cent. payable half-yearly. Where the compromise of the old bond is dollar for dollar, the rate of interest to be but three per cent. and the bonds are to be payable in forty years, through the operation of a sinking fund which is provided for in the ordinance. This ordinance also provides that for the first five years the rate of interest shall be but one per cent.; for the next ten, two per cent.; for the next ten, two and half per cent.; for the next ten, three per cent.; for the next five, four per cent.

Report of the Patent Office.

The income of the Patent Office for the three quarters ending September 30, 1860, was $197,648 40; and its expenditure $189,672 28, showing a surplus of $7,976 17. During this period 5,638 applications for patents have been received, and 841 caveats filed. 3,612 applications have been rejected, and 3,896 patents issued, including reissues, additional improvements, and designs. In addition to this, there have been 49 applications for extensions, and 28 patents have been extended for a period of seven years from the expiration of their first term.

New York and Boston Air Line Railroad.

We learn from reliable sources that the President of the Air line road to New York (Hon. John M. Wood) has concluded a contract with a Philadelphia house for 2,500 tons of American railroad iron. This amount, it is stated, will be amply sufficient to iron the road to Woonsocket, R. I. A like contract for engines has also been made with Messrs. Norris of the same city. Should the weather prove favorable, it is anticipated that the road will be opened for travel and transportation early in June next.—*Boston Traveller.*

Railroad Earnings.

The earnings of the Little Miami and Columbus and Xenia Railroad for November, 1860, were $98,029 83
November, 1859 ..... 99,159 19

Decrease $1,129 36

The earnings of the Cleveland, Columbus and Cincinnati Railroad were for

November, 1860 ..... $89,745 94
Do. 1859 ..... 90,567 66

Decrease $821 72

The following is an approximate statement of the earnings of the Pittsburg, Fort Wayne and Chicago Railroad Company for the month of November, 1860, compared with the same period of last year, viz:

	1860.	1859.
From Freight	$136,787 27	$110,582 42
" Passengers	75,014 85	65,221 55
" Express	2,600 00	3,250 00
" Mails	7,825 00	7,825 00
" Rent of road	7,083 33	5,500 00
" Rents and Miscel.	833 30	532 72
Totals	$230,143 75	$192,911 69
Increase		$37,232 06
Earnings Jan'y 1, to Nov. 30	$2,143,106 79	$1,786,039 90
Increase		$357,067 89

The following are the earnings of the Cincinnati, Hamilton and Dayton Railroad for the month of November compared with the same month last year:

November, 1860 ..... $50,711 49
" 1859 ..... 41,934 72

Increase $8,776 97

The following are the earnings of the La Crosse and Milwaukee Railroad for November, 1860, and comparison of same with earnings of November, 1859:

	1860.	1859.
Freight	$75,620 24	$62,133 28
Passengers	19,329 40	21,268 41
Miscellaneous	866 61	6,131 34
Total	$95,816 25	$89,528 03
Increase in 1860		$6,288 22

The revenue of the Baltimore and Ohio Railroad for November was as follows:

MAIN STEM.

From Passengers	$50,536 35	
" Mails	7,933 33	
" Express	10,069 39	
" Tonnage	298,332 00	
		$366,871 57

WASHINGTON BRANCH.

From Passengers	$24,738 06	
" Mails	900 00	
" Express	1,300 00	
" Tonnage	6,322 71	
		32,255 77

N. W. VIRGINIA BRANCH.

From Passengers	$3,594 46	
" Mails	866 66	
" Tonnage	24,504 98	
		28,966 10

Summary of Revenue for Oct., 1859 *and* 1860.

	1859.	1860.
Main stem	$366,202 40	$366,871 57
Washington Branch	33,225 92	33,255 77
N. W. Virginia Railroad	21,831 60	28,966 10
Totals	$421,259 92	$429,093 44

—Showing a net increase of $7,833 52 in November, 1860.

The earnings of the Central Railroad Company of New Jersey, for the month of November, 1860, were $92,628 18
For the same month last year 87,344 80

Increase, 6 per cent. $5,283 38

The operations of the Central Ohio Railroad for October were as follows:—

EARNINGS:

From Passengers	$24,273 18
" Freight	39,232 93
" Express	3,050 90
" Mail	2,378 79
Total	$69,035 71

EXPENSES:

Transportation department	$10,897 72
Machinery department	11,431 27
Fuel expense	6,171 07
Road department	14,424 15
General expenses	2,454 74
Construction account	3,450 86
Total	$48,829 81

The receipts of the Grand Trunk Railway of Canada for the week ending December 8, 1860, was $70,841 24
Corresponding week last year 51,811 88

Increase $19,029 36
Tot. traffic from July 1, 1860, to date. $1,596,496 69
Corresponding period, 1859 1,193,274 81

Increase $403,221 88

Revenues of Great Britain and France.

The following table shows the revenues of these two countries.

REVENUE OF GREAT BRITAIN FOR 1860.		REVENUE OF FRANCE FOR 1860.	
1. Income Tax	£12,903,715	1. Direct taxes, land, house, personal and patents.	£18,800,000
2. Stamps	3,040,091	2. Stamps & domains.	14,300,000
3. Crown lands	416,531	3. W'ds, forests and fisheries.	1,500,000

Total	£71,104,127	Total	£72,000,000

Census of Illinois.

TOTAL POPULATION 1,719,496—INCREASE IN FIVE YEARS 412,920.

We publish below an interesting table of Statistics of Illinois. It embraces the population by counties, of the State, as returned by the State census of 1855, the same as returned by the United States census of 1860; also the aggregate vote in each county as cast at the late Presidential election, and the valuation of the real and personal property in each county for the year 1859:

Counties.	*Pop'n of* 1855.	*Pop. of* 1860.	*Vote of* 1860.	*Val. pro'y* 1859.
Adams	34,811	41,355	8,224	$10,582,311
Alexander	2,927	4,707	1,047	2,114,300
Bond	7,511	10,740	1,995	1,846,317
Boone	10,994	11,630	2,069	1,628,324

* Estimated population of 1860.

The only counties whose population for 1860 is not included in this table are Jefferson, Monroe and Washington. They have not yet been returned to the U. S. Marshall's office in this city; but assuming that they have made the estimated increase since 1855, which we concede to them above, the total population of the State may be set down at 1,719,496—showing a gain in five years of 412,920 souls. We have not the leisure at this time to show the ratio of increase which the present population of each county sustains to that of 1855, but for the whole State it is at the rate of about 34 per cent. The counties which show the greatest increase are Bureau, Champaign, Cook, DeKalb, Fulton, Hancock, Henry, Iroquois, Kane, Kankakee, Knox, Lasalle, Lee, Livingston, Logan, Macon, Macoupin, McDonough, McLean, Mercer, Montgomery, Morgan, Ogle, Peoria, Sangamon, St. Clair, Stephenson, Warren, Will, etc. The only counties, which according to the census returns have decreased, are Edwards, Hardin, Henderson, Madison, Perry and Pope, and in reference to some of these we are convinced there must be some mistake of the Deputy Marshals.

The total vote of the State on President is given above at 339,656. Its ratio to the population is 5.16.

The last column of our table gives the total valuation of personal and real property of each county in the State, as returned by the Assessors to the Auditor's office. It shows that next after Cook county, Sangamon is the wealthiest in the State, with Adams next, and then Peoria, with St. Clair, Lasalle and Fulton coming after. But these Assessor's returns are a very unfair means of determining the wealth of the various counties, on account of the different and grossly unequal rates of valuation which they adopt. And here, as we have time and again urged, the Legislature should step in and organize a Board of Equalization. What appears a little remarkable, is the fact that, while the total valuation of the real and personal property of the State for 1859, returned to the Auditor's Office, is $366,702,053, in 1858 it was $403,140,321, and in 1857 it was $407,477,367, showing a decrease of upwards of $60,000,000. The returns of 1860 will be still smaller than for 1859. The cause of this is not in the fact that the wealth of the State has at all decreased, but because the Assessors in many counties, owing to hard times, or other causes, have reduced their standard of valuation. It is notorious that in all the elements of wealth and property, the State has in the last few years made very rapid advances.—*Illinois State Journal.*

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterisk* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in *"italics."*

American Railroad Journal.

Saturday, December 22, 1860.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

The Effect of Political Agitations upon Railroad Enterprises.

The first effect of the present political agitations has been to put an end to the progress of railroads throughout the country, particularly in the Southern and Southwestern States. They are greatly to be regretted on this account, as the system which these States had planned and were actually engaged in executing, is only partially completed. A large amount of capital thus invested must remain unproductive, and a portion of it lost; while the country must, for an indefinite period, remain without these works, which more than all others tend to promote its prosperity and wealth. None of the rural or agricultural districts can supply an amount of capital sufficient to construct their roads. This must, to a considerable extent, be furnished by parties living at a distance, who are not going to put their money into enterprises in sections of the country, which may soon be the scene of disturbances, at least, if not of civil war.

All our railroad enterprises are thus not only brought to a dead stand, but the traffic of such as are in operation is soon to show a great falling off. Commerce flourishes only in times of quiet. As far as our railroads are concerned, consequently, the effect of the present political agitations is simply disastrous, and to a degree that can hardly be estimated. The construction of these works in the newer States has already been thrown back five years. Is there any compensatory advantage gained on the other side? Nothing. Everything that tends to alienate the two sections, tends to the same extent to destroy the traffic of our public works. Is it not, then, the duty of all parties

interested in their construction, or in their securities, to lend a hand to place the material interests of the country in harmonious relations? These transcend all of a political character. So long as they are maintained or preserved, the others cannot possibly go wrong. Political obligations should be deduced from, and always be subordinate to, considerations of personal or material advantage. The moment these are disregarded, a course is entered upon, which sooner or later must be abandoned, though not, perhaps, until mischief is done that can hardly be repaired.

Share and Money Market.

The share market the past week has been very fluctuating, sympathizing with the excitable tone of the public mind and influenced by every rumor that might gain credence for the hour. The week bids fair to close with a better feeling than has existed for some time past. The excessive alarm and apprehension which has so generally prevailed, is subsiding. The rates for money are becoming easier; but above all the indications from the south are more favorable. The State of Georgia does not propose to rush blindly into the secession movement, but to proceed in a methodical manner and upon what she terms reasonable grounds. With her, secession is not a foregone conclusion, but a step that may be taken in a certain contingency. Such a course is calculated to arrest and embarrass the whole movement, as time will be gained in which she will learn to act from reason instead of impulse. The foreign news is favorable. Our staples maintain a good price, and shipments of gold to pay for them, must relieve, for the present, apprehension in reference to our monetary affairs. Although it is yet too early to speak in a confident tone, appearances are certainly more favorable to a pacific solution of our difficulties than they have been for some time past.

Mobile and Ohio Railroad.

The cars are now running on this road to Baldwin Station in Tishemingo Co., Miss., 300 miles north of Mobile. The track is laid six miles beyond Baldwin, leaving only 25 miles to be laid. The connection is now made with Corinth, the Southern terminus of the Northern division, by a line of stages. If the weather permits it is thought that the track will be laid to that point by January next; and thus the whole road from Mobile to Columbus, 20 miles below Cairo, be opened for travel.

Debt of Pennsylvania.

The following statement shows the indebtedness of Pennsylvania on the first day of December, 1860.

6 per cent. loans		$400,630 00
5 do. do.		36,967,295 72
4½ do. do.		381,200 00
4 do. do.		100,000 00
		$37,849,125 72
Unfunded debt, viz:		
Relief notes in circulation	$99,402 00	
Interest certificates outstanding	16,074 80	
Interest certificates unclaimed	4,448 38	
Domestic creditors' certificates	797 10	
		120,721 78
Total State debt Dec. 1, 1860		$37,969,847 50
Amount of public debt on the 1st day of December, 1859		$38,638,961 07
Deduct amount paid during the fiscal year ending with 30th November, 1860, viz:		
Loans redeemed	$664,857 65	
Relief notes canceled	1,811 00	
Interest certificates	2,439 52	
Dom'stic creditors' certificates	5 40	
		669,113 57
		$37,969,847 50

Illinois State Debt.

The public debt of Illinois, November 30, 1860, was as follows:

Interest stock, payable at pleasure of the State		$808,396 84
New refunded stock—coupon b'ds—payable after 1860		18,000 00
New refunded stock, payable after 1862		902,000 00
Liquidation b'ds, payable after 1865	$250,890 21	
New refu'd stock payable after 1865	21,000 00—	271,890 21
New refunded stock, payable after 1869		215,000 00
New internal improvement stock payable after 1870	$2,163,617 83	
New refunded stock pay'be after 1870.	193,000 00—	2,356,617 83
New refunded stock, payable after 1876		109,000 00
Interest b'ds of 1847, pay'be after 1877.	$1,534,925 82	
New refunded stock, pay'ble after 1877.	185,000 00—	1,719,925 82
		$6,395,830 20
Old State Bonds:		
Bank of Illinois b'ds, 1860.	$31,000	
Internal improvement bo'ds 1870	42,000	
Illinois and Michigan Canal bonds, N. C. RR., 1860.	4,000—	77,000 00
122 Macalister and Stebbins bonds which, according to statements, &c., of Macalister, will, January 1st, 1861, amount to		49,608 81
Internal improvement scrib.		23,054 35
Six Certificates for arr'rs of inter't.		2,674 53
		$6,548,167 89

Illinois and Mich. Canal bonds unregistered	1,373,090	
	$3,672,185	
From the canal debt is to be deducted a dividend of five per cent. on the registered bonds, which will leave total canal debt		$3,557,280 25

Missouri River Valley Railroad.

We learn that the officers of the Chariton and Randolph Railroad Company and of the Missouri River Valley Railroad Company have effected an arrangement by which the two companies will act in concert, and with a view to completing the road to Richmond, Ray county, so soon as the present disturbed state of the finances of the country will admit of the prosecution of the work. The location of the line of the road from Brunswick to Richmond has been commenced. Carroll County has ordered an election this month to determine whether that county will grant aid, in its corporate capacity, for the continuation of the work throughout that county.

Alleghany City and County Bonds.

The indebtedness of Pittsburg, Alleghany and Alleghany County, upon railroad bonds, is as follows:

ALLEGHANY COUNTY.	
Alleghany Valley Railroad	$750,000
Pittsburg and Connellsville R. R.	750,000
Pittsburg and Steubenville R. R.	500,000
Pittsburg and Cleveland Railroad	150,000
Chartiers Valley Railroad	150,000
	$2,300,000
CITY OF PITTSBURG.	
P., Ft. W. & Chicago R. R.	$200,000
Pittsb. and Steubenville R R.	550,000
Pittsb. and Connellsville R. R.	500,000
Alleghany Valley R. R.	400,000
Chartiers Valley R. R.	150,000
	1,800,000
CITY OF ALLEGHANY.	
P., Ft. W. and Chicago R. R.	400,000
	$4,500,000

The assessed valuation of the property of the county is divided, in round numbers, thus:

Alleghany County, (outside the cities).	$12,500,000
City of Pittsburg	10,500,000
City of Alleghany	3,000,000
	$26,000,000

The proportion of the annual tax on these $4,500,000 of bonds, for which each of the above is responsible, stands thus:

CITY OF PITTSBURG.	
Interest on $1,800,000 bonds issued by herself	$108,000
Her proportion (21-52) of interest on county bonds	55,730
	$163,730
ALLEGHANY CITY.	
Interest on $400,000 bonds issued by herself	$24,000
Her proportion (8-26) of interest on county bonds	15,928
	$39,928
ALLEGHANY COUNTY.	
Remainder of interest (25-52) on her $2,300,000 bonds, left unpaid by the two cities	$66,347

From the above it will be seen that while the county is responsible for an annual interest on these bonds amounting to $66,349, the City of Pittsburg's proportion amounts to $163,730, or almost two and a-half times as much; and by taking in Alleghany City, we find that the country districts owe less than one-fourth the whole interest falling due annually, while of the amount subscribed by the county, Pittsburg has 21-52 to pay; Alleghany City, 6-52, and the country districts, 25-52, or less than one-half of the $138,000 annual interest due on county subscriptions.

Superintendent of the N. Y. Central Road.

The Schenectady *News* referring to the rumors of Mr. VIBBARD's resignation, says: "We are happy to announce, to all who feel interested in the matter, that there is not one word of truth in any such statement, and all that has been said about his intention of resigning is the merest speculation. Mr. Vibbard will attend to his duties so long as his health will permit, which we are glad to perceive is much improved within the last two weeks."

Weverton Branch of Baltimore & Ohio R. R.

On Saturday last a railroad meeting was held at Boonsboro', Washington county, Md., which was numerously attended, and a committee of five appointed to correspond with the President of the Baltimore and Ohio railroad in reference to the proposed branch road to Weverton.

The Iron Trade of Marquette.

The aggregate amount of ore brought down by the Marquette and Bay de Noc Railroad the present season for the different iron companies is as follows:

	Net tons.
Jackson Company	62,980
Cleveland Company	47,889
Lake Superior Company	39,394
Total net tons	150,263

	Tons.
Pig iron for Pioneer Iron Company	3,000
Do. for S. R. Gay	938
Do. for do. by teams	867
Northern Iron Company	50
Total tons	5,350

This may be called a great season's business, when it is considered that there was some interruption in the spring by delay in opening the canal, and still more in the fall by reason of the withdrawal of the sail vessels, and of the repairs upon the road. The Pioneer works, too, have lost considerable time in repairs and making improvements. The aggregate avails foot up as follows:

132,000 tons iron ore, gross weight	$396,000
5,000 tons pig iron	125,000
	$521,000

This will give quite a handsome profit to the Iron Companies. Let us see:

Quarrying the ore at 50 cents a ton would amount to	$75,000
Railroad charges, $1 a ton	150,000
	$225,000
Net profit	171,000

An amount which would pay a good round interest on a pretty big pile of capital.

The product of the iron ore of the mines during the past four seasons has been as follows:

	Tons.
1857	27,000
1858	31,327
1859	80,000
1860	150,000
Total in four years	287,327

The product of pig iron during the last three years has been as follows:

	Tons.
1858	2,000
1859	6,000
1860	5,000
Total in three years	13,000

The two foundries at Marquette have turned out 3,500 tons of castings in two years.—*Marquette Journal.*

Report of the Interior Department.

During the year 3,976,619 acres of the public lands have been sold for cash, yielding $2,021,425 97; 3,879,040 acres have been absorbed by the location of bounty land warrants; 2,037,770 92 acres approved to States under the swamp grants, and 2,665,628 acres under the railroad grants. The number of military bounty land warrants, outstanding on the 30th of September last was 74,468, and they will require 8,196,589 acres of the public domain to satisfy them. The Secretary decidedly approves of the existing land system. The system of surveys is perfect, the price moderate, and the settler is secured in his improvement.

For the completion of the eighth census, the sum of $437,000, as a deficiency, will be required for the current fiscal year, and a further appropriation of $190,000 for the fiscal year ending June 30, 1862; which, with the appropriation heretofore made for this service, will make the entire cost of the present enumeration about $1,642,000. The Secretary recommends the establishment of a bureau of statistics.

The Census of Pennsylvania.

Counties.	1850.		1860.

Wyoming	10,655		12,644
Warren	13,671		19,299
Westmoreland	51,726		54,020
Totals	1,091,723		1,354,888

This list gives us, with the census of the Eastern District, the following total of population and dwellings in the State:

	Population.	Dwellings.	Deaths.
Eastern District	1,559,553	267,840	16,172
Western District	1,354,888	247,007	12,465
Total	2,913,441	514,847	28,937

The population of the Eastern District in 1850 was 1,220,053. and of the Western District 1,091,-723, making a total of 2,311,776. Deducting this from the present population of 2,913,441, we have an increase in ten years in the entire State of 601,-665, or about 26.026 per cent.

Memphis and Louisville Railroad.

The Louisville *Journal* says the grading upon the entire line of the Memphis, Clarksville and Louisville Railroad will be finished by 20th of the present month, and the track will be finished between Clarksville and the Tennessee River, which point is within twenty-six miles of Paris, the terminus of the Memphis and Ohio Road, by the 1st of January. The track is now within five miles of the river, and the work is being pushed with energy. The Clarksville *Chronicle* says that the company laying track from Paris in the direction of Clarksville have five miles down, leaving but twenty-one miles of unfinished road between Louisville and Memphis, and that is promised by the contractors before the 1st of March next.

Cleveland and Pittsburg Railroad.

"In the United States Circuit Court on the 14th inst., an order was granted, on motion of the President of the Cleveland and Pittsburg Railroad Company, giving leave to the Company to execute and issue to Henry C. Kingsley bonds to the amount of $1,300,000 to be used for constructing and extending the road from Rochester to Pittsburg, and a mortgage upon the road, its revenues and property to secure the same, and to execute and issue bonds to James F. Clark to the amount of one million two hundred thousand dollars to be used solely for the purpose of compromising, funding and paying the indebtedness of the Company, and to execute a mortgage as above to secure the same. These mortgages and bonds are to be without prejudice to the existing mortgages and liens on the company's road and property. The expenses of engraving, &c., are to be provided for by the Receiver, Mr. McCullough, out of the funds in his hand. The court also appointed Mr. C. P. Wolcott a Commissioner to examine the reports of the Receiver, and report to the court within sixty days after the filling of each return of the Receivor as to the business of the road, and his receipts and disbursements made under the order of the Court."—*Clevelahd Herald.*

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT, Sup't.

Boston, Nov. 24, 1860. tf

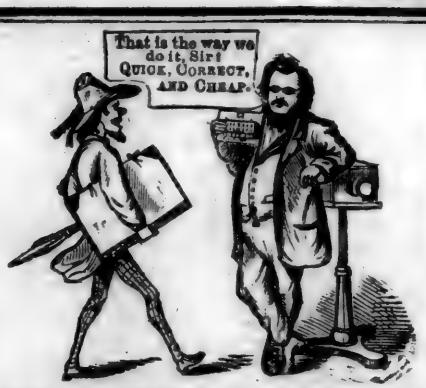
DON PEDRO II. RAILWAY.

RIO DE JANEIRO, BRAZIL, September 18th, 1860.

PROPOSALS are invited for the Graduation, Masonry, and other items of Construction of 11½ miles of this work, extending from the western end of the Great Tunnel of the Serra du Mar down the valleys of the Sacra Familia and Pirahy Rivers to the banks of the River Parahyta.

The work is generally heavy, comprising 1,200,000 cubic yards Earth, 250,000 cub. yds. Rock, and 7,500 cub. yds. of Tunnel excavation, 9,000 cub. yds. Bridge, 8,000 cub. yds. Culvert, and 5,000 cub. yds. retaining Wall Masonry, together with iron Bridge Superstructure, permanent way and stations.

At the Company's office in Rio de Janeiro, may be seen plans, profiles and specifications, where sealed proposals for the whole 11½ miles, or any portion thereof not less than 4 miles, will be received until February 28th, 1861, at which time they will be opened and the work awarded.



The Directory determine, that the technical direction of the work shall be exclusively in the hands of their own Engineers, but will entertain proposals either with a scale of prices for the various kinds of work, or for the entire construction at a fixed price. In the latter case, the monthly payments will be regulated by a scale of prices.

All payments will be made monthly in cash, a percentage being retained as security for the faithful fulfilment of the contract. This, however, may be dispensed with, in case a deposit is made in money, stocks or bonds approved of by the Directory; in the latter case, the depositor will be entitled to the accruing interest upon said security.

Parties unknown to the undersigned will be expected to present evidence of their ability from officers of works upon which they have recently been engaged.

This work is in a mountainous and perfectly healthy region, within 7 hours' ride of Rio de Janeiro. About 200 additional miles are located and remain to be placed under contract.

C. B. OTTONI, President.
ANDREW ELLISON, Jr., Eng'r in Chief.

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

E. GOMEZ,
Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.

WASHINGTON ARSENAL, December 10th, 1857.
COLONEL H. K. CRAIG, CHIEF OF ORDNANCE,
Washington, D. C.

On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.

I am, sir, most respectfully, your obd't servant,
W. H. BELL, Major of Ordnance.

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

Sheet No.			Sheet No			
1.	General Table for all Bases and all Slopes.		13.	for Base 18 ft. Slop.		1½ to 1
			14.	" 20 "	"	1½ to 1
2.	For Side Hill Cuts and Fills.		15.	" 24 "	"	¼ to 1
3.	Base 12 ft. Slopes	1½ to 1	16.	" 24 "	"	1½ to 1
4.	" 14 "	1½ to 1	17.	" 25 "	"	1½ to 1
5.	" 15 "	¼ to 1	18.	" 26 "	"	1½ to 1
6.	" 15 "	1 to 1	19.	" 28 "	"	¼ to 1
7.	" 15 "	1½ to 1	20.	" 30 "	"	1 to 1
8.	" 16 "	¼ to 1	21.	" 30 "	"	1¼ to 1
9	" 16 "	1 to 1	22.	" 30 "	"	1½ to 1
10.	" 18 "	¼ to 1	23.	" 32 "	"	1 to 1
11.	" 18 "	½ to 1	24.	" 32 "	"	1¼ to 1
12.	" 18 "	1 to 1				

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at **25c.** each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,
By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

HISTORY
OF THE
RAILROADS
AND
CANALS
OF THE
UNITED STATES
OF AMERICA
EXHIBITING THEIR
Progress, Cost, Revenues, Expenditures
AND
PRESENT CONDITION.
By HENRY V. POOR, Esq.,
Editor of the 'AMERICAN RAILROAD JOURNAL.
Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

STRATTON & CO.,
COMMISSION MERCHANTS,
No. 1 PINE STREET, N. Y.
AGENTS FOR
Bauman & Co.'s Poco Metallic Paint.

FOR WOOD PAINTING.—It retains a beautiful lustre, kills knots and will protect it under any circumstances. It covers 6,000 square feet per hundred pounds, and will neither fade, blister, or wash, and a better fire-proof than any other Paint, for it will stand a heat that will melt lead. It is proof against sea, air and storms.
Refer to JOHN LEISENRING, Sup't and Eng'r. Lehigh Coal and Navigation Co., Mauch Chunk, Pa.

FOR BRICK AND PLASTER.—It makes all the fanciful stone colors, and will cover 4,000 square feet per 100 pounds. When laid out in blocks, it is truly beautiful.
Refer to SEMPLE & BROTHER, Easton, Pa.

FOR SHIP AND BOAT PAINTING.—It hardens under water to the hardness of Iron, preventing the ravages of the wood-worm effectually. On deck it is impervious to water, expands and contracts with heat and cold, and we warrant it on the forecastle six months.
Refer to CAPTAIN MASON, Schooner 'Adolph Ugel,' Philadelphia.

FOR RAILROADS.—It preserves Bridges and Ties from dry or wet rot and freight cars from burning and leaking.
Refer to R. H. SAYER, Sup't and Eng'r, WM. KELLOG, Master of Repairs, Lehigh Valley Railroad, Bethlehem, Pa.
A. G. BRODHEAD, Sup't and Eng'r, Beaver Meadows R. R., Mauch Chunk, Pa.

FOR ROOFING.—It covers 8,000 feet per 100 pounds, and may be used in the rain, as it never runs.
Refer to M. CULLOUGH & CO., HENRY BUCKWALTER, Philadelphia.

FOR IRON.—It will stand 300 deg. Fah. and gives satisfaction to all the Iron men in Philadelphia, on gas holders, steam boilers, Iron fronts and ornamental iron. It is equal to Red Lead, for steam and hot water joints.
Refer to J. W. and J. F STARR, Camden, N J. MORRIS, TASKER & CO., MERRICK & SONS, Philadelphia.

FOR IRON FOUNDERS' PATTERNS.—Five parts by weight of it to one of gum shellac dissolved in alcohol, will make a covering more impervious to the damp sand or loam than shellac alone of equal consistency.
Refer to THE NOVELTY IRON WORKS, New York.

FOR STAINING.—Oak, Mahogany, Rosewood and Walnut Stains for Furniture, we warrant it equal to Turkish Umber. Its natural colors are Umber, Brown, Lake, Olive and Lead color, which may be combined in endless variety. We hope soon to have other colors much lighter.

ANALYSIS.

DENNIS BAUMAN & CO.,
Parryville, Carbon County, Pa.
The following are the results of Analysis of your Poco Metallic Paint:—Peroxyde of Iron 55.84, Red Oxyde of Manganese, 1.65; Lime, 2.62, Magnesia 1.29; Alumina, 9.00; Silex, 29.70;—100 parts.
The Analysis proves that this paint is not likely to be altered in the slightest degree by ordinary atmospheric agents, such as sunlight, rain, cold, or heat. We therefore regard your Poco Metallic Paint as of the most durable character

NATIONAL FERTILIZER.

The attention of Agriculturists is requested to this ECONOMICAL and SUPERIOR **FERTILIZER.** It possesses all the good qualities of the best known manures, without any of the injurious effects produced by the over-active Ammonia in Guano and kindred FERTILIZERS, while its *price* is **less than one-half of the Peruvian** Guano. The various materials composing this Fertilizer, are so chemically combined, that they are gradually evolved by the heat and moisture of the earth, and furnish to the plant all the requirements for a **rapid and luxurious vegetation.**

[COPY.]
NEW YORK, Sept. 8, 1860.
I have used about one ton of the NATIONAL FERTILIZER manufactured under Dr. L. Harper's patent, on my sugar plantation in the Island of Cuba, and although tried upon very poor soil, realized a fine crop. I used it in the same way and in the SAME QUANTITY as I use Peruvian Guano. I can confidently recommend it as in every respect equal to Peruvian Guano for sugar cane.
D. DE HEIVERA.

IRON BOILER FLUES.

LAP-WELDED BOILER FLUES,

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direct from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

ROSENDALE HYDRAULIC CEMENT.

ROSENDALE AND KINGSTON CEMENT CO. Manufactory at Kingston, N. Y. on the West Bank of the Hudson River. Office 45 Pine st., New York City.

ROOFING.

THE Cheapest and most DURABLE **ROOFING** IN USE. Sent to any part of the country with *directions for application.*

GUTTA PERCHA CEMENT ROOFING.

SPECIMENS and *references* can be seen, and any desired information obtained on application, by *letter* or in *person*, at our OFFICE, 510 BROADWAY, N. Y. (Opposite the St. Nicholas Hotel).
JOHNS & CROSLEY.

This Roofing can be applied to new and old Roofs of all kinds. It is FIRE and WATER PROOF.

Gutta Percha Cement applied to Tin and other Metal Roofs will render them perfectly and permanently water-tight.

JOHNS & CROSLEY,
Sole Manufacturers,
510 BROADWAY.

PATENT ASPHALTIC
ROOFING FELT.
THE BEST, CHEAPEST AND
MOST DURABLE ROOFING KNOWN.

THE IMPROVED PATENT ROOFING FELT furnished by the Subscribers is entirely free from the objections hitherto urged against articles that have been furnished under similar names by various parties.

It makes a **light, cheap, durable,** and perfectly **Fire** and **Water-proof Roofing** for **Churches, Farm Buildings, Railroad Depots, etc.**

It forms the best and cheapest lining for Stores, Granaries, Barns and Wooden Buildings, as rats, mice and other vermin will not touch it.

It stands all climates and has been extensively furnished to the British Government for use in their widely scattered foreign possessions. The Turkish Government used large quantities of the Felt for roofing their hospitals and stables in the late war.

In this country first class dwelling houses have been roofed for three years with this Felt, and the owners who used tin now prefer this Roofing Felt.

Also an entirely new, superior and cheap **ROOFING CEMENT** for the above Felt and leaky tin roofs.

For Samples, Circulars, etc., apply to
EDMISTON BROS.,
No. 3 Bowling Green, New York.
N. B.—Agents wanted.

CEMENT ROOFING.

PATENT MICA
AND
Fibrous Cement Roofing.

IT HAS STOOD THE BEST OF ALL TESTS—TIME!

IT fully sustains the high reputation it has gained, as a PERFECTLY RELIABLE, DURABLE and WATER PROOF ROOFING. It is adapted to every variety of Roof, new or old, and is the best and cheapest Cement in use for repairing OLD LEAKY TIN or other Roofs.

ALL WORK WARRANTED.

Cement for sale by the Barrel, and sent to any part of the Country, with printed instructions for use.

Also, for sale, State and County Rights for a portion of the United States.
DITTO, PORTER & CO.,
Successors to JOSEPH DITTO & Co.,

American Railroad Journal.

PUBLISHED BY J. H. SCHULTZ & CO. No. 9 SPRUCE ST.

New York, Saturday, December 29, 1860.

The Pacific Railroad Bill.

This bill as it passed the House on the 22d provides for one to start from some point of Nebraska, opposite to the state of Iowa, and another to start from a point in Kansas, opposite to the State of Missouri, the two converging at a point not more than 200 miles from the Missouri river, thence proceeding by a single trunk line on the nearest and best route to San Francisco or the navigable waters of the Sacramento, passing in the vicinity of Salt Lake City. The second road is also to consist of two converging lines, resting upon Fort Smith, (Arkansas,) and the Western border of Louisiana, uniting with the South Pacific Railroad, chartered by the State of Texas, and terminating at San Diego.

The bill provides for chartering the company and granting the usual powers with the right of way through the public domain, and 200 feet of land on each side of the road; also every alternate section of land for six sections in width on each side for 200 miles from each terminus, and every alternate section to *twice* that distance for the remainder of the route—other lands to be selected in case those designated shall have been pre-empted. On the completion of the railroad and telegraph for fifty consecutive miles, Messrs. Erastus Corning, Samuel R. Curtis, and Samuel M. Felton are constituted a Board of Commissioners to examine and report upon the work to the President of the United States, who is thereupon to issue patents for the lands granted, and so on as each fifty miles shall be openad. As soon as 250 miles are ready for opening, the Secretary of the Treasury is directed to issue United States bonds to the amount of $15,000 per mile for the *last* fifty miles, and thereafter at the same rate for every mile of road constructed. These bonds are to be of a denomination of not less than $1,000 each, to bear interest at the rate of five per cent. per annum, and be redeemable at the expiration of thirty years. On completion of the entire work an additional sum in bonds of $10,000 per mile for the whole line is to be given by the general Government, the whole to constitute a first and *only* mortgage on the road, its equipment and all other property.

The work is to be commenced within one year from the passage of the act, and built at the rate of not less than 100 miles per annum, the whole to be completed by the 4th of July, 1876, the hundredth anniversary of our national independence.

Assuming that with the aid sought from Government, sufficient means can be raised to build the road, and that the central, including the fork lines, will be 1,600 miles long, its cost to the nation at large would be about as follows:

Right of way.....	$107,000
3,600 sections of land for 600 miles...	2,880,000
12,000 sections of land for 1,000 miles.	9,600,000
Bonds for 1,400 miles at $15,000.....	21,000,000
Bonds for 1,600 miles at $10,000.....	16,000,000
	$49,587,000

This, it will be seen, is equal to $31,000 per mile, in round numbers, three-fourths of it being simply a loan or payment in advance for services to be performed by the company.

Lehigh Valley Railroad.

The receipts of this company in November were about $57,000, and the gross receipts for the year will be about $680,000, showing an increase over the receipts of 1859, of $150,000. The net profits of the company are estimated about thirteen per cent. and have been wholly expended in permanent improvements.

Population of Maryland.

The following table will show the census returns of the State of Maryland, together with the comparisons of the census which was taken in the year 1850. It will be observed that as far as Baltimore city and Howard county are concerned, there cannot be any comparison made, for the reasons that the returns of the seventh census made an aggregate of both Baltimore city and the county, and since that time Howard county was established by an act of the General Assembly of the State, being formed from sections of Anne Arundel and Baltimore counties.

Baltimore city .	211,824	174,853	2,218	6,718

It will be perceived that the increase of population in the State for the last ten years is 148,531. The decrease in the number of slaves is 4,986; decrease of deaths 3,224, and the increase in the number of dwellings 23,859. It is worthy of remark that the above returns are complete and compiled from the official returns, with the exception of Alleghany county, in which several small precincts in the mountain region of the county are yet to hear from. The total amount of the population in the State is 731,565, whilst that of the year 1850 was 583,034.

Industrial Resources of Boston.

We copy from the Boston *Traveler* the following summary of the number of establishments, amount of capital employed, value of articles used, and the yearly products, in each ward in that city:

Wards.	No. of Establishments.	Capital employed.	Materials used.	Products.
1....	12	$467,000	$700,000	$1,211,000
2....	53	1,802,000	2,620,000	4,669,000
3....	312	2,303,000	5,065,000	8,405,000
4....	218	2,484,000	3,474,000	7,258,000
5....	12	62,000	78,000	256,000
6....	43	120,000	341,000	509,000
7....	77	969,000	2,501,000	3,697,000
8....	69	839,000	573,000	1,979 000
9....	7	28,000	166,000	135,000
10....	62	374,000	365,000	838,000
11....	30	780,000	558,000	2,270,000
12....	42	2,617,000	3,473,000	6,710,000
Total.	937	$12,845,000	$19,852,000	$37,947,000

The following table gives the number of men and women employed, and the amount of monthly pay received:

Wards.	Men.	Pay of Men.	Women.	Pay of Women.
1.....	245	$9,020	62	$800
2.....	1,908	52,890	11	185
3.....	2,780	100,660	619	10,194
4.....	2,599	78,430	2,160	34,341
5.....	115	5,000	24	330
6.....	260	8,500	2	24
7.....	1,120	35,100	1,055	15,100
8.....	727	37,000	208	4,505
9.....	49	8,700	5	70
10.....	535	18,000	29	384
11.....	737	49,000	78	1,566
12.....	2,385	69,400	56	904
Total...	13,410	$471,700	4,309	$68,403

It will be seen by the above that the monthly pay roll for the manufacturing establishments of the city is, for men $471,700: for women $68,403. This amounts to $6,481,206 a year. The above does not include the great building interest of the city. The aggregate of products, as will be seen, is $37,947,000, but there are some omissions, which would have swelled the amount to upwards of $40,000,000. One important omission is that of the great Boston Gas Company, which employs a large number of men, and annually produces gas to a heavy amount in value.

Phœnix Iron Co.

The creditors of this company held a meeting in Philadelphia on the 20th inst. The company asked an extension of one year from Dec. 18, 1860, payable in full, with interest from maturity of new, at the rate of 9 per cent. per annum. This proposition was quite satisfactory to the creditors, who unanimously accepted it. By this arrangement, the works will be continued in full and active operation. The assets of the company are nearly a million and a half in advance of its liabilities, the figures being as follows:

Liabilities of Phœnix Iron Company	$303,008
Liabilities of David Reeves & Son	157,821
Total	$464,839
Assets, including real estate	1,922,656
Surplus after paying liabilities	$1,467,817

The suspension of the Phœnix Iron Company is attributable solely to the political troubles in the South, from which section of the country large amounts are owing. Notwithstanding these difficulties, however, the company is now executing several orders for the Southern States.

Journal of Railroad Law.

ENGLISH DECISION AS TO WHAT CONSTITUTES NEGLIGENCE: DUTY OF RAILROAD COMPANIES AS TO FENCES.

The case of Marfell *vs.* The South Wales Railway Company recently came up in the Court of Common Bench in England. The cause arose upon the question as to what, under the circumstances of the case, was the duty of the company in reference to the closing of a certain gate in a fence which they had erected along the side of their road; and whether the leaving of it open, by which the plaintiff's horse was killed, was such negligence as rendered the defendants amenable to the plaintiff in an action against them for damages.

Besides their own road the defendants were also owners of a tramway, running parallel thereto, and separated therefrom by a fence, also their property, which was continued down to a certain point, where the said tramway crossed the railway; at this point the defendants had placed swinging gates, which it was proved were always open. The plaintiff, being licensed by the defendants, to use the tramway on payment of tolls, was proceeding with two horses drawing certain trains along the tramway, when a train approaching upon the railroad, the fore horse took fright, rushed through the open gate upon the line, and was killed by the engine.

Upon this state of facts the Court held that the defendants were liable to the plaintiff for damages, on the ground of negligence. The following are the opinions of two of the Justices. It appears however, that a dissenting opinion was given by the Chief Justice.

WILLIAMS J. I think the facts show the liability of the defendants. It appears that it was part of the constitution of the tramroad of the defendants, which the plaintiff, together with the rest of the public, was invited by the defendants to use, on payment of toll, that some swing gates should be placed across it at the point where it crossed the railway, in order to seclude the tramroad from the railway, and prevent the perilous position in which horses would be placed who were drawing tram wagons on the tramroad when they approached that point, if there was an open communication between the tramroad and the railway. In order to make the gates available for this purpose, they ought to be kept shut except when the transit of tramway wagons going along the line required that they should be temporarily opened. The tramroad being thus constituted, I think every one who uses it has a right, on payment of toll to expect, and a duty thereupon arises on the part of the defendants, that, as owners of the tramroad and recipients of the toll, they shall employ ordinary care and diligence in the management of the gates, in order that they may afford that security which they are ostensibly intended to afford to those who are using the tramroad. The jury have, in effect, found that the defendants neglected that duty by negligently leaving the gates open at the time when they ought to have been shut, and that the loss of the plaintiff's horse was occasioned by that neglect of duty. It has been argued that, as the plaintiff himself admitted in his evidence that whenever he saw the gates they were open, it ought not to be inferred that he used the railroad on an implied contract that they should be kept shut. But if it was the duty of the defendants towards their customers on the tramroad to use ordinary care and diligence in keeping the gates duly shut, as part of the constituent safeguards of the tramroad held out as such to those who should use it, they are not, I apprehend, the less liable for the consequences of a breach of that duty, because to the knowledge of the plaintiff they have been guilty of previous breaches.

BYLES, J. I am of opinion that the plaintiff is entitled to keep his verdict. The railway, the parallel tramway for horses, and the fence between them, are all the property of the defendants. The fence appears to have had no other purpose than the protection of persons using the tramway. There is in the fence a gate, which is opened for the use of the defendants; the defendants or other persons claiming under them, but not the plaintiff, have a right to open it; the defendants, for reward, license the plaintiff to use the tramway being so fenced; the defendants negligently leave the gate open; the foremost of the plaintiff's team of horses, alarmed by the noise of an approaching train, is driven by fright through the open gate on to the railway and killed. Conceding that the negligence found against the defendants amounts to no cause of action, unless they were under a legal obligation to exercise some degree of care in respect of the gate, the question is this, were the defendants bound to exercise any degree of care? It is not material to inquire what degree, for, whatever the degree, the jury have found that the defendants neglected to exercise it. The facts may be illustrated by a simpler but a parallel case. Suppose the defendants to be owners of a meadow in which there is a deep chalk pit, fenced round by them to prevent cattle falling in, but with a gate in the fence to be used only by the defendants when they should desire to remove chalk from the pit; suppose the defendants for reward to take in cattle to graze in that meadow, the same question arises, are the defendants under an obligation to exercise any degree of care in the use of that gate? It is clear, on the authorities, that they are in the supposed case, bound to exercise care in the use of the gate, and are responsible if they leave the gate open. In the case now before the court, the person using the tramway is equally without control over the gate, for he cannot, without danger, leave his horses in the immediate proximity of the railway by running on before to see if the gate if open, or to shut it if it be open. He requires for his safety a continuous fence; the continuity of that fence is broken by the defendants opening the gate placed there for the use of the defendants; the gate is under their control; they provide the fastenings, and it cannot be touched by the plaintiff without a trespass, except to shut it (if possible) when, by standing open, it is a nuisance in his way. I therefore think the defendants are bound to some degree of care in the use of the gate. That being so, and the jury having found negligence, the damage which the plaintiff has sustained is the proximate and natural result. It was proved that the gate had very often, perhaps generally, been left open; but I apprehend that evidence shows no more than the habitual negligence of the defendants.

Dividends and Interest.

The Cleveland, Columbus and Cincinnati Railroad Company have declared a semi-annual dividend of 5½ per cent. payable February 1. A dividend of 4½ per cent. was paid in July last, making 10 per cent. for the year. The earnings for the year are said to more than justify this liberal division of cash profits.

The Eastern, Mass., Railroad Company have declared a dividend of 2 per cent. payable January 1. This is the first dividend, since the difficulties in which the company became involved by the defalcation of Tuckerman.

The Old Colony and Fall River Railroad Company have declared a semi-annual dividend of 3 per cent. payable January 1.

The Boston and Providence Railroad Company have declared a dividend of 4 per cent., payable January 1.

The Boston and Lowell Railroad Company have declared a semi annual dividend of 4 per cent., payable Jan. 1, to holders 15th inst.

The Providence and Worcester Railroad Company have declared a semi-annual dividend of 4 per cent., payable Jan. 1.

The Middlesex Railroad Company have declared a dividend of 6 per cent., payable Jan. 1.

The Boston and Maine Railroad Company have declared a dividend of 4 per cent., payable January 1.

The Lehigh Valley Railroad Company have declared a dividend of 4 per cent., payable in stock.

The Panama Railroad Company have declared a semi-annual dividend of 6 per cent., payable Jan. 2.

The Western Railroad bonds of Massachusetts have declared a semi-annual dividend of 4 per cent. payable Jan. 1.

The Hartford and New Haven Railroad Company have declared a quarterly dividend of 3 per cent. payable Jan. 2, to the New York stockholders at the Union Bank.

The Worcester and Nashua Railroad Company have declared a dividend of $2 50, payable Jan. 7.

The interest due Jan. 1st on the bonded debt of Virginia, will be paid in this city at the Bank of the State of New York.

The interest on the Ohio State stocks will be paid at the office of the Ohio State Agency, 25 William St., from the 1st to the 15th of January.

The interest on the third mortgage bonds of the New York and Erie Railroad Company, which became due Sept. 1st, will be paid upon presentation to the receiver, in Erie Place. This leaves no over-due interest, except on 4th and 5th mortgage bonds.

The interest on the public debt of Iowa, due Jan. 1, will be paid by Messrs. Atwood & Co.

The interest due Jan. 1 on the Minnesota $250,000 8 per cent. State loan will be paid by Messrs. Clark, Dodge & Co., 51 Wall St.

The interest due Jan. 1, on the State debt of Indiana will be paid by Messrs Winslow, Lanier & Co.

The interest on the debt of North Carolina will be paid at the Bank of the Republic.

The January interest on Green Co., Ills., bonds, and the Joliet and Chicago Railroad bonds will be paid by M. K. Jesup, & Co.

The interest on the bonds of the Central Military Tract, Chicago and Aurora, and Chicago Burlington and Quincy Railroad Companies, maturing January 1, 1861, will be paid by the Bank of Commerce in New York.

The coupons of the Jackson County, Ohio, bonds, due on the 1st of January, will be paid after that date at the Ocean Bank in this city.

Interest coupons of the Third Mortgage Bonds and bonds of 1872 of the Harlem Railroad will be paid on and after Jan. 2, 1861, at the Treasurer's office, corner Twenty-sixth street and Fourth avenue.

The interest due on the bonds of the Cleveland and Toledo Road, due 1st January, will be paid at the Corn Exchange Bank.

The Metropolitan Bank has declared a dividend of 4 per cent. payable January 7. The Bank of America 3½ per cent. payable Jan. 2. The Grocers Bank 3½ per cent. payable Jan. 2. The Peoples Bank 3 per cent. payable Jan. 2. The Bank of North America 3½ per cent. payable Jan. 7. The Mechanics Bank 4 per cent. payable Jan. 2. The Tradesman Bank 4 per cent. payable Jan. 8. The Merchants Bank 3½ per cent. payable Jan. 2. The Merchants Exchange Bank 3½ per cent. payable Jan. 2. The Bank of New York 3 per cent. payable Jan. 2. The Seventh Ward Bank 5 per cent. payable Jan. 2. The Chemical Bank a quarterly dividend of 6 per cent. payable Jan. 2. The Broadway Bank 5 per cent. payable Jan. 2. The Manufacturers and Mechanics Bank 3½ per cent. payable Jan. 2. The Atlantic Bank of Brooklyn 5 per cent. payable Jan. 2. The Bank of Brooklyn a semi-annual dividend of 5 per cent. payable Jan. 2.

The Long Island Insurance Co., has declared a dividend of 10 per cent. payable Jan. 2. The American Fire Insurance Co., an interest dividend of 3½ per cent. payable Jan. 2. The Commonwealth Insurance Co., 6 per cent. payable Jan. 2. The Goodhue Fire Insurance Co., 6 per cent. payable Jan. 2. The Neptune Fire Insurance Co., 3½ per cent. payable Jan. 2. The Mercantile Mutual Insurance Co., 3½ per cent, payable Jan. 2. The Great Western Marine Insurance Co. 3½ per cent. payable Jan. 2. The Mercantile Fire Insurance Company 6 per cent. payable on the 2d January.

Covington and Cincinnati Bridge Company.

A called meeting of this company was recently held in Cincinnati, at which the President, John W. Finnell, Esq., presented the following statement which was read and accepted:

Construction	$253,769 92
Due on stock	98,081 92
Real estate	19,685 73
Thirteen city bonds	13,000 00
Due from city of Covington	28,762 43
	$413,300 00
Receipts from all sources	$294,952 74
Disbursements	321,020 69
	$26,067 95
Resources of the company	$163,071 93
Indebtedness do.	36,280 76
Balance	$126,791 17

—mostly payable in material and service if the work progresses. A committee was appointed to consult with the directors as to the best practical plan for securing the benefits of the bridge enterprise, and to report at an adjourned meeting to be held on the 27th inst.

The Southern Railroad.

We learn from Robert C. Green, Engineer of the Southern Railroad Company, that all the iron is laid on the track between Vicksburg and Meridian, the termini of the road, except about two miles between the Chunkey and Tallahatta bridges, and that portion would have been also laid at least by the 20th of December, but for the recent heavy freshet which considerably damaged the bridge work in progress, on the eastern end of the road. Notwithstanding this unavoidable detention in track laying, Mr. Green hopes he will have the road ready to take the members of the Convention all the way from Meridian to Jackson, by the 7th of January, when that body meets. It may now be confidently asserted that in a few short weeks, the Southern Railroad, in all its length of about 140 miles, to its junction with the Mobile and Ohio Railroad, at Meridian, running due east through the counties of Warren, Hinds, Rankin, Scott, Newton, and Lauderdale, all in the State of Mississippi, will be A COMPLETED ROAD, with an ample equipment of engines and cars, required for the business of the finished road. The credit of building this highly important road is strictly due to its able and indefatigable President, our distinguished fellow-citizen Wm. C. Smedes. No man in the State, undertaking a public work of such magnitude under such disadvantages, has rendered such an amount of valuable and lasting service to the State as he has in the development of its resources, the increase of its population, wealth and social advantages, and for which he is entitled to the eternal gratitude of Mississippi.

There are fifteen cities and villages on the line of the road, viz; Vicksburg, Bovina, Edwards, Bolton, Clinton, Jackson, Brandon, Pelahatchie, Morton, Forest, Lake, Newton, Hickory, Chunkey and Meridian. The eight last named are just springing into life. The oldest of these new stations, Morton, has rapidly grown into the full proportions of a highly respectable village, driving a heavy and brisk mercantile business, shipping its thousands of bales of cotton. By its manifestations of thrift and improvement, with an enterprising population it bids fair to at least retain, if it does not advance beyond its present importance.

Forest, the next station, ten miles east of Morton, has grown with astonishing rapidity. Twelve months ago it had not a single house, now it presents a commanding appearance, and is a place of considerable business, and will ship six or seven thousand bales of cotton next crop, with the prospect at no distant day of being the county seat of Scott county, in the place of Hillsboro'. The other depots farther east, are bran new places. All of them would be good points for business, some of them destined to improve rapidly and become important interior towns, containing at no distant day from 500 to 5,000 inhabitants. Meridian, the eastern terminus of the road, and the future county seat of Lauderdale county, will at once become the most important of all the stations on the road, and will no doubt far outstrip them in rapid settlement, vigorous growth, and permanent prosperity.

We are gratified to learn that the company will be prepared to pay its semi-annual interest debt due on the first of January, notwithstanding the great financial calamity that is now oppressing the whole country. We predict for this road an extraordinary amount of prosperity. How can it be otherwise? In less than a year Alabama will join rails with it at Meridian. The remaining disjointed links necessary to make a continuous railway from Vicksburg to Savannah and Charleston, are being cared for and worked upon with a determined purpose to close those gaps in the shortest possible time, so as to bind together the cotton States on the thirty-second degree of latitude and connect the Southern Atlantic sea coast and cities, with the Mississippi river and the fertile lands lying West of it, and with Texas and California. The peculiar organization of the Southern railroad company gives it very great advantages over any

other road that we know of—its directors are its proprietors; the largest interest they have, is their railroad interest; they are not like ordinary boards of railroad directors, having but a trifling amount stock add being willing to act as the agents of the stockholders merely for the honor of the station, and the privilege of riding free. The gentlemen who are the managers of this road have invested largely of their private means; not one them owns less than one hundred thousand dollars of the stock, some a quarter of a million, and some upwards of a half million. It necessarily follows, that they all feel the deepest interest in the judicious management and well doing of the road, bestowing on it their watchful attention and deep solicitude, and the natural consequence is, that the protection and advancement of every interest of the company will be carefully looked after by the several large proprietors, thereby ensuing the maintenance of the road and machinery in the best and most effective condition; a strict accountability and judicious economy in every department, and the adoption of such a line of policy as to operate the road to the greatest advantage of both the owners and the public.

There will be a very great increase of travel North and East over the Southern railroad as soon as the Mobile and Ohio Railroad reaches Corinth, on the Memphis and Charleston road. Passengers leaving Vicksburg or any point East of it on the line of the Southern Railroad, will take the cars of the Memphis and Charleston road for the Eastern cities, also for Nashville, Louisville, &c. The Mobile and Ohio road expects to reach Corinth some time in January next. The company here will sell through tickets and check baggage through to all points by that route.—*Vicksburg Whig, Dec. 18th.*

Oswego and Syracuse Railroad.

The earnings from operations of this road for the fiscal years ending September 30, 1859 and 1860, were as follows:

	1859.	1860.
Passengers	$63,112 87	$59,581 16
Freight	40,609 49	56,639 21
Mails	3,041 40	3,041 95
Miscellaneous	2,388 84	404 12
Total	$109,152 60	$119,666 44

The expenses of 1859 and 1860 compare as follows:

	1859.	1860.
Maintaining road	$11,882 56	$14,664 75
Repairs and machinery	10,705 61	11,138 48
Operating road	25,734 99	29,114 59
Total	$48,323 19	$54,917,82
Increase in receipts in 1860		$10,513 84
Increase in expenses		6,594 63
Increase in net receipts		$3,919 21

	1859.	1860.
Capital stock	$396,340	$396,340
Funded debt	213,500	213,500
Floating debt	10,875	4,875
Total	$620,715	$614,715
Cost of road and equipment to September 30, 1860		$791,001 72
Do. to 1859		775,677 37
Increase		$15,324 35

Newport and Fall River Railroad.

At a meeting of this company recently held in Newport, the charter of incorporation was accepted and adopted with its amendments. The following are the names of officers chosen: Directors—David Buffum, Benjamin Finch, Joseph I. Bailey, William C. Cozzens, Oliver Chace, and at a subsequent meeting of the Directors, Benjamin Finch was elected President, and David G. Cook, Sec'y and Treasurer.

☞ Gen. Robert Saunders of Williamburg, Va., has been elected President of the Richmond and York River Railroad Company, vice Alex. Dudley, Esq., who declined a re election.

☞ Mr. L. R. Sargent, formerly of St. Louis, and well known as a Railroad Superintendent and Engineer, died at Bristol, Pennsylvania, on the 3d inst.

Brooklyn City Railroad.

The annexed statement is compiled from the annual report of this company for the year ending, Sept. 30, 1860:

Capital stock		$1,000,000 00
Debt, total		180,000 00
Cost of road and equipment, by last report		1,054,107 86
Cost of road and equipment by present report		1,265,225 96
Length of road built, 4½ miles.		
Number of four-wheel city cars seating 20 persons, 141.		
Number of omnibus cars, 17.		
Number of passengers carried, 10,477,984.		
Exp's of maintaining road	$8,535 72	
Exp's of operating road.	401,246 61	$405,959 33
Earnings from passeng's.	$511,470 19	
Other sources	9,284 99	520,855 18
Payments—		
Operating expenses	$409,959 33	
Dividends 8 per cent	80,000 00	
To surplus fund	31,552 98	$521,655 16
Total am't of surplus f'd, Aug. 1, 1861.		119,756 08

Philadelphia and Baltimore Central R. R.

This road was opened to Oxford on the 22d inst. Oxford is a thriving village of Delaware county, Pa., situated near the head waters of the Elk river, and about five miles from the Maryland line. A little over one-half of the road is now completed, and, the friends of the enterprise are in strong hopes of finishing the work to Baltimore within the next two years.

The Steamship John P. King.

This vessel which was destroyed by fire at our wharves a short time since, was nearly ready to make her first trip from New York to Charleston. The *Courier* published in the latter city says:

The South Carolina Railroad and Georgia Railroad Companies owned stock in this ship to the amount of $45,000, and about 72,000 were owned in this city, and the remainder by Spofford, Tileston & Co. of New York. The ship was estimated at $220,000 in cost, and there are policies sufficient to replace nearly that amount.

The committee of the Charleston Stockholders in the New York and Charleston Steamship Line have returned from New York, and report that the line will be continued, and that no obstructions are expected on account of any action of the State of South Carolina. Assurances have been given that all necessary conditions will be met.

Pensacola and Georgia Railroad.

The bridge over the Suwannee river, the only gap on this road, was finished on Friday, the 7th instant, and the train from Tallahassee passed over it that evening, thus connecting the cities of Jacksonville, on the St. Johns, and St. Marks, on the Gulf, with a continuous railway communication. The completion of this link is of considerable consequence to our city. At nearly all the stations west of Columbus on the Suwannee, large quantities of cotton were awaiting shipment, most of which would find its way to the east over this new channel, and will find shipment at Jacksonville or Fernandina, to New York, Charleston, or Savannah. The entire distance from Tallahassee to Jacksonville is 166 miles, and from St. Marks to Jacksonville 186 miles, and the time between St. Marks and Savannah will be reduced to 21 hours by the new schedule, which will go into effect in a few days.—*Savannah Republican.*

Revenues of the Island of Cuba.

According to the official report recently published, the public revenues collected by the Treasury department during the month of October last, amounted to $1,417,333 12—being for *Rentes Maratimas* $779,920 98, and for *Rentes Terrestres* $637,412 14. During October, 1859, they were $825,990 97 and $635,890 88 respectively. The decrease in the former is $46,069 98, with an increase in the latter of $1,521 25—the total decrease being $44,548 73.

Growth of Connecticut.

The following table gives a summary of the new census as complete as practicable, and will interest the public:

Counties.	1840.	1850.	GAIN.	1860.	GAIN.
Hartford	55,629	69,957	14,328	90,065	20,108
N. Haven	48,619	65,588	16,969	97,462	31,874
N. London	44,463	51,812	7,349	61,832	10,020
Fairfield	49,917	59,775	9,858	77,685	17,917
Windham	28,080	31,081	3,001	34,618	3,536
Litchfield	49,448	45,253	4,805	47,866	2,613
Middlesex	24,879	27,216	2,337	31,086	3,870
Tolland	17,980	20,091	2,111	21,224	1,133
	310,015	370,782	60,758	461,838	91,065

The gain for the last ten years is greater than for fifty years, from 1790 to 1840.

Steam Fire Engines.

We copy the following report of a committee of citizens, made to, and adopted by the City Council of Columbus, Ohio, in relation to a Steam Fire Engine, built for that city by Messrs. Silsby, Mynderse & Co., of Seneca Falls, New York, of which C. W. Copeland, Esq., Civil Engineer, No. 122 Broadway, N. Y., is agent. The committee, after a careful examination of the engine, and trials of its working, unanimously submitted the following report:

The rotary principle as here applied together with the improvement in the construction and capacity of the pump, have in the opinion of the committee, fully obviated the many long existing objections to rotary engines and pumps for this service; and the committee feel that it is due the makers of this engine to say that the material used in her construction and the workmanship meet their unqualified approbation; the machine being a masterpiece of mechanism. The power and capacity are beyond doubt, adequate to any emergency, as the number and variety of the severest trials and tests to which the engine has been subjected, have fully demonstrated.

With great simplicity and durability, it combines power to an almost incredible degree, and yet working without friction, labor or movement of carriage, is under instant and perfect control, giving spectators and operatives the fullest confidence in their security; sensitive to one of the sudden mishaps incident to the service for which the engine was constructed and is so well adapted. These are considerations deserving of special mention by the committee.

The activity, also, with which this engine can be handled, only two horses being required to move it with great rapidity to any part of the city, is to be taken into account; nor is it unreasonable to say that the usual number of men composing a hand engine company can, in good time and with great facility run it to a fire, should the horses at any time be found disabled.

The committee here express their obligations for the prompt and satisfactory responses of the manufacturers to a call of the city for a first-class steamer. The early delivery of one in charge of the senior of the firm, Mr. Silsby, whose experience and personal services during the two days trial and experiments with the engine, have been as valuable to the committee as their intercourse

with that gentleman has been agreeable. No trial, however severe, has been suggested that he has not promptly and cheerfully acquiesced in, and proposed others of importance as showing the power and adaptation of the steamer for service here where the river is likely to be for many years the dependence for water in case of fire. This engine has not only power to supply from the river, but has demonstrated a capacity for throwing from the river on to the church at Third and State streets.

The committee, with an unanimity not common, and an unusual degree of confidence, recommend the purchase of this steamer, and as the city is to be supplied with two, suggest to the Council the purchase of another of a corresponding construction, power, size and weight of the same makers.

The conditions of the agreement in the case requiring a certificate from the committee for publication, the following is annexed as part of the report:

The undersigned committee on the examination and trial of one of Messrs. Silsby, Mynderse & Co.'s Steam Fire Engines, certify that the conditions of the agreement by and between the City of Columbus, Ohio, and the said firm of Silsby, Mynderse & Co., of Seneca Falls, N. Y., for a first-class Steam Fire Engine, have, by the party of the second part, been fully complied with, and the engine now here in the service of the city is such a one as is provided for in said agreement.

JOHN MILLER,
Chief Fire Department.

JOHN S. HALL,
CHAS. AMBOS,
WM. A. GILL,
J. W. OSGOOD,
} Committee of Practical Engineers.

A statement of the various tests to which the engine was subjected accompanied the report.

The following resolution was then offered by Mr. Riley of the City Council and unanimously adopted:

WHEREAS, The Council, by resolution passed on Monday evening, Nov. 19, 1860, instructed the Standing Committee of the Fire Department to purchase, immediately, two first-class steam engines, and one hand machine equipped; and,

WHEREAS, A committee of practical engineers, citizens of Columbus, have presented a unanimous report in favor of the steamer manufactured by Messrs. Silsby, Mynderse & Co., which machine has been on exhibition and trial several days, since which time, the expression favorable to increase of steam power in lieu of hand engines, is found to be quite general. Therefore be it

Resolved, That so much of the resolution instructing the purchase of a hand engine, &c., be, and is hereby rescinded, and a first-class steamer for hard service be substituted; provided such substitution, or change, does not involve an expenditure greater than the sum contemplated by said resolution for the purchase of a hand engine; and provided further, that a contract giving terms and conditions shall first be submitted and confirmed by the Council.

New York and Erie Railroad.

The report of the Receiver of the Erie Railroad for the year ending Sept. 30 last has been made public. The total earnings for the year have been $5,180,321, expenses of all kinds, $3,352,915, net earnings $1,827,406, of which the interest on the mortgage debt, and rents of connecting roads consumed $1,508,539, leaving $310,818 78 to apply to the interest on the unsecured bonds amounting to $6,660,500. This is equal to about 4¾ per cent. The gross increase in the traffic of the road over the previous year was $698,172 38, of which $688,473 97 was in freight. The increase of net earnings was $388,425 55, The increased expenses are $303,348 of which $92,026 is for freight cars, $71,155 is for fuel, $21,128, for track repairs, &c.

The following is a statement in detail of the operations of the road for the year:

Earnings	1860.	1859.
From freight	$3,884,343 54	$3,195,869 57
From passengers	1,180,957 55	1,154,083 53
From mails	98,144 91	97,851 62
From other sources	16,875 70	34,344 60
Total earnings	$5,180,321 20	$4,482,149 32
Exp's. incl'g. taxes	3,352,915 30	3,043,168 67
Net earnings	$1,827,405 90	$1,438,980 35
Office and Station Expenses.		
Office expenses and stationery	$44,158	$39,881
Agents and clerks	199,046	142,588
Labor, loading, unloading	186,802	129,798
Cost of Running.		
Porters, Watchmen, Switchmen	41,996	45,633
Wood and water st'n attend'ce.	6,626	7,258

American Railroad Journal.

Saturday, December 29, 1860.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Share and Money Market.

The share market presents the same unsteadiness which has characterized it for some time past, dancing attendance on the public sentiment in reference to our political affairs which is hopeful to-day and despairing to-morrow. The tone throughout the week has been a gloomy one. This is caused, in part, by the great defalcation in the Department of the Interior at Washington—the abstraction of the funds belonging to the Indian Department to the amount of nearly $1,000,000. This affair, and the probability that nothing can be effected in the present Congress by way of composing our political difficulties, has given a downward turn to the market. In the meantime, the traffic of our railroads remains fair and promises to be better than the past winter. A great cause of embarrassment has been the difficulty in negotiating exchange, and the very low price of bills. This is likely to be removed, to a great degree, by importations of gold, to pay for our staples. The balance of trade is now decidedly in favor of the United States, and must continue so for some time to come. Our crops are going forward at fair prices, while importations must be merely nominal in amount. Gold must, consequently, accumulate rapidly in New York, reducing the rates for money to a very low figure. It is probable that in two months from this time money will be as abundant as it has been at any time for several years past.

The uncertainty in our political future seems to be exerting an influence over the price of railway shares and securities, altogether disproportionate to its real importance. Take for example the

roads entering this city. The sources from which they draw their traffic do not seem likely to be affected, in any considerable degree, by political events. The greater part of the trade of the Erie and Harlem Railroads is purely local, and is daily increasing in amount and value. The same is true of the Hudson River and New York Central Railroads. The earnings of all these continue to be largely in excess of similar periods for the past year. The intrinsic value of their securities is not weakened, notwithstanding the excessive fall that has taken place. A similar statement may be made of most of the Western railroads which are doing remarkably well. The crops of the past year, at fair prices, laid the foundation for an excellent business for a twelvemonth at least.

New York and Erie Railroad.

We give in another column a statement of the operations of this road for the past year ending Sept. 30th. Compared with that of 1859, the increase in gross earnings has been $698,172; net, $388,425. The net earnings come within $145,317 of paying the interest on the entire funded debt of the company.

Under ordinary condition of affairs, the result for the present year would have shown a still greater per centage of increase than the past. In almost any event a considerable increase may be looked for. The Long Dock will soon be in use. The western extensions of the road are in progress. Both the traffic and facilities for the transaction of business, consequently, are steadily improving. The disasters that have formerly overtaken it, are hardly possible in the future.

Second Avenue Railroad.

The annexed figures are from the annual report of this company for the fiscal year ending Sept. 30, 1860:

Capital stock	$800,000 00
Stock issued	650,000 00
Funded debt	350,000 00
Floating debt, last report	18,000 00
Do. present report	74,000 00

COST OF ROAD AND EQUIPMENT.

	Last Report.	Present Report.
Construction	$878,186 56	$886,620 39
Building and fixtures	27,586 90	28,168 61
Land, damages & fences	36,393 31	42,742 76
Horses	68,141 00	67,190 00
Passenger cars	47,500 00	52,915 00
Freight and other cars, etc.	3,700 00	3,900 00

Length of road about 8 miles. Number of cars, 86.

Expenses of maintaining road and real estate	$3,230 00
Expenses of repairs of machinery	12,152 13
Expenses of operating the road	192,735 53

EARNINGS.

From passengers	$259,830 12
From other sources	3,231 61
Total	$263,061 73

PAYMENTS.

Transportation	$208,117 82
Dividends, 8 per cent.	52,000 00
Interest	24,500 00

Richmond and Danville Railroad.

The County of Henry, Va. by a decided vote, have determined to subscribe $107,000 to the extension of the Danville Railroad, from Danville westwardly through that county.

Third Avenue Railroad.

The following is an abstract of the annual report of this company for the year ending Sept. 30, 1860:

Capital stock		$1,170,000
Funded debt by last report		110,600
Total amount of debt (all funded) now		245,000
Average rate of int'st on debt, 7 p. ct.		
Cost of road and equipment		1,616,671 25
Length of Road—Miles	8	
Length of double track, including sidings	8½	
Numb. of passengers. carried in cars	12,109,417	
Expenses of maintaining road and real estate		21,456 86
Expenses of operating road		357,769 08
Earnings—		
From passengers	$605,478 85	
From other sources	5,118 32	610,597 17
Payments—		
For transportation	$379,225 94	
For interest	9,444 07	
Dividends 10½ per cent	122,850 00	
New cars	22,294 26	
Harlem extension	15,294 29	
Personal taxes	10,363 10	
Real estate	3,619 87	
Loan account	5,000 00	568,091 53
Balance		42,505 64

Eighth Avenue Railroad.

The following is an abstract of the report of this company for the year ending Sept. 30th, 1860:

Capital stock		$800,000 00
Cost of road and equipment		859,048 25
Length of road laid, miles	5½	
Number of cars	90	
Number of pass'gers carried in cars	7,775,050	
Expenses of maintaining the road		41,942 69
Expenses of repairs of machinery		18,740 38
Expenses of operating the road		99,925 94
Earnings from passengers		388,750 20
Payments—		
Transportation expenses	$274,121 84	
Dividends, 12 per cent.	96,000 00	
Dividends, 3 per cent.	24,000 00	
		$394,121 84

Memphis, Clarksville and Louisville R. R.

The Louisville *Journal* says that the pressure of the times has warned the directory of the necessity of curtailing expenses, and they have, therefore, abolished for the present the office of Superintendent, and consolidated the duties of that office with that of the Chief Engineer, and placed the whole in the hands of G. B. Fleece. Mr. Illsley, the late Superintendent retires from the road.

Cumberland Valley Railroad.

The receipts of this company for the year ending September 30, 1860, were:

From passengers	$70,177 40
" freight	107,296 00
" mails	5,200 00
Total	$182,673 40
Increase over last year	13,547 00

Dividends of eight per cent. on the preferred stock, and six per cent. on the unpreferred stock of the company have been paid. The company has this year, from its profits, retired $33,896 66, which has been placed in the hands of trustees to create a sinking fund, which it is intended to increase annually, so that there will be a fund to meet any contingencies which may occur and ultimately pay off the bonds of the company. The controlling interest in the road is now owned by the Pennsylvania Central Railroad Company.

Vermont and Massachusetts Railroad.

The earnings of this road for the years ending November 30, 1859 and 1860 was as follows:

	1859.	1860.
Earnings	$246,798 15	$254,826 37
Expenses	140,481 01	136,089 96
	$106,317 14	$118,736 41
Interest	57,422 03	55,496 03
Surplus	$48,895 11	$63,240 38
Net earnings for the two years		$112,135 49

Pittsburg, Fort Wayne and Chicago R. R.

The Pittsburg *Chronicle* says that the plan for the reorganization of this road has been perfected, and copies of the agreement have been sent to the President to be signed by those bondholders who desire to become parties to the arrangement. The agreement may be signed by the bondholders in person, or they can give a power of attorney for their execution, the necessary papers for which will be forwarded them on application.

Chicago and Northwestern Railway.

The extension beyond Oshkosh is rapidly approaching Appleton, the rails being laid at the rate of three-fourths of a mile per day. It is estimated that the road will be completed by the middle of January.

Baltimore and Ohio Railroad.

We gave on the 1st instant the report of the President of this road. We have since received that of the Master of Transportation from which we make the following extracts relative to the operations and transportation for the past year. The whole report of the Master of Transportation is interesting and valuable.

TONNAGE TRANSPORTATION.

The revenue from this source, on the Main Stem alone, exhibits an increase of $296,056 84 over that of 1859—the amount now being $3,224,467 50 to $2,928,411 16 in that year. This increase is equivalent to 10 10-100 per cent.; and the tonnage revenue bears, to the whole revenue of the Main Stem, a proportion of 82 21-100 per cent.

General Tonnage and Mileage. With an improved accuracy and system in keeping the accounts of the business of the road, a much more minute and thorough statement of the details of its freight business is presented than at any time heretofore.

The grand total of tonnage hauled (exclusive of the material for the company's own use) has swollen from 897,496 tons in 1859 to 1,029,822 tons, showing an apparent increase of 132,326 tons, which is equal to 13 62-100 per cent. of the total of 1859.

The mileage returns show that a grand total of 198,457,965 tons of freight, paying a revenue to the company, was hauled one mile on the Main Stem and Branches, as against 176,111,991 tons in 1859—the increase being 22,345,984 tons one mile, or 12 68-100 per cent. On the Main Stem proper, the mileage was 184,827,145 tons. In 1859 it was 163,894,423 tons—the increase in 1860 being 20,932,722 tons carried one mile, or equal to 12 77-100 per cent. Of this increase nearly 16,000,000 were in the coal trade, and more than 4,000,000 in the increased through business—the remainder being in the mixed local traffic.

The eastward bound tonnage on the Main Stem proper (excluding that to Baltimore from the Washington Branch) amounted to 748,766 tons, as against 181,857 tons bound westward, being an increase of the former of 115,897 tons, and in the latter of 5,400 tons.

The material hauled during the year 1860 for the use of the company, for repairs of track, bridges, etc., fuel for locomotives, etc., amounted

to 124,632 tons (not including ballast, etc.), being 12 39-100 per cent. of the quantity of business paying freight. The mileage upon this was equal to 11,960,991 tons one mile, and bearing a per centage of 6 2-100 to the mileage of the paying business of the road.

Extent and Value of the Tonnage to and from Baltimore City.—By an examination of the general table of tonnage and mileage, it appears that the business of the road, to and from the city of Baltimore, during the past year, has been exceedingly large. The quantity of freight of all kinds, and from all sources, brought to Baltimore by the road during the year, is 700,085 tons, while that taken from Baltimore is 203,957 tons, making an aggregate of 904,042 tons. Deducting this aggregate from the total tonnage hauled on all parts of the road in 1860, it proves that but the relatively small portion of 125,780 tons was independent of the attraction of the city of Baltimore.

Computing the value of the coal brought to Baltimore, and enumerated in the above aggregate of tonnage, at $4 per ton (including the freight paid the company), it would show the total value of that article at Baltimore to be $1,602,156. Deducting the 400,539 tons of coal brought to Baltimore from the 904,042 tons of freight to and from Baltimore during 1860, it would leave 503,503 of miscellaneous trade. Safely assuming, by careful estimate, that the average value of this freight was $68 per ton, it would show a valuation of $34,246,000. Adding the value of the coal to this, as already stated, it would show a grand total of $35,847,156 as the valuation of the freight transported during the year 1860 by this road to and from Baltimore.

Through Merchandise Trade.—That total tonnage through, in 1858, was 224,863 tons; in 1859, 210,843 tons; and in 1860, (including 1,993 tons of river freight loaded at Moundsville is 224,531 tons). The actual increase of the through trade in 1860, over that of 1859, is 13,688 tons, of which 13,947 tons is in the eastward bound, with a decrease of 259 tons westward. The westward freight, for points beyond the termini of the road, is greater by 2,407 tons, than in 1859. The large falling off in freight to Wheeling, for local consumption (pig iron, &c.) in 1860, makes the apparent decrease westward. Computing, indeed, the business of that description only (viz: to and from points *beyond the termini* of the road), it will be found that the through traffic of 1860 was larger than that of any previous year.

Of the 56,483 tons received from the Central Ohio road, 13,049 were in live stock. In 1859, the live stock from the same source was 8,278, the increase being 4,771. The quantity of through produce received from the Central Ohio road is 43,434 tons, while in 1859 it was 42,972, being an increase of 462 tons. The gross increase of through freight from the Central Ohio road, as by the above table, is therefore 5,233 tons.

The Coal Trade.—The quantity of coal hauled in 1859, and paying freight to the company, was 343,729 tons, while in 1860 it is shown to have been 427,798 tons, or an increase of 84,054 tons—equal to 24 45-100 per cent. In 1858 the quantity was 332,797 tons, or 94,996 tons less than in 1860, although the trade of 1860 was not so large as that in 1857, before the financial revulsion of that year. In addition to the above returns for 1860, there were 4,725 tons of coal hauled from the Clarksburg mines, on the North-western Virginia road.

The revenue from the coal trade, on the Main Stem, in 1860, was $1,093,195 84, while in 1859 it was $875,952 50; the increase for the past year being $217,243 34, or 24 8-100 per cent.

Evidences of an enlarged demand for the superior semi-bituminous coals, from the Cumberland, George's Creek, and other mining regions on the Baltimore and Ohio Road, are offered in the further success with which this article has been used for the past season, as a fuel for locomotive engines. Numerous Eastern railroad companies have fairly tried and fully approved it for this object, and report it as possessing great advantages in economy, either when compared with wood or with other coal. The New York and Erie, the Hudson River, the Boston and Maine, the Eastern, the Kennebec and Portland, the Boston and Providence, the Boston and Worcester, the Philadelphia, Wilmington and Baltimore, and other Eastern roads, have thus endorsed its value. Nor has its merit as a locomotive fuel been entirely overlooked by the Western railroad companies. Intelligent officers of several of the leading lines in Ohio and Kentucky are at this time contemplating its use on their lines, for which ample facilities are at their command for its transportation through Parkersburg, or Wheeling, in good condition and at moderate rates.

The gas coal, from the Newburg, Fairmont, and Clarksburg Mines, has also received a renewed approval; and its consumption has increased during the last few months, with prospects for a permanent and much more enlarged demand.

Live Stock Trade.—The figures under this head present remarkable results. The entire tonnage of the live stock trade, for 1860, is 36,359 tons (excepting that delivered at local stations), against 26,458 tons in 1859—the increase for the past year being 9,891 tons. Of this increase 7,517 tons is in through stock trade, and the remaining 2,374 tons is from the local stations. The aggregate number of hogs brought to Baltimore in 1860 is 140,271, against 137,175 in 1859, showing an increase of 3,096 head.

The cattle business, both local and through, has been materially extended. The number of head of cattle loaded at Wheeling has been 9,873, as against 3,317 in 1859. At Parkersburg there was loaded 8,369 head, as against 5,179 in 1859. The aggregate tonnage of through cattle last year was 10,570, as against 5,222 tons in 1859—the increase being 5,348 tons or 102 41-100 per cent. In 1858 the through tonnage was 2,716.

Nor should this extraordinary accession of through trade in so important a feature be regarded as temporary or casual. It is simply the result of efforts made by this company, and its connecting lines forming the "Baltimore and Ohio route," from Southern and Central Ohio, Indiana, Illinois and Kentucky, to Baltimore, Philadelphia and New York. This trade, which has now grown very large from the demand caused by the increasing population of the Atlantic cities, has heretofore sought the more Northern lines, in view of their having been the first completed to the West. It is but now, since the proper facilities for transfer of cattle, feeding, etc., have been matured, that the shippers are turning their attention to what they must regard as the most direct, as well as the most natural and convenient route, even to their largest market, the city of New York.

The Flour Trade.—There has not been a large variation in the aggregate, under this head, for the past year. The total number of barrels brought to Baltimore has been 820,525½. In 1859, it was 784,574—the increase in 1860 being 35,951½ barrels. The quantity of through flour (from points upon or beyond the Ohio river) has been 352,418. In 1859 it was 463,067 barrels, showing a decrease of 110,654 barrels. From local sources on the Main Stem the receipts at Baltimore for 1860 are 423,894½ barrels, and from the Washington Branch 44,318 barrels, as against 287,790½ and 31,647 barrels respectively in 1859, showing an increase of 135,604 barrels in the Main Stem local trade, and 12,671 in that of the Washington Branch.

Transportation of Cotton.—There has been a considerable development in this item of the through transportation on the road during the past year. In 1859 the number of bales hauled was 6,888, while during the past year it has been 14,181 bales, showing an increase of 7,293 bales, or 105 87-100 per cent. In 1858 the number of bales brought by the road was but 3,014. All of this business, with the exception of about 2,000 bales for local consumption, was destined for the Eastern manufacturers, or for shipment to Europe.

The extend to which this great staple is moved from the Southern and South-western States would hardly be realized without an examination of the most reliable statistics. For several years past that portion of it which is shipped from Western Tennessee has shown a tendency to seek the seaboard of the Eastern and Middle States, by way of the Ohio river and the railroad lines leading eastward from it. In the statistical year of 1860, ending with the 1st September last, the total crop of the United States was 4,670,417 bales. Of this, there were shipped from the Memphis and Nashville markets 422,448 bales. Of this, 111,126 bales went by the Ohio river, and thence by the lakes, canals and railroads to the East. In 1859 the quantity was 90,074 bales; in 1858 it was but 28,800 bales.

In view of the disposition shown by the shippers to compress packages of cotton into such dimensions as will enable it to be carried more economically, and in view, also, of the tendency towards such an increase in its extent as to offer a steady source of business to the railroads—sufficient to enable them to make special provision for its carriage—it is likely to become a much larger item in the through trade of this line hereafter.—Had the company possessed the power to re-ship cotton to Europe from Baltimore, on advantageous terms, during the past year, and had it specially invited this trade for that destination, it is believed that the business would have been more than quadruple that shown in the above return.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT, Sup't.

Boston, Nov. 24, 1860. tf

DON PEDRO II. RAILWAY.

RIO DE JANEIRO, BRAZIL,
September 18th, 1860.

PROPOSALS are invited for the Graduation, Masonry, and other items of Construction of 11¼ miles of this work, extending from the western end of the Great Tunnel of the Serra du Mar down the valleys of the Sacra Familia and Pirahy Rivers to the banks of the River Parahyta.

The work is generally heavy, comprising 1,200,000 cubic yards Earth, 250,000 cub. yds. Rock, and 7,500 cub. yds. of Tunnel excavation, 9,000 cub. yds. Bridge, 8,000 cub. yds. Culvert, and 5,000 cub. yds. retaining Wall Masonry, together with Iron Bridge Superstructure, permanent way and stations.

At the Company's office in Rio de Janeiro, may be seen plans, profiles and specifications, where sealed proposals for the whole 11¼ miles, or any portion thereof not less than 4 miles, will be received until February 28th, 1861, at which time they will be opened and the work awarded.

The Directory determine, that the technical direction of the work shall be exclusively in the hands of their own Engineers, but will entertain proposals either with a scale of prices for the various kinds of work, or for the entire construction at a fixed price. In the latter case, the monthly payments will be regulated by a scale of prices.

All payments will be made monthly in cash, a percentage being retained as security for the faithful fulfilment of the contract. This, however, may be dispensed with, in case a deposit is made in money, stocks or bonds approved of by the Directory; in the latter case, the depositor will be entitled to the accruing interest upon said security.

Parties unknown to the undersigned will be expected to present evidence of their ability from officers of works upon which they have recently been engaged.

This work is in a mountainous and perfectly healthy region, within 7 hours' ride of Rio de Janeiro. About 200 additional miles are located and remain to be placed under contract.

C. B. OTTONI, President.
ANDREW ELLISON, Jr., Eng'r in Chief.

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

E. GOMEZ,
Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.

WASHINGTON ARSENAL, December 10th, 1857.
COLONEL H. K. CRAIG, CHIEF OF ORDNANCE,
Washington, D. C.

On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.

I am, sir, most respectfully, your obd't servant,
W. H. BELL, Major of Ordnance.

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

Sheet No.			Sheet No		
1. General Table for all Bases and all Slopes.			13. for Base 18 ft. Slop.		1½ to 1
			14. " 20 "		1½ to 1
2. For Side Hill Cuts and Fills.			15. " 24 "		¼ to 1
3. Base 12 ft. Slopes	1½ to 1		16. " 24 "		1½ to 1
4. " 14 "	1½ to 1		17. " 25 "		1½ to 1
5. " 15 "	¼ to 1		18. " 26 "		1½ to 1
6. " 15 "	1 to 1		19. " 28 "		¼ to 1
7. " 15 "	1½ to 1		20. " 30 "		1 to 1
8. " 16 "	¼ to 1		21. " 30 "		1¼ to 1
9 " 16 "	1 to 1		22. " 30 "		1½ to 1
10. " 18 "	¼ to 1		23. " 32 "		1 to 1
11. " 18 "	¼ to 1		24. " 32 "		1½ to 1
12. " 18 "	1 to 1				

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at 25c. each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,
By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

HISTORY
OF THE
RAILROADS
AND
CANALS
OF THE
UNITED STATES
OF AMERICA
EXHIBITING THEIR
Progress, Cost, Revenues, Expenditures
AND
PRESENT CONDITION.

By HENRY V. POOR, Esq.,
Editor of the AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

AGENTS FOR

Bauman & Co.'s Poco Metallic Paint.

FOR WOOD PAINTING.—It retains a beautiful lustre, kills knots and will protect it under any circumstances. It covers 6,000 square feet per hundred pounds, and will neither fade, blister, or wash, and a better fireproof than any other Paint, for it will stand a heat that will melt lead. It is proof against sea, air and storms.

Refer to JOHN LEISENRING, Sup't and Eng'r, Lehigh Coal and Navigation Co., Mauch Chunk, Pa.

FOR BRICK AND PLASTER.—It makes all the fanciful stone colors, and will cover 4,000 square feet per 100 pounds. When laid out in blocks, it is truly beautiful.

Refer to SEMPLE & BROTHER, Easton, Pa.

FOR SHIP AND BOAT PAINTING.—It hardens under water to the hardness of Iron, preventing the ravages of the wood-worm effectually. On deck it is impervious to water, expands and contracts with heat and cold, and we warrant it on the forecastle six months.

Refer to CAPTAIN MASON, Schooner 'Adolph Ugel.' Philadelphia.

FOR RAILROADS.—It preserves Bridges and Ties from dry or wet rot and freight cars from burning and leaking.

Refer to R. H. SAYER, Sup't and Eng'r, WM. KELLOG, Master of Repairs, Lehigh Valley Railroad, Bethlehem, Pa.
A. G. BRODHEAD, Sup't and Eng'r, Beaver Meadows R. R., Mauch Chunk, Pa.

FOR ROOFING.—It covers 8,000 feet per 100 pounds, and may be used in the rain, as it never runs.

Refer to M. CULLOUGH & CO., HENRY BUCKWALTER, Philadelphia.

FOR IRON.—It will stand 300 deg. Fah. and gives satisfaction to all the Iron men in Philadelphia, on gas holders, steam boilers, Iron fronts and ornamental iron. It is equal to Red Lead, for steam and hot water joints.

Refer to J. W. and J. F STARR, Camden, N J., MORRIS, TASKER & CO., MERRICK & SONS, Philadelphia.

FOR IRON FOUNDERS' PATTERNS.—Five parts by weight of it to one of gum shellac dissolved in alcohol, will make a covering more impervious to the damp sand or loam than shellac alone of equal consistency.

Refer to THE NOVELTY IRON WORKS, New York.

FOR STAINING.—Oak, Mahogany, Rosewood and Walnut Stains for Furniture, we warrant it equal to Turkish Umber. Its natural colors are Umber, Brown, Lake, Olive and Lead color, which may be combined in endless variety. We hope soon to have other colors much lighter

ANALYSIS.

DENNIS BAUMAN & CO.,
Parryville, Carbon County, Pa.

The following are the results of Analysis of your Poco Metallic Paint.—Peroxyde of Iron 55.84, Red Oxyde of Manganese, 1.65; Lime, 2.52, Magnesia 1.29; Alumina, 9.00; Silex, 29.70;—100 parts.

The Analysis proves that this paint is not likely to be altered in the slightest degree by ordinary atmospheric agents, such as sunlight, rain, cold, or heat. We therefore regard your Poco Metallic Paint as of the most durable character

NATIONAL FERTILIZER.

The attention of Agriculturists is requested to this ECONOMICAL and SUPERIOR **FERTILIZER.** It possesses all the good qualities of the best known manures, without any of the injurious effects produced by the over-active Ammonia in Guano and kindred FERTILIZERS, while its *price* is **less than one-half of the Peruvian Guano.** The various materials composing this Fertilizer, are so chemically combined, that they are gradually evolved by the heat and moisture of the earth, and furnish to the plant all the requirements for a **rapid and luxurious vegetation.**

[COPY.]

NEW YORK, Sept. 8, 1860.

I have used about one ton of the NATIONAL FERTILIZER manufactured under Dr. L. Harper's patent, on my sugar plantation in the Island of Cuba, and although tried upon very poor soil, realized a fine crop. I used it in the same way and in the SAME QUANTITY as I use Peruvian Guano. I can confidently recommend it as in every respect equal to Peruvian Guano for sugar cane.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete and Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

ROSENDALE HYDRAULIC CEMENT.

ROSENDALE AND KINGSTON CEMENT CO. Manufactory at Kingston, N. Y. on the West Bank of the Hudson River. Office 46 Pine st., New York City.
E. M. BRIGHAM, Sec'y.

ROOFING.

THE Cheapest and most DURABLE ROOFING IN USE. Sent to any part of the country with *directions for application.*

GUTTA PERCHA CEMENT ROOFING.

SPECIMENS and *references* can be seen, and any desired information obtained on application, by *letter* or in *person*, at our OFFICE, 510 BROADWAY, N. Y. (Opposite the St. Nicholas Hotel).
JOHNS & CROSLEY.

This Roofing can be applied to new and old Roofs of all kinds. It is FIRE and WATER PROOF.

Gutta Percha Cement applied to Tin and other Metal Roofs will render them perfectly and permanently water-tight.

JOHNS & CROSLEY,
Sole Manufacturers,
510 BROADWAY.

PATENT ASPHALTIC
ROOFING FELT.
THE BEST, CHEAPEST AND
MOST DURABLE ROOFING KNOWN.

THE IMPROVED PATENT ROOFING FELT furnished by the Subscribers is entirely free from the objections hitherto urged against articles that have been furnished under similar names by various parties.

It makes a **light, cheap, durable,** and perfectly **Fire and Water-proof Roofing** for **Churches, Farm Buildings, Railroad Depots, etc.**

It forms the best and cheapest lining for Stores, Granaries, Barns and Wooden Buildings, as rats, mice and other vermin will not touch it.

It stands all climates and has been extensively furnished to the British Government for use in their widely scattered foreign possessions. The Turkish Government used large quantities of the Felt for roofing their hospitals and stables in the late war.

In this country first class dwelling houses have been roofed for three years with this Felt, and the owners who used tin now prefer this Roofing Felt.

Also an entirely new, superior and cheap **ROOFING CEMENT** for the above Felt and leaky tin roofs.

For Samples, Circulars, etc., apply to

EDMISTON BROS.,
No. 3 Bowling Green, New York.
N. B.—Agents wanted.

CEMENT ROOFING.

PATENT MICA
AND
Fibrous Cement Roofing,

IT HAS STOOD THE BEST OF ALL TESTS—TIME!

IT fully sustains the high reputation it has gained, as a PERFECTLY RELIABLE, DURABLE and WATER PROOF ROOFING. It is adapted to every variety of Roof, new or old, and is the best and cheapest Cement in use for repairing OLD LEAKY TIN or other Roofs.

ALL WORK WARRANTED.

Cement for sale by the Barrel, and sent to any part of the Country, with printed instructions for use.

Also, for sale, State and County Rights for a portion of the United States.

DITTO, PORTER & CO.,
Successors to JOSEPH DITTO & Co.,
207 Broadway, cor. of Fulton st., N. Y

GUTTA PERCHA
ROOFING,

IN Rolls which anybody can put on; waterproof, elastic, durable, fire-proof; needs no repairs; costs about half as much as Tin, and **lasts twice as long.**

These Roofs are suitable for any style of building. They can be steep or flat, or of any required inclination. Also,

LIQUID
Gutta Percha Cement,

Preferable to paint for covering Tin Roofs, protecting them for many years from rust, and rendering them water tight.

Samples, Terms, Price, etc., furnished on application.
